THE OCCIDENT.

No. 1.—Vol. I. SAN FRANCISCO, SATURDAY, JANUARY 4, 1868. {$4 00 a Year, in Advance. $2 50 for Six Months.

THE OCCIDENT.

Rev. JAMES EELLS, D. D., Editor.
Rev. E. B. WALSWORTH, Associate Editor.

Published every Saturday at the Office, 609 Montgomery street. Terms: *$4 00 a year, in gold coin, payable in advance; $2 50 for six months; $5 00 for fifteen months. Remittances to be made at the expense of subscribers. Direct all communications, whether relating to the editorial or business departments, to "The Occident, Care of Bancroft & Co., San Francisco, Cal."*

Published by BANCROFT & COMPANY,
609 Montgomery st., San Francisco.

The articles which appear in leaded type, in the various Departments of The Occident, *and those alone, are original.*

CURRENT TOPICS.

The Convention of Presbyterians in Philadelphia seems to have been much more important in its probable influence than was supposed when we received only the outline of its discussions. The basis of union proposed, and the general spirit of the Convention, have been so extensively made known that we need not specially allude to them, except to express our great satisfaction that such a meeting could be held. It is only within a very few years that it would have been possible. Now, all branches of the Church rejoice in it. The delegates were not all in favor of the action taken, but they stood nearer together than ever before, and though all Presbyterians may not be speedily united, this Convention will hasten the union of the O. S. and N. S. bodies. We wait for the time, with eager expectation and confident hope.

The General Synod of what was lately the "Reformed Protestant Dutch Church," in its session at Albany, by a vote of 112 to 7, resolved to change the name of that venerable church. The discussion has been long and spirited that preceded this action, and some of the leading ministers and laymen anticipate only evil from the loss of the "Dutch" in their title. There is no occasion for such fear, and we congratulate our brethren who have long felt the incubus of their name, and known it hindered the progress they coveted for their denomination, that they have now laid aside that weight. They might have chosen a better title, possibly, than "The Reformed Church," but with it on their houses of worship, none will turn from the doors, saying they do not understand the language of the service. May God abundantly bless this grand old Church, as she now girds herself for her new career of advance! She has admirable machinery, and plenty of wealth, and warm hearts, and influences and piety, for the motive power.

In the days of Hildebrand and Leo X, the thunders of the Vatican were wont to startle all Europe, and shake alike the thrones of princes, and the homes of the people. They are heard no more. Even Austria no longer trembles before the Pope. The Emperor recently received from the Romish Bishops of the Empire an address protesting against any change in the Concordat between Austria and Rome. He replied with a reproof, and the assertion that the Emperor of Austria is a constitutional Prince, as well as a true son of the Church.

And 1200 Roman Catholic teachers met, a few weeks ago, in Vienna, to confer respecting the schools, which all testified were inferior to those of Protestant Prussia. They declared the reason to be in the priestly control of their course of instruction, and this sentiment was warmly applauded by the citizens, who crowded in large numbers to show their sympathy with any movement to free their Empire from the rule of the priesthood. Verily, there is progress, and such facts are prophetic.

The Mission work of the American Board does not satisfy the earnest men who support it. With a just view of our times, and thankful that inviting fields are open everywhere, they propose to expend more than half a million of dollars this year. To China alone they have resolved to send sixty new missionaries. It is a most promising sign for the world, when Christians not only pray for "wide and effectual doors" to be opened before the church, but are ready to enter them, when their prayers are answered.

The effort of the Methodists to raise a million of dollars during the last year for general missionary purposes, proves the value of a high aim. They were not successful in reaching the full sum, the last account we saw giving something more than $800,000, as the probable maximum, but they would have fallen a little short, if they are like most men, had the mark been only half a million. The result is noble, and has been attained, partly because of the excellent machinery furnished in the Methodist system for the execution of such a scheme, and partly because of the united vigor and enthusiasm for which that denomination is noted. We are wont to expect too little in our plans for promoting the Lord's Kingdom. We are afraid to aim high. Let other Christians be taught by the success of such an example.

We find in our exchange papers the statement that a Jewish Rabbi and a Catholic Priest were recently on board the steamer Montana, when a sailor fell and broke his leg, and that they vied with each other in efforts to aid the suffering man, even going arm in arm among the passengers and soliciting contributions for his benefit. The passengers were struck with surprise by the fact, but the journals reporting the circumstance, do not appear to think it a cause of special wonder. Well, theoretically they are right, no doubt. But when the history of the persecutions of the Jews for so many centuries by the Catholic Church in Europe is considered, as well as the fact that the same illiberal spirit still exists in several European countries, and is seen in their laws and witnessed in their customs, the surprise of the passengers does not seem so very strange. If we mistake not, in Rome itself and in many other cities of Europe, the Jews are obliged to live in special quarters, and are otherwise restricted in their business, their worship, their teaching and their personal freedom. The Catholic clergy often uphold these governmental abuses, and sympathise with the popular prejudices against them. Now the fact that here on the Pacific coast a Priest should be found sufficiently superior to such prejudices to unite cordially with a Jewish Rabbi in a work of practical benevolence, we consider a matter for rejoicing, and altogether praiseworthy.

Those of us who are invited to remain outside may find some comfort in our position, and some food for reflection, in the present relations of the High and the Low portions of the Episcopal Church. In one view the exhibition is sad, when pulpits and papers are occupied to so large an extent in the condemnation and defence of what most of us regard as very trivial affairs. But in another view it has importance and interest we are not likely to make too prominent. Whether Rev. S. H. Tyng, jr., shall be allowed by his Bishop to treat other clergymen and churches properly, may be a matter of small moment to those clergymen and churches. But whether the principle involved in the case shall prevail in the Episcopal church is of vast moment, both to the prosperity and usefulness of that church, and to the cause of Christian communion and coöperation in serving our common Head. We watch the progress of events, therefore, with mingled curiosity and concern.

In days when the Sabbath needs really vigorous defence among Americans, it is cheering to learn that abroad it is gaining power, where it has been dishonored. After years of effort to create a public opinion in support of its better observance in Prussia, the friends of the Sabbath have obtained from the Government an order that after nine o'clock of that day, there must be no work to disturb the public, shops must be closed, and no concerts, or other assemblies shall be permitted during the hours of public worship. Continental Europe may yet give us a wholesome example.

Our Legislature has chosen Eugene Casserly to represent California in the United States Senate, in the place of Senator Conness, whose term expires on the third of March, 1869. Mr. Casserly has the reputation of being a good lawyer, as well as a man of fair ability and honorable character—as worthy a man, probably, as any ordinary Legislature would select to fill so elevated a position. For, without wishing to enter into any criticism of their choice in this instance, we are of opinion that as a general thing it is not only rare, but almost impossible for State Senators and Assemblymen to unite in choosing a man who is above the general average of fair capacity and worth. We do not believe that it is a necessary vice of republican institutions to elect only men of moderate talent and character to public offices; but it is undoubtedly a prevailing error in the practice of our people—an error, unfortunately, to which only very unusual events, or extraordinary contingencies

bid defiance. Yet the highest welfare of our Nation and of each State lies in a contrary practice. The ablest and the most upright men should always have the preference among a Christian people.

Religious Intelligence.

PACIFIC COAST.

Convention at Marysville.

A very interesting Sunday School Convention was held in Marysville on the 5th and 6th of December, of which accounts have been published in other papers, but which should be noticed by all who feel interest in this department of Christian labor. The Convention was important, because of the discussions that were conducted, and the spirit that prevailed in it, but chiefly because it was the first of a series that may be held in the State with a similar object. A number of resolutions have been sent us for publication, of which we give the substance, regretting that the space allotted in our first paper to matter of this kind prevents us from giving them in form. In these the delegates affirm that the real object of Sunday Schools should be the *conversion* of children, and express the conviction that those who have been engaged in them have not appreciated this object as they should. They also express doubt whether they will have a just sense of the magnitude of their office till they are ready to carry on the work in the spirit of self sacrifice, and with earnest prayer. They do not condemn concerts and picnics, when properly conducted, and favor Teachers' Institutes and Normal Classes, yet believe that success must depend, most of all, on the Spirit of God, in aid of those who see the children to be perishing, and strive for their salvation. They declare that the Sunday School should only supplement, never take the place of parental and pastoral instruction, and in the most solemn manner urge upon parents and pastors their peculiar responsibility that can never be transfered, while it is their duty to give all encouragement in their power to those who teach in the School. The resolutions close with the expression of their pleasure in having attended the Convention, and their purpose to give more earnest heed to this great work, especially commending to the churches at large, Mr. Peters, the Missionary of the American Sunday School Union, to whose presence and counsels they were greatly indebted.

Removal of Calvary Church.—The fifty-vara lot on the northwest corner of Powell and Geary streets, has been bought by Calvary church for $35,000. Next spring it is expected to erect a new church on the above site, at a cost of from fifty to sixty thousand dollars. Until the completion of the proposed edifice, the present place of worship will be retained.

Methodists in California.—The Advocate publishes a list of the members of the Methodist churches in this State, from which we take the following items: In the year 1851, the members reported at the Mission Conference numbered 722. In 1853, there were 1,496; in '56, 2,650; in '59, 3,994; in 1860, 4198; in '63, 4,598; in '66, 4,696; and in '67, 5,862.

Episcopal Mission Seminary.—Rev. Dr. Breck, in company with four associate clergymen who will act as Professors, is trying to establish in our State a Theological Seminary, like one that he had charge of in Minnesota. His school there numbered two hundred pupils, and was successful enough to support both itself and the theological seminary in connection with it. The plan is to buy the lands and buildings of C. J. Flatt, at Benicia, (now offered at $14,000) and maintain a good school for boys, and a theological school to train young men to become ministers and missionaries of the church in California and on the Pacific Coast. A part of the money has been pledged, and it is hoped the balance will soon be secured.

Alphabetical List of Clergymen

BELONGING TO THE OLD AND NEW SCHOOLS OF THE PRESBYTERIAN CHURCH ON THE PACIFIC COAST.

Rev. Jas M. Alexander, N. S., San Leandro, Cal.
Rev. H. R. Avery, O. S., Walnut Creek, Cal.
Rev. B. B. Bonham, O. S., Sebastopol, Cal.
Rev. I. H. Brayton, N. S., Principal College School, Oakland
Rev. W. W. Brier, N. S., Alvarado, Cal.
Rev. F. Buel, O. S., agent California Bible Society, 757, Market st., San Francisco.
Rev. P. S. Caffrey, O. S., Portland, Oregon.
Rev. W. H. Cain, O. S., not settled, San Francisco.
Rev. Charles Russell Clarke, O. S., Principal City Female Seminary, cor. Mason and O'Farrell sts., S. F.
Rev. A. J. Compton, O. S., Arcata, Oregon.
Rev. Eli Corwin, N. S., Honolulu, H. I.
Rev. H. H. Dobbins, O. S., Jackson, Oregon.
Rev. John Edwards, O. S., Visalia, Cal.
Rev. James Eells, D. D., O. S., pastor First Church, Stockton st., residence 127 Kearny st., San Francisco.
Rev. Ben. E. S. Ely, O. S., Healdsburg, Cal.
Rev. J. G. Fackler, O. S., Pastor Central Church, Mission st., residence 121 Fifth st., San Francisco.
Rev. A. Fairbairn, O. S., Bloomfield, Cal.
Rev. Fred'k Fox, N. S., Red Bluff, Cal.
Rev. Thomas Frazer, O. S., Santa Rosa, Cal.
Rev. Ed. R. Geary, O. S., Albany, Oregon.
Rev. M. M. Gibson, U. P., residence, 608 Pine st., S. F.
Rev. L. Hamilton, N. S., Oakland, Cal.
Rev. J. R. Hammond, O. S., Solano, Cal.
Rev. Joseph A. Hanna, O. S., Ashland, Oregon.
Rev. J. S. Harmon, N. S., Oakland, Cal.
Rev. Oliver Hemstreet, O. S., Bloomfield, Cal.
Rev. N. B. Klink, O. S., Vallejo, Cal.
Rev. A. W. Loomis, O. S., Missionary among the Chinese, chapel and residence, cor. Sacramento and Stockton sts., San Francisco.
Rev. B. I. Lowe, O. S., 10 Martin's Block, San Francisco.
Rev. W. F. B. Lynch, N. S., Alvarado, Cal.
Rev. Wm. W. Macomber, N. S., Marysville, Cal.
Rev. David McClure, N. S., Principal Oakland Academy, Oakland, Cal.
Rev. Robert McCullough, O. S., Yreka, Cal.
Rev. J. S. McDonald, O. S., Sacramento, Cal.
Rev. James McLaughlin, N. S.
Rev. I. H. McMonagle, O. S., pastor Larkin st. Church, residence, 1312 Jackson st., San Francisco,
Rev. W. J. Monteith, O. S., Corvallis, Oregon.
Rev. F. L. Nash, N. S., Alameda, Cal.
Rev. J. B. Pinney, N. S., Austin, Nev.
Rev. George Pierson, N. S., Brooklyn, Cal.
Rev. John S. Reasoner, O. S., Brownsville, Oregon.
Rev. Robert Robe, O. S., Brownsville, Oregon.
Rev. John Sessions, D. D., N. S., Oakland, Cal.
Rev. Anthony Simpson, O. S., Olympia, W. T.
Rev. J. A. Skinner, O. S., Stockton, Cal.
Rev. T. E. Taylor, N. S., Virginia, Nev.
Rev. Lewis Thompson, O. S., Astoria, Oregon.
Rev. P. V. Veeder, O. S., Principal City College, cor. Geary and Stockton sts., San Francisco.
Rev. Charles Wadsworth, D. D., O. S., Pastor Calvary Church, Bush st., residence 920 Pine st., S. F.
Rev. C. C. Wallace, N. S., Placerville, Cal.
Rev. E. B. Walsworth, N. S., President Pacific Female College, Oakland, Cal.
Rev. L. P. Webber, N. S., Santa Clara, Cal.
Rev. S. T. Wells, O. S., agent Presb. Board of Publication, Depot at Bancroft's Bookstore, 609 Montgomery st.
Rev. Samuel P. Whiting, N. S. Mendocino, Cal.
Rev. A. F. White, N. S., Carson, Nev.
Rev. Ed. P. Willard, N. S., Columbia, Cal.
Rev. S. H. Willey, N. S., Oakland, Cal.
Rev. M. A. Williams, O. S., Jacksonville, Oregon.
Rev. S. Woodbridge D. D., O. S., Benicia, Cal.
Rev. James S. Wylie, N. S., San Jose, Cal.
Rev. Richard Wylie, O. S., Napa, Cal.

Church Donation.—Five gentlemen, attendants of the Presbyterian church in Oakland, having purchased a lot on Fourteenth street, and offered it and one thousand dollars in cash, to forward the building of a new church edifice, providing the congregation would raise a sufficiency of money to defray a debt of $4,000, which has been due by the church for some time, the amount was raised on Sunday last by Messrs. Bigelow, W. H. Miller, J. H. Brayton, G. W. Armes and E. C. Sessions, and the church is out of debt.

The San Francisco Baptist Association comprises 32 churches, with an aggregate membership of 1,782. The number baptized during the past year has been 255. Twenty of the churches are supplied with pastoral labor. The last annual meeting, the eighteenth, was held in Stockton. The next is to be at San José.

Daily noon prayer meetings are held in the rooms of the Young Men's Christian Association at San José. Their rooms are on one of the principal avenues, and are easy of access. The library and reading room would be creditable to a much larger and older organization.—*Advocate.*

The Congregational Church at Redwood City has become self-sustaining, and is increasing in strength and numbers.

EASTERN.

Fraternization.—At the meeting of the representatives of the different branches of the Presbyterian church, held in Philadelphia last November, for the purpose of preparing the way for a general union of these now separate organizations, there was present a delegation from the Episcopal church also. Bishops Lee and McIlvaine and other clergymen and laymen came into the Convention, and were most cordially received. At the close of the speeches made on the part of the Episcopalians by Bishop McIlvaine, and on the part of the Presbyterians by Rev. Dr. Hodge, the feeling of sympathy and union was so great, that the whole assembly was in tears.

Religious Destitution.—The following items from Eastern papers show the extent of this destitution in certain localities:

The population of New York city is about 1,000,000. It has 275 Protestant churches, with sittings for 200,000, and a total membership of 94,000. It has 350 churches, chapels and missions of all kind, with accommodations for 300,000; leaving about 700,000 persons in the city, on the Sabbath, who could not attend religious services in the sanctuary if they desired; and yet those churches show many vacant seats. In New York city, in a recent canvass of twenty-two wards, containing 4,726 families, 1,925 families were found professedly attending evangelical churches; 2,112 attending unevangelical churches, while 589 families, by their own confession, attended no church whatever.

The population of Cleveland, Ohio, is 69,278. The number of sittings in all the churches—Protestant, Romanist and Jewish—is 27,200; leaving 42,078 in the city, on the Sabbath, for whom there is no room in the house of God; and yet those churches are seldom fully occupied. There are in that city 19,000 persons over five years of age, who are never found in any place of public worship, and 1,231 families, no member of which attends any church.

In Chicago, 150,000 persons are without the influence of the gospel, as preached from the pulpit; 40,000 of these spend the Sabbaths in saloons and German gardens.

Waupacca Co., Wisconsin, with a population of 12,000, has but 4,000 church-goers; leaving 8,000, or two-thirds of the population, unreached by the gospel.

St. Louis, Mo., has a population of 204,327. Of these, 171,743 are over five years of age. The sittings in the evangelical churches number 33,339; leaving 148,404 persons who could not be accommodated in the evangelical churches; and yet those

churches show many vacant seats. The number present, by actual count, in all those churches, on a pleasant Sabbath in October, 1864, was, morning service, 12,052; second service, 8,376; leaving, morning service, 11,287 vacant seats; second service, 14,963.

St. Joseph, Mo., has a population of 19,000. It has ten Protestant churches, with a total membership of 1,600, and church sittings for 3,000; leaving 16,000 persons who could not be accommodated in the Protestant churches.

The population of Boston, Mass., is 192,000. It has one hundred places of worship, averaging six hundred sittings, providing accommodations for 60,000, and leaving 132,000 for whom there is no place in the house of God.

Trenton, with a population of 28,000 has 833 Protestant families who never go to the house of God.

OPEN COMMUNION BAPTISTS.—A letter from Rev. B. W. Nash, of Hookerton, North Carolina, reports that there is in the eastern part of that State a number of Baptist churches which practice open communion. A letter from a reliable person in the vicinity of Richmond, Va., states that there is a considerable Baptist element in that State which favors communion with all evangelical churches.

LUTHERAN.—The young Synod of New York met in Conference at St. Paul's, Red Hook, Dutchess county, October 18th, when eleven congregations presented letters of dismission from the New York Ministerium, and were received. The Synod of East Pennsylvania has resolved to raise $100,000 for benevolent purposes this year, within its own bounds.

CONGREGATIONAL.—The progress of Congregationalism in the West is marked by the statement that in Illinois it numbers 222 churches, 216 ministers, and 15,297 members. In Wisconsin 158 churche , 152 ministers, and 9,868 members.

EPISCOPAL MINISTRY.—The *Western Episcopalian* says: "There is a diminution in candidates for the ministry of nearly one-third in eleven years, notwithstanding all the increase of members and wealth in the Church."

LITURGY IN A NEW QUARTER.—It is said that the Unitarian Association are about to publish a liturgy for the use of the society under their care. Dr. Palfrey, of Belfast, Maine, has been selected to edit the new book of service.

THE Georgia Mission Conference, at Atlanta, had 16 white and 14 colored ministers present. It reports 61 local preachers, and 6,886 members; 691 adult baptisms, and 275 children during the year.

JEWISH COLLEGE.—The Jews have resolved to establish a college in Philadelphia. It is not, however, to be confined to their own people, but will be open to Christians of all shades of views.

AT the late annual meeting of the American Board, in Chicago, it was resolved to undertake the work of evangelizing China with a fresh force of sixty missionaries.

OF Congregational Churches in the United States there are 2,780; ministers, 2,019; members, 267,453. Including Canada, there are 2,900 chnrches, 3,009 ministers, 272,974 members. Gain last year, 60 churches, 3,913 members, 28 ministers. Of the churches, 1,518, or over one-half, are in New England.

A thorough specimen of German industry and research is the recent *Geography of Palestine*, edited by one Dr, Tobeller. It enumerates and extracts from 1,500 works on the Holy Land, the authors of which lived from the third to the nineteenth century. In this century he enumerates 384 distinct works on Palestine.

EPISCOPAL STATISTICS.—Dioceses, 34; Bishops, 44; priests, 2,416; parishes, 2,305; communicants, 161,234; Sunday-school scholars, 151,819.

Rev. John Cumming, the English preacher of the Second Advent of Christ, is busy upon *The Signs of the Last Times.*

FOREIGN.

SUNDAY SCHOOL PROGRESS IN GERMANY.—The following is a summary of four years' experience in establishing Sunday schools in Germany: "Fifty-one Sunday schools have been established in Germany and Switzerland, with a few more than seven hundred teachers, and almost eight thousand pupils. They are found in nearly all the great cities of Protestant Germany and Switzerland: Berlin, Halle, Breslau, Stettin, Dantzig, Elberfeld, Cologne, Wiesbaden, Frankfort-on-the-Main, Darmstadt, Mannheim, Stuttgart, Zurich, Berne, Schauffhausen, Bale, etc. The men who began the movement still have their shoulders to the wheel, and are more and more convinced that the Sabbath school movement is, under God, to be the Salvation of Germany. The little paper edited by the revered Procknow, the *Sunday School*, has a circulation of over twenty-five hundred copies, and those excellent men, Mr. Neuhaus and Mr. Brockhelman, lend their best energies to the enterprise. It is impossible to estimate the greatness of this field.

THE EVANGELICAL ALLIANCE.—Of the meetings of this Alliance, the Rev. E. de Pressense, D. D. writes as follows: "The meetings at Amsterdam were worthy of evangelical Protestantism. A spirit of large-hearted benevolence prevailed in them all, and the whole assembly faithfully observed the beautiful inscription on the walls of the rooms where the sessions were held: *In necessariis, unitas; in dubiis libertas; in omnibus, caritas.* [In necessary things, unity; in doubtful things, liberty; in all things, charity.] To the false catholicity which aims at uniformity was opposed the true Christian catholicity which proclaims, *Ubi Christus, ibi ecclesia.* [Where Christ is, there is the church.] Nothing could be more beautiful than the Holy Supper celebrated at Amsterdam in four languages, and in which Christians belonging to every fraction of evangelical Protestantism participated."

JEWISH INTEREST IN THE CHURCH OF ROME.—The Rothschilds, in 1865, loaned the Pope ten million dollars, taking security on the property in the Church. The next year five millions more were advanced, and a second security taken at a higher rate of interest. This year the vacuum in the Pontifical treasury is six millions, and it must be filled in the same way. Thus the Jew is rapidly getting the available property of the church under his control. No one believes the Pope will ever remove the encumbrance.

OPEN COMMUNION BAPTISTS IN ENGLAND.—The *N. Y. Evangel*, of Nov. 14th, has the following: from the correspondence of Rev. Dr. Stock, of England, in the Boston *Era*, it would appear that the present tendencies of the English Baptists are to open communion. The London Baptist Association is putting up a chapel in that metropolis every year. But it is pretty certain they will continue to be occupied with open communion churches.

CHURCH GOING AMONG THE GERMANS.—Of Hamburg's 200,000 inhabitants, no more than 5,000 go to church on Sundays; of Stetten's 60,000, 2,000 attend; of Berlin's 630,000, 20,000 attend. The sermons are hortatory and emotional.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.
☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.
The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.
For Terms and further particulars, address

REV. P. V. VEEDER.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.
The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.
Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.
In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical train ing.
For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.
Further particulars may be obtained by addressing the Principal, at Oakland.

City Female Seminary,

Corner of Mason and O'Farrell Streets,

REV. CHAS. RUSSELL CLARKE, A.M., PRINCIPAL.

The FOURTEENTH SESSION (of five months) of this School, for Girls and Young Ladies, will open on Thursday, Jan. 2, 1868. Pupils are taken in Primary Branches, and carried up to graduation.

San Mateo Institute.

BOARDING SCHOOL FOR YOUNG LADIES.

The Eighth Session of this Institution will commence on Thursday, January 9, 1868.
For Catalogues, containing full information, address

MISS BUCKMASTER, Principal,
San Mateo, California.

GEORGE E. ROGERS,
Successor to G. W. Bell,

Assayer,

No. 512 CALIFORNIA STREET,
One door west of Montgomery, SAN FRANCISCO.

The Occident.

San Francisco, Saturday, January 4, 1867.

INTRODUCTORY.

As we send out a new paper, to take its place among those which already have circulation in the Pacific States, few reasons need be given why it appears. That it is offered to a people, a large proportion of whom read and think, while they are eminently practical and earnest; and that they have anticipated its coming with many assurances of welcome, are sufficient reasons for its publication, were there no others.

We believe there has never been a field open to cultivation through the press, of which it was as true as it is of this upon which we enter, that every good seed and all wise culture are certain to produce a speedy and splendid harvest. Society is in the process of crystallization. The Church is becoming compact, vigorous, and prepared for aggressive effort. Families are growing up to be interested, as none have been hitherto, in this coast as their home, and to be trained for the pecular obligations of such a trust. Individuals are to be instructed, influenced, aided, urged, in the midst of evils, and errors, and temptations, known in such formidable strength in no other country, till they can appreciate and strive for the character and attainments which the opening future must demand. No apology need be given for an attempt to assist those already in the field to render society, the church, the family, and individuals, worthy of our position and our times. It will be reward enough for the attempt, if we shall be able to lay some stones in the foundation of the grand structure that may be reared of the materials Providence is gathering here from every portion of the globe.

Still less is it necessary to give reasons why a paper, specially representing the Presbyterian Church in its various branches, now imposes its claims on those interested in the prosperity of this Church. The fact that though large and growing, it has no organ and representative on this side of the continent, becomes itself the most decisive demand for such a medium, through which to make its influence felt upon all public interests, and at the same time promote its own vigor and success. We enter on our career, hoping that we shall not take in the least from the power for good of any agency now existing, and that we shall be able to prove that dignified and earnest support of those sentiments and aims which have ever distinguished Presbyterians, may be in complete harmony with a truly catholic spirit and Christian courtesy towards all who may not agree with us. Our object is to make The Occident specially welcome in the *family;* and in conducting it, particular attention will be given to those departments which will associate it from the beginning, with the *homes* of our people. The form has been chosen, with this in mind, being convenient both for use and preservation, and the general appearance of the paper will be made as attractive as possible.

Announcing no pledges, save that we will endeavor to carry out the design thus indicated, and having no doubt of the good will and support of all who are in sympathy with these designs, while we are true to them, we take our station and begin our work.

Rev. Albert Williams, after a year's absence in the Eastern States has returned to this city.

THE LIVING AGE.

It is popular to use very brilliant colors, when attempts are made to exhibit the era through which we are passing.

Fancy and fact have their place in each picture, and religion, philosophy, business, and romance, give these their proportions, and light and shade, as either may have the public eye for the time. There may be proof of folly in the really gorgeous displays which are sometimes presented. There may be occasion for ridicule in some, and for fear in others, of the views to which enthusiasts call our attention. Yet there is certainly food for serious thought in the very brilliancy of hues which is universal, if there is enough of positive fact to form the substance of all the pictures that are so highly wrought.

The conviction that with all its incidental excesses, we are living in an age superior to those which have passed, becomes a stimulus and elevating power. And the belief that our age must furnish grand contributions to those which are to come, has in it a prophecy of what the future will really receive at our hands. These high colors have their value, and the variety of representations which abound, may be studied with profit. There is assumption apparent, and pride, and sometimes pretension, none of which can be approved. But there is also a readiness to take great burdens, and an ability to carry them. A conviction of what the world needs, and a purpose to supply this; a feeling that energy, and progress, and life must be cosmopolitan, and not restricted, in their bearing, which are full of promise and hope.

Every one is conscious of great expectations, and observes the same prominent in others. Whatever may have most of our thoughts, we anticipate for it a speedy and marvelous advance. Science stands just within the threshhold of the splendid temple, whose walls she expects to garnish with her trophies. Philosophy points to what it has accomplished, as only the earnest of what it will soon exhibit of its power to elevate the race. Philanthropy predicts the rapid approach of that time. when humanity shall be free from the curses under which it heaves, and will not rest. Religion is putting on her beautiful garments, and moving in the majesty of a thousand godlike enterprises, toward the glorious consummation of the millennial day. Yet these expectations will not be fulfilled to an inactive, plodding people; nor to those who seat themselves on some Pisgah-height, to look for the Canaan they hope will be theirs. There are great demands upon us. The unseen helpers live only in fable, who bring from the earth the palaces their favorites have only to order. The bequests we have received from the past impose their demands, for we have these only to be enjoyed in trust. In our turn we must use, and increase, and bequeath. The splendid possibilities of the present are even more imperative in their demands, and no man has a right to look upon the majestic procession of events now passing, unless he is willing to assume the obligations they proclaim. And our on-coming successors, who have had no equals, and the thunder of whose tread is already in our ears, so rapidly do they press upon us, and so speedily will they be here, call out to us to be careful how we prepare for them. "Cast up, cast up the highway; gather out the stones," and leave nothing to hinder their march toward the glory of the last times!

These demands make great conflicts necessary. Error in every form is entrenching itself as formidably as possible, and will not yield to truth without such struggles as have no precedent. Vice, with its legion, will go back before virtue, only as it is forced. This is no time for the form of good, without its power. Reverence for the past is of small account. The declarations of the fathers have little value, unless men see they are worthy to be reäffirmed by themselves. And no systems, or sentiments, or men will stand, unless they show themselves able, before the tribunal of analysis and thought, to prove their worth. Truth ought not to regret that such necessity is pressed upon her, but should rejoice in it; and all lovers of right, and righteousness should equip themselves so perfectly, that there shall be no occasion to fear the result. But this is no age for dogmatism, or bigotry, or arrogance, or those who expect to make room for what will abide, without the actual demonstration that it is profitable to man, or will glorify God.

Nor is this age to be marked only by great expectations, and demands, and conflicts. There are, and there will be, great achievements and triumphs, that make it the more worthy of the position it holds. These are not confined to any departments, or lands. There has been general advance through a multitude of agencies, and he who will compare the existing condition of the world with what was true fifty years ago, will confess that *the race* has been elevated.

Science, labor, enterprise, war, liberty, religion, have all had their part in the processes by which the result has been reached; and it may be they will all have a part in the struggles yet to be, before our generation shall have passed away. Yet, by the strange ordering of God, and under His constant control, these all become elements in the progress of civilization, and the extension of His kingdom. It is a sublime privilege to live in an age when it may be so plainly discerned in which direction God is moving, and those who ally themselves with Him, and are true to duty, shall be certain of triumph and reward. Of these, the beginning shall be immediate; the whole shall be made known in the yet unwritten history of what is to be.

Help to make your own Paper.—The design may be all that you wish, and the paper we issue may come to you laden with all we can supply in the execution of this design, yet you may not have what you really want. The reason will be that no one can furnish all you want. You will not find it in editorials alone, nor in correspondence, nor in general contributions, nor in general news. There must be a disposition on the part of subscribers themselves to aid in supplying the material. Clergymen, especially, and others who occupy prominent places, may do much for the interest of The Occident to themselves, if they will take pains to send us—not *letters*, but *items*, of religious and ecclesiastical information, in their own vicinity. In this way, we shall have fresh material for this important department of the paper, without which none of you will be satisfied.

Sermons for The Occident.—We have been asked to print sermons often, if not regularly, in our paper, and could we have the right kind of sermons for publication, we should be glad to give them space. There are many themes, however, and many methods of treating them, which are proper and profitable in the pulpit of a particular church, which it would not be wise to print. It is our present purpose to furnish one sermon each month, beginning in February—short, pithy, practical, and adapted to the wants of the people. We shall endeavor to make this feature *attractive*, and never *afflictive* to any.

MODERN DEMONOLOGY.

The continual recurrence of a certain class of delusions, age after age, in constantly varying forms, though maintaining a substantial identity, and the pertinacious vitality which they display, starting up, transfigured but not destroyed, after they have long been considered dead, and are almost forgotten, seem to indicate some chronic disorder of the intellect of mankind at large, analogous to that which affects its moral nature. The form of modern demonology known as spiritualism or spiritism, is one of these old acquaintances, with a new face, though one greatly changed for the worse, just as the witches' Sabbath of the sixteenth century was a reproduction of the old festival of Bacchus Sabbazius. The Neo-Platonists did not produce raps on tables, nor did they perform conjurers' tricks in the dark, like the Davenport Brothers, or that "powerful medium," Mr. W. T. Church, whose imposture was a few months since so thoroughly exposed at Louisville, Kentucky; but they believed in guardian spirits that moved invisibly among mortals, observing and influencing their actions. They did not sit in circles with joined hands in order to invoke the presence of these spirits, but believed that by the agency of music, of elevated studies, of prayer, and of a pure life, they could be attracted. They also believed that by the same means, a state of exstatic intuition, similar to that claimed by the spiritist mediums, could be attained. In this, the first and purest form of Neo-Platonism, we find none of the repugnant features of modern spiritism. The beings invoked were benignant, and the methods of invocation, instead of being trivial or impure, were elevating and refining in their influence. Music, prayer, the study of ethics and dialectics, and the endeavor to lead a pure life, though they might fail to summon spirits from the vasty deep, or to produce a state of "inspiration," would inevitably tend to make the seeker better and wiser. But, by a natural process, this simple and comparatively rational belief and practice gradually degenerated, until it assumed many of the features of a system of magic. Neo-Platonism, however, could not boast the impressive "phenomena" of spiritism. Its genii and demons tipped no tables, returned no absurd answers to idle questions, nor did they knock furniture about, play the banjo in darkened rooms, or drench sleeping children with ditch-water. Its "mediums" indulged in much mystical talk, but this was not generally without a certain poetic beauty; and it often conveyed valuable truth; even the twaddle of their "revelators" was not quite such wretched stuff as the twaddle of the spiritist sages. Whether Plotinus considered himself as writing with any intuitional and abnormal insight, we do not know, but he frequently, like Andrew Jackson Davis, assumes the tone of a prophet who sees by a light not possessed by others, and who has attained his knowledge by other than ordinary process. A comparison of these two writers furnishes a singular illustration of the intrinsic value of the "revelations" for which the world is indebted to spiritism; for notwithstanding that the Neo-Platonists have been dead for more than a thousand years, while the Poughkeepsie Seer is the intellectual heir of all that has since been thought and written, (to say nothing of the inspirational insight which he claims) the works of the former contain far more that is suggestive and interesting to a speculative mind than those of the latter.

Another difference between Neo-Platonism and Spiritism is, that while the doctrines of the former admit of being stated in a tolerably distinct form, and have been so stated, the latter is not a homogeneous belief, and can not in fact, be properly termed a system of belief at all. It has no unity, coherency, or self-agreement. Taken in the concrete, it is a loose aggregate of a thousand forms of mental, moral, and physical disease; a refuge for minds afflicted with various forms of hypochondria; a psychological epidemic that absorbs many forms of mental alienation; a thaumaturgy in the exercise of which mountebanks may enrich themselves; a religion of license for the licentious, of false consolation for weak and credulous souls in affliction, and of illusory beauty for maudlin sentimentalists; and a "philosophy" for dabblers and sciolists.

At the period of its earliest development in the United States, spiritism seemed to be nothing more than a revival of the long-exploded belief in ghosts. Table tippings, mysterious rappings, and communications through "mediums" were its principal features, and they were witnessed with the same kind of interest and curiosity that drew audiences to the exhibitions of clairvoyants and biologists. But within the last few years it has made pretensions to the dignity of a religious belief, and steps have been taken to organize its adherents in the United States into what may be called a Spiritist Church. At a general convention in which all the States of the Union in which any considerable number of believers existed were represented, resolutions were passed, recommending the formation of societies similar to the church organizations of the various denominations of Christians, in every community throughout the Union, where such a step was practicable. The new societies, it was declared, would take the place of the effete sectarian organizations, and being inspired with a genuine, instead of a merely conventional belief, would evince the enthusiasm and living energy of the primitive Christians. The invitation to unite with the new Church was general. No subscription to any article of belief, and no terms of communion were required. But this recommendation of the Convention was never very extensively acted upon, and the sanguine expectations of the would-be founders of a new religion have not been realized. Nor is the reason difficult to discover. Spiritism, so far as its teachings are concerned, is not a system, but an incongruous aggregate. It offers us neither a single new article of belief, nor a single new precept of morality, nor does it furnish any additional moral sanction, or dynamic, or motive power to stimulate men in the effort to bring up their lives to the standard of the law they recognize, to conform their actions to their ideal. It has no element that can make men capable of self-denial and renunciation; on the contrary, it relaxes the moral fiber, and lowers man to the level of the brute creation by making instinct and inclination the law of his action. Of distinct, authoritative teaching, it has not enough to constitute a belief. Its chief hierophants differ without end among themselves, each having a creed or a "philosophy" of his own, which he generally promulgates in a mystical, and uncouth jargon, peculiar to the sect. Judge Edmunds, Andrew Jackson Davis, and others of the more influential illuminati, speak most reverently of the Savior, while the majority of the peripatetic lecturers cannot mention his name without the most appalling blasphemy.

At their last national convention, recently held at Cleveland, Ohio, the most violent dissensions broke out. A report was brought in by a committee, repudiating the rope-tying, and dark cabinet tricks, and declaring that they were the work of impostors. It was received with stormy manifestations of disapproval by the more credulous majority, who were loath to part with such apostles of the faith, as the Davenports, Church, Foster, and their brother charlatans, One delegate withdrew from the Convention with words of warning and prophecies of evil, because his attempts to maintain the doctrine of the atonement elicited tokens of dissent and ridicule. In short, the entire session was one protracted wrangle, which at times threatened to degenerate into a brawl; and on no single point of importance that was mooted, was there anything approaching to harmony of feeling or opinion. The like want of agreement is to be found in the responses obtained from "the spirit land." The same question, propounded at half a dozen different *séances*, is answered in as many different ways. If one inquires as to the condition of the departed in the other world, or in regard to any controverted point of theology, or philosophy, no two replies agree. With the spirits, as with the spiritists, all is confusion and contradiction.

Yet this irrational and demoralizing delusion has gained a large discipleship in the United States, where it is claimed that its adherents are counted by millions. The eagerness with which the "new revelation" has been received by a certain class of minds, is a significant symptom of a natural reaction against the hard and earthly materialism that refuses to believe in anything that has not the evidence of the senses to vouch for it, or that does not admit of demonstrative proof. Such a reaction, though at first running to extremes, cannot find its legitimate resting place in a system like that of modern spiritism.

Certain other causes and influences, which have co-operated with the reaction against atheism and materialism, to favor the spread of the table-tipping faith, will be treated of in a future article.

University College School of Mines,

CORNER GEARY AND STOCKTON STREETS.

ON THE 6th DAY OF JANUARY, 1868,

A COURSE OF LECTURES ON

CHEMISTRY, METALLURGY, MINING, AND GEOLOGY,

Will be commenced, and to continue for four months from date. The special objects of these Lectures will be to afford those practically engaged in metallurgical and mining pursuits, full and complete information on all points bearing on the useful minerals of this coast, together with practice in the Chemical and Metallurgical Laboratories.

Price for the full Course of Lectures and Practice in the Laboratory, $120.

Terms for Lectures alone, $10 for each subject.

For particulars, apply to

THOMAS PRICE,
University College, San Francisco.

EDWARD DILLON,

Chronometer and Watchmaker,

Merchants' Exchange Building,
Battery Street, opposite Custom House and Post Office,

SAN FRANCISCO.

CHRONOMETERS INSURED AGAINT LOSS BY FIRE.

Chronometers Rated by Transit Observations
All Repairs and Adjustments done with Accuracy and Dispatch.
Watches of all constructions Repaired.
Charts and Nautical books for sale.
Mathematical and Nantical Instruments Repaired.

LEAFLESS TREES.

BY MRS. JAMES NEALL.

Leafless and stripped! yet are they whole,—
They mind me of a Christian soul,
Whose daily strife is almost o'er,
Waiting for entrance at the Door.
Delightful verdure underlies
What seems so poor to mortal eyes;
And what they are, or what have been,
Is naught; if so the sap within
Each root has grounded strong and firm,
'Gainst Autumn's blast—or Winter's storm.

How well defined their out-lines lie,
Against the back ground of the sky!
And here again a type we see,
Of what a Christian's course should be,
Distinct and clear,—that all may trace
His shadow and abiding place.
Oh! leafless trees—unto my heart,
How sweet the lessons ye impart.

The fragrance of your early spring,
Your summer days of blossoming,
The flushing of your autumn dyes,
Ne'er brought you qulte so near the skies,
As now, when desolate ye seem,
Against the Heaven itself to lean.
Oh! all our crowns we cast aside,
All ornaments of human pride,
And passing underneath the rod,
Stand naked in the sight of God.
Not blasted—only stripped and bare,
That we may know how weak we are.

Oh! leafless trees! your strength renew!
For all the sunshine covers you;
Naught now your symmetry can mar,
Ye stand before us as ye are;
Your branches lifted as in prayer,
As tho' ye felt your need of care;
And from His treasury, old and new,
With garments God will cover you;
For when the keenest storm winds blow,
Your branches shall be wrapped in snow,
While even the descending rain,
Shall beat upon you not in vain.—
For what more beautiful can be,
Than wintry frost-work on the tree?
When cold and rain their work have done,
All glorious beneath the sun,
Transparent in the risen light,
Ye *shine*—e'er in the Father's sight.

Melt snow, into the hardened bole,
As melts God's word into the soul,—
Yet e'en the quickening germs of life,
May sometimes need the pruning knife,
For "by its fruits" alone we see
The value of the grafted tree.
And by their fruits alone we know,
God's children in this world below.
May seeking souls the lesson take
And give up all for Christ's dear sake.
He asks the blossoms of our spring,
First tithe of every offering—
Our summer day, in all its prime,
The glory of our autumn time,—
For we must stand beneath His eye,
Like leafless trees against the sky—
Disrobed of self, and shorn of pride,
Our sins laid on the Crucified.

Oh! Holy Spirit! if it be,
The symbol of the leafless tree,
May show us more and more of Thee—
Grant us that when the storm winds blow,
As Thou dost cover it with snow,
So to Thy shelter we may go.
Grant us to feel Thy gracious word,
So little known, so often heard,
May penetrate with power anew,
And quicken us, Thy will to do,
That when o'er past the winter snows,
So we may "blossom as the rose."
And as the Tree renewed, may bring
To Thee our fruits of offering.

Rev. Dr. Scott, is pastor of the 42d St. Church, N. Y. City, laboring with his usual health and vigor.

Life an Occasion for Thanks.

Gratitude is an original and most delightful principle of our constitution, and its expression is a privilege that has its foundation in the very nature of things; for as we can by no equivalent recompense God for His mercies, it seems positively unnatural not to cherish a lively sense of His goodness, and to give utterance to the feeling on appropriate occasions.

Unthankfulness is a vice, that, like its opposite virtue, has its foundation in a principle of our nature. The word *grumble* expresses a constitutional human function. It is indeed no more than the expression of our dissatisfaction with things present, whose grand design is to urge us toward the higher and better things that are far away and beyond us. A virtuous principle in itself, but easily degenerating into a vicious. The babe grumbles at its unrocked cradle, the school-boy at his satchel, the farmer at the weather, the doctor, if the night-bell does ring and the day-bell does not, the merchant at the market, the lawyer at retaining fees, the preacher at his salary, and the whole congregation at the pastor and his preaching.

Even the bodily exercises of crying or groaning positively mitigate and allay the anguish which occasions them. Physicians will tell you they reduce excited pulses and soothe nervous irritabilities. They are the escape-valves of sorrow. Indeed, he that has nothing to complain of cannot be happy; for by the same law he has nothing to hope for.

The word *happiness*—derived from the root *to hap*—expresses our delight in what happens to us, or comes to us from without. While the word *joy*—from a root which means *to leap*, or *spring*—denotes a delight in the soul not produced by outward things but by the quality and harmony of its own inbred emotions. In a word, *happiness* enters *from without*—joy issues *from within;* happiness is a thing of *circumstances*—joy is a thing of *character*. In this sense the ground-form of thankfulness is not happiness, but joy, an abiding grace, not an occasional emotion. Unthankfulness is not merely a sorrowful mood occasioned by conditions, but a sinful disposition constituting character, a fearful moral distemper, an insanity of the will, a neuralgia of the affections, a paralysis of the moral man.

An immortal spirit within the limits of time and the conditions of probation, must necessarily be restless. The bird of paradise has never been known to sing, if caged like a linnet, but zoophites are proverbially an uncomplaining kind, and periwinkles and shell-fish float with the tide in a very sea of comfort; and well-fed oxen, and geese, and swine are, in their own sphere, as contented as angels. But their pleasure is not the supreme earthly good. Mortal life is not terminal, but transitional, and mere *comfort*, in comparison with *character*, is only as the sty of a beast to the boundless firmament of an angel! Man's world is not a play-ground, but a pupilage; his life not a May-game, but an earnest ministry, a battle in heavy armor. But the true heart exults in its destiny, and thanks God more for the crown of thorns than the May-Queen's garland.

God works slowly, and in circles of immense sweep. His buildings are not Aladdin's palaces, nor his oaks Jonah's gourds. His mercies come to us often in the germ; sometimes the kernel has a rough shell, which will not break save with frost. And we must perceive the oak in the acorn, and the completed temple in the slowly wrought portals and pillars.

Life! what a gift it is in contrast with non-existence. Life, even the lowliest, a flower's life, a bird's! How the lily and the lark praise God for their being, till the air seems odorous and musical with their thanksgiving. Yet the winged bird is a poor soulless wanderer, and the brightest flower dies with the summer. How, then, with *your life*—an *immortal life*, bearing God's image!—can you be thankless? A life so conditioned for development, cradled in a star-hung world, and watched and warded by angels, and preparing and advancing to a destiny for whose glory thought has no image and language no name! Men, immortal men, sons of God, Princes of an endless empire, borne in this chariot of creation to the palace and the throne!—you who might have been a fading flower, a dead stone, a nothing—how can you be thankless? You, whose afflictions at their most, in contrast with your mercies, are no more than a single plume gone from the wing of a soaring eagle—a stain of dust on the iron wheel of the golden car of a triumphing conqueror! What mean you, thanklessly to count your losses, and trials, and sorrows? Awake to better thoughts and higher moods! Lift your eye from the low paths you are treading, to the divine love that watches you, the shining angels that wait on you, the eternal city that opens its glorious gates to welcome you!—*Sermon of Dr. Wadsworth, Nov.* 24, 1867.

The Week of Prayer.

It is not true that prayer is related to those objects for which it is offered, as cause is related to effect, yet it is both encouraging and instructive to observe how often those things are accomplished, respecting which Christians have been united in supplication.

There is no longer opportunity to question that unusual and marked religious interest has been apparent in colleges and institutions of learning, soon after the day set apart each year for special prayer on their behalf. Peculiar proofs of divine favor have often followed the observance of particular days on which these blessings were sought in concert. And individual Christians have been so impressed with the power of such union in prayer, that for the personal objects they desired of God, they would ask some friend to join with them in private petition.

No doubt, moved by this oft-repeated experience, the Evangelical Alliance of London several years ago, first sent out an invitation to all Christians to observe the first week in the new year, by a succession of exercises and prayer bearing upon the conversion of the world. The Alliance proposed a programme, which was generally adopted; and each year since, a similar order of topics has been suggested, greatly to the profit, it is believed, of those who have accepted their invitation. The result to the world has not been left to conjecture. The American Board gives facts, gathered from missionary fields last year, which demonstrate the worth of what we hope may become a confirmed custom of the Church, closing the record with the statement that "the impulse for good which the Christian work received, on mission ground, from the observance of this "Week of Prayer," can hardly be over-estimated." Other organizations furnish like testimony, and reasons abound why the request of those who are more directly connected with the means used to evangelize the world, should be heeded by the Church. This article will come before our readers too late to have much influence, so far as the observance of the week on this coast is concerned, yet we most heartily second the proposition of a writer in the last number of *The Pacific*, that all evangelical

denominations unite, on these successive days, beginning with the first Sabbath, in public and social meetings of prayer and conference respecting the salvation of men. Such meetings would be profitable to all who might attend them, and would have a valuable influence upon our churches, while only He who hears and answers prayer can tell how widespread would be the blessing thus invoked upon the world.

Church Trial.—Rev. S. H. Tyng, Jr., of the Episcopal Church, and rector of a parish in New York, has been charged with a violation of the rules of the church, and is to have a formal trial. The offense consists: first, in preaching in a Methodist church without leave from the Bishop, contrary to the canons; and second, in doing so within the parish of another Episcopal clergyman, without his permission. The vestry of his own parish have resolved to sustain him in his course, and pay all expenses of the coming trial. This trial derives its interest from the fact, that the low-church party uphold Mr. Tyng, and the high-church party sustain Mr. Stubbs, the clergyman who makes the charge. It is a sort of test question, whether the views of the one or the other party are to prevail in practice.

PERSONAL.

Rev. A. J. Compton, M. D., lately in Arcata, Humboldt Bay, goes to Watsonville, and the Church he left are negotiating with a young man of the senior class in Princeton Seminary, to succeed him. As a sentiment of their love and esteem for him, the members of the Sabbath School, presented him with a very beautiful gold headed cane, valued at $30 00.

Rev. Dr. Anderson, who removed to the Eastern States in the winter of 1863–4, after visiting Europe for the recovery of impaired health, is located as pastor of the Presbyterian Church of New Albany, Indiana.

Rev. A. E. Kittridge is pastor of the Eleventh Street Presbyterian Church, New York City, and laboring with marked success.

Rev. Mr. Earle, who labored here as an Evangelist, sends a letter of greeting which is published in the *Pacific*, from which we extract the following paragraph: "I take this method of expressing my thanks to the ministers and members of eleven denominations of Christians, with whom I have labored so pleasantly. I also thank all the citizens, among whom I passed, for a warm welcome and a liberal support in every place. In every home and church I was received, not as a stranger, but as a welcome guest. And when I passed out through your Golden Gate, and could no longer look upon your beautiful green hills, and fruitful valleys, and thought that I might never again look upon your smiling faces, or feel the warm grasp of your hands, tears would flow. And I have offered the earnest prayer, 'Lord, send me to labor, at least one season more, on the Pacific coast!' I hope I may return another year."

The San Francisco *Times* says the Rev. Dr. Phelps, formerly of Sacramento, will be recommended for Principal of the State Normal School, by Superintendent Fitzgerald. The Governor, State Superintendent and three Trustees (elected by the Legislature) have the appointing power.

Rev. T. L. Eliot, son of the Rev. Dr. Eliot, of St. Louis, has accepted a call to be pastor of the Unitarian Church in Portland, Oregon.—*Pacific.*

Rev. J. S. Bush, the new rector of Grace Cathedral, has arrived in San Francisco. He is said to be an eloquent divine.

A minister of the Greek Church has come lately to this city with a view to gathering a society of that faith.

Dr. Livingston Alive.—It will carry gladness to many hearts to know that Dr. Livingstone, the African explorer, was not murdered in the wilds of Africa some months ago, as was circumstantially reported. Positive information has been received in London that he was well in April last, and continuing his explorations several hundred miles from the African Coast.

Gen. Geary and wife have recently joined the Presbyterian Church (N. S.), at Harrisburg. This step in connection with his course on temperance is gratifying to the friends of religion and good morals.

Rev. William Woodward, a member of the M. E. Church, stationed on the Berryessa circuit, in Napa county, was suddenly stricken with paralysis, lately, and died almost immediately.

Rev. Dr. Cheney is supplying a church at East Boston, and still suffers from asthma.

The Appointee.—Col. J. B. Crockett, the newly appointed Supreme Judge, formerly practised law in St. Louis. He came to California in 1850, and established himself in San Francisco, where he has since resided, enjoying a large and lucrative practice. He is not what is termed a "brilliant man," but possesses a large share of common-sense united with untiring industry and unblemished integrity. He was Governor Haight's first law partner in this State, and, probably, owes his appointment to the merited esteem and good will of his former associate and friend. He is over 50 years of age.

MINING NEWS.

M. Belinsky, a member of the Statistical Society of Archangel, lately returned to that city after exploring the banks of the Oukhta and the Petchora. Near the former river he discovered great quantities of naptha, and other mineral oil, which is found close to the surface of the earth and collected by the peasants in rough vessels made of the bark of trees. Pursuing his researches, the enterprising traveler discovered enormous forests, chiefly of larch, fir and pine trees. He also found near the river Tsilma rich specimens of copper ore, some of which he took with him."

Illinois bids fair to be a great rival of Pennsylvania in supplying the country with coal. Nearly the whole State is underlaid with inexhaustible beds of bituminous coal, scarcely surpassed anywhere in quality and thickness; and as a source of wealth it is rapidly becoming a leading interest. Eastern capitalists have already organized some of the very largest companies for working the mines, from which it is anticipated the entire West and Northwest will be shortly supplied with the black diamond.

The mineral production of the Pacific States and Territories for the present year sums up as follows:

California	$25,000,000
Nevada	19,000,000
Montana	12,000,000
Idaho	6,000,000
Colorado	5,000,000
Oregon	2,000,000
Miscellaneous	5,000,000
Total	$74,000,000

Between the year 1848, when gold was first discovered in California, and the first of July, 1866, the product of the gold and silver mines of the United States was about $1,000,000,000, nearly all of which has gone into the world's general stock.

The ground at Virginia City and Gold Hill, State of Nevada, is settling in consequence of the masses of silver ore taken out beneath. Buildings have fallen and others are in danger, occupants fear.

During eleven months, California has received, from all sources, 223,959 tons of coal; of which, 94,400 tons have been dug from the mines near Mount Diablo.

GRAFTON T. BROWN & CO.

Lithographers,

548 CLAY STREET.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

RECENT PUBLICATIONS.

REMARKABLE CHARACTERS AND PLACES OF THE HOLY LAND. By Charles W. Elliot. Hartford: J. B. Burr & Co. San Francisco: Bancroft & Co., General Agents for the Pacific Coast.

The object of this attractive volume is to present the men and the localities mentioned in the Bible, as though they were found in any other book. The object is a good one, and has been attained to a degree that commends it to those who wish to think of what they read. There is a feeling rather than a sentiment in many persons, that the characters in Scripture were hardly like the men we know, and that its geography was in some sense different from what we study; and this feeling does not permit the advantages which, as ordinary men, we might derive from the biographies and history of the Sacred Word. Hence the need of such proof as is given in this work, that these are real human beings, not demi-gods, who have a place in the Bible, and that they had their homes, as do we, on the earth. The book is worthy of careful reading.

CONFUCIUS AND THE CHINESE CLASSICS, OR READINGS IN CHINESE LITERATURE. Edited and compiled by Rev. A. W. Loomis. San Francisco: A. Roman & Co.

Mr. Loomis has advantage in giving the public this evidence of his own acquaintance with the literature from which he culls, since we have nothing with which we may compare it, that we may judge of its merit. The quotations from the great philosopher of the Chinese exhibit much that is puerile, and even foolish; but much, also, that is surprising and provoking thought, not only because of the sentiments they contain, but because they make known the substance of the religion, if so it may be called, of about one quarter of our race. The Chapters on the History of the Empire, ancient and modern, and the Life of Confucius, and the very suggestive and valuable "Remarks" on the influence of their accepted doctrines on the Chinese character and life, are able and satisfactory proof that the author did not spend his time for years among these strange people in vain. Our more direct and intimate relations with China give special interest to this work, for the residents on the Pacific coast, and the beautiful form in which it is given us by the Publishers, renders it all the more acceptable to those for whom it is particularly designed.

THE BIBLE HISTORY OF THE HOLY LAND. By John Kitto D.D., F.R.S. London edition sold by Bancroft & Co.

Those who are familiar with Kitto's previous works in illustration of Scripture, will not need assurance that this is a valuable addition to what he had before published. His is a household name in Christian families, and this volume will be welcomed to a place among those most prized and most read, by both parents and children, because giving new attractions to the word of God.

THE HERMITAGE AND OTHER POEMS. By Edward Rowland Sill. Published by Bancroft & Co., San Francisco.

It is a fact to be noted, that as this side of the continent becomes more stable and varied in its population, we are furnished from among ourselves with those who undertake to meet the wants of an intelligent people. Not less is this true of those who make books, than of contributors, in other respects, to our pleasure and profit, and we welcome the author of this little volume to a merited place in public favor. Severe criticism might find some opportunity for exercise in a portion of the pieces, and when the poet shall have more experience, and write other books, none will criticise more severely than himself. Still, the collection deserves much praise, and we specially commend in it the abundant use of the really beautiful Saxon language. Rarely do poets use it so well, and it is always pleasing to see that it can be flexible and smooth without the loss of its force. We shall soon convince our Eastern friends that neither in writing nor printing are we to be inferior to them.

MAP OF THE PACIFIC STATES. Compiled by Wm. Henry Knight. Published by H. H. Bancroft & Co., San Francisco.

This is a much needed and thoroughly prepared representation of the geography of the new States and Territories, which have rapidly fixed upon them the attention of the world. It really leaves nothing to be added that could make the work more complete, and there is no alternative but to possess it, if one would be acquainted with the country in which he has his home. Yet it is "a thing of beauty" as well as of use, and has hardly been surpassed in the finish and accuracy of its execution. No doubt it will be sought, not only by many of those who live in the region it exhibits, but of others also, who will be amazed at the exhibition of what this region is, and what it must become.

HYMNS OF FAITH AND HOPE. By Horatius Bonar, DD. New York: Robert Carter & Brothers. San Francisco: Bancroft & Co., and C. Beach.

A sweet and beautiful collection, worthy of its title and the reputation of its author.

Putnam's Magazine.—All lovers of good reading will be glad to know that "Putnam's Monthly," under the above title, is to be revived. While it was published perhaps there was no Monthly more ably and pleasantly conducted, and the list given us of those who are to contribute to its columns, leaves no doubt that it will fully maintain its former position. Messrs. Bancroft & Co. are to have the exclusive control of the Magazine on this coast, and the first number will be issued at the beginning of the year.

The January number of the Pacific Medical and Surgical Journal comes laden with a rich freight of contents. Dr. Kunkler continues his speculative article on the *Nervous System;* the junior editor describes the *Endoscope*, a novelty in practice; the new medical books are reviewed and criticised; and the editorial summary is abundant, spicy and suggestive. The Journal is ably edited by Dr. Henry Gibbons and son, and published by Bancroft & Co., who have introduced some typographical improvements in the present number.

LITERARY ITEMS.

The most successful and popular German novelist of the present day (Miss Muhlbach not excepted) is Fritz Reuter, who writes his books only in the Mecklenburg *patois*. His novel *In the Year* 1813 has been translated into nine languages. Reuter did not write anything until he was 40 years old. Up to that time he had hardly been able to make a living by giving private lessons.

Thomas Carlyle says of the literature of fiction: "In 50 years, I should guess, all really serious souls will have quitted that mad province left to the roaring populaces; and for any *noble*-man or useful person it will be a credit rather to declare, 'I never tried literature; believe me.'"

Edwards, Bates and Vinson, of the Metropolitan Theater, San Francisco, notified Charles Dickens, in Boston, on the 12th of Dec., that they would give him $20,000 in gold for thirty readings in California, and he telegraphed back declining the offer with thanks.

A new volume from the pen of Prof. Robertson, entitled *Lectures on the Life, Writings, and Times of Edmund Burke*, will appear about Christmas.

Earl Derby will soon publish a revised and popular edition of his translation of Homer, with additions from the Greek.

The entire correspondence relating to the attempted foundation of the Mexican Empire and its fall, is announced to be published by Duncker and Hambolt, at Leipzig, who also announce three volumes of the Emperor Maximilian's memoirs and essays.

Theodore Parker left in manuscript a thousand sermons and lectures which have never been printed. A selection is to be made from this mountain of manuscripts, and the famous course of lectures on great Americans is likely to see the light at an early day.

The Rev. George Rawlinson has in press the fourth and last volume of his *History of the Five Monarchies of the East*, which will contain a history of ancient Persia.

George Catlin is about to publish *My Last Rambles amongst the Indians of the Rocky Mountains and the Andes.*

Prof. Veitch of the University of Glasgow is busy upon a *Memoir of Sir William Hamilton.*.

H. W. Beecher's *Norwood* has appeared in London, in a three volume edition.

Edmund Clarence Steadman will soon publish a new collection of his poems.

Tennyson has been translated into French and has a great sale in Paris.

Mr. Beecher calls the parables of the New Testament "little novelettes."

EDUCATIONAL.

Formation and Information.

"Whichever theory of education we adopt, the formation or the information one, much dependence must be placed on the memory as one of our instruments." (*N. Y. Round Table*, No. 147.) The two different theories of education are well characterized by the above words—*formation and information.* According to fhe former theory, our point of view is the human mind, and our endeavor is to develop that. According to the latter theory, our point of view is the field of knowledge, and our endeavor is to lead the pupil over that. Holding the former, we praise a school examination thus: It was satisfactory; the pupils showed that they had been led to exercise all their powers. Holding to the latter, we express ourselves thus: It was satisfactory; the pupils have accumulated a large body of knowledge. Or, in looking at a Course of Study, under the former theory, we say: It is deficient; there is no study, for example, tending to refine the pupil's taste. Or, under the latter, we say: It is incomplete; the study of Algebra, for instance, is not carried sufficiently far. Which theory of education we hold (consciously or unconsciously) is by no means a matter of indifference, as we may have occasion to show.

Foreign Travel.

It is related of Josiah Quincy that, when he was eighty-two years old, he said smilingly to a young man just returned from a foreign tour: "Well, well, I mean to go myself when I am old enough to profit by it." (*Atlantic Monthly*, Nov. 1867.) Truth is sometimes pleasanter to receive, and easier to carry, when wrapped up like this in a little velvety humor, than in almost any other shape. The truth here inclosed is the superior benefit to be derived from foreign travel, after due preparation. When any of our young friends, therefore, see their acquaintances embarking on foreign tours before school-days are over, let them suppress envy. When your time comes, you may see enough more to compensate you fully for all delays. Meantime, sweeten your labors over Foreign and Ancient Languages, and History, with the thought that all these will prove of the greatest service to you in distant lands, if it should ever be your privilege to travel.

AGRICULTURAL.

THE TULE LANDS.—At a recent meeting of the California Academy of Sciences, Dr. Gibbons made some remarks on the bad policy of burning over the tules. He said when burnt off, the deposit of ash was scarcely perceptible, nearly the entire substance being dissipated; but when the vegetation was suffered to fall into natural decay, the annual increase in depth of soil would be very important, say one-fonrth of an inch a year. At this rate about two feet in a century would be gained. Such a yearly increase would soon effectually redeem all the tule land in the State, and render it valuable for cultivation.

THERE is a famous grape vine at Santa Barbara, famous because of its history, its size, and its yield. It is now over thirty-eight years since this vine was planted, and its origin was in this wise: An Indian woman rode a horse from Los Angeles to Santa Barbara, using a cutting from a grape vine as a switch. Arriving at the latter place, she stuck her switch into the ground, where it took root and grew into probably the largest grape vine in the world. Sixty barrels of wine were made from the grapes produced by this vine last season.

THE cranberry is now worth in the San Francisco market thirty-seven and a half cents per quart, or at the rate of ten dollars per bushel. They are cultivated in swamps, of which our State has a large area; and they produce from one hundred to three hundred bushels per year, annually. In New Jersey, where they are extensively grown, the cost of cultivating an acre is five dollars a year, and of picking, fifty cents per bushel, and the net yield of an acre is sometimes two thousand dollars.

A MASSACHUSETTS YANKEE and his wife are proving to everybody in Coloma that money can be made in the fruit business. This season the wife has canned ten thousand pounds of fruit, and between Coloma and Virginia City every pound of that fruit is sold at a profit. Five years' trial of it has made the balance on the right side larger and larger.

ILLINOIS produces one-sixth of the Indian corn in the United States. It is also the largest producer of oats, and grows twenty per cent. of the hay. Pennsylvania takes the lead in rye—nearly one-third of the production of the whole country, and in buckwheat nearly forty-two per cent.

NEW PRODUCTS IN CALIFORNIA.—Judge Nicholas, of Los Angeles, is growing a crop of taro. He has also a large field of ginger under cultivation. Taro is worth sixteen cents a pound in San Francisco. We shall soon be able to export to Hawaii the Islanders' own favorite food.

THERE were made in this State, last year, according to the report of the Surveyor General, 29,860 hogsheads of wine of 60 gallons each; of which, 8,334 hogsheads were made in Sonoma county, and over 600 hogsheads of this in one township in that county.

ALDEN ADAMS, of Leverett, Massachusetts, has this season gathered a goodly crop of hops off from the same vine that his grandfather gathered from ninety years ago.

O. H. ALLEN has erected a castor oil mill in Los Angeles, capable of manufacturing forty gallons of oil per day.

Family Reading.

Christmas Hymn.

"Thou hast put all things under His feet."

Oh, North, with all thy vales of green!
Oh, South, with all thy palms!
From peopled towns and fields between,
Uplift thy voice of psalms.
Raise, ancient East, the anthem high,
And let the youthful West reply.

Lo, in the clouds of heaven appears
God's well beloved son;
He brings a train of brighter years.
His kingdom is begun;
He comes a guilty world to bless,
With mercy, truth, and righteousness.

Oh, Father! haste the promised hour,
When at his feet shall lie
All rule, authority, and power,
Beneath the ample sky;
When he shall reign, from pole to pole,
The Lord of every human soul;

When all shall heed the words he said,
Amid their daily cares,
And, by the loving life he led,
Shall strive to pattern theirs;
And he who conquered death shall win
The mightier conquest over sin.

William Cullen Bryant.

The Happy Christian Home.

Nothing is more sacred in memory, nothing more beautiful and blessed in its influence, than the abiding joy of which the well-spring is in a charming home. If it was ours in childhood, the gentle stream of pleasure it sent forth has cheered and gladdened us along all life's weary way. If it is ours in manhood, we come to it from the deserts and toil of other scenes, and are evermore refreshed and made stronger and happier by its clear and abundant waters. If both our early and later years have been made by it to exhibit the verdure and the fruits which constitute the value and beauty of life, we have known its designed and delightful power to relieve a world of sin of many of its evils.

As we look back upon the home within which were our cradles and our first experiences, and around which cluster our hallowed memories, we do not find that these relate only to the house, the scenes, or even the dear ones, that all come so freshly before us, summoned by the magic word "Home"—for not all these compose it—it was more, though we find it difficult to define it. It was the charm that dwelt with it in us—the spirit that breathed in no other place such blessings as were there—the very air that lingered around all its associations, and gave a sacredness to all its routine of daily life, with those who seemed almost a part of ourselves; it was all these that composed our home. The faces of the family, the furniture of the several rooms, the household altar, the family Bible, the rules we were to obey, the books we read, the lessons we received, the papers with which we were familiar, the peaceful hours of fireside converse, and many items more, were all elements of *home*, and helped to form its spell upon us, as they were combined and transfigured by the love that presided over all, and possessed all.

We remember the instruction from the Word of God, the catechism, the primer, and the school-books And we remember the hours, at evening, when pleasant family reading was enjoyed by all, followed by those varied exercises, with games and puzzles, and riddles, and charades, and other modes of recreation which seem to have secret bonds in them, with which to unite a family. And we remember the nursery and the play-room, with all their equipments and sports, in which mingled not the children only, but where father and mother loved to come, to be happy with the little ones, while they contributed to their "fun." Yes: all those faces and scenes, and silver-footed hours, come back to us, in after life, with indescribable yet real ministry of good; and we feel that they are to be rebuked, if they are not absolutely wicked, who feel no interest in making the childhood of the little ones within their circles as happy as may be, and their home as charming as our Father intended it to be. Such a sunshiny childhood is like a head-light on an engine, sending its rays far out on the track of life, to cheer and guide, whatever the region through which we may pass. Such a home is like the love by which it is made radiant—a perpetual fountain of comfort, and pleasure and good.

Children.—Children are the sunbeams of domestic life. A house without children may be rich and elegant; but it will lack the air of ease, the home aspect one likes to see in families. We used to visit a dear relative, now with the beautiful above, whose house was a pattern of order and physical comfort, but who was unblessed with children. In awe we walked through the large rooms. A chillness crept along our veins as we felt the silence pervading the house when conversation was suspended. No little feet could be heard, running aimlessly about; no infantile cry; no childish shout broke the oppressive stillness. No playthings, scattered around, disturbed the precision of order on every side. There was no accidental jostling, no upsetting of things, no disarranging of ornaments—no jar breaking the monotony of exact life. The flowers in the garden, from the bud to the ripened seed, flourished for grown people. No child, enraptured, gazed on them, breathed their fragrance, enjoyed their beauty, and scattered their petals about. They grew, bloomed, and died in stately order, as they were planted. They were beautiful—they cheered that childless home as inanimate objects could do; but the presence of children was needed to interpret them fully and perfect their mission.

Mercy and Pardon.—In the reign of the first Napoleon, there was an insurrection in Paris. One of the ringleaders was brought before the Emperor; and as this was his second offence against the Government, he was sentenced to be transported,

The day after the trial it was told Napoleon that the child of the convicted man was waiting to see him. "Bring her in," said Napoleon; and a tearful, trembling little girl, on being led in, cast herself at his feet, and implored him to have mercy on her father.

"My child," said the Emperor, touched by her distress, "this is the second time your father has been guilty of treason; I cannot save him." "Oh, sir," said the kneeling child, "it is not *justice* we want, but *mercy* and *pardon*." Napoleon, much moved, raised the girl to her feet, and said: "For your sake I will release your father."

Does not this story apply to us? Are not *our* wants the same as that little child's? "It is not justice" we want from the great King, even the Lord our God, but "mercy and pardon" for Christ's sake.

Workingmen Need the Sabbath.—Father Hyacinthe, an eloquent French priest, at the Roman Catholic college at Malines, in speaking on the education of the working classes, met the objection that the interests of industry required that the Sabbath should be spent in work, by referring to the example of England and the United States, "fully the equals, if not the superiors of France." He said: "We ask the liberty of the Sunday, and Sunday by liberty. We only ask that the public works shall scrupulously respect the Sunday, and force the individual to blush before the State; that the princes of industry, of thought, of eloquence, shall act in concert; that they shall create fruitful currents in the public mind; and little by little things will change their aspect, noise will die away, work will be suspended, and God will have his day, and the people likewise."

The Young Folks.

The Dancing Sunbeam.

By May Wentworth.

In a dark, narrow street of the city, stood a dingy tenement house. Many people lived within, and called it by the dear name of home; yet it was very different from the luxurious homes of the rich, surrounded by pleasant gardens, and filled with costly pictures and a thousand beautiful things very delightful to possess. Nor was it like the comfortable homes of the middle class, where the fire burns brightly in the polished grate, and the table is always plentifully spread. Oh! no! The people in the tenement house were all poor, from the first floor front, to the attic back, which was the worst of all.

It was the rainy season, and through the roof, round the chimney, and between the cracked and loosened weather-boards, came the driving rain.

Then there was a continual opening and shutting of doors, and at the common entrance, all day long and far into the night, there was somebody always coming in, or going out, letting in the chilling blast, that rushed through the muddy halls, and into the rooms, pinching the sick and old in a pitiless way.

Altogether, it was not a pleasant place to live; but most of the people in the tenement house had always been poor, and had learned to be content with what the day brought them, so they were not hungry. Only one in the house had known the luxury of being very rich, and she was now the poorest of them all.

Just under the roof she sat, wearily stitching upon the coarse work that must bring bread to her little child. How the rain pattered and chattered upon the roof, as the daintily bred woman bent above her unaccustomed task, thinking over the old thoughts, that made the present more than desolate.

"It was not so once," said the rain. "The old home, how comfortable and beautiful it was! There, you were a fair lady with lily-white hands; now, you are the same, only one cannot think so. There are silver threads in your hair, and your hands are too red. People say: 'what a pity the poor woman with the pretty child is so poor,' but they do not help you." "The old home, the old home," echoed the sad thoughts all day long and into the still hours of the night. In the corner of the room sat a little child playing with a doll, made of an old apron; yet, to the child it was "the pretty Dolladine."

She was very beautiful, with silken white hair shimmered over with a golden lustre. A little garden flower thrown out by chance upon the common wayside, yet blossoming in her own sweet beauty, in contrast with everything around her.

She was a real princess born, and her coarse ragged clothes could make no difference.

The work was finished, and though it was raining still, the mother put on her worn bonnet to take it home.

"If the sun would only shine again," she sighed heavily, looking down into the dismal back alley; "but I must go."

She kissed the child, saying: "be good, darling, mamma won't be gone long."

"I will be good, mamma," she answered; and Dolladine and I will catch the sunshine for you."

"You are my only sunshine now," said the mother, hastening away to conceal the tears that would not stay in their hiding-place. Then the little one was left alone in the attic-room, and began as she often did, to talk to her doll.

"Now, Dolladine," she said, "mamma is very sad

and sick, I fear, and you and I must make sunshine for her; but how shall we do it? that is the question."

"Don't you remember, Dolladine, one day the pretty lady said my hair was beaming sunshine? We must shake it out for poor mamma, we must shake it out;" and the little girl began jumping around the room, shaking her curls and singing:

"We will make the bright sunshine,
Dolladine, Dolladine;
Make for mamma glad sunshine,
Dolladine, Dolladine."

Just then she saw the sunbeams dancing into the room. The rain was over, and on the roof of the next house, a washerwoman was hanging out her clothes which were blowing about in the wind, casting gleams of light and shadow upon the little attic window, sothat the sunshine went flitting about like the Will-o-the-wisp, for the shadow was always chasing it.

The child was delighted. "Do you see it, Dolladine," she said. "The glorious sunshine which the loving God gives us?"

"Now, we must catch it for mamma."

She took the doll in her arms, and gave chase to the dancing phantom; but it was no use; just as her little hand was ready to grasp it, it flew away.

"You don't help me enough, Dolladine," said the child, her little eyes filling with tears.

Just then, a great double knock came at the door, and before she could answer it, in walked a little old man with a very wrinkled face, and long white beard; a big hat almost covered his face, so that the upper part was all in shadow.

"What are you doing, little chick," he said, pleasantly; "and where is the mother?"

"Mamma has gone to carry home the work," answered the child, timidly; "and Dolladine and I have been making sunshine for her. But see, it flies away;" and again she tried to catch the dancing beams.

"It often does from older and wiser hands than yours; but how did you make it, fairy?" asked the old man, laughing.

"God put it in my hair, and I shook it out for dear mamma, who is sick, and so tired of the dark days," replied the little one, again shaking her pretty curls, that were luminous with beauty. "I see!" said the old man. "Now, I am a great magician, and can help you;" and he sang, with a clear ringing voice:

Sunshine, sunshine, listen to me,
Dwell in the heart of the little fairy;
Make her gentle, loving and mild,
Make her the mother's sunshine child.

Just at that moment the washerwoman took down a big sheet, and the little room was flooded with warm, glowing sunshine.

"Oh! it is glorious, is it not, Dolladine," exclaimed the child, clapping her hands and dancing about with pleasure. "Mamma will be so happy, and so will Dolladine and I."

"Remember," said the old magician, "that all good comes from the loving God, who has blessed you, and made you the sunshine child. You can make the mother and every one very happy, so long as you keep God's sunshine in your heart; but if you forget the blessed Christ, it will fly away, and will not be the warm, beautiful light of God's love, but only the dancing sunshine that always escapes your grasp. And then, how sad! you would change to the little stormy-weather child, which would be worse than the darkest winter's day to the dear mother."

Oh! no, no! I will never forget to bless the good God. It is so delightful to make mamma and every one happy."

"This box," said the old man, "is full of sunshine; I will give it you for the mother."

"Let me kiss you, dear magician," said the child, gently, "I always love anybody who is kind to poor mamma."

The old man took the little one in his arms, and kissed her fondly, saying: "God bless you, darling; "God bless you." Then he went away, to be her life-long friend.

"I am so happy I cannot keep still, Dolladine," said the child; and she danced about till the mother came in, weary and worn. "Oh! mamma;" said she, running up and kissing her; "We shall always be happy now, in God's glorious sunshine, and the old magician gave me this box full of it for you, mamma."

It was sometime before the mother could understand all; but when she opened the box, sure enough, it was full of sunshine. There was the missing deed that restored to her, her own—the dear old home and all her great wealth.

Again, she became the fair lady with the lily-white hands; but her greatest joy was in the warm, genial sunshine her good little daughter made. From a child she grew up to be a loving, beautiful and pure woman. But she never forgot the good God, and all her life remained the mother's sunshine child.

DON'T BE COWARDS.—"I won't tell a lie! I won't be such a coward!" said a fine little fellow, when he had broken a statuette of his father's in showing it to his playmates, and they were telling him how he could deceive his father and escape a scolding. He was right. Cowards tell lies, brave little boys tell the truth. So Charlie Mann was right, and was rewarded for it, as the following story will show.

A boy whose name was Charlie Mann, happened to smash a large pane of glass in a druggist's shop, and ran away at first, for he was frightened; but he began to think; "What am I running for? It was an accident. Why not turn about and tell the truth?"

No sooner thought than done. Charlie was a brave boy; he told the whole truth; how the ball with which he was playing slipped from his fingers, how frightened he was, how sorry too, at the mischief done, and how willing to pay if he had the money.

Charlie had not the money, but he could work, and to work he went at once, in the shop where he broke the glass. It took him a long time to pay for the large pane of plate glass he had shattered; but when he had done it, he had made himself so useful to the druggist, by his fidelity and truthfulness, that he could not hear of his going away, so Charlie became his clerk.

"Ah! what a lucky day it was when I broke that window!" he used to say.

"No, Charlie!" his mother would respond, what a lucky day it was when you were not afraid to tell the truth."

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, 50 cents. F. E. WEYGANT, Proprietor.

TELEGRAPHIC SUMMARY.

Political.—The *Tribune* says in regard to the removal of Gen. Ord, that Gen. Grant is a mere clerk, while the President controls the game.....Gen. Logan is preparing a bill to establish a Civil Service Bureau, to decide on the qualifications of all applicants for places in the various departments. ....The Union League of Louisiana has nominated Chase for President.....Thad. Stevens is preparing a speech in favor of purchasing Alaska.....Judge Field has been spoken of as the Democratic candidate for President

The South.—J. W. Sullivan is at Washington, preparing for trial in the U. S. Supreme Court, a test case which will involve all the issues raised by arbitrary orders in the South since 1861.....Gen. Ord, at Memphis, states that the Freedmen in many of the counties of his District are in a starving condition. The Freedman's Bureau is unable to provide for the existing destitution. Several disturbances occurred at Memphis on Christmas, in which about a dozen negroes were wounded.....Accounts of the expected rising of negroes in the southern counties of Virginia are greatly exaggerated.....Gen. Canby has issued an order for a Convention to meet at Charleston, January 14th.....The Freedmen's Bureau officers who were trying to swindle the negroes of Alabama, have been tarred and banished by the negroes.

Military.—Gen. Ord has been transferred from the 4th Military District, headquarters at Memphis, to San Francisco, to succeed Gen. McDowell in command of the Military Department of California. The latter is to go to Vicksburg to relieve Gen. Gillam.

Miscellaneous.—A movement is on foot in New York to raise and equip a regiment for the Papal army.....Steamer *Raleigh*, from New York was burned off Charleston, S. C., Dec. 26. Fourteen persons missing—loss, $350,000..... There were 13,015 patents issued during the past year.....The heaviest snow-storm ever known at Nashville, Tenn., was raging Dec. 30.....The schooner *Petrel* from San Francisco, with treasure-seekers bound for Cocos Islands, in distress, was picked up by the *Mohican*, and towed to Panama..... Judge Clark, of the N. Y. Supreme Court, has decided that gold and silver are no longer lawful money, but are merchantable commodities.....C. A. Humphreys, U. S. Representative from Ohio, has been murdered by his insane son.

Foreign.—The new constitution of Austria has been proclaimed throughout the empire. A bill for emancipating the Jews in Austria, has passed the Imperial Assembly.....Santa Anna has been proclaimed dictator of Yucatan by the revolutionists and is expected with men and money.....There are rumors that the Swedish Government will follow the example of Denmark and sell the Swedish West Indies to the United States.....King Theodore, of Abysinia, has released the English prisoners, on learning the extent of the expedition against him.....The Brazillian army has been victorious in two great battles with the Paraguayans.....A St. Thomas letter says that 500 shocks of earthquakes have been felt there.....Juárez was inaugurated President of Mexico, Dec. 15th.....The English mail steamer *Saturn* was lost in a gale off Montevidio, in Nov. Of 400 persons on board, only 14 were saved.....The eruption of Mount Vesuvius is increasing in power and splendor.....C. Gould Buffum, formerly editor of the S. F. *Alta*, has committed suicide in Paris..... Edward Thornton is the new British Minister to Washington.....3000 special constables have been sworn in at London, as a precaution against the Fenians, whose late operations have caused great public excitement.

WEEKLY MARKET REPORT.

From the San Francisco Evening Bulletin.

Produce Market.

FLOUR—Sale of 6,000 hf sks National Extra for export, private. We quote city mills as follows: Superfine, hf sks, ℔ 196 lbs, $6 75 @ 7 00; qr sks, 7 00 @ 7 25; Extra, hf sks, 7 50 @ 7 75; qr sks, 7 75 @ 8 00.

WHEAT—Sale of 4,000 sks good shipping, full price. We quote the market firm at $2 50 @ 2 60 for good to choice At the close 700 sks Coast, $2 55; 300 sks good milling, private; 1,200 sks Coast, $2 55.

BARLEY—Continues dull at $1 80 @ 1 90 ℔ 100 lbs, with a disposition to shade off to effect sales. At the close 380 sks good feed, $1 82½ ℔ 100 lbs.

OATS—Light to medium are quotable at $1 70 @ 1 75; good to choice, $1 80 @ 1 85 ℔ 100 lbs.

POTATOES—Market quiet and prices irregular, some dealers quoting Humboldt at $1 25 firm, while others are said to be offering the same description at $1. Sale of 850 sks Humboldt, in lots, from store, $1 25. We quote other kinds of good at $1 ℔ 100 lbs.

BEANS—Market steady at 3@3¼c for Bayo, Butter, Pea, and small White, 2½@2¾c for Pink, and 2@2¼c for Red. Sale of 50 sks Pea, 3⅛c ℔ lb.

PEAS—50 bags sold at 2c ℔ lb.

ONIONS—Quotable in small lots at 3c ℔ lb for Yellow.

HAY—We quote the range of the market at $18@$23 ℔ ton for cargoes in order.

BRAN—Continues to sell from the local mills at $25@ $27 50 per ton, according to quantity.

MIDDLINGS—Feed descriptions are quoted at $40, and Shorts at $35 ℔ ton.

San Francisco Cattle Market.

Tuesday, December 31.

We have no change to notice in prices. The market remains about the same, with a good demand for fresh quality, in consequence of holiday times.

We quote slaughterers' prices as follows:

BEEF—American 1st quality, 10c ℔ lb; Spanish, 1st quality, 9 @ 9½c; do 2d quality, 8 @ 8½c; do 3d quality, 7 @ 8c.

VEAL—10 @ 12c ℔ lb.

MUTTON—6½ @ 7c ℔ lb.

LAMB—9 @ 10 c ℔ lb.

PORK—Undressed, 4 @ 5c; dressed, 6 @ 7c.

Merchandise Market.

CANDLES—1,200 bxs Gross & Co., (new brand,) ex steamer, private.

CLAY—Sale of 7½ tons English, ex Beatrice, private.

FIREBRICK—Sale of 20,000 Cowan's, ex Beatrice, on terms not made public.

FREIGHTS—Moore & Co. have secured the ship John Tucker, 1,100 tons, to follow the Panther in their line to New York. The British bark Calabar, 495 tons, has been taken for Liverpool on terms withheld. The Prussian bark Enscalduna, 219 tons, has been chartered to load Lumber at Burrard Inlet, for Foo Chow, at about $6,500.

Shoes and Dies of White Iron, manufactured for, and imported by us, expressly for this purpose, and will last 25 per cent. longer than any other made on this coast.

Russia Iron Screens, of any degree of fineness. We are the only manufacturers on this coast of the "Hicks Engine," the most compact, simple in construction, and durable, of any Engine in use.

W. H. HOWLAND, H. B. ANGELL, E. T. KING, CYRUS PALMER

Electro-Silicon.

This wonderful product of nature and the Pacific Coast (the two do not often work together) has fairly electrified New York. No sooner had its powers been tried on a seal ring, at Ball & Black's, than a rush was made for the establishment, and it required 100 Metropolitans and all their stars, to keep off the mob. Finding the pressure too great to be borne, the police bethought them of applying Electro-Silicon to the rioters' persons, which were consequently rubbed out of existence in a very few minutes. By the last Panama steamer, orders were received, by KEITH & CO., for 200 gross, which, at fifteen dollars per gross, are worth the sum of $3,000, a handsome order for an article discovered but yesterday.

THE OCCIDENT.

A Weekly Journal devoted to Religion, Literature Education, and the best interests of Society, is also the special organ of the various branches of the Presbyterian Church in the Pacific States.

NOTES ON

CURRENT TOPICS.

It is often said that Rev. H. W. Beecher should not be judged by the rules that apply to other men, and our high respect for him inclines us to grant him all proper license. But there are some things which we can hardly sanction, even in Mr. Beecher. When he does or says, in his pulpit, what no other clergyman should do or say, we will excuse him, and hope this does not detract from his usefulness. When he publishes, for theology, what we find it hard to accept, we will withhold criticism until we get his own explanation of what he means. When he writes novels for the *Ledger*, against the advice of his friends, and even notwithstanding the remonstrances of many who love him, and would make him their ideal minister, we will believe that he thinks their fears unfounded, and his power for good increased by this disregard of them. But when he consents that his novel shall be dramatized, and exhibited, with all the concomitants of a New York theatre, and forced down to the support of what, without such support, would be far less powerful for evil—*his own name*, not "Norwood," on the show-bills, being the chief attraction—we are ready with no apology, but feel that here is a public wrong, which can not be tolerated, though claiming a place among the eccentricities of genius. Mr. Beecher has lost influence by this consent, and this is a loss which even he should be unwilling to suffer.

It is proposed to erect in London a Memorial Church and Hall by the joint contributions of those who may feel interested in the object, in Great Britain and the United States. We are not sufficiently informed as to the details of the enterprise, but so far as we can understand them, there can be no doubt that such an edifice would be of considerable value in the direction of cultivating good feeling between these countries. It will be a rendezvous for our people when they go abroad, serving as a kind of religious exchange, and public worship will be maintained in it on the Sabbath, in which clergymen from both countries, and of all denominations may officiate. The history of the past ten years testifies that more pains should be taken to unite the Christians of England and our nation, and more bonds should hold together the common people of the Governments, whether christians or not. We must not allow disaffection to grow, and this proposition seems likely to check it, where it exists. The edifice is to be reared especially in memory of President Lincoln, and to be regarded as a monument to his fame.

The approach of General Conference seems to occasion the usual agitation in the Methodist church. There are divers questions which have special interest, but prominent among them is that of lay representation in ecclesiastical bodies. The voices which are denied opportunity to be heard in the Conference are uttering no uncertain sound in the discussions which precede it, and not a few of the ministers favor a change in this feature of the Methodist polity. To those who are not identified with the system, it has long been a matter for surprise that what has so little harmony with American institutions could be retained so long. There is need of wisdom in managing the affairs of a great denomination, that must come, directly or indirectly, from those who have given their chief thought to business, and the observing men of the church see this clearly. Nor is it reasonable that laymen should be excluded from any counsel respecting the disposition of what laymen are expected to supply. The spirit appears to be good in which the discussion is conducted, and it is probable that the change will be made.

Complaints abound respecting the corruption of the municipal government in our large cities. So serious has been the evil, that, in some States, the Legislature has undertaken to hold in check the city authorities, and citizens have formed organizations for their protection against the outrages of their rulers. Nothing could more fully reveal the depraved condition of the masses who are thus herded together, and who become the tools of unprincipled partisans and demagogues. There can be no permanent reform in municipal rule until there is reform among those who support it. Tax-payers and lovers of order should be zealous in sustaining city missions. The weight of their burdens should be an argument for Bible Societies, and colporteurs, and Sunday Schools. When agencies that elevate men are multiplied, and receive the support of the respectable in our cities, and agencies that deprave men are frowned upon and crowded out by public opinion, there will be relief from municipal misrule.

Those Christian men, who united, two or three years ago, in founding an institution in Constantinople, in which youth of all nations may receive an education, could hardly have anticipated the success that has already attended the enterprise. In honor of Mr. Christopher Robert, who was the largest donor, the institution is called the "Robert College," and last year there were seventy-six students, representing fourteen nationalities, and five systems of religion. The prevailing influence in the college is decidedly Christian, and most of the professors are missionaries, so that the talent in process of education is constantly subjected to religious culture. It was far-reaching wisdom that is finding so rich a reward, and none can estimate the advantage to Christianity when those who are thus prepared for influence shall go forth to their several lands, to be leaders among their people.

Rev. Baptist Noel has announced that he will resign his pastoral relation to the John Street Church in London after the present winter. The reason he gives is a desire that his people may have "a younger man, who will do them better service," as he is now seventy years of age. Those who have known with what power this distinguished preacher has uttered his voice and wielded his pen for almost half a century, will learn of this decision with unfeigned regret. Baptist Noel has influence wherever the English Language is spoken, and there is no man so great, who has more to love, as well as admire him. We are glad to know that his vigor is not gone, notwithstanding he feels constrained to leave his pulpit, and we may hope that he will still furnish for the press the fruit of his ripened experience and thought.

Deception is never profitable, but specially dangerous when we deal with Indians. Our Government has learned this, at last, and it is said that most rigid measures will be taken to secure a faithful execution of the treaties lately made with the tribes in the interior. Here is the real basis for hope that the atrocities which have so seriously interrupted communication across the continent, will not be repeated. Indians will not keep treaties if we do not. Great Britain has had little difficulty with them because always careful to fulfil promises, and it is of immense importance to us on the Pacific coast, that our Government have agents equally faithful.

It is said that Napoleon proposes to affiance the young Prince to the youngest daughter of the Emperor of Austria. As the far-seeing Frenchman does nothing without a purpose, just in the present condition of affairs in Europe it is not difficult to divine the motive for such an alliance. But it is too late to make monarchy permanently strong on that Continent. The people are moving towards the demonstration of their power. Hand joined in hand cannot resist their march upward.

Figures are often very significant. In 1866 the Legislature of the State of New York appropriated $129,025 to various religious institutions. Of this sum $124,174 was given to those owned by Roman Catholics, $2,367 to those owned by Protestants, and $2,484 to those owned by Jews. In the city of New York the Common Council gave to Romanist institutions $115,000; to Protestants, *nothing*—except $5,000 to the Young Men's Christian Association. Comments are not needed.

What wonder that London has so many poor! Rev. Newman Hall stated at a meeting in New York,

that in London there are seven drinking shops to one bakery, and that $70,000,000 are spent annually for drink, $50,000,000 of which come from the poor We are tending towards a like condition of things, in this country. Let us be warned by this picture of what is possible.

Religious Intelligence.

PACIFIC COAST.

The Church in Portland, Oregon.

We have just had the pleasure of an interview with Rev. T. Frazer, on his way through San Francisco, to Portland, Oregon. He goes to supply, for a while, the Presbyterian church of Portland. We are rejoiced that he has consented to fill this engagement. The Portland church is one of the most important on the coast, connected with the Presbyterian body. And those who have had the pleasure of hearing Mr. Frazer know that his varied talents make him well adapted to continue and enlarge the power of any church to which he may minister. We are also rejoiced to learn that Mr. Frazer has welcomed to his home on the Pacific coast his father, who is a minister of the Presbyterian church of Canada, in conneetion with the Mother Church of Scotland. His father will supply the churches of Two Rock and Santa Rosa during his absence.

At the annual meeting of the congregation of the Presbyterian church of Placerville, held on the evening of January 1st, the financial report of the Society showed the encouraging fact that, although the church had lost a large number of families, by removal, during the year, owing to the present decline of the town, yet all the current expenses, amounting to over $2,000, had been promptly met, and the funded debt on the building had been reduced $800, leaving the present incumbrance about $1,300. During the same time $150 had been expended for the Sabbath School, and a similar amount for various benevolent objects. The report, in view of the depressed condition of the community for the past year, was deemed very cheering. An election was held to fill vacancies existing in the Board of Trustees, which now consists of the following persons: John Blair, E. B. Conklin, J. M. Preston, C. W. Brewster, and W. B. House.

A Sunday School Convention and Institute will be held in Sacramento, commencing on the 7th inst., and continuing two days. The first exercise will be a Union Prayer-Meeting on Tuesday evening, and the discussions that follow, will be respecting the best methods of teaching and conducting Sunday Schools, and the means to be used to excite greater interest among those who work in them. Sunday School officers, teachers, and pastors are cordially invited to attend, and it is hoped they will be prepared to give brief accounts of the temporal and spiritual condition of their schools. Arrangements have been made for the entertainment of those who come,—and further enquiries may be made of Mr. Sparrow Smith, Chairman of the Committe, at Sacramento.

Presbyterian Church, Oakland.—Allusion was made, in our last number, to the recent successful effort to pay off the debt of $4,000 on this church. There was one feature of it which was new on this coast, which has not been mentioned. It was proposed by one of the congregation to add $500 to the amount required to be raised, and, if the whole sum was pledged, to do away, for the ensuing year, with the passing of the collection-plate. The response was so hearty and liberal that no Sabbath contribution will be required, except those for the various causes of public benevolence whose claims no Christian people can forget or neglect.

The Pacific.—This paper comes to us, with the new year, in quarto form and new dress. As is true of many other good things, increase of years occasions increase of beauty and worth in *The Pacific*, and being now distinctively the organ of the Congregational church, we have no doubt it will have greater prosperity and usefulness than ever. We heartily congratulate those having it in charge on its position and success, with our best wishes for its future.

The Pacific Baptist Association includes 14 churches, having an aggregate of 740 members. The number baptized during the past year has been 130. The most of this number were baptized at Petaluma and Marysville. The last annual meeting was held at Healdsburg, and the next is to be with the church at Ukiah, in Mendocino county.

We learn, with pleasure, that the First Baptist Church of this city has given a call to Rev. Dr. Thomas, of Brooklyn, N. Y., and that he will probably accept it. We had personal knowledge of his position and success where Dr. Thomas now has his home, and shall gladly welcome him to San Francisco.

By a strange oversight, the name of Rev. Dr. Scudder was omitted from our list of Presbyterian clergymen on the Pacific coast in our last issue; also of Rev. I. N. Hurd, of the Westminster Church, Hayes Street, and Rev. Joshua Phelps, 38 Stanley Place, of this city.

The annual renting of pews in the Howard Presbyterian Church, for 1868, took place on Monday night, 6th inst. The amount of premiums offered was about $1,700. The income of that church, during the first year in its new house of worship, (ending Dec. 31st,) was about $18,000.

The daily Union Prayer-meeting is continued in the basement of Calvary Church, beginning at 12¼ o'clock, and closing at 1 o'clock. This meeting should be more largely attended.

Rev. Dr. Eells announced, last Sabbath, that on next Sabbath evening he will deliver the first sermon of a short series on Paul as a Model for Young Men.

The Temperance Legion of San Francisco has enrolled more than one thousand members, and the number is increasing.

EASTERN.

Church Statistics in the United States.—The religious condition of the United States was the subject of a report recently made by an American clergyman to the Evangelical Alliance General Conference, in session at Amsterdam. From this it appears that in this country the Catholics are the largest denomination, having 4,000,000 members, and 3,800 churches. The Methodists come next, with 2,000,000 membership and 10,460 churches. The Baptists are third, with 1,690,000 members, and 17,220 churches. Next come the Presbyterians, with 5,000 churches and 700,000 members; next the Lutherans, with 2,900 churches and 323,800 members; then the Congregationalists, with 2,780 churches, and 564,400 members; then the Episcopalians, with 2,300 churches and 161,200 members; the German Reformed, with 1,160 churches and 110,000 members, and the Dutch Reformed, 440 churches and 60,000 members. Besides these he states that the United Brethren have 3,000 societies, the Unitarians 200 churches, the Moravians 12,000 communicants; the Universalists number 600,000 of the population; the Orthodox Friends 54,000 members.

A Thanksgiving Donation to Hamilton College.—Last Thanksgiving day, Dr. Goertner, pastor of the church in Hamilton College, had the pleasure of receiving from John C. Baldwin, Esq., of Orange, N. J., ten thousand dollars, to be held by the Trustees as a permanent fund, for aiding pious and needy students in that institution. It was a timely gift for a noble object.

Rev. J. T. Duryea, D.D., the youngest of the pastors of the Collegiate Reformed Church, New York City, has received and accepted a call from the Classen Avenue Presbyterian Church, Brooklyn. This church has been recently formed, but has great promise, and, with the ministrations of Dr. Duryea, will soon become prominent in the City of Churches.

Knox Co., Illinois, has a population of 34,401, of whom 27,861 are over six years of age. Total number of church members in the county, 5,094; leaving 22,767, or at least three-fifths of the population over six years of age, not connected with any evangelical church.

Leavenworth, Kansas, has a population of about 24,000. The members of Protestant churches are 2,293. At most, not over 3,000 persons of Leavenworth attend Protestant places of worship regularly; leaving 20,000 souls, or seven-eighths of the population, not regularly reached by the gospel.

The membership of the Universalist churches of the United States, is stated at 600,000.

FOREIGN.

Religious Condition of France.—The excellent Rev. Dr. De Pressense, of the Evangelical body in France, writes thus of the moral condition of that country:—

"The moral state of the French nation inspires the most painful anticipations. Corruption in high places, unbridled license in low places, atheism joining hands with immorality, and all developing formidably under the pressure of circumstances—such is the prospect which is arrayed before us. Should any event—which might easily occur—open afresh the revolutionary arena, it is not difficult to imagine what might happen any day in such a state of French society. We have a secret impression that God, in the often severe methods of His goodness, is about to allow us to try the doctrines of positivism and materialism, so fascinating to the present age, and to leave the country to drink to the dregs the turbid and bloody cup of infidelity.

"All the information we can gain from public rumor touching the theaters and concerts, makes it evident that nothing is so vile as to be denied a place. The most shameful scenes are represented to the life every night in the presence of thousands of spectators; and what they dare not say, they sing, accompanied with pantomime equaling the most infamous exhibitions ever known to the Roman Empire."

Darkness giving Way.—As the result of a revival in the Vavau islands in Polynesia, twenty new Christian chapels were erected the last year, wholly at the expense of the natives. At a meeting in the Fiji islands, a native assistant said that two whole tribes had given up heathenism. He had often gone to the chief of one of these savage tribes, and begged him to become a Christian, but was always refused, till recently he came to him of his own accord, and declared for the Christian religion. In the other tribe, the teacher preached one Sabbath to 7 people, the next to 70, and at the third visit 637 threw up their devil worship for the worship of the true God, and have already begun to destroy their heathen temples. A missionary on these islands, formerly the habitation of cruelty, who is revising the translation of the New Testament, receives important aid from the king.—*American Messenger.*

What the Figures Say.—The *Congregationalist and Recorder* says that during the past twenty years the Roman Catholic immigration has been only twenty per cent. in excess of the Protestant. Meantime the increase of the native Protestant population has been vastly in excess of the Catholic. And already the tide has been turned in favor of Protestantism. During the present year up to Au-

gust 21st, the whole number of immigrants received at the port of New York was 163,059, of whom only 45,895 were from Ireland, against 77,042 from Germany. England and Scotland sent 25,453; Norway, Sweden, and Denmark, 4918; Holland, 1836; Switzerland, 2959; so that the majority of this year's immigration is decidedly Protestant.

But a great drawback to this view is that the Irish are positive Romanists, while the Germans are only nominal Protestants.

PERSONAL.

NEWMAN HALL.—The proceedings of the House of Representatives on Monday, were opened with prayer by Rev. Newman Hall. He avoided all mention of American politics, but prayed that the ties of mutual affection might bind together this and the mother country, that all causes of alienation might be removed, and everything righteous and just might be acknowledged and done that these two nations especially may ever be bound together as the common champions of what is right, and free, and good, and promotive of the happiness of the world. This gentleman has been pastor in London for thirteen years, and his congregation are intending to give him a testimonial of their appreciation of his services upon his return from this country.

REV. Albert L. Long sailed from New York, November 9th, for his mission in Constantinople. Mr. Long has been spending a large part of the past year in New York, editing the publication of the New Testament in the Bulgarian language, for which work he was selected by the American Bible Society. This work is now completed, being neatly and accurately electrotyped; and Mr. Long returns to his former field of labor with a new and important adjunct.

REV. Selah Merrill, who graduated from the Yale Theological Seminary, in 1862, and has been two years a pastor in Leroy, N. Y., arrived on Monday last, by the steamer. He will support the pulpit of the Third Congregational church, in this city, a few Sundays.—*Pacific.*

REV. Newman Hall is electrifying New York with his speeches, addresses and sermons. He occupies churches without reference to denomination, and appears equally at home in all.

MRS. SILLMAN, a sister of General Lewis Cass, died lately in Pajaro Valley, Santa Cruz county, where she has resided the past two years. She was 84 years old.

REV. Miss A. J. Classin has been called to the pastorate of a church in Mount Pleasant, Iowa. She is said to be a fluent preacher.

ROBERTS, McMISH & CO.

Importers and Wholesale dealers in

Boots and Shoes.

Sole Agents for the Pacific Coast for the sale of the

CELEBRATED RUBBER BOOTS,

Manufactured by the National Rubber Company.

Have always on hand a complete assortment of Seasonable Goods

216 AND 218 CALIFORNIA STREET.

A Thrifty Society.

The Policies of the Equitable Life Insurance Society, 91 Broadway, N. Y., average larger in amount than those of any company in our country, and its losses will not reach more than one-half of the percentage of many older companies. In this as in all that relates to Insurance, it seems has not been paralelled in the annals of the business in this country or Europe. *All Cash* income $3,000,000—*Purely Mutual*—dividends available on the *Second Payment*—and not as in many companies—deferred four years.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

REV. P. V. VEEDER.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

City Female Seminary,

INDIVIDUALISM.

There is a tendency in our times towards both separation and union, and it is no paradox to say, that the more powerful this tendency is in one direction, the more powerful it will be in the other. While men have narrow views and a limited range of effort, they will be suspicious of each other, because more or less conscious of their deficiencies, and afraid that others will take advantage of them, if they permit any intimate relations. Hence, ignorance and weakness foster disunion and ill-will. When they gain broader views and enter wider fields, having tested their strength and found their knowledge reliable, they are so far content with what they are able to compass as not to feel it to be a personal injury if others work beside them, and, with a manly spirit and worthy success, gather what may not be within their reach. They are stronger and better because of this alliance, even though it may sometimes assume the form of competition, for they know that by it their own power is not at all diminished, nor is their range curtailed. Hence, self-reliance and conscious vigor favor union and good-will towards all who enter the harvest with us, for with a host of reapers, though they be stalwart and unwearied, much of the grain will be left in the field.

While Christian denominations class among essential doctrines those items which pertain to their own peculiarities, and limit their zeal for advance to the special polity they adopt, they will stand apart, look askance at one another, and be afraid to unite in action against a common foe, lest each might not have all the particular prominences after the engagement that had before been exalted. But when bigotry is regarded as a clog, and each denomination is so confident of its own superiority in features of necessity distinctive, that it is ready to meet any honorable comparison, and relies on itself, with the blessing of God — not on the overthrow of some other — for the progress it seeks, there will be the most firm maintenance of what each may prefer, yet the most generous interest in the success of all.

It must not be supposed, then, that the manifest purpose of men to take their own position, and to make each his own mark on the world, is an evil, or that it will prevent union in the support of all valuable interests. Every man should insist that he is an independent, distinct force among his fellows, for the increase, and control, and direction of which he alone is responsible. He should think for himself, read for his own profit, act under the conviction that no other man can do his work. And when he has come forth upon that wide stage, to which such thought, and reading, and action will certainly introduce him, he will rejoice to find there with him all others who have been prepared in like manner for the only successful co-operation. Not one of the company will be the counterpart, or echo, of another. There will be no sycophants among them, no men waiting to receive dictation, no men whose horizon is bounded by the narrow circle of their own vision. Yet all will be both ready and able to weigh what each may suggest; all will feel the advantage of union, in which each can put forth his whole strength, and in the combined number every noble and valuable cause will have mighty and reliable support. This is already becoming evident, and should be hailed with hope.

Nor should it be supposed that the strongly marked lines that are now being drawn in this country, between different branches of the Church, are indicative of distrust and an unworthy spirit. Nor should we regret that real differences are clearly defined.

This is not that "best mode" of promoting Christian union, given by a New England divine, now dead, viz: "Build a ten-rail fence between the churches." If there is no radical difference, every consideration urges that there be hearty, vital, organic union, for the whole body thus formed may be as sharply outlined, and as compactly knit together, as either component would be if separate. But nothing is gained for Christian union when Arminianism tries to be like Calvinism, or *vice versa*. They never can be alike, nor can they tend toward each other. He who accepts one faith, may be so rooted and grounded in it that he can afford to be kind and Christian in his *feelings* towards him who accepts the other, and this union of heart will be in proportion to the intelligent conviction of each that, in *doctrine*, they must be apart. Nothing is gained for union when a church that has inscribed on its banner, "No Bishop, no Church," tries to force itself, with its banner flying, into concord of *sentiment* with another church that does not believe in Bishops, and finds no warrant for them in the Scriptures. They can never be one church. But the *members* of each may be so well established in their faith, through investigation — not by assumption — that they will be liberal towards the others as brethren, since, whether either is right depends only on interpretation, and, respecting what must thus be decided, intelligence is always liberal, never bigoted.

In any view, therefore, nothing is to be feared — much is to be hoped — from the resolute individualism that is everywhere apparent. As it shall become more general, while prompted and guided as now, there will be more union, more progress, more genuine love.

HOW SHALL WE EVANGELIZE?

Christians readily accept the Master's great commission, but ask, How shall it be executed? In a country like ours, and with the present pulse of the church, touching obligation to "every creature," it is not easy to answer this question. The population, in many regions, is rapidly outgrowing the capacity of the ordinary means for preaching the Gospel. The remarkable increase of our cities within a few years, has rendered the proportion in them much larger of those who do not come under the influence of established religious institutions. Churches can not be formed, often, because there is no proper material, and they could not be supported, were they formed, because of the indifference, or opposition, of the people. Where there are churches, pastors are unable to multiply their labors so as to reach, by their direct ministrations, those who will not come to the house of God. Faithful and efficient preachers can not be supplied in sufficient number to meet the necessity, and the expense of sustaining them would be beyond the ability of those who will do what they can. There is no question, therefore, now more important, or made more emphatic by the facts that are forced upon our notice, than this: How shall our population be evangelized?

A recent canvass of one of our most fully supplied eastern cities revealed the startling fact that one-seventh part of the families were without a copy of the Bible. In several other cities it was found that the entire capacity of the churches would not accommodate more than one-quarter of the population, and that only about one-fifth of the children were attendants in Sunday School. Large tracts of country, being rapidly settled, in some cases including several counties, were reported as having no Protestant houses of worship, and no regular evangelical ministers. And, in every part of the land which had been explored, the very limited agencies for the maintenance and diffusion of the Gospel were made the occasion of special comment by those who were gathering statistics.

It is believed that a careful survey of the States and territories on the Pacific would exhibit quite as sad proof of the inadequacy of the existing means for the evangelization of our people, and, when we include the increase of inhabitants we expect within the few years to come, the prospect may well occasion anxious thought. Much may be done by colporteurs, and those who shall organize and care for Sunday Schools, as they distribute bibles and religious publications of every form, and enlist the few who can be pressed into such service in the local support of their work. Much may be done by general missionary labor, and through the papers, which may gain access to some reached by no other means. But a wide margin must remain beyond the limits of all these agencies, over which the power of the Gospel is not felt.

There seems to be a demand it is not safe to disregard, for some new methods of preaching. It may not be wise to license and ordain a large number of men, who have not been prepared, by the usual amount of study, for the sacred office. But, in some way, the vast and varied abilities now, for the most part, lying dormant in the *laity* of our churches, must be made available for preaching the Gospel. This is being done — or, rather, is being begun — in Great Britain, with cheering success, and it may be done here. No people can be found among whom so many men able to speak in public, with power and profit, can be selected as are known to be among us; and there are no people more susceptible to the power of public speech.

We may be thankful that the attention of both the great Assemblies of our church was given to this subject at their last sessions, and the eyes of multitudes in the new regions of our country are eagerly looking for some adequate plan by which, according to our ideas of ecclesiastical order, the Gospel may be more abundantly proclaimed.

Then, in addition to this, there is urgent need of a baptism of fire to come upon our churches at large, as in apostolic times, that all — each one bearing proof that the cloven tongue rests upon him, and needing no other commission — may "go everywhere, preaching the Word." Then will follow apostolic success.

VICTIMS OF ADVANTAGES.

Intellectual superiority, wealth, and high social position are the idols of the day. On the western continent, under the influence of republican institutions, they seldom continue long in the same family. Dr. Beecher used to say that, were it not for the annual levy which the large Atlantic cities made on the rural districts, they would, in two generations, become peopled with a race of pigmies. It is a true as well as trite saying, among the Bostonians, that a majority of their successful business men came, years ago, from the farming towns of New England, with their entire fortune tied up in a cotton handkerchief. The same is essentially true of all the larger cities of the eastern states.

The energy, enterprise, and successful prosecution of business in San Francisco are to-day repre-

sented by self-made men. It will always be so. Forty years from to-day, the influential, wealthy, and persistent business men of this city—the men who will give character and tone to its commercial, financial, and social life, will be — not the sons of the rich and prosperous men of to-day, but the lads who are now laboring for a livelihood, and sharing with their parents the privations of poverty. Some of the boys who, in 1868, are running, bare-footed and begrimed, in the alleys of the city, will, in 1900, be the merchant princes, bankers, and leading business men of the metropolis of the Pacific coast.

Nor are the sons of men of "overgrown fortunes" the only victims of "advantages." In every grade of the so-called prosperous classes there is generally a system of training adopted which is certain to engender effeminacy. Almost every man who has struggled with hardship and privation, resolves that his children shall enjoy the advantages of which he has been deprived. He wishes them to possess healthy, symmetrical bodies and active, well developed minds. So he divides their time between school and play, with never a duty or a care, and he supplies all their wants, as far as money and kindness will do it. His poorer neighbors envy him, and would imitate him, if they could.

By and by his petted darlings approach manhood and womanhood; but, somehow, they do not quite realize his expectations. They have more grace, perhaps, but certainly less physical stamina and energy of purpose, than the poor lads and lasses who have been compelled to labor in field, shop, and kitchen. They have a smattering of accomplishments, but, in solid attainments, they are not one step in advance of those who have been only half of their time at school. They do not seem to grasp anything firmly. There is the velvet glove, but not the hand of iron. They look well and dress well, and are lifted, by influence, into creditable positions, and, with some prompting, get on tolerably well. Yet, step by step, the unkempt brotherhood gain on them in the arena of practical life. For a time, it is neck and neck between blood and muscle; but, at length, the underbred distances his well groomed rival and forces him to take a second-rate position. This is, of course, not always the case, but so often that none but relatives are surprised.

Hardship and privation are powerful aids in developing mind, muscle, and sound morals. This is a harsh thing to say to an indulgent father or mother, but it is stern truth. Teachers and libraries can not develop brains, nor cooks get up vigorous constitutions. The necessity of effort, persistent and energetic — of resolution to struggle manfully with difficulties, must be early cultivated and practiced, if we would have our children endowed with vigorous physical and mental capacities.

CONTRIBUTIONS.

"The Meek shall Inherit the Earth."

Seven is called a perfect number; it occurs very often in the Bible. Seven days are our appointed week. God created our world in six of his days, and rested the seventh.

In the beatitudes, there are seven characteristics, all of which combined in one make a perfect character. The seven blessings assigned to this perfect character, constitute perfect blessedness. One of these blessings—"To inherit the earth"—includes all worldly good, while the other six make a perfect heaven, where a perfect character will be perfectly blessed.

In our Lord's prayer there are seven petitions—three for God and four for ourselves. As, to pray: "Thy kingdom come," means that we ought to pray for God's blessing upon all agencies employed to advance that kingdom, so, to pray: "Give us this day our daily bread," teaches us to bring all our temporal business and wants to our heavenly Father for His blessing. This lesson learned and practiced would save from many a pecuniary disaster, and lift many a poor man to comparitive ease and comfort, because "The blessing of the Lord, it maketh rich, and he addeth no sorrow with it."

Many of the answered prayers of the Bible are for temporal deliverance and blessing. When Jacob went out from his father's house, his prayer that God would keep him in his way and give him bread to eat and raiment to put on, was abundantly answered. When he wrestled all night in prayer that the wrath of his brother Esau might be appeased, like a prince he prevailed.

Paul prayed against the thorn in his flesh, and was heard and granted such measures of grace as met his difficulty. "Give us day by day our daily bread," and "the meek shall inherit the earth," are a prayer and promise on which we may surely rely.

Our heavenly Father has fully encouraged us to bring all our worldly wants to him. He who gave us life, is well pleased to give us meat. He who gave us a body, is well pleased to give us raiment.

"Ye, being evil, know how to give good gifts unto your children—how much more shall your Father which is in heaven give good things to them that ask him."

Honor thy father and thy mother," is a command with a promise of long life and prosperity. Are you in doubt? Commit your way unto the Lord, and lean not unto your own understanding; in all your ways acknowledge Him, and He will direct your steps. "Blessed are the meek, for they shall inherit the earth." W.

ORIGINAL EXTRACTS.

There is a strong disposition in men who write despatches and newspaper paragraphs to find some reason why those who undertake to transport us from one part of the country to another, are not to be held responsible, if while in their hands, we are killed, instead of being carried. We are told that on an Eastern railroad, on a cold night, a train was running behind time, at a high rate of speed, over a bridge fifty feet in height, when two cars were precipitated into the abyss, and forty-seven passengers were killed. Yet, it would probably never be known, we are also told, what caused the accident, or if there was any cause, it must have been the breaking of an axle, or a wheel! When will such high-handed trifling with human life be punished as it deserves? and when will the public refuse to believe that there is not sufficient cause for such a horrible sacrifice in the facts, as they are given us?

J. S. Van Winkle & Co.

Dealers in

IRON, STEEL, PIG IRON, CUMBERLAND COAL, BOILER TUBES, GAS-PIPE AND FIXTURES, AND RIVETS OF ALL SIZES.

A large assorted stock of Blacksmith Tools; best quality New York Hand-made House Nails. Carriage, Plow, Machine, and Norway Philadelphia Bolts. Having agents in New York and Liverpool, to select first class goods, we are prepared to fill all orders with dispatch, at the lowest market rates.

Corner of Battery and Bush streets, San Francisco, and 93 I St., Sacramento.

Electro-Silicon.

This wonderful product of nature and the Pacific Coast (the two do not often work together) has fairly electrified New York. No sooner had its powers been tried on a seal ring, at Ball & Black's, than a rush was made for the establishment, and it required 100 Metropolitans and all their stars, to keep off the mob. Finding the pressure too great to be borne, the police bethought them of applying Electro-Silicon to the rioters' persons, which were consequently rubbed out of existence in a very few minutes. By the last Panama steamer, orders were received, by KEITH & CO., for 200 gross, which, at fifteen dollars per gross, are worth the sum of $3,000, a handsome order for an article discovered but yesterday.

Presbyterian Board of Publication.

The publications of this extensive house comprise works in all departments of Religious Literature, including Commentaries, Annotations, Religious History and Biography, Sermons, Bible Dictionaries, Devotional Books, etc., etc., together with a large assortment of

SUNDAY SCHOOL LIBRARIES,

To which the attention of Sunday School Teachers and Officers is requested.

Besides the Presbyterian Psalmodist, the Presbyterian Juvenile Psalmodist, and Children's Praise, this house publishes that new and popular collection of Hymns and Tunes, called

THE HYMNAL,

An admirable compilation of Hymns and Tunes suited to Congregational Singing.

Correspondence.

A FEW WEEKS IN ALASKA.

Sitka, A. T., Dec. 5, 1867.

Editors Occident:—In the early part of June, while passing a few days among the grazing lands of Mendocino County, my attention was first called to Russian America by the discussions of the San Francisco press and the speech of Mr. Sumner.

A few months later, one Sunday morning in October, I awoke amid the quiet waters of the bay which lies in front of its leading town—Sitka; surrounded by a world of mountains, whose dark bases, shaded by great forests, precipitous sides gleaming with waterfalls, and lofty summits capped with eternal snow, gave to the scene a character of immensity, infinite beauty, and vast grandeur.

Before us lay a town of nearly two thousand people, having, in its external appearance, and the characteristics of its occupants, no resemblance to the Anglo-Saxon towns of the Pacific coast. On the right were the warehouses of the Russian Fur Company, the Governor's residence, the churches, and the houses of the Russian and Creole (half-breed) population. On the left, stretching in a long line down the beach, were the lodges of the natives, who number over a thousand. There was a large gathering of canoes around the steamer, for the purpose of selling deer, wild fowl, fish, and samples of their workmanship. They belong to the Kolosh tribe, and are of a type far higher than the California and Oregon Indians — having a larger size, better shaped head and features, and a higher mental development. They have far more skill in mechanism, live in better cabins, and are more provident of the future.

Yet these natives, whose village constitutes one-half the town of Sitka, are not the peers of the native race, as seen at Kodiak and the Aleutian Isles. They are more heathenish, more treacherous, more cruel. This is seen in the greater tenacity with which they cling to ancient superstitions. When a chief is about to die, it is a traditionary practice for him to name two persons to accompany him to the "far-off hunting ground." At his demise they are summarily despatched, and the three bodies are burned together. It has required the constant vigilance of the Russian officers to stop this practice, and it was only done by purchasing the intended victims and transporting them to Kodiak. The price paid was usually twenty blankets. There is now at Kodiak a colony of these "transports" and their descendants, numbering over sixty.

The practice of cremation is peculiar to the Kolosh Indians—not prevailing among any other of the tribes on the coast. The body is placed on a large pile of dry wood and fagots. While the flames are progressing the relatives dance, sing, shout, and howl, making a jargon offensive to musical ears. After the body is reduced to ashes, these are gathered and deposited under a wooden monument resembling a large box, the front and sides of which are marked with strange figures. The native burial ground, occupying an elevated ridge back of their village at Sitka, is covered with these monuments.

The natives of Russian America are proverbial for their skill in fashioning a multiplicity of household utensils and war implements. In carving, they rival the Japanese, from whom, many ages ago, they probably derived the idea of giving quaint and curious forms to wood, horn, and ivory.

Twelve months ago these "curios" could be purchased for the merest trifle, but of the hundred naval and army officers who had been in port, a majority had been, of late, busy in procuring novelties to send home to their friends. We could not buy from the canoes around the steamer, except at an exorbitant price. So a day was set apart by several of us for making a visit to the Indian portion of the town.

Passing the sentry at the opening in the stockade which shuts them out from the town proper, we entered a sort of market-place, where twenty old crones, with faces painted with oil and soot, were sitting alongside some questionable piles of fish and game. In one of the large cabins beyond there were some twelve males sitting on the ground in two rows, facing each other, singing a monotonous song, swinging their arms, and gesticulating most grotesquely, while they were furtively shifting from one hand to another a few pebbles or shells. This, we learned, was a gambling scene — a game something between "odd or even" and sleight of hand dexterity. A bundle of little sticks before each one served for checks, which pass among themselves as "legal tenders" in barter for whiskey, or more essential articles for an Indian's comfort.

Their dwellings, or "lodges," are about twenty-five feet square, built of logs, about ten feet posted, and extend in line along the water-front. I counted over eighty dug-out cedar canoes moored in front, and fastened by ropes made of the wild nettle, which grows abundantly on the island, and is covered with a coating of the toughest fibre. Around each cabin are a group of wolf-faced dogs, which lie torpidly during the day, and howl dismally all night. Five or six slippery steps lead up to a hole not unlike the opening in a kennel, which is the only entrance — then there is an equal descent, down greasy steps, to what constitutes the floor. In the centre burns a huge log fire, the sticks laid crosswise, in cob-house fashion. The smoke works its way up through an opening in the roof. Seated around the fire in abject laziness, were the occupants, old and young, of both sexes. They have no tables, a few low stools, a large quantity of wooden trays, copper kettles, horn ladles, bowls, and spoons, and a numerous variety of wooden spears, lances, and darts, pointed with bone and ivory.

The most curious articles of workmanship are their ladles and dishes, skillfully wrought out of the huge horns of the wild mountain sheep, which live on the mountains of the mainland. They are a fleet animal, and every traveler who has tarried long about the Cascade range will well remember how he has seen them leap down from crag to crag, striking upon their horns, and bounding again upon their feet, with a fleetness which no other quadruped can equal. The ladles have long handles, fancifully carved like a goose's head and neck, or a fox's leg. The dishes are neatly carved, and some of them will hold a gallon. The dart is a wooden shaft, five feet long, rimmed with a bone socket at the end. In this socket is inserted an ivory point, sharply barbed. When the sea-otter is struck by the shaft he dives. The point is detached, and being fastened by the string to the shaft, the animal drags the wooden missile till, wearied, he falls an easy prey.

In each of these native lodges are little coop-like apartments, ranged along the walls, which serve at night for separate sleeping-rooms, and in which each one stores his choice goods. Piled on the tops of these rooms are heaps of smoked salmon, game, skins, and a variety of articles, emitting odors most ancient and fish-like. Our entrance into their cabins did not disturb or surprise them in the slightest degree. They were ready, but not anxious, to trade with us. Like most other human beings, they are disposed to treat every one well who treats them well — at least I have invariably found this the case when traveling among the aboriginal races of this coast. Now and then we saw an invalid in their lodges — victims of the consumption which exhibits the same unmistakable symptoms here as in the eastern States. Flint-lock muskets are hung up in every cabin, for the Russians, years ago, furnished them with fire-arms to kill the wild fowl, but did not allow them to kill fur animals with the gun, as the noise drives the seal and otter to new haunts.

The females are not abused by their husbands so badly as east of the Rocky Mountains. They have less of drudgery to perform, are allowed equal privileges in trading, and accompany them in fishing and hunting excursions. They have the hideous practice of occasionally streaking, and sometimes entirely covering, their faces with black paint. At first I was told that it was a badge of mourning, but its frequency led to a second inquiry, when I found that it was an ancient custom. Their complexion is much fairer than in California, and is a shade lighter than in Minnesota. Still, unlike the Ounalaskan maidens, none of them have "chubby, pleasant faces." Some of them have married Russian laborers, and, proud of their association with the Caucasian race, maintain a strict fidelity, which some of the dames in our larger cities would do wisely to imitate. Yet these are exceptional instances. In no native language on this coast is there any word to designate female virtue.

Nearly all the women of this tribe adopt the ancient custom of boring the under lip half an inch below its edge, and always wear a *labret* of ivory or wood inserted in it. Instead of the "chignon," they have a profusion of long, fine hair, hanging often far below the shoulders. If the entire truth is to be told, I will add that, in combing these dark ringlets, it would not be desirable to use an implement with teeth too finely set. Yet they by no means entirely ignore cleanliness. A leading Boston editor said, a few weeks since, that there were ladies who walked on Washington street — beautiful ones, too — who had never been thoroughly washed since they were first bathed in New England rum. These Kolosh women bathe every morning, and I have heard them splashing in the blue Pacific while yet the thick darkness brooded over its waters.

The Indians of the Sitka group of Islands are warlike and aggressive. They early taught the Russians what the Ounalaskans failed to do, that it was cheaper to treat them kindly than to attempt to enslave them. They are fond of whiskey, and the fur company has furnished them under a rigid license, or governmental system. It is to be feared that, under our government, the supervision will be less scrupulous and restrictive. Orient.

A Half Week in Sacramento.

The first storm in December appeared to be over, the sky was clear, the index of the barometer pointed at the words "very fair," and it seemed a good time to visit the State Capitol and spend a Sabbath in paying a long standing pulpit debt to an esteemed ministerial brother. But clear skies, as well as the smiles of beauty, are sometimes deceitful; and barometer dial-plates are not to be trusted in winter. Except in time of storms, the mercury always stands higher in winter than in summer, and, therefore, the elevation which ought to be read "very fair" in summer, ought to be read "changeable" in winter. The misgivings occasioned by the knowledge of this

fact were, however, disregarded, and thus it happened that the pulpit debt alluded to above was paid on the stormiest Sabbath within the memory of the "oldest inhabitant."

The Legislature still holds its sessions in the old Capitol, in halls familiar to the writer ten years ago, the appearance of which has suffered no change. But few of the former occupants of legislative seats, however, are now to be seen, and this is a change suggestive of thoughts not untinged with sadness. There is another and great change, which is cause for gratitude: that daily sessions are now opened with prayer to Almighty God, by regularly appointed chaplains. It was an impressive scene; the Speaker's tribunal vacated to give place to the man of God — the full assembly of Senators standing reverently while thanksgivings were offered for mercies received, and prayers for blessings needed, alike by law-givers and people. May the day never come when the Christian character of our institutions, as framed by our Christian forefathers, shall be so widely and influentially denied by infidels, or misguided Christians, that it shall be decreed that daily public homage shall not be paid, in our halls of legislation, to the King of Kings! The Rev. J. S. McDonald, pastor of the Presbyterian church on Sixth Street, as chaplain of the Senate, performs his duty with a becoming simplicity and propriety. The business of both Houses was despatched with rapidity; short speeches were made, and, altogether, the impression produced was that this Legislature means business. Certainly the early election of the U. S. Senator is a good omen.

Two or three visits in company with the Senate chaplain may be mentioned. We paid our respects to the Governor, whom we found at home in his office, and who bears with easy grace his new honors. Those who have been acquainted with Gov. Haight's Christian character, and his connection with Calvary Presbyterian Church, as a ruling elder, will be gratified, but not surprised, to learn that he has given notice that he receives no visits and transacts no business on the Sabbath, and attends the Presbyteryian church as a regular worshipper. He treated us with great courtesy in our brief visit, and entered with interest into conversation on matters of education and religion.

The very able and scholarly pastor of the Congregational church, Rev. Dr. Dwinelle, welcomed us to his study. His congregation is one of the oldest in the State, and the church is a monument of the pioneer labors of the present editor of *The Pacific*. The piety, staunch orthodoxy, and pulpit ability of Dr. Dwinelle are such as might be expected in a minister who was, for many years, a standard-bearer of the Gospel in the good old city of Salem, Mass. During his five years' settlement in Sacramento, over one of the most important congregations in the State, he has constantly employed both pen and voice in defending the truth, and exposing the infidel character of that religious teaching which denies Bible inspiration and atonement through the blood of the Son of God.

The Presbyterian church, under the charge of its young pastor, to whose persevering labors it owes, in large measure, its existence, has at length struggled up to what may be called a prosperous position. The blessing of the Lord has followed the labors of his servant, who, beginning three years ago with a handful of hearers, in the Senate chamber, has at length gathered in, by real shepherd's work, a goodly congregation, meeting in a modest, but neat and pleasant church edifice of their own. The Christian sympathy and material aid extended to this enterprise by liberal hearts and hands in San Francisco have not been thrown away.

A half day was profitably passed in the State Library. One large room is filled with law volumes in legal calf, containing copies of digests of the laws of all the States of the Union. This and three other rooms contain the most valuable and costly collection of well selected books in the State, The total number of volumes is not far from 22,000.

The new State Capitol buildings are well situated at the intersection of two wide avenues. The substructions are astonishingly massive, and the whole building, of brick and solid granite, is so strongly framed together as to seem designed to stand while the world lasts. When completed, the architectural effect will be imposing and worthy of the chief public building in a great State.

From the yet incomplete walls of the dome one of the most extensive views in the world is obtained. The traveler who has visited Milan, Italy, is reminded of the vast plains of Lombardy, bounded, on the one side by the glistening, snow-clad Alps of Switzerland, and on the other side by the lower and darker range of the Maratime Alps of Italy.

The levees on the north side of the city were the last objects of interest visited. The American River had been led, by engineering art, into a partly new channel, and, although its threatening waters were almost as high as in some previous destructive floods, the raging currents no longer dashed, as formerly, against the levee, which was here strengthened by facings of granite boulders. Fears for the safety of the city were at once dissipated by an inspection of the improved levee.

The wisdom and value of a good levee system have been made apparent during the recent floods. It was undoubtedly a great mistake to locate a city on ground subject to overflows, when high ground was only three miles distant; but it has at length been demonstrated, by the indomitable energy of the citizens of Sacramento, that here as well as in Louisiana, a great city can be secured by levees; and it will be a still greater mistake to abandon any part of the rich lands on the banks of the Sacramento to the mercy of periodical floods, by neglecting to construct levees of sufficient strength and magnitnde to protect them. V.

AN EXAMPLE.

The pastor of one of the Presbyterian churches in this city requested his congregation to remain after the benediction to hear a statement in respect to THE OCCIDENT. A copy had been placed in each pew. The result was that 120 papers were subscribed for by those who wish them in their families, and eighty additional pledged for the general use of the congregation — in all, 200 copies. Let this example stimulate others. When THE OCCIDENT has 1,500 subscribers, the publishers promise to add four pages more to it, which will make its issue of the size of the *Bulletin*. W.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Current Literature.

RECENT PUBLICATIONS.

LIBER LIBRORUM, ITS STRUCTURE, LIMITATIONS AND PURPOSE. A friendly communication to a reluctant sceptic. New York: Charles Scribner & Co. San Francisco: H. H. Bancroft & Co.

As intimated on the title page, the writer of this book undertakes to remove the doubts and answer the queries of one who feels himself obliged to be sceptical in respect to the Bible. The arguments are well stated and conclusive for the most part, and so far as the effort is aimed at the great purpose of Infidelity now, to undermine confidence in the word of God, it is worthy of more study than are many of those which have the same design. Yet it may be questioned, whether too much credit for sincerity is not given to one who chooses to shut his eyes to the proof that the Bible could not have had any human origin. What gain for the advocate of truth can come of the admission that he who refuses to accept it, when demonstrated, is nevertheless honest, and thoughtful, and "reluctant" in his infidelity? Indeed, it may be doubted whether there are any such sceptics in relation to the divine authority of the "Book of Books." Christians are too ready to make unbelievers comfortable and excusable in their position. That the sun shines can be actually known by vision, and from its effects, and the prevailing assumptions of infidels should lead us to insist that in by far the majority of cases, those who reject the Bible will not see, or will not study. While, therefore, we should present the proof, as this author has well done, we need not diminish its force in advance by apologizing for the willingness of too many to turn it aside.

THE LAND OF THOR. By J. Ross Browne. New York: Harper Brothers. San Francisco: C. Beach.

This is a pleasing, and, so far as we are able to judge, a reliable exhibition of life in Northern Europe, by one of our California authors, already known to the public, who informed himself by travel among those of whom he writes. There will be various opinions respecting the style, in some of its peculiarities, but the volume will give good return for the time spent in reading it.

DEUS-HOMO. By Theophilus Parsons. Sold by Bancroft & Co., and A. Roman & Co.

Taking advantage of the interest which the "Ecce Homo" and the "Ecce Deus" had excited among thinkers, the author of this book conceived the idea of uniting the two in a title for his attempt to gain favor for Swedenborgianism. If the "New Church" does not receive support from better rhetoric and sounder logic than are found here, it will hardly prove itself to be a new dispensation.

HISTORY OF THE BOOKS OF THE BIBLE. By Professor Calvin E. Stowe.

There are few men more fully prepared to write such a book as this than Prof. Stowe, and it is emphatically a book for the times. Able, clear, suggestive, popular in style, it is admirably adapted to the instruction of all classes. It is now sold here only by subscription, but it should be for sale in all our book stores.

WEBSTER'S NATIONAL PICTORIAL DICTIONARY. Illustrated by William A. Wheeler. Springfield: G. & C. Merriam, Mass. San Francisco: H. H. Bancroft & Co.

It is too late to commend Webster's Dictionary, though we may commend this very convenient abridgment of the great work, and the very pleasant manner in which it is made pictorial. Often the attempt to make a compend of a valuable work gives us one that is almost worthless; but, in this instance, we have an exception, and, for ordinary use, one could hardly desire a more complete dictionary.

MACKENZIES' TEN THOUSAND RECEIPTS. Sold by agents of H. H. Bancroft & Co.

The ambition of the compiler of this book was satisfied with 5,000 receipts when it was first issued, but a wider range and more extended knowledge have doubled the number. Of course no individual has opportunity to test the value of all these receipts, but they are said to be reliable, and the great demand for the book is the best evidence of its worth.

We have received, with thanks to those who have supplied them,

Putnam's Magazine for January, 1868, a number fully sustaining its former reputation. From H. H. Bancroft & Co.

The Pacific Coast Almanac for 1868. Compiled by Henry G. Langley, and filled with facts and items which are important for reference.

The Annual Report of the California Prison Commission for the past year.

The Reports of Hospital Associations in Canton and Pekin, China, which surprise us with their exhibition of advance in those cities.

EDUCATIONAL.

Pedestrianism in California.

Dr. Johnson was of the opinion that life had few things better than the "excitation" produced by being whirled rapidly along in a post-chaise. But Sir Walter Scott says that he who has in youth experienced the confident and independent feeling of a stout pedestrian, in an interesting country, and during fine weather, will hold the taste of the great moralist cheap in comparison. It will be noticed that one condition of the happiness of Scott's pedestrian is, that the country through which he trudges shall be "interesting." To the hills and plains of California there are some kinds of interest (and some that the author quoted doubtless had in mind) which are lacking. We refer to the interest attaching to the scenes of historic events, and to that which invests busy agriculture and farm life. If our young men, therefore, would find the country "interesting," through which they incline to make pedestrian excursions, they must prepare themselves to enjoy nature itself. But nature means rocks, soils, flowers, trees, birds, beasts, insects, and landscapes; and these are the objects of which we learn in geology, botany, natural history, and the fine arts. In connection with the last of these, we may prepare ourselves to enjoy prospects, groupings, and landscapes by carefully noticing the pictures of such objects which we find in books, studios, galleries, and print shops.

Clerkship.

A clerk once detained a customer, in writing a receipt for money, a moment longer than seemed necessary. He apologised and explained himself. He said he had been trained under an employer who required his clerks always, before handing a receipt, to give credit for the money on the books. This plan was designed to prevent the possibility of money, once received, being again demanded—always an offense to customers, and an injury to business. That employer had observed that the waiting of the customer prevented the receipt being forgotten; but that his departure with his receipt, often facilitated the forgetting of the credit—the more important matter. It is plain, then, that there is an education for business, as well as for the professions, although the name which is applied to it is oftener *training* than *education*. And, as a scholar would desire in his teacher a good pattern and counsellor in study, so the clerk should aspire to find an employer well-fitted to serve as a model and an adviser in business. His success in life is imperilled the moment he enters an establishment where the account-book is a scrawl, like the first diary of a schoolboy, or where the hints of the proprietor savor of the foresight of idiocy, and the morality of junk-shops.

GENERAL NEWS.

More Mexican Territory.—Senator Shaw has introduced a resolution into our legislature providing for the acquisition of all that portion of Mexico lying north of the 26th parallel of latitude. This would embrace the mouth of the Rio Grande, all of Sonora and Chihuahua, the larger part of Lower California and Coahuila, nearly half of Nuevo Leon, as well as portions of Tamaulipas, Durango, and Sinaloa, and includes the cities of Chihuahua, Hermosillo, Matamoras, and the seaport of Guaymas. It does not include La Paz, however, nor the richest portions of the peninsula of Lower California. It secures the gulf of California and the mouth of the Colorado river, and access thereby to Arizona and New Mexico at all times, and gives an immense extent of new mining land. At the same time it adds an enormous area of barren and desert country, and will necessitate fierce Indian wars and a heavy outlay to protect such acquisitions for the use of our people. The resolution aims to commit our legislature, then the U. S. Congress, and finally the General Government to the policy above named. We suppose it is a fair indication of the sympathies of the democrats, and of very many republicans also.

Promptness.—Promptness is a cardinal virtue. Nothing noble in life can be achieved without it. With it all things are possible. Before it all difficulties vanish, all obstacles disappear. The prompt man is the successful man. He takes time by the forelock. The opportunity comes and he seizes it. Luck is on his side. The forces of nature take his part and act with him. Promptness is not rashness. It never acts blindly. It does not waste its strength in random blows. It strikes at the right moment, in the right place. It is a wide awake faculty. It sees clearly and acts with a wise decision. It does not put off till to-morrow what ought to be done to-day.

Hon. John Bidwell and Wine Drinking.—At a meeting of the Sacramento Band of Hope, held in this city on Sunday, Dec. first, says the Sacramento *Rescue*, Hon. John Bidwell addressed the Band in a brief but pointed speech. He referred to incidents of history in the early settlement of the Valley of the Sacramento, and reverted to the plans he formed concerning the vineyard at his planting. It was his intention to make wine and brandy, but he assured his audience that he now firmly believed that wine was the foundation of drunkenness and an unmitigated curse to man, and declared that no wine should be made from grapes grown in his vineyard.

Newspapers.—In a lecture upon newspapers, delivered in Philadelphia, by Rev. Dewitt Talmadge, he said: "I now declare that I consider the newspaper to be the grand agency by which the gospel is preached, ignorance cast out, oppression dethroned, crime extirpated, the world raised, Heaven rejoiced, and God glorified. In the clanking of the printing press, as sheets fly out, I hear the Lord Almighty proclaiming to all the dead nations of the earth, 'Lazarus come forth,' and to the retreating surges of darkness, 'let there be light!'"

Colored Population not Diminished.—General Howard has written a letter in reply to an inquiry whether the negro vote in the late Southern elections is not out of proportion to the population. He says carefully compiled statistics show an increase of the negro population since 1860. The decrease heretofore alleged was based on the misreport made in December, 1866, which was estimated from very meager returns.

Current Items.

OMAHA has four trains, and three steamers daily; 100 saloons and 8 churches; 2,151 houses; 55 hotels and boarding houses; 3 theatres; 3 printing offices; 1 capitol; 1 court house; 1 jail; 2 daily and 2 weekly papers; together with mills and founderies, bakeries, and manufacturing establishments of various kinds.

THE public debt of California is stated thus: Counties, $12,000,000; State, $5,000,000; Towns, $3,000,000—total, $20,000,000. Annual interest on this debt, $1,600,000. Taxable property in the State, $207,000,000. Tax levied this year, (1867) $8,000,000. Cost of governing the five hundred thousand people of the State, $6,000,000 per year.

THE Message of Governor Smith, of Montana, is published in the papers of that territory. It states that the territory covers an area of 172,800 square miles, and has a population of 65,000. The assessed value of property, exclusive of minerals, is between six and seven millions of dollars.

THE San Jose *Patriot* says that thirteen hundred wagons loaded with families and household fixings, have passed over the new grade at San Jose South, for the coast counties. Santa Barbara and San Luis Obispo counties seemed to have the preference of emigrants.

THE *Quaker City*, which took the Holy Land excursionists through the Mediterranean cities, has returned to New York. She sailed 14,000 miles and on her voyage none of her passengers died, not one was seriously ill, nor did any accident occur.

POSTAGE STAMPS are a comparatively recent invention, but they have gone into universal use in most enormous quantities. England uses 850,000,000 postage stamps annually; France, 450,000,000; and the United States, 350,000,000.

Charles Darwin, author of the *Origin of Species*, has a new work in the press—*The Variation of Animals and Plants under Domestication*: or, the Principles of Inheritance, Reversion, Crossing, Interbreeding, and Election.

IN the "Life of Wilberforce," is the following entry in his diary: "Went to hear Foster. Felt much devotion, and wondered at a man who fell asleep during the psalms. During the sermon went to sleep myself."

THE Boston Journal states, that recently an egg was placed in a vessel of cold water which was made to revolve 232 times a minute. The egg was boiled in six minutes, the only heat being the friction of the water.

IT costs $35,000,000 annually to pay our lawyers, $12,000,000 to sustain the criminals, $10,000,000 to support the dogs, and $6,000,000 to keep the clergymen so that the wolf enters not their door.

THE Alpine Miner has the following in its issue of November 30th: "In the stomach of a cow, killed at Silver Mountain on Monday last, was found gold dust to the value of over ten dollars."

RELIABLE SEEDS.

EDWARD E. MOORE.

425 WASHINGTON STREET.

The undersigned, a Practical Agriculturist, is now prepared to supply the wants of Merchants, Ranchmen, and all others, by wholesale or retail, of such seeds as will not disappoint those who use them, as our seeds after using the utmost care in their selection, in getting them true to their kind. We have suitable grounds prepared to test the different varieties, so as to insure their entire reliability. The assortment consists of ALL KINDS OF VEGETABLE SEEDS, ALL KINDS OF FLOWER SEEDS, ALL KINDS OF GRASS AND RED AND WHITE CLOVER SEEDS; also, ALFALFA AND LUCERNE.

EVERGREEN SEEDS, NATIVES OF CALIFORNIA AND ADJACENT STATES. ALL KINDS OF TREES AND SHRUBS, ALL KINDS OF FLOWERS IN THEIR SEASON, ALL KINDS OF BULBS IN THEIR SEASON, STRAWBERRY AND RASPBERRY PLANTS, Etc., Etc.

The subscriber deems it superfluous to name every article for sale, but merely remarks, that no one has a superior assortment, and no one will deal more honorably by his customers, to whom he refers with confidence, as universal approval has been awarded him. Small papers at wholesale or retail. All communications, or orders, by Mail, or Express Companies, attended to promptly. Catalogues furnished on application, by letter or otherwise.

Extra Baltimore Fresh Cove Oysters

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equal to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings, and all the principal dealers.

FAMILY READING.

Act in the Present.

Look not mournfully back into the past; it cometh not again. Wisely improve the present; it is thine. Go forth to meet the future without fear, and with a manly heart.—*Hyperion.*

Heart gazing mournfully back through past years—
Bringing sad memories, laden with tears—
Life's hours wasted; talents abused;
Bright opportunities blindly refused—
Close up the record fraught with such pain;
Years that have vanished return not again.
Grasp thou the *Present*; be earnest and bold—
Fleeting its moments, more precious than gold.

Watch and fight bravely against sloth and sin;
Pray for the Spirit the victory to win.
Cometh the future veiled and slow?
Go forth to greet her for weal or for woe.
Bringeth she gladness? Praise thou the Lord.
Bringeth she sadness? Bow to his word.
O'er Past and o'er future dim shadows recline.
Heart, be thou manful; *The Present is thine!*

In Church.

When once thy foot enters the church beware!
God is more there than thou; for thou art there
Only by his permission. Then beware.
And make thyself all reverence and fear.
Let vain and busy thoughts have there no part:
Bring not thy plow, thy plots, thy pleasures thither;
Christ purged his temple—so must thou thy heart;
All worldly thoughts are but thieves met together
To cozen thee. Look at thy actions well,
For churches are either our heaven or hell.

—*Herbert.*

How they do it.

"I don't understand how they do it," said Mrs. Warren, thoughtfully.

"You were talking about the Wentworths, as I came in," responded a friend; "was it with reference to them that you spoke as you did?"

"Yes," was the reply. "We don't personally know the Wentworths, but Mr. Wentworth has the same position in society which my husband has; gets the same salary; his children are no older, and they have one more daughter than we. Yet they dress better, and live every way better than we do. How they can do it, honestly, I can't see, for it costs us every penny that is made to live decently, and sometimes we go behindhand. It is a puzzle to me, I confess."

"I am very intimate with the Wentworths," remarked the new-comer, quietly. "As you say, they are no better off with regard to money than you are, but they are great managers."

"O, I hate managing people," said Mrs. Warren, shrugging her shoulders.

"You don't quite understand me, perhaps," said her friend, gently. "I happened to be stoping at the house some three years ago, when Mary was fourteen. Mary is the oldest, and was always an ingenious girl. I remember they had a dressmaker there, and Mrs. Wentworth questioned her very closely about the trade—so closely that she glanced up at last in surprise, saying—

"'Why, Mrs. Wentworth, are you going to make a dressmaker of Mary'

"'I have serious thoughts of it,' said Mrs. Wentworth. 'Will you teach her by the shortest method for a certain sum?'

"Well, the bargain was made, to the good woman's astonishment, and Mary went for two or three hours a day, as one goes to take a music lesson. The consequence is, that for that outlay they have established in their family a dressmaker who never fails them, and who, in her quiet efficient way, aided by her sisters, fits and makes all the dresses worn by her mother, her sisters and herself. Consequently, as the making often costs half as much as the material, all that extra expense is saved, and they can afford to buy a better fabric, one that lasts longer and looks richer. Another daughter was initiated in the art of bonnet-making, and for a bonnet for which you would give ten dollars at a good store they give less than half that sum, and can, consequently, if they wish, afford two bonnets to your one. Of course, all the other sewing is done at home, and special hours are set apart for this work. They sew together, chat together, compare notes, originate tasteful trimmings and fashions, and really outdress and outshine their wealthier neighbors (though I don't think they desire to do so,) on a very much smaller sum. I tried one day to pattern some buttons which I very much admired, but failed, and finally went to them. 'Why, you couldn't purchase them,' said Mary, laughing, 'because we made them ourselves. We obtained some thin rings, covered them, as you see, with gray satin, worked the edge all round with thick silk, in buttonhole stich, made a little bee in the centre with silver thread, and so we procured our stylish buttons, which everybody has admired, for less than half of what we could have bought a very inferior button for.'"

"So that is the way they do it," said Mrs. Warren, thoughtfully. "I wonder I never guessed at it, for certainly my dressmaker's bills are terrible. I always dread to buy new dresses because of the after expenses. But are they cultivated girls?"

"Thoroughly so. Mary sings. She did not wish to study music, so was never encouraged. Alice, the second girl, is a fine performer on the piano; Nellie paints wonderfully, and the youngest has a great aptitude for making bread, I am told, and is a born cook. As I said before, their time is equally divided. There is no hurry or confusion there, for everything seems to be done upon careful system at the right moment. They are all practical workers, and often earn something for themselves by turning their ingenuity to account for their friends. They live simply and frugally. Mrs. Wentworth is a good housekeeper, and everything is turned to some useful purpose, even twine and paper; nothing is ever wasted at meals; whenever you meet them they are neat, and clean, and cheerful. Their reunions at night are something quite delightful, for each one tries to add something to the happiness of the others. They are never idle and never overworked. The house is filled with pretty ornaments of their designing, simple, but novel and beautiful. There is a magic about the family that impresses the most thoughtless observer. The house is a workshop, an art union, where the most delicate designs are originated, and where genius is both stimulated and applauded. Then, you observe, they are all well fitted to go out into the world as independent laborers, should they be reduced in circumstances, or quite competent to manage houses of their own, whether they marry the humblest or the wealthiest."

"I see," said Mrs. Warren, thoughtfully, and there was a new light in her face. "One is never too old to learn."—*Watchman and Reflector.*

CHRISTIAN COURAGE.—Chrysostom, before the Roman Emperor, furnishes us with a most impressive and beautiful example of true Christian courage.

The Emperor threatened him with banishment if he would still remain a Christian.

Chysostom replied: "Thou canst not, for the world is my mansion—thou canst not banish me."

"But I will slay thee," said the Emperor.

"Nay, but thou canst not," said the noble champion of faith again; "for my life is hid with Christ in God."

"I will take away thy treasures."

"Nay, that thou canst not," was the retort; "for in the first place, I have none that thou knowest of, my treasure is in heaven, and my heart is there."

"But I will drive thee away from man, and thou shalt have no friend left."

"Nay, and thou canst not," once more said the faithful witness; "for I have a friend in heaven, from whom thou canst not separate me. I defy thee. There is nothing thou canst do can hurt me."

THE RIGHT PERSUASION.—In terrible agony, a soldier lay dying in the hospital. A visitor asked him,—

"What church are you of?"

"Of the church of Christ," he replied.

"I mean of what persuasion are you?" then inquired the visitor.

"Persuasion!" said the dying man, as his eyes looked heavenward, beaming with love to the Savior: "I am persuaded that neither death nor life, nor angels, nor principalities nor powers, nor things present nor things to come, nor heighth nor depth, nor any other creature, shall be able to separate me from the love of God which is in Christ Jesus."

THE YOUNG FOLKS.

Every Little Helps.

Suppose a little twinkling star,
Away in yonder sky,
Should say, "What light can reach so far
From such a star as I?
Not many rays of mine so far
As yonder earth can fall;
The others so much brighter are,
I will not shine at all."

Suppose a bright, green leaf, that grows
Upon the rose-bush near,
Should say, "Because I'm not a rose,
I will not linger here."
Or that a dew-drop, fresh and bright,
Upon that fragrant flower,
Should say, "I'll vanish out of sight,
Because I'm not a shower."

Suppose a little child should say,
"Because I'm not a man,
I will not try, in word or play,
To do what good I can."
Dear child, each star some light can give,
Though gleaming faintly there;
Each rose-leaf helps the plant to live;
Each dew-drop keeps it fair.

And our good Father, who's in heaven,
And doth all creatures view,
To every little child has given
Some needful work to do.
Kind deeds toward those with whom you live,
Kind words and actions bright,
Shall, 'mid the world's deep darkness, give
A precious little light.

—*S. S. Visitor.*

THE CLEAN APRON.—A lady wanted a trusty little girl to come and help her to take care of baby. Nobody could recommend her one, and she hardly knew where to look for the right kind of child. One day she went through a by-lane, and met a little girl with a clean apron. She went the third time, and saw the same little girl with her clean apron, holding a baby in the door of a small house.

"That is the child for me," said the lady. She stopped and asked for her mother. "Mother has gone out to work," she answered, modestly; "father is dead, and now mother has to do everything."

"Should you not like to come and live with me?" asked the lady.

"I should like to help mother some way, said the child.

The lady, more pleased than ever with the tidy looks of the little girl, went to see her mother when she was at home; and the end of it was, the lady took the child to live with her; and she found, what indeed she expected to find, that the neat appearance of her person showed the neat and orderly bent of her mind. She had no careless habits; she was no friend to dirt; but everything she had to do with was folded up and put away, and kept carefully. The lady takes great comfort in her, and helps the poor mother, whose lot is now not so hard as it was. She smiles when she says, "Sally's recommendation was her clean apron; and who will not say it was a good one?"

TWO KINDS OF BOYS.—"I didn't think," said a smart-looking boy, one day, as he stood with downcast eyes in the presence of a grave-looking gentleman.

"You didn't think, eh? Then I'm ruined, because you are a thoughtless boy. You may go, sir," replied the gentleman, in a tone of voice which expressed both sorrow and sternness.

The boy silently left the room. He too, seemed sad, and a tear glistened in the corner of his eye.

What is the matter? What has he done? I will tell you.

He was an apprentice. His trade was that of a carpenter. It had been a part of his duty to light the fire in the shop half an hour before the men came to work. One cold, windy morning, he lighted the fire as usual, but in doing so he left a shaving burning outside the door of the stove. It was only one shaving. He didn't think it would do any harm, because it was only a little shaving. But a puff of wind from beneath the door of the shop blew the shaving on the floor. There it set fire to another shaving; the fire spread, unperceived by the boy, until it reached a pile of shavings, and blazed up

into the room. Then he started and tried to put it out. But he was too late. It was beyond his control. He rushed out, shouted "Fire!" and alarmed the people. They came, but could not save the shop. It was burned down, and its owner, not being insured, was ruined.

He was ruined, because that boy didn't think.—*Parish Visitor.*

THE FIFTH COMMANDMENT.—An old school master said one day to a clergyman, who came to examine his school:

"I believe the children know the catechism word for word."

"But do they understand it? that is the question," said the clergyman.

The school-master only bowed respectfully, and the examination began. A little boy had repeated the fifth commandment, "Honor thy father and thy mother;" and he was desired to explain it. Instead of trying to do it, the little boy, with his face covered with blushes, said, almost in a whisper:

"Yesterday I showed some strange gentlemen over the mountain. The sharp stones cut my feet, and the gentlemen saw they were bleeding, and gave me some money to buy me shoes. I gave it to my mother, for she had no shoes either, and I thought I could go barefoot better than she could."

MINING NEWS.

NEW MINING REGION.—A Milwaukee newspaper speaks of important discoveries on the northern shore of Lake Superior. The Indians and trappers of this region have often brought pieces of silver ore into the settlements. This has given rise to a general belief that when the shore should be thoroughly explored, deposits of this precious metal would be found. The isolation and ruggedness of the region, however, have discouraged private enterprise, and the peculiar land policy of the British Government has prevented the formation of mining companies. Veins of ore have been profitably worked at the mouth of Pigeon river and on Prince's bay, but elsewhere little or nothing has been done until within a year past. It is about a year since a Mr. McKellar, of Ontonagon, discovered indications of a silver deposit at the head of Thunder bay. This Summer other persons have prosecuted the search. The result of their work is thus told:

"Two veins of native silver have been discovered, besides several others which contain 'silver lead resembling that contained in the mines about Marquette. The former are situated on Currant river, about three miles from Thunder bay. One is eighteen the other seventeen feet in width, their general course being east and west, and their distance apart one mile. They carry considerable native silver, and also a slight percentage of ore—sulphuret. One of these veins has been explored for a distance of three or four miles, and is found to be continuous and well defined. Two shafts have also been sunk upon it, and have yielded well thus far, although no assays have yet been possible.

RICH GOLD DIGGINGS IN NORWAY.—Mr. Ashburn furnishes us a translation from The Scandinavian, of October 17th, in regard to the discovery of gold mines of almost fabulous richness in Norway:

"These fields are found in the northern part of Norway. It is said that a tributary of the Tana river, which forms, in part, the boundary between Norway and Lapland, on account of the late Spring and high water, changed its channel in one place, and in the old bed of the stream gold was found; not only in fine dust, but also in large lumps. One person, who has been in California, states that the locality where this discovery was made, resembles very much the gold fields of that State. Gold is also said to have been found in Alten. The Christiana Morgenblad has information from Finmarken that wages for workmen engaged in gold washing in the rivers, has gone up to several dollars specie per day."—*Transcript, 4th.*

THE laborers in the Union Copper Mine were discharged last Saturday, with the exception of a small prospecting force below. The company has some four hundred tons of first-class ore now lying on the ground awaiting shipment, which is rendered difficult and expensive by the bad condition of the roads. Work will not be resumed until Spring. The late fire and the suspension of work on the mines promises a dull and cheerless rainy season for Copperopolis.

Pacific Medical and Surgical Journal.

NEW SERIES. PUBLISHED MONTHLY.

The editorial management is in the hands of Dr. Henry Gibbons, a veteran in his profession, formerly Professor of Theory and Practice in the Philadelphia College of Medicine, afterwards President of the California State Medical Society, and now Professor of Materia Medica and Therapeutics in Toland Medical College, and Dr. Henry Gibbons, Jr., whose extensive experience in a large hospital in Washington, during the war, has familiarized him with modern surgery, and qualified him to take charge of this department. Besides, we have secured the assistance, as collaborators of a corps of eminent physicians, representing the body of the profession on this coast.

TERMS.—$5 00 a year, or $2 00 for six months, payable in advance, in gold coin. Postage pre-paid by the Publishers.

PUBLISHED BY BANCROFT & COMPANY,
San Francisco, Cal.

One copy of the PACIFIC MEDICAL AND SURGICAL JOURNAL and one copy of THE OCCIDENT (subscription price $4.00) will be forwarded one year, to one address, for $8.00.

BANCROFT & COMPANY, San Francisco, Cal., are the exclusive Publishers, for the Pacific Coast, of

Putnam's Magazine,

FIRST NUMBER, JANUARY, 1868.

This publication will be similar in character and general appearance to the former series of *Putnam's Monthly*, which ranked, during its existence, as the ablest periodical in America.

High-toned papers on matters of national interest, popular science, and industrial pursuits; and sound information and instruction on important topics, will be specially cultivated.

In the lighter articles, healthy entertainment and pure amusement for the family circle, will be carefully chosen from the ample resources presented by a large circle of contributors.

TERMS OF SUBSCRIPTION.—Four dollars per annum, in gold coin, payable in advance. Postage prepaid by the Publishers. Direct all communications to

SAN FRANCISCO, CAL.

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, 50 cents.

F. E. WEYGANT, Proprietor.

PACIFIC COAST ITEMS.

THE Grand Jury of San Francisco County closed its session last Saturday. Among notices of crimes they report, thus: "We call attention to the total absence of any check upon prostitution, and to the shameless effrontery with which it is practiced in our city. In a large commercial community the vice can not be suppressed, but it should not be ignored. The experience of older communities proves that a strict surveillance, the collection of a heavy tax, and the enforcement of sanitary regulations, are the most efficient means for abating this vice and mitigating its evils. We earnestly recommend the passage of an ordinance containing these provisions. We also call attention to the want of adequate legislation for the punishment of seduction."

THE "Eisner-Robitscheck tragedy," which occurred some two weeks since, in this city, at a store on the corner of Sansome and Merchant streets, is a singular, mysterious affair. The Coroner's jury have not yet finished their investigations. Both were natives of Bohemia, both Jews, and intimate friends. Eisner, on leaving for Europe, two years ago, placed $50,000 in keeping of Robitscheck, in trust. On his return, a few weeks ago, they disagreed in making a settlement, and the affair terminated in Eisner's death.

ON Sunday, a middle-aged man committed suicide, at the embankment north of the foot of Vallejo Street, in this city, by drowning. Before doing so, he emptied his pockets of trinkets and trifles, and gave them to the boys near by. He then filled his pockets with rocks and leaped into the water. His person bore evidence that vice and disease led to the act, that he was once a resident of Norwich, Ct., and his name was Patrick Shandley.

THE Supreme Court of California has decided that mining claims, mortgages, schools, churches, libraries, and charities must be taxed hereafter. This will probably add $50,000,000 to the taxable property of the State. In San Francisco the churches, charities, and educational institutions are worth about $5,000,000, and, at the present rate of taxation, would pay $12,000 to $15,000 annually.

CHARLES MORGAN, of Petaluma, coming to this city on New Year's, very considerately put up at the Russ House, but inconsiderately, on retiring, blew out the gas-light as if it were a tallow candle. The next morning he was found insensible, and with difficulty was restored to consciousness. Charles must have come from Pike County.

RELYING upon the tenor of the California press, we infer that during no period of her history have the substantial interests of this State been more prosperous than during 1867. Especially is this true of farming, which has now become, and will continue to be, the leading interest in the State.

THE *Times* says, "The Butchertown question was discussed vigorously in this city all last year, yet the butchers are just where they where twelve months ago, with the superadded fact that their neighborhood is more odoriferous by a year's additional deposit of filth."

THE great rain-storm of 1867–8, though severe, has done only trifling damage, compared with that of 1862. Santa Clara County had its face washed cleanly, and a few of the Yolo farmers had to "climb a tree." The levees shielded Sacramento and Marysville.

THE funeral services of the late Commodore James T. Watkins took place at Grace Church, on the 2d inst. He died from an accidental fall down a hatchway, on the steamer, between Yokohama and Hongkong.

VOLNEY E. HOWARD, of Los Angeles, proposes to start, in this city, in February, a new daily morning paper, under the title of "*The Pacific Press*. It is to be the organ of the 'war,' or anti-secession Democrats.

THE local press of this city say the inclement weather has largely increased the number of applicants for charity among the poor. The San Francisco Benevolent Association aided 520 during the past month.

COL. EDWARD MCGARRY, well known in military circles, and to old residents, committed suicide, by cutting his throat, at the Occidental Hotel, on the 31st ult. He was a native of New York, and 47 years old.

HON. CHARLES MACLAY was elected to the State Senate on the 2d inst., by fifty-nine majority, to fill the vacancy made by the death of W. J. Knox. Mr. Maclay was the Democratic candidate.

PROMINENT citizens of Petaluma are taking measures to organize a company, to build a railroad from Petaluma to Healdsburg. Several thousand dollars have been subscribed.

GEN. PHIL. SHERIDAN is reported to have left off his gross profanity. If so, it is one of his greatest victories.

THE *Times*, of this city, says that there have been fewer fires, wrecks, and serious casualties, during 1867, than usual on this coast, but no diminution in the number of suicides.

GEORGE C. GORHAM, Prof. B. Silliman, and Judge Cowles sailed for the east on the opposition steamer of last Saturday. The *Nevada* had a full complement of passengers.

GEN. MCDOWELL has been removed from the command of the Pacific Department to that of the Department of South Carolina. Gen. Ord succeeds him.

A TIN company, with a capital of $4,000,000, has been formed in this city, to work the tin mines in San Bernardino County.

THE *Alta California Almanac* is a very useful compendium for reference in all matters pertaining to the Pacific Coast.

TELEGRAPHIC SUMMARY.

POLITICAL.—Gov. Bullock, of Massachusetts, in his inaugural, takes conservative grounds, opposes confiscation, favors the restoration of southern whites to equal rights, but insists on all the guaranties given to the blacks.....The eastern Democrats are divided between Gen. Hancock and Horatio Seymour as candidate for the Presidency.....Gov. Flanders, of Louisiana, has resigned, and Johnson Baker, a Kentucky conservative, has been appointed his successor.....Mr. Broomall has introduced a bill in Congress to provide for the redemption of greenbacks, in sums less than $100, when presented, for the first month paying a certain sum (say 1.34) in gold; the next month one-half cent less, and so on, until gold and greenbacks become of equal value.

MISCELLANEOUS.—Mr. Burlingame, our Chinese Minister, has been empowered, by the Chinese Emperor, to adjust all disputed matters between that government and the powers of Western Europe. He is now on his way to London, *via* San Francisco, leaving the duties of the American Mission in the hands of his Secretary.....The weather at Sitka this winter proves colder than was anticipated, but the report that the United States troops are suffering from frozen limbs is absurd. The rumor of new discoveries of gold this winter is got up for the special benefit of those who own the transport line between Victoria and Sitka.

FOREIGN.—King Emanuel of Italy declares in favor of the national wish that Rome shall be the capital of his kingdom, but advises patience.....Dr. Livingstone, the African traveler, is alive, well, and traversing the wilds of Southern Ethiopia.....The Fenian excitement is unabated in Ireland and England, to the alarm of the Government, who are preparing to meet any outbreak.....Juarez is getting more firmly established in Mexico, and urges a remodeling of the government after the plan of the United States. The Mexican treasury is empty, and the Minister of that department has resigned.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, Jan. 8, 1868.

FLOUR—Sales include 100 bbls low grade Superfine, $6 50; 200 bbls Extra, interior brand, $7 75; 550 bbls Oregon Extra, part per Ajax, private; 550 bbls Extra, interior brand, private. We quote Oregon Extra firm at $7 50 for qr sks of Imperial and Standard. City mills are moderately active at the following rates: Superfine, hf sks, ₱ 196 lbs, $6 75@7 00; do qr sks, $7 00@7 25; Extra, hf sks, $7 50 @7 75; do qr sks, $7 75@8 00.

WHEAT—Sales include 3,000 sks Coast, $2 62½; 13,000 sks medium, $2 60. We quote the market firm at $2 65, with $2 70 bid for extra choice lots. At the close, 1,900 sks, very choice, $2 67½; 1,200 sks inferior, $2 40.

BARLEY—The range for feed and brewing qualities is $1 80@1 90 ₱ 100 lbs, dull. At the close, 500 sks feed, $1 80; 600 sks brewing, $1 87½ ₱ 100 lbs.

OATS—Sales include 700 sks fair, $1 75; 600 sks choice, $1 85 ₱ 100 lbs.

POTATOES—Sales include 300 sks Bodega, $1 12½; 200 sks Humboldt, $1 12½; 380 sks do, in three lots, $1 20 @1 25. Market firm at $1 25 ₱ 100 lbs for latter description.

CORN—Continues scarce at $2 25 ₱ 100 lbs, as an outside figure for choice.

RYE—Is quotable at $1 75@1 87½ ₱ 100 lbs.

BUCKWHEAT—Is exceedingly dull at $2, with $2 25 ₱ 100 lbs asked.

ONIONS—We quote Yellow at 2½@3c ₱ lb.

BEANS—Sales of 50 sks choice Pea, 3¾c. We quote jobbing rates as follows: Bayo, Butter, Pea, and small White, 3@3½c; Pink, 2½c; and Red, 2c ₱ lb.

MIDDLINGS—Feed descriptions are quoted at $40, and Shorts at $35 ₱ ton.

BRAN—Continues to sell from the mills at $25@27 50 ₱ ton.

HAY—One cargo of choice sold at $23; good descriptions quotable at $18@23.

DAIRY PRODUCTS—The recent severe weather has diminished the receipts of all kinds. Fresh roll Butter has advanced to 50@52½c; old California, in firkins, 15@25c; and 22½@25c ₱ lb for Eastern; Eggs, 65@70c, with 67½c ₱ dozen at the medium figure.

POULTRY—Live Turkeys are quoted at 18c ₱ lb, with a declining tendency; Hens and Roosters, $7 50@8; Ducks, $6 ₱ dozen; Geese, $3 50@4 ₱ pair.

PROVISIONS—Bacon is quoted at 12½@13½c for California, and 12@12½c for Oregon; Lard, 10¾@11c for California, and 11@11¼c for Eastern.

WOOL—Inactive at 12c for good shipping grades of fall clip.

HIDES—California dry, usual selection, 14c, and Mexican, 12@12½c ₱ lb, nominal.

TALLOW—Is reported dull at 7½ for good Beef.

San Francisco Cattle Market.

Prices have advanced considerably during the past week in consequence of the wet weather preventing the driving in of Cattle. We understand that a great number have been drowned during the late rains, more especially Beef. The demand for all kinds is chiefly for second quality.

We quote the slaughterers' prices as follows:

BEEF—American, 1st quality, 11@11½c ₱ lb; Spanish, 1st quality, 10½@11c; do 2d quality, 9@10c; do 3d quality, 8@9c.

VEAL—12½@15c ₱ lb.

MUTTON—9@10c ₱ lb.

LAMB—10@12½c ₱ lb.

PORK—Undressed, 6@6½c; dressed, 8½@9c.

NOTES ON

CURRENT TOPICS.

With no little anxiety are all friends of education, and of this noble State, waiting for the action of the Legislature in respect to a University. So far as we can judge, the spirit of those who are to have the honor of inaugurating this most worthy demonstration of California's purpose to prepare for the future, is a fair reflection of that which is felt among the people. Men of every class and party find this common ground on which to stand. Laudable state pride, far-seeing wisdom, an earnest desire to provide for our sons what may equip them for their work, and a desire, at the same time, to make this coast attractive to all who may think of it as a home, combine to make the proposition that we have a University one of the most popular ever presented in our Legislature.

The only dangers attending it relate to the manner in which the institution shall be organized, and the manner in which it shall be controlled, We trust the joint committee will be wise, as well as enthusiastic, in the report they frame, and that gentlemen in both Houses will forget all other considerations in passing the bill under which the University must be managed, save those which experience and judgment suggest. We want a University, but not until we can have one without any clogs to hinder its brilliant success.

Japan has attracted a large share of attention from the other nations of the world, during the last ten years, but the late news from that country will increase the interest of all in its condition. The Tycoon has abdicated, and the Mikado, or highest power in the Government, has called a council of the Daimios, or Provincial Governors, to consult respecting the policy to be adopted in the exigency

The whole aspect of affairs indicates a tendency toward a constitutional government, and a purpose is manifested to carry out treaty stipulations with foreign nations. Some of the inferior princes are bitterly opposed to this, and civil war may be the result, but the majority of the people are believed to be in favor of the new line of policy, and it will finally, and perhaps speedily, prevail.

As an evidence of the change already effected, a Consul has been appointed to represent the Government in San Francisco, the first ever appointed, and we may soon look for further proofs that Japan is turning toward the civilization so long excluded from her people. Nor can we doubt that Christianity will be welcomed, as the necessary attendant of the civilization they court.

The signs of the times favor union among all Presbyterians. Since the Convention held in Philadelphia, which took many by surprise, because of its spirit and results, not only have individuals and churches expressed their delight that such a Convention was called, but union meetings have been called in various localities to increase the interest thus excited, and more thoroughly remove the partition walls. One of these meetings was to be held in the Brick Church, New York City, at the suggestion of some of the leading men in all branches of the church, on the nineteenth ult., and, although no account of the meeting has yet reached us, its origin gives assurance that it must have great effect in giving tone and direction to the sentiment of all who were there represented. One of the noblest bulwarks of trnth ever erected, and one of the most formidable hosts ever arrayed in support of Christianity, will be prepared for the conflicts yet to be, when Presbyterians shall be one body, with the same banner and a common aim. The moral effect of such an exhibition would be enspiriting, and the actual power of such a church we are not yet able to estimate.

Charles Dickens has no opportunity to complain of American patronage, as respects his works, or American enthusiasm as respects his person. Though not bestowed quite so abundantly, perhaps, as in the case of some other celebrities who have visited our country, yet the adulation manifested by many of our people must be deemed rather farcical by our distinguished visitor. Indeed, it seems almost time that we ourselves had attained more self-respect than we manifest in our treatment of foreigners. There is never any reciprocity of such treatment when our great men go abroad, and we have as great men as are any who visit us. Nor are we rewarded, save with a smile at the simplicity some do not weary in repeating, by those to whom we thus display ourselves. Genius is worthy of honor, and this we can justly render to Charles Dickens. A consistent regard for our Government in the midst of a "crooked and perverse generation," should be rewarded with the proper evidence that it is appreciated and esteemed, and to this Dickens is entitled. But there is no reason why we should not gain his still higher admiration by the dignity, as well as sincerity, with which we receive him and do him honor. Gratifying improvement can be noticed in the mode of welcome adopted by the majority of those whose respect he would value, as compared with that which in former years has occasioned ridicule; and this affords hope that, in time, no Americans will degrade themselves when they pay merited compliments to others.

National changes are most interesting subjects for study, whether in history past, or history passing, and oftentimes things which seem unimportant items are prophetic of issues that astonish the world. The rebels in China have reduced the Imperialists to such straits that there is danger they will lose their power. This is no new thing in the history of revolutions, and we only reply to the despatch that brings the fact with the thought that in China, as in other lands, the strong must rule, the weak go down. But, the Emperor has called upon the European Powers for help, that he may retain his throne. This *is* a new thing, and as marvelous as new. It tells us, as hardly any other fact could, that extremity has broken down the exclusive spirit of the Chinese Government, as necessity had already broken down the wall around the empire. It tells us that their fancied isolation is, by their own confession, no longer possible. And this sought alliance is a marked proof that the days of the past will never return in China. Henceforth, in many particulars, the Rulers must be like those they are forced to make their helpers, and, as the Sultan of Turkey lost his prestige and glory when he was compelled to a like alliance, so Chinese rule can be exclusive no more.

Earthquakes are certainly "in divers places" this year, and have startled multitudes of people who had heard of the occasional trembling on the Pacific coast, and been thankful that their lines had fallen to them in safer regions. Western and northern New York, and New England have recently been disturbed quite as much as California was wont to be in other days, while in the general commotion upon sea and land, we have, thus far, escaped. The natural philosopher who shall explain the apparently lawless and fearful phenomena of earthquakes, suddenly rocking the inhabitants of regions never regarded as volcanic in their structure, as powerfully as those in the neighborhood of open craters, and felt by all, while unexplained, to be the direct manifestation of the mighty power of God, will make great and welcome advance in the discoveries of science. Till then, let us profit by our belief that God works unseen below and rules above.

Notice has been given of a bill to be introduced in the Legislature for the repeal of the Sabbath law. We greatly hope it will not pass. We should be glad were it never introduced. Repeal of this law would not leave us where we were before it was enacted. We shall have become more generally a Sabbath-breaking people than we were before restrained somewhat by law, by a natural reaction we all understand. No serious evils result from the statute. No class of citizens is seriously hindered in the proper exercise of liberty; no valuable business is essentially checked by its restrictions. On the other hand, according to testimony that ought to

have weight — the testimonp of facts, not of bigotry or cant — good order, good citizenship, comfort, prosperity, are promoted by the influence of such a law. While advance towards a more general observance of the Sabbath can be observed in Continental Europe, let us not go backward here.

Experiments have been made in this city, during the past week, which seem likely to introduce great changes in fuel for propelling machinery. We had read and heard much about the substitution of petroleum for coal, but were so far away from the region where the tests had been made that no intelligent opinion could be formed, until they could be brought to us, and submitted to the examination of scientific men here. This has now been done. Col. Foote's apparatus has been forwarded, under charge of some of his associates, and the experiments have been highly satisfactory, in many particulars, to those practical engineers and educated gentlemen who have witnessed them. We are not prepared now to give the details, except to say that, as respects convenience, amount of heat, facilities for regulating it, and freight in the case of steamers, all agree that petroleum has decided advantages. As to comparative expense, and the probability of a permanent and abundant supply, there has been some question; but upon these points most of those who have given thought to the matter are very sanguine.

The advantage of such a change, if all the essential conditions can be answered, will be very great, especially in making long voyages at sea. Steamships are now obliged to carry immense freight in coal alone, and none but those of great tonnage can be employed where there are no ports at convenient distances for their supply. Naturally, therefore, those interested in the great lines of ships which sail from San Francisco, situated so far from any of nature's coal fields, but near to vast reservoirs of oil, and those concerned in the commerce of this port, are very desirous that all may be proved that is claimed by those who would give them petroleum for coal.

Religious Intelligence.

PACIFIC COAST.

Drunkenness.—The Grand Jury, in their recent report, in this city, made the following statement:

Intemperance.—A large proportion of the cases brought before us originated in intoxication, and our attention has thus been drawn to the evil entailed upon the community by the prevalence of this vice. The county annually expends, for the suppression and punishment of crime. about $400,000. Doubtless one-half of this expense is chargeable to the use of alcoholic stimulants.

Per contra, the county receives for licenses for the sale of liquors $50,000. This leaves a large balance on the wrong side of the ledger, and shows a losing business for the county.

No account is here made of the losses and expenditures of private parties, and of benevolent associations, or of the inappreciable degradation and misery caused by indulgence in this vice. We recommend a large increase in the price of licenses, that those who profit by the vices of their fellow citizens may be made to bear some of the burdens created by their traffic.

We learn, from the License Collector's office, that eight hundred and fifty licenses have been issued during the last quarter.

Langley's Directory gives the names and place of business of twelve hundred retail liquor establishments; showing that proper diligence has not been used to enforce payment. It is just to add that the figures show a large increase for the month of December, compared with the two previous months.

Such a view, taken by a body of men, composed as grand juries usually are, needs little comment. Ignoring all moral and religions considerations. in a monetary point of view, the use of intoxicating drinks is a relentless, unmitigated scourge. Had all the money wasted in California by the use of liquors, since 1860, been used economically in building railroads, we should now have a railway communication with every important farming and mining neghborhood of the State — doubling the value of every man's farm and forest.

Church in Mendocino.—At the annual festival of the Sabbath School of the Presbyterian church in Mendocino, the worthy Superintendent, Mr. Jerome B. Ford, was presented with a testimonial expressive of the regard of the people, in the form of a fine gold-headed cane. Mr. Ford was the founder of the Sabbath School, and it has been mainly through his unceasing efforts that both the church and Sabbath School in Mendocino have reached their present flourishing condition.

The pastor, Rev. P. C. Whiting, was also remembered, receiving a purse well filled with the yellow coin wich circulates so freely through our State.

From a private letter, we learn that the Rev. Dr. Newell, of the Allen Street Presbyterian Church, New York has been visited with a series of most painful afflictions. A few months ago his wife was taken from him in a moment by an attack of apoplexy. A few weeks since his daughter, who had been married but three weeks to Rev. Mr. Booth, of Englewood, died suddenly, and now we are informed that the husband and father is laid aside from his pulpit by a disease which will probably take away his life.

San Jose.—At the communion last Sunday, 12th inst., eight persons were admitted to the Presbyterian church at San Jose — five by letter and three by profession of faith.

Union prayer-meetings are held daily in the rooms of the Young Men's Christian Association, and a growing interest is manifest.

The evangelical ministers of that city have united in forming a Ministerial Association, aud adticipate a mutual benefit from this effort to secure oneness of sympathy and interest.

The Unitarian Church, at Portland, Oregon, was dedicated on the last Sunday afternoon of December. The services were conducted by the new pastor, Rev. T. L. Elliott, recently of St. Louis, assisted by Rev. Mr. Stratton, of the Methodist, Rev. Mr. Harpending, of the Presbyterian, and Rev. Mr. Anderson, of the Baptist church.

The annual sale of pews at the Unitarian Church took place on Monday night. The price paid as premiums for choice amounted to $5,340. Last year the premiums exceeded $20,000, a sum then needed to liquidate a debt. The congregation is one of the most wealthy on the coast.

Sunday School Convention.—Two days of last week were spent by the friends of Sabbath Schools in Sacramento, in consultation in reference to their important duties. The attendance was not large, but all who were present were quickened and encouraged for their work.

Sacramento.—Five persons united with the Presbyterian church in Sacramento last Sabbath, Jan 12th. Three of them by profession of faith in Christ, two by certificate.

MISCELLANEOUS.

"Not Denominational."—Rev. Alfred Taylor tells this story of a boy who had risen, under the lure of Sunday School sweetmeats and picnics, to the perfection of a certain latter-day idea of undenominational breadth:

"Where do you go to Sunday School, Jimmy?"

"Who, marm, I go to Baptisses, and Methodisses, and the Presbyteriums, but I've been trying the 'Piscopals for two or three weeks."

"You don't seem to belong anywhere, then, Jimmy."

"Why, yes, marm, don't you see? I belongs to 'em all, exceptin' the 'Piscoppls, but I'm goin' to join them too, now."

"Well, Jimmy, what's your idea in going to so many?"

"Why, you see, I gets a little of what's going on at 'em all, marm. I gits liberties, and hymn-books, and all that; and when they have picnics, I goes to every one of 'em"

A new author asked an editor his opinion of his books. The answer was:

"I have found a great deal of good and original matter in them; but what was good was not original, and what was original was not good."

It should cheer the steps of a servant of Jesus Christ, as he journeys, to know that, even in darkness, his guide is still with him, and that that guide is the King of the country through which he is traveling.

Faith is a burning-glass, which receives the beams of God's love, and inflames the heart with love to him again; till, mounting up in fervent prayers, love reaches its original, and rests forever in love.

Some one, looking at a rich man, said: "Poor man; he toiled day and night, until he was forty, to gain his wealth, and he has been wathing it day and night, ever since, for his victuals and clothes."

Enthusiasm for a person has no such grand control of a man as has enthusiasm for an idea. The masters have all been led by ideas, the disciples by persons.

Klopstock engraved, on the grave of his wife, two sheaves of wheat, thrown, as it were, carelessly together, with the inscription: "We shall ripen in heaven."

Said a brother, lately, in increasing a subscription: "The Lord has greatly blessed me in my crops and in my business, and I think he means something by it."

A firm faith is the best theology; a clear conscience the best law; honesty the best policy; and temperance the best physic.

Use the best language in your common conversation at home, and you will soon acquire the habit of using it on all occasions.

"It is a great misfortune," says La Bruyere, "not to have mind enough to talk well, nor judgment enough to be silent."

He can never truly relish the sweetness of God's mercy who never tasted the bittterness of his own misery.

Did sin bring sorrow into the world? Then let sorrow carry sin out of the world.

Dr. Hall says: "To be a great orator, a peerless beauty, or the star of the social circles, whether man or woman, is the next door to being lost."

Prentice says: "Russia makes over American possessions to us under hand, and a hundred thousand seals."

The late eruption of Vesuvius has caused the formation of ten new craters, all quite small.

General Grant will be forty-six years of age on the 27th of April next.

California produced 182,000 bushels of peanuts, valued at $545,550, last season.

GENERAL NEWS.

Roberts Brothers, of Boston, have sold 50,000 copies of Jean Ingelow's poems. Miss Ingelow's face is described as not beautiful, but something better than beautiful.

IMMIGRATION.—From the 1st of January to the last of October, the number of immigrants who arrived at New York, was 208,428; or 6,000 more than last year.

THE funded debt of California is $5,129,500. During the last two years, all warrants on the general fund have been paid when presented.

THE North German Parliament has unanimously requested the Executive to put down public gambling throughout the Confederation.

SEVERAL European capitalists have lately come to California, with the expectation of developing the mineral resources of Alpine county.

THE number committed to the Insane Asylum, during the last four years from San Francisco, reaches four hundred.

THE difference between a pound of meat and a drummer boy—one weighs a pound and the other pounds away.

LONGER.—The opening of a grave in Harrisburg, Pa., has shown that silk dresses last longer than human bones.

THE Pacific Mail Steamship Company recently launched a magnificent steamer, the Alaska, for the Atlantic side.

A TRAVELER who was detained an hour by some mischance, shortened his stay by making a minute of it.

UNCLE SAM pays for Russian-America about two and a-half cents per acre.

PERSONAL.

SUCCESS.—I have traveled beyond the Alleghanies, and, when there, the west seemed farther still; and as I turned homeward again toward the setting sun, the west was still before me, and still receding. So of success; it seems almost within grasp, but when reached for, who clasps it? Who has indeed attained it?—*Geo. Wm. Curtis.*

INDECISION of character is shown in a constant recurrence to others for advice, which is either rejected without reason or acted upon without conviction. Decision of character never seeks advice except when necessary, and when obtained, it is either followed up judiciously, or rejected on assignable or reasonable grounds.

UNABLE TO READ.—A correspondent of the American Missionary, for December last, writes as follows from North Carolina. He says: "There are yet among all classes and races in the Southern States five millions of souls unable to spell the name of Christ, or decipher one word of His will to man!"

IT takes four things to make a thorough gentleman. You must be a gentleman in your tastes, a gentleman in your principles, a gentleman in your person, and a gentleman in your manners. No man who does not combine these qualities can be justly named a true gentleman.

J. E. Perley, aged 52, is the oldest member of the Senate, and W. W. Pendegast, aged 25, is the youngest. The oldest member of the House is D. W. Connely, aged 61, and the youngest is A. Comte, Jr., aged 25.

CHARITY.—Great minds are charitable to their bitterest enemies, and can sympathize with their fellow-creatures. It is only the narrow-minded who make no allowance for the faults of others.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.
The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.
Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.
In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.
For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.
Further particulars may be obtained by addressing the Principal, at Oakland.

Gold and Silver Ores Worked.

Electro-Silicon.

This wonderful product of nature and the Pacific Coast (the two do not often work together) has fairly electrified New York. No sooner had its powers been tried on a seal ring, at Ball & Black's, than a rush was made for the establishment, and it required 100 Metropolitans and all their stars, to keep off the mob. Finding the pressure too great to be borne, the police bethought them of applying Electro-Silicon to the rioters' persons, which were consequently rubbed out of existence in a very few minutes. By the last Panama steamer, orders were received, by KEITH & CO., for 200 gross, which, at fifteen dollars per gross, are worth the sum of $3,000, a handsome order for an article discovered but yesterday.

The Occident.

San Francisco, Saturday, January 18, 1868.

THE MEASURE OF LIFE.

To pass so many years, serve as a link in the chain of human generations, and then die, is the sum of life with many who by no means place a low estimate upon themselves. No noble cause, no valuable interests, no schemes for blessing mankind receive their sympathy or aid, and they leave the world no evidence that they have lived in it, except that they breathed its air, enjoyed its favors, and are laid in its soil. Their tombstones are the only memorials of them, and these, as if in irony upon such a life, furnish the whole record that is worth preserving when they give their names, and when they were born, and when they died. It matters little whether the interval between the dates is great or small. Yet this is not *life*, nor can life be measured by the mere lapse of years.

There are others who see the folly of a career like this, and pity those who are content with it, resolving to mark their course with some proofs that they have been in the world, which can be left as a heritage for their successors. They gather riches that others may use, or acquire influence that may survive them, or achieve results that remain as their monuments, all of which bear testimony that excites both gratitude and praise that their life was not a failure. In any sphere, with any faculties, men may thus make themselves immortal, and we are ever affected by the vibrations of cords struck by we know not whom, we know not when. Yet they are the abiding witnesses that tombstones could not sum up the history of those who thus caused their influence to be perpetual. Still, we do not in such men find all that may be made of life, nor is it fully measured by accumulated wealth, or accomplished results, or any mere blessing gained by ourselves and left to honor us when we are gone.

That the destiny of the race, predicted in the hopes and efforts of every generation, in the history of all the past, and in the distinct promises of God, may be attained, there is need of more than individual influence and acquisition, or of associated agencies that expire with those who may employ them. There must be organizations, wisely planned, and capable of more efficient service, in the hands of those to whom we may transmit them. There must be machinery that shall not be worthless when we can direct it no longer, but can be made more perfect and successful, its products being the more grand from age to age, The products we furnish with this machinery may be a splendid contribution to the race, but the machinery itself, in complete order, ready for the use of others, and able to produce for them what we can not live to bring out, will be far more valuable, often, than the actual results we leave.

Here, then, we see by what life should be measured. How are you employing years and powers, not merely as to what you alone may do, nor as to what, with others, you may transmit as the contribution of your time, rounded and complete? But what are you doing alone to render your influence abiding, and what with others to furnish for those who will be in your places the best facilities for progress, and the most effective means with which to prosecute what you have begun? The problem of life is not that each may leave as beautiful a house as possible, finished, furnished, and worthy of praise; but that each may build as much as possible upon the great Temple that is to be reared during the ages, and work with others where combined effort is necessary, and give into the hands of those who will be vigorous when he grows weak the implements and engines by which they can build more rapidly than he could in his prime. The measure of life is not the amount accomplished, but the present and prospective worth of what is done. One may do more in ten years than another could do in fifty, though it may be questioned, in view of what should be passed down to our successors in the best condition for them to prosecute and improve, whether it is real gain to crowd into so short a career what the judgment and study of a more calm and lengthened term of life would render more complete. One may have a far more brilliant course, during the years he lives; may set on foot majestic enterprises and move on mighty agencies for good, and seem to his contemporaries, to be greatly in advance of another, whose work is of a different kind, and more within the capacity of other men. Yet he may be disabled, or die, and all his magnificent schemes, which no other can execute, may remain half completed, and his really noble plans may be useless, and his whole work, so successful in his hands, may be like an unfinished tower, that nobody after him can carry to the top-stone upon his foundation. This tower, no matter how successfuly he wrought upon it while he lived, is of but little worth to man, and though he may be truly great, the real measure of his life will be found only in what he was able to leave as *results*; his engines can not be used, his machinery can not be wielded, after he has gone.

Instances will occur to all that illustrate these remarks, yet, one is so directly in the line of what has been said, and has so much interest, because of the recent visit of one of the distinguished men to this country, that it may be considered with profit. In many of their characteristics, no men in London are more unlike than Spurgeon and Newman Hall, while the world knows that both of them are most intent on making life to the highest degree useful. The devices, and agencies, and labors of Spurgeon, have excited the wonder and admiration of all, and the query has been only respecting the possibility of one man moving forward so extensive an array of forces in defense and support of religion and truth. It was no surprise, when we learned, that, while yet in his prime of years, his health had failed, and his work must be diminished. Were he to die, no man, no body of men could take up his work, and the plans that he makes so successful, would be magnificent still, but only the unpractical proofs of his own greatness. The regretful lamentation of the good would be, "Alas! that he did not leave us something worthy of his greatness, that might be a ceaseless and growing means of good, in the hands of other men, who can execute what he might have organized with the most brilliant promise!" The work of Newman Hall, in some respect, even, while he lives, as noble, and extensive as that of Spurgeon, could be left by him, at any time, and some other could take it up, and prosecute it, with no other loss than that which must ever attend such a transfer. Surrey Chapel will for ages be a mighty power for good, among the common people of London. The methods of usefulness, comprehensive, but simple, which center there, will be in full operation when the Pastor is no more. Everything has been arranged, and conducted, and adjusted for permanent working, in control of the church, with any competent leader at its head, and Newman Hall will live in the success, and increase of those agencies he has put in motion, long after his years are ended.

No man should gain his own consent to do nothing or little, when he may do so much, and no man should be willing that his power shall die with him, however great it may be, when he may send it down upon the generations to come, freighted with blessings, for which an unnumbered host will give thanks that he has lived. For the measure of life has reference to what we *may* do, rather than to what we *do*, and the range of every life may be, not *years*, but *ages*,

ATTITUDE OF THE LOW CHURCH.

The signs of the times are, that the Low Church party of Episcopolians, intend to make a bold stand, against the High Church, upon their right to fraternize with the ministry of other churches. Dr. Brewer of Brooklyn, says: "The evangelical ministers of our church ought to recognize the ministry of all evangelical churches, not only in theory, in word, in writing, but in a more visible and practical way. We should pray with them, preach with them." So an individual speaks. In accordance with this, also, has been the action of an informal gathering of the Evangelicals in Philadelphia. Of this gathering, it is authoritatively reported that "two subjects of discussion — viz: the Liberty of Preaching, and the recognition of Non-Episcopal Ministry — were embodied in a declarative paper, which will define hereafter, beyond cavil from any quarter, the consistent determination of Evangelical men in the Episcopal church."

But words, whether from individuals or Conventions, are not so eloquent as acts; and the acts of Evangelicals have been like their declarations. At the opening of St. George's Church (Episcopal), in New York, the distinguished rector invited Dr. Gardiner Spring, Presbyterian, who occupied a place in the chancel, to read the prayers after sermon. So much for calling other ministers in. But they have done the other thing — have themselves gone out into non-Episcopal pulpits. This was the offense of Rev. S. H. Tyng, jr., for which he has been cited to undergo trial. Moreover, some of the Low Church have taken occasion to concede, generously, the success of non-Episcopal missions. Rev. Mr. Rising, of Nevada, has distinguished himself very amiably in this way, in what he has said of the triumphs of the Gospel in the Sandwich Islands. Finally, the great Presbyterian Convention in Philadelphia was honored by the presence and recognition of those lights of the age, Bishops Lee and McIlvaine.

We are glad, indeed, to believe, from these signs, that Low Churchmen are determined to make a stand on this particular line of defence. We are glad, for the truth's sake. If they fight manfully and suffer patiently, just here, they will call attention and invite reverence to the glorious truth of the oneness of believers in Christ. They will supply a beautiful argument to those who would maintain that, in the best sense, Protestantism is really more united than Rome. And we are free to say, that we are glad for our own sakes. We can not sympathise with those who would say: We are indifferent; it can not hurt us however you decide. We *are* hurt by every appearance of distance and separation from those we believe to belong to the same precious family, the same sacred body, with ourselves.

But we are especially glad that the Low Church party seem determined to fix themselves just here — for their own sakes. The High Church will surely drive them to the wall, and the sooner they

find a wall to stand against, the less will they waste their energies in retreating. It is the old story of unscrupulous attack and misguided concession. The former will never stop till the latter is exhausted wholly. The Sepoy hated the English, and that hatred was not to be destroyed by keeping the Bible out of his school or the tallow out of his cartridge. A little temporary peace might be purchased by yielding the point now most in dispute, but it would only be temporary. Dr. Dix would cease to preach that the "law of the Episcopal Church, and her highest interests, forbid non-Episcopal ministration within her fold." Correspondents of Puseyite newspapers would cease to declare that Bishop McIlvaine's affiliation with Presbyterians means "treason to the Episcopal Church, or it means nothing." Without rebuke from Episcopal brethren, High Churchmen might do as one did recently in North Carolina — re-baptize a sick child in the very face of the good Methodist pastor who had just performed the same ordinance. And, without complaint, Bishop Hopkins might continue to require "every deacon whom he ordains to sign a promise that he will never associate, in any way, with any non-Episcopal ministers." But such a peace, and absence of rebuke, would neither be honorable nor lasting. Another demand would soon come for the relinquishment of some other position, the denial of some other precious truth of God's Word. For their own sake, then, especially, we trust that the Low Church will make a stand against supercilious aggression, on ground which is scriptural, dignified, beautiful, and certain to secure the widest re-enforcement of outside sympathy.

THE SABBATH—OR SUNDAY.

The word Sabbath means rest, or to rest, or cease. Philo says that the Sabbath is not a festival, peculiar to one people, or country, but is common to the whole world; and that it may be named the general and public festival, and that of the nativity of the world. Aristobulus quotes Homer and Hesiod, who speak of the Sabbath day as sacred and venerable. Clemens Alexandrinus confirms the statement of Aristobulus, and adds some passages from the ancients, who celebrated the seventh day. Job, at the end of seven days, sacrificed to the Lord, on account of his children, in consequence of which some commentators have concluded that he observed the Sabbath. Porphyry says, "The Phœnicians consecrated the seventh day as holy." The Saracens, before the time of Mahomet, kept their Sabbath on Friday. The pagan Sclavonians held a weekly festival. In In the greater part of Guinea, Tuesday of each week is set apart for religious worship. The Chinese, at one time, honored the seventh day of the week. The Persian Magi have marked in their calendar the eighth day as holy. Aertius says, "that the Greeks and Romans consecrated Saturday to rest, as suited to contemplation, and a day, therefore, on which the divine patronage was to be implored against dangers and misfortunes."

The foregoing are a *very few* of the evidences furnished by profane writers in favor of the observance of the seventh day by heathen nations.

THE OBJECT OF SUCH OBSERVANCE.

It is doubtless true, that most of the festival days observed by the heathen nations, such as the Assyrians, Grecians, Romans, and others, were observed religiously. There are substantial evidences, however, that some of those festivals were observed to secure *rest* from labor. Plato extols festivals, as the gift of the gods for the "relief of toil-doomed man." Seneca applauds the holy days, as the wise appointments of legislators, "for the necessary attempering of human labor."

THE NUMBER SEVEN.

This number has ever been held sacred by all the nations of antiquity. An eloquent writer on that subject says: "It directed the heating of Nebuchadnezzar's furnace. It ruled the retinue of the court of Shushan. It has sounded the depths of slavery. It has measured noble deeds. Ajax bore his shield covered with seven hides. Boreas ruled in his sevenfold, many-celled cave. The classes of the Polynesian areois, supposed to be a society of divine origin, were seven. The chosen conductors of the great annual sacrifice, offered by the wild Indians, were seven. The priests who prepared the more solemn feasts in ancient Rome, were seven. Seven was the complete number of sacrificial victims with Deiphœbe, as with Baalam — in Athens as in the land of Uz. Seven ewe lambs sealed the covenant beween Abraham and Abimelech. Agamemnon's peace-offering to Achilles included seven tripods and seven maids. Seven ages were the gift of the gods to Tithonus; and, according to Shakspeare,—

> "All the world's a stage,
> And all the men and women merely players.
> They have their exits and their entrances,
> And one man, in his time, plays many parts,
> His acts being *seven* ages."

It may be added that Mohammed's paradise, is seven heavens. Without tracing, at this time, the origin of the extraordinary concurrence of the recognition, among the nations of the earth, of the sacredness of the number seven, and the seventh day of the week, it is manifest that the Jews were not peculiar in the observance of the seventh day of the week as a holy day.

SUNDAY.

Sunday is not synonymous with "Sabbath." The first day of the week was originally dedicated to the sun — hence the name Sunday. The early Christians called the first day of the week "the Lord's day," because of the resurrection of our Lord on that day. The first day of the week was therefore consecrated to worship. It has, for eighteen hundred years, been observed by Christians of almost every denomination, as a day devoted to religious duties.

In this introductory number we have endeavored to show: 1st. That history establishes the fact that the most distinguished nations, and peoples which have left their imprint upon the track of time, have regarded the number seven as sacred, and have devoted at least a seventh portion of time to rest and contemplation.

2d. That nearly all Christians, since the ascension of our Lord, have, likewise, constantly observed at least a seventh portion of time for religious worship, and total abstinence from secular pursuits and employments.

It is our purpose to consider: 1st. The effect of this economy upon man's physical development.

2d. Its effect on his moral and religious development.

3d. Its effect upon the character and permanence of government. Z.

J. S. Van Winkle & Co.

University College School of Mines,

CORNER GEARY AND STOCKTON STREETS.

ON THE 6th DAY OF JANUARY, 1868,

A COURSE OF LECTURES ON

CHEMISTRY, METALLURGY, MINING, AND GEOLOGY,

Will be commenced, and to continue for four months from date. The special objects of these Lectures will be to afford those practically engaged in metallurgical and mining pursuits, full and complete information on all points bearing on the useful minerals of this coast, together with practice in the Chemical and Metallurgical Laboratories.

Price for the full Course of Lectures and Practice in the Laboratory, $120.

Terms for Lectures alone, $10 for each subject.

For particulars, apply to

THOMAS PRICE,
University College, San Francisco.

Correspondence.

The Russians in Alaska.

Sitka, A. T., Dec. 12th, 1867.

Editors Occident:—Having, in a previous letter, written of the aborigines proper in Sitka, let me briefly speak of the Caucasian race — the Russians, who, for nearly a century, have been the rulers of this widely extended region. The town lies half encircled by a group of cone-like mountains, remarkble for their precipitous sides and sharply-pointed summits. On a clear day, the harbor can boast of a scenery surpassed by none in North America. Landing at the wharf, and passing a battery of old-style guns, the visitor first comes to the warehouses of the Russian Fur Company — five long, two-story buildings, painted yellow, with sheet-iron roofs. These, with two old hulls of ships, raised on trestle-work, above the reach of high tide, contain all the furs, goods, and supplies of the Company. The fur skins, many of them in a crude state, have been forwarded here from all the trading-posts of Russian America. Sitka, for sixty years, has been the general depot; and all furs were brought here for sorting and the needed preparation for foreign shipment. Those now in store with the goods and supplies needed for trade with the Indians, are worth over half a million of dollars. On a rocky bluff overlooking the storehouses is the Governor's residence, a spacious, comfortable, but not elegant edifice.

Passing up the street, next come the business offices, and, further on, in the middle of a small plaza, stands the Greek church, the only building in the town having any claim to architectural beauty. It is a capacious wooden structure, having a spire of oriental style in front, and a large dome on the center. The spire has a chime of bells, and is ornamented with an ancient clock-face. The body of the church is of a blue slate-color, the roof and dome of a deep green. Near by, on the right, is the Lutheran church, built and occupied by Finlanders, who, in Russia, are largely dissenters. On a hillock to the left, near by the Indian portion of the town, is the church built by the Company for the sole use of the natives. It never gained their sympathies, and for several years past no services have been held there.

Beyond the churches are the hospital, foundry, mechanical shops, and houses occupied by private families. A stream of moderate size flows through the eastern part of the town, on which is a saw-mill. Yet there is little use for boards, since every edifice, large and small, is built of hewn timbers, so well done, in the better class of houses, as to leave no crevices, with the walls so smoothly dressed as to be fitted for either painting or papering. As to streets, there is really only one in the town — the most of the private houses being built on alleys leading into it. This street, bending toward the beach, terminates in the only road in Alaska. It runs along the shore for a mile, and, turning north, stops at the base of a jagged mountain. It affords the only pleasant walk on the island, and, on a fair day, has for half a century been the fashionable promenade of the aristocracy of Sitka.

One of the features which at once strikes the visitor to this town, as peculiar, is the absence of signs. You can not find the "shingle," of a lawyer or doctor — not a placard of a milliner or dressmaker — no conspicuous sign of grocer or dry goods dealer — no projecting transparency of hotel or restaurant. Everything has been owned and managed by the Russian Fur Company. Until the day of the formal transfer, they owned all the buildings, public and private, numbering about one hundred and thirty. They furnished all the goods and supplies, bought all the products of sea and land, were proprietors of all wharves and shipping. Every specimen of live stock, except dogs and poultry, every vehicle, every piano the town could boast of, was their exclusive property. All judicial and executive authority was vested in the Governor. Alaska has never had any judges or jurors. No law-making body ever convened in her capitol.

The Russian population of Sitka numbers four hundred. Of the leading officers, some have already left for Europe. The others will remain, for the present, to adjust the affairs of the Company. Of the laboring class and soldiers, it is probable that a majority, accustomed to a life of routine, and unwilling, perhaps incapable of adapting themselves to American ideas and habits, will leave Alaska. Those who prefer to do so, will be transported by the Company to the Asiatic settlements on the Amoor. Many of them have either Creole or Indian wives, with children. Their employment has been varied — cleaning and packing fur skins, unloading ships, hewing timber, and various incidental labors. They have been a slow, simple-hearted, well-disposed people — of tastes rather coarse and groveling.

On account of the numerous holidays, which in Russia number *eighty-six*, exclusive of Sundays, they have worked for the Company about two hundred and twenty-five days annually. Their pay has been sixty-five dollars per year. To a Californian this would seem nothing short of starvation wages. It is true that their fare has been very coarse, and they have, to use a homely phrase, "lived from hand to mouth." Yet, in Sitka, no family has really ever been destitute of food and clothing. The Company, having a bakery, have always furnished coarse wheat bread at five cents a pound, and dispensed either fish or venison soup gratis. The soup was prepared every day at twelve o'clock, and, after inspection by an officer, as to its quality, was distributed from the soup-house to each family according to its needs. Besides this, the Company furnished physician, school teacher, and priest, free from tax. Food, drink, and clothing was supplied at a fixed price. It left nothing for the individual to do — but to work.

Thus, to the laboring class in Sitka, life has been monotonous and without excitement. Yet, having no conception of any other, they have been, for the most part, a contented people. Their world was the little town in which they lived, with its surrounding waste of woodlands. The busy outside world, its revolutions, its bustling trades and startling improvements, have been to them of as little moment as to the inhabitants of the moon. Of all the inventions of the past century, only one has been practically known to this community — the friction match.

Yet, in the progress of events, a new era has dawned, and already this remote village is beginning to be thronged with a people as wild with speculaiton, as agitated by excitement, as deeply earnest in the pursuit of gain, and as eager for the earliest news from abroad, as any growing town in Idaho or Montana.

The Greek Church.

Our first Sunday on shore was like most autumnal days at Sitka, cloudy, with occasional showers. According to the American calendar, it was Saturday, October 12th; but, on shore, it was the Russian Sunday. How could such an anomaly between two civilized nations occur? The solution is not difficult. Civilization, radiating from Europe, and carrying with it, both east and west, the observance of the first day of the week as the Christian Sabbath, has met midway on the opposite side of the globe, upon these islands of the North Pacific. Advancing eastward, every fifteen degrees of longitude brought the beginning of the day an hour earlier. As the settlement of these islands came from Russia eastward, bringing with the Russian flag western time, the day is earlier, by twenty-four hours, with them than with us, Californians, who came from the east, bringing the American flag and a consequent later time westward. Hence, their Sunday is our Saturday, and the other days of the week are in corresponding discord. Scientifically, both are correct — the discrepancy arising from the rotundity of the earth, and its daily revolution from east to west.

It was expected that, as soon as the American flag was raised the Russian calendar would give place to ours, and Sunday be the same day with the Russians as with us. But the Bishop of the Greek Church, while admitting the propriety of the change, is unable to conform until ordered to do so by the High Council of Bishops at St. Petersburg. So the Russo-Greek Church continues its observance of Sunday one day in advance. The result is that, for six months to come, we are to have two Sundays each week, to the great danger that neither will be properly observed, especially among the Americans.

I have already alluded to the exterior of the Greek church. The Russian Bishop had recently arrived from Kodiak. By the favor of the United States chaplain, I had seen him at his quarters. We were quietly and courteously received, and, in accordance with the custom of Eastern Europe, were served with light wine, excellent tea, and a sour quality of rye bread. The Bishop had evidently some misgivings as to the interests of the "Ancient Church" after it should cease to enjoy the fostering care of the Muscovite *regime*. Through an interpreter, he inquired if the property of the church would be truly secure under our Government, and if the Government did not afford some support to the priesthood of an established organization. To the first query the chaplain replied that the United States would most faithfully fulfill its stipulation in regard to the prosperity of the Greek Church, but it afforded no special support to any religious organization.

We left the ship early, as the services of the Greek Church always begin at nine in the morning, and are only held during the forenoon. There are no seats in their churches, the audience standing or kneeling during the service. The men occupy one part, the women the other — side by side, prince and laborer, princess and half-breed, officers of rank, soldiers and sailors, all earnest and devout, making the sign of the cross on the breast and forehead, and kneeling to kiss the floor. The interior of the church is richly furnished with altars, desks, and chandeliers of massive silver. The curiously folding doors, which at times shut off the inner altar from view of the congregation, are embossed with silver. Silver bas-relief representations of the principal events in the life of the Savior adorn the walls under the dome. On the chapel walls are copies of the celebrated paintings of the old masters. They are of the Byzantic school—gifts sent by the parent church to this, its remote offspring.

The services were almost entirely responsive. Twice the full chime of bells added consonance to the voices of the choristers, and lent a charm to the devotional and impressive ritual. I will not attempt to describe the gorgeous richness of this symbolic

service. Though strangely unfamiliar, and rendered in the Sclavonic tongue, its significance and sincerity can not be misunderstood. It is to be regretted that during the dark ages, in her contact with ignorance and heathenism, this church has gathered incidental accretions which, we doubt not, will gradually disappear in a more enlightened age. Venerable for her antiquity, she challenges our respect for having, in an age of barbarism, given shelter to the poor and safety to the unprotected.

The Greek Church resembles the Roman Catholic in its intense regard for mere formalities — its superabundance of ceremonies, and its reverence for symbols, whether paintings, statuettes, or relics. It differs from the Catholic Church in ignoring the Pope, and discarding celibacy as a condition of the priesthood. Most of the priests marry, but they are not allowed to enter the matrimonial estate a second time. It is said, I know not with how much truth, that the wife of a Greek priest is the object of far greater solicitude than usually falls to the lot of the sex in wedded life. A singular feature in the ecclesiastical polity of this Church is, that widowers only are eligible to the office of Bishop. ORIENT.

Memories of the Camp.

In company with the delegates of the Christian Commission, I visited the hospital near Petersburg. It occupied the site of the agricultural grounds, and the situation was pleasant and cheery, the grass and trees being verdant with the early spring. The Confederates had occupied it as a hospital, and some of their sick and wounded still remained, though our own troops filled most of the wards.

A WOUNDED CÆSAR.

As we entered the first ward, we found a wounded soldier shrinking back from the hands of the nurse, with the intensest agony depicted on his countenance, and at once expressed our sympathy with the suffering man.

"You needn't waste any sympathy on him," said the nurse; "its only a blister I was putting on his breast."

Ah! thought I; so it is. Here is a man who has shouldered his musket and marched against the enemy fearlessly, but now shrinks and turns pale at the sight of a blister. Could we blame the sick soldier? The tongue of Cæsar, when the fever fit was on him:

> "Alas! it cried, give me some drink, Titinius,
> As a sick girl."

COLORED SOLDIERS.

The next ward was occupied by colored soldiers. They lay around in their cots, and their black faces indicated suffering and patience. It has been the lot of their race to suffer and be patient. Before the proclamation they felt, doubtless, that patience had had its perfect work, and they hailed it as the herald of their day of redemption. No murmur or complaint escaped their lips. They thankfully took the oranges we had to give them, provided from the stores of the Christian Commission, and listened with reverence to the words of Christian cheer and consolation which we spoke to them. Perhaps they knew and realized the wondrous change that had passed over them by the result of the war, perhaps not. They certainly knew what slavery was; freedom was an unknown, untried state. Its fruits were yet to be gathered and proved; but they were ready to fight, bleed, and die for it, and that is all that Leonidas and his Spartans did at Thermopylæ.

"What would they have done," said one of the delegates to a colored Virginian, "if your people had ben mustered into the rebel army?"

"Well," said the other, "I think half our people would have gone over to the Yankees straight, and 'tother half would have stopped half way, turned around and fired one charge back on the rebels before they went over."

Their anxiety to get out of Egypt is plain enough, and their anxiety to get into Canaan; but this middle desert is hard to bear.

THE DYING SOLDIER.

We next passed into a ward occupied by Confederate soldiers, dying of gangrened wounds. It was a sad sight to see these poor fellows, the wrecks of the battle-fields, stranded in this hospital ward, far away from home and friends, left by their comrades here to rot and perish. No blame, of course, attaches to their officers that they were left behind, for they could not be moved; but here they were dying daily by inches. They eagerly sucked the fruit, as it was put to their lips by our delegates, and seemed much cheered and refreshed by it.

Here I witnessed a scene I never shall forget, as long as memory does its office. We passed the cot of a native of Virginia, as we saw by the ticket over his bed. The hue of death was on his face, his eyes were sunken and turned back in their sockets, his hands lay loosely beside him, and his features expressed the agony of dissolution.

"What is your name, my friend?" said one of us. There was no reply.

"Where is your home?" said another. Still there was no answer.

"Do you love the Lord Jesus Christ?" said a third.

A few convulsive throbs passed like waves over his countenance; a placid smile followed, like the sun breaking through the cloud drifts of a sour November sky, and the clear, distinct reply, "Yes, yes, yes," broke from his lips. Taking the hands of the inquirer in his own, he clasped them, with it, over his head, and repeated, "Yes, yes, yes."

If the tomb had glowed with a celestial light, and its stony lips had opened and spoken the glory of a risen Savior, it could hardly have been more impressive than the sight of that face, now stiff and cold with the approach of death, yet radiant with the presence of Jesus, and those lips, close sealed to all earthly interests, opened to testify of His love.

CONVALESCENT WARD.

The next ward showed us a different scene. Soldiers of the Confederate army, who had recovered sufficiently to travel, were joyous in prospect of a parole, so that they might return home. Home, home, was on their lips now. Hospital, camp, and war, they were glad to leave, and, with the advent of peace, again see the loved ones of their households. F. B.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

RECENT PUBLICATIONS.

SCHEFER'S BREVIARY. Published by Roberts Brothers, Boston. San Francisco: H. H. Bancroft & Co.

Whoever contributes prose or verse, by which the family may be made more charming and home more attractive and powerful for good, is a public benefactor. There is no lack of those who offer to do this, and more than ever before is actually done in our days to honor and bless the households of the common people. Yet one of the most genial and effective of all the books we have seen, which have this object, has come from an old man in Germany, whose work has lately been translated by C. T. Brooks.

All who are familiar with German literature have long ago become acquainted with Leopold Schefer, as a graceful and popular author, in several departments of writing, and the "Layman's Breviary," now given us from the twelfth edition in German, well sustains his reputation, while in purpose and spirit, it is in advance of the most of his works. It is a collection of poems, of which one is assigned to each day in the year, and the subjects are suggested by the relations of the family, and a conception of the dignity and worth of life, as having its origin in these sacred relations. Indeed, no one can read the pieces in order without a higher sense of what it is to live, and a more just conviction of his own worth to himself and his fellows. Here, for example, are a few lines that deserve careful thought:

"Let every task be easy to a man,
And all alike! For each one gives him power
To be a man! That is the thing. Who e'er
Has lived, that man has done much, has been much,
Much in the mansion of this beauteous world!
Therefore think worthily of human life,
Worthily of yourselves, ye living men!
Holy is whatsoever thing that breathes
This ether. Underneath these golden stars
Is no none great or small; all is divine!
And none is mean who recognizes this.
In presence of this endless wealth of earth
No one is rich; and yet, in view of Heaven,
No one is poor! and no one is despised
Whom the Eternal Father owns as child,
Who dares to call him Father; and that name
He loves to hear from all.

Beautifully are the lessons of experience, and varied duties of daily living enforced and illustrated, throughout the book, so that one feels wiser and stronger, and better from having read it; life losing none of its charms because of its real features, as they are here represented. We would be glad to quote many extracts, but will only give this from the month of November:

The fancy has its own peculiar woes,
From which reality protects us not.
When, in our dreams, we walk on piercing thorns,
It helps us nothing that we sleep in shoes!
And when thou walk'st on roses in thy dreams,
Thou heedest not the snake approaching thee.
Only the working ones can God release
From the night-horror of old heavy dreams.
How mankind wrestles to be wide awake!
The genuine day is worth thy living in;
Truth is the most divine of poems, full
Of magic, depth, pomp, beauty, as none else.
Be always wakeful, then!

EVIDENCES OF CHRISTIANITY IN THE NINETEENTH CENTURY. By Albert Barnes. New York: Harper Brothers. San Francisco: Bancroft & Co.

This volume contains the series of lectures delivered, by the author, to the students of Union Theological Seminary, under appointment of the directors of what is known as the "Ely Foundation." The wise and liberal gentleman who bestowed this fund did not design to intimate any belief that on the genergl themes to be discussed in the lectures there was a lack of able instruction in the Seminary, but he wished to supplement this with an annual presentation of them by some one whose pastoral experience would give them more practical point.

No one could have been selected more fully qualified to satisfy this wish in the first course, than Albert Barnes, and he has equalled the expectations of those who looked for an able defense of Christianity against the popular infidelity of the time. The book should be read by those who believe, and by those who are skeptical — it will do both classes good. The rhetoric is not remarkable, but the logic is clear and forcible, and the exhibition of common sense throughout commends it to all honest readers.

ON BOTH SIDES OF THE SEA. By the author of the "Schonberg-Cotta Family." New York: M. B. Dodd. San Francisco: Bancroft & Co.

Few books given to the public within the past ten years have contributed more to the entertainment and profit of all classes of readers, or become more familiar in Christian families, than the series written by Mrs. Charles. She has peculiar ability to render attractive what, as mere statements of fact, or chapters of history, would have little interest, so that, since she threw such a charm around the scenes of the Reformation by the "Schonberg-Cotta Family," each new book from her pen has been welcomed with assurance of its worth. This last volume does not need to borrow from the popularity of its predecessors that it may find favor, but, by its own merit, fully sustains their reputation, and will be read by multitudes. Those who, through this work, make their first acquaintance with the author, will only regret that the pleasure has been so long postponed.

FAIRY TALES FROM GOLD LANDS. By May Wentworth. Published by A. Roman & Co.

The author of these Tales has been quite successful in attaining the object she appears to have sought. She presents in such form as always interests children, those lessons that will be of value to them. We are glad to have the promise of one who can produce so beautiful a volume as this, that she will occasionally furnish stories for the young folks who read the Occident.

THE PICKWICK PAPERS. Globe edition of Dickens' works. New York: Hurd & Houghton. San Francisco: Bancroft & Co.

New interest is felt in the works of Mr. Dickens, because of his visit to this country to give a series of readings from them. Without comment now on the the works themselves, we will only say that the Globe edition is almost free from fault in print, illustration, and finish.

We have received, with pleasure and thanks:

The Second Annual Report of the California Prison Commission, abounding in matter that may be wisely pondered by law-makers and people.

The Catalogue of the College of California, giving an encouraging exhibit of the condition of tha institution.

The San Francisco Municipal Reports, for the year ending June 30, 1867; published by the Board of Supervisors, and causing us to feel that we live in a great city, the history of whose government, for a single year, is full of interest.

Lippincott's Magazine, a new periodical, of fine appearance, attractive contents, and good promise.

The State Capital Reporter is the title of a new daily and weekly paper issued this week in Sacramento. It is a large and neat sheet, and is designed to be the central organ of the Democratic party.

EDUCATIONAL.

Pacific Female College.

It would have been a public calamity had the fears of the friends of this institution been realized, even in its temporary suspension. It is an occasion for congratulation that now it is likely to be beyond any such probability. Rev. E. B. Walsworth has been re-elected President of the College, and, with his family, will reside in the building. This announcement is abundant guaranty that all departments will be fully sustained, and all the interests of pupils will receive proper care. The connection of no individuals with such an institution, however, whether as officers or teachers, can give it the permanence and support essential to success, and we have reached a point in the progress of educational interests on this coast, when this should be very distinctly understood by our peop'e. We have an excellent public school system, and we take a just pride in its working, but our higher schools have been left heretofore, for the most part, to the enterprise of those who would establish them, or to the partial and temporary support of those who could be induced to give money for such a purpose. Thus maintained, they have done excellent service, and we owe much to those who have furnished facilities for the education of our children, without any endowment of the academies, and seminaries, and colleges that have been opened. There may not be necessity for so many, but there is necessity that such as will answer the demands of our population be properly organized, and well endowed, and placed in the charge of wisely selected boards of trust. We are glad that this is being felt, and we hope soon to see at least one broad and ample college, or university, for each sex, in California, placed beyond the contingencies of individual control. This will be a benefit to the people that all should covet, and it will stimulate, and indirectly aid, those private schools which will always find supporters in a communita where there is a high tone of interest respecting education.

The College of California.

The Catalogue of this College, just issued, represents a degree of prosperity it has never before exhibited. In the proper collegiate department there are twenty-one students, nine of whom are in the Freshman Class, a fact that prophesies well for the future, as it indicates that a draft is now being made upon our native born Californian young men for the supply of our colleges, and that parents are convinced that it is not now necessary to send their sons to eastern institutions that they may be educated.

The Mining and Agricultural Department seems to be well organized and prepared for progress, and the Academic Department, under the direction of Rev. I. H. Brayton and Rev. E. G. Beckwith, is remarkably prosperous, having a total of three hundred and one pupils.

This College has offered much to the Commission of the State University, and, no doubt, the offer will be acccepted.

The Marquis of Westminster has presented the citizens of Chester with a public park, which is pleasantly situated on the banks of the river Dee. The land and the laying out of the grounds cost the donor a quarter of a million dollars in gold.

Young Mechanics.

Parents, in apprenticing their sons, and young men in choosing their workshops of trade, can not be too careful in respect to moral influenees. The danger is not an imaginary one of a young man entering some shop where the atmosphere will pollute his very soul. We quote the description given by a gentleman of San Francisco, of his own employers: "Like too many that receive boys into their service, neither he nor his partner cared where their apprentices were at other hours, or how they occupied themselves in their own time, if only they were in their places during working hours." So he found his shopmates intemperate, profane, and Sabbath-breakers. (*Learn to Say No.*—Presb. Board.)

On the other hand, the search, if persevering, can not be vain, for a shop in which the influences will be healthful. There have been such shops, and we can not doubt that they exist still. The following is a hint of the wholesome atmosphere that characterized one establishment. "The young were taught to begin and end the business of each day in the privacy of the closet; and the same salutary lesson was taught to the entire body of the employed, for they were statedly assembled in a private chapel for morning prayer." And, with such an influence, we are not surprised to read the further statement: "Of all who have been in Mr. Budgett's establishment, probably not one could charge a failure in life on the habits acquired there."—(*Model Merchant*, Presb. Board.)

Theological Training.

Fear has been the leading feeling with which we have heard, from time to time, of Spurgeon's Pastors' Colleges: fear that this wonderful man was lending his power to the propagation of a race of uneducated ministers. It was with earnest curiosity, therefore, that we began reading an authentic account of his labors in this connection. We ended it with joy and gratitude to God. It seems that, so far from despising the learned tongues, he considers an "elementary knowledge" (and that is all that divinity students ever acquire,) of Greek and Hebrew as essential to ministerial usefulness. And, in fact, how is it possible for any practical man not to see this? In the case of Sill *vs.* Reese, lately on trial in the Twelfth District Court, many witnesses were placed on the stand who spoke only Spanish. How embarrassing it would have been to employ two interpreters — one to turn Spanish into Italian, for example, and another to turn the Italian into English. The Court would have permitted this, doubtless, only in case of absolute necessity; there would have been too much danger of the testimony becoming obscured, even with all honesty on the part of the interpreters, by such a double rendering. But God, in His Word, is a witness speaking in a foreign language, and is it not more likely that we will arrioe at his exact ideas if our interpreter is not only able to explain somebody else's English, but to unfold to us God's own Hebrew and Greek directly?

EDUCATION.—The Humboldt *Times* says: "If the object of our common school system is to exempt those whom we educate from labor with their hands, it must ever prove a failure, as to the greater part because the great bulk of the people of any country must work in some way or other, and a great many must needs perform hard labor. But the object of education is higher and holier than this. It is not alone to make our children smart, that they may make money. It is rather to make them wise, that they may be good and happy, judicious in their own behalf, and safe and honorable members of the community.

Attention!!

RELIABLE SEEDS.

EDWARD E. MOORE.

425 WASHINGTON STREET.

The undersigned, a Practical Agriculturist, is now prepared to supply the wants of Merchants, Ranchmen, and all others, by wholesale or retail, of such seeds as will not disappoint those who use them, as our seeds after using the utmost care in their selection, in getting them true to their kind. We have suitable grounds prepared to test the different varieties, so as to insure their entre reliability. The assortment consists of ALL KINDS OF VEGETABLE SEEDS, ALL KINDS OF FLOWER SEEDS, ALL KINDS OF GRASS AND RED AND WHITE CLOVER SEEDS; also, ALFALFA AND LUCERNE.

EVERGREEN SEEDS, NATIVES OF CALIFORNIA AND ADJACENT STATES. ALL KINDS OF TREES AND SHRUBS, ALL KINDS OF FLOWERS IN THEIR SEASON, ALL KINDS OF BULBS IN THEIR SEASON, STRAWBERRY AND RASPBERRY PLANTS, Etc., Etc.

The subscriber deems it superfluous to name every article for sale, but merely remarks, that no one has a superior assortment, and no one will deal more honorably by his customers, to whom he refers with confidence, as universal approval has been awarded him. Small papers at wholesale or retail. All communications, or orders, by Mail, or Express Companies, attended to promptly. Catalogues furnished on application, by letter or otherwise.

For sale by E. G. Sneath, Bowen & Brother, Fordham & Jenning s and all the principal dealers.

Family Reading.

Lines

GIVEN TO A FRIEND TWO DAYS BEFORE THE DECEASE OF THE WRITER.

When I beneath the cold, red earth am sleeping,
Life's fever o'er,
Will there for me be any bright eye weeping
That I'm no more?
Will there be any heart still memory keeping
Of Heretofore?

When the great winds through leafless forests rushing,
Sad music make;
When the swollen streams, o'er crag and gulley gushing,
Like full hearts break;
Will there then one, whose heart despair is crushing,
Mourn for my sake?

When the bright sun upon that spot is shining
With purest ray,
And the small flowers, their buds and blossoms twining,
Burst through that clay;
Will there be one still on that spot repining
Lost hopes all day?

When no star twinkles with its eye of glory,
On that low mound;
And wintry storms have, with their ruins hoary,
Its loneliness crowned;
Will there be then one versed in misery's story
Pacing it round?

It may be so — but this is selfish sorrow
To ask such meed —
A weakness and a wickedness, to borrow
From hearts that bleed,
The wailings of to-day, for what to-morrow
Shall never need.

Lay me, then, gently in my narrow dwelling,
Thou gentle heart;
And tho' thy bosom should with grief be swelling,
Let no tear start;
It were vain — for time hath long been knelling,
Sad one depart!

—*William Motherwell.*

Pleasure, Fame, and Power.

The experience of most worldlings has been Solomon's sorrow, repeated with the variations incident to altered circumstances, and the diminished intensity to be expected in feeble men — vanity and vexation of spirit all over again. And, as we are sometimes more impressed by modern instances than by Bible examples, we could call into court nearly as many witnesses as there have been hunters of happiness — mighty Nimrods in the chase of pleasure, and fame, and power.

We might ask the statesman, and, as we wished him a "happy new year," Lord Dundas would answer, "It had need to be happier than the last, for I never knew one happy day in it."

We might ask the successful lawyer, and the wariest, luckiest, and most complacent of them all would answer, as Lord Eldon was privately recording when the whole bar envied the Chancellor, "A few weeks will send me to dear Encombe, as a short resting-place between vexation and the grave."

We might ask the golden millionare, "You must be a happy man, Mr. Rothschild."

"Happy! I happy? What, happy, when, just as you are going to dine, you have a letter placed in your hands, saying, 'If you do not send me £200, I will blow your brains out!' Happy, when you have to sleep with pistols at your pillow!"

We might ask the world-favored warrior, and get for another answer, the "Miserere" of the emperor-monk Charles V, or the sigh of a broken heart from St Helena.

We might ask the brilliant courtier, and Lord Chesterfield would tell us, "I have enjoyed all the pleasures of the world, and I do not regret their loss. I have been behind the scenes. I have seen all the coarse pulleys and dirty ropes which move the gaudy machines! and I have seen and smelled the tallow candles which illuminate the whole decorations, to the astonishment of an ignorant audience."

We might ask the dazzling wit, and, faint with a glut of glory, yet disgusted with the creatures who adored him, Voltaire would condense the essence of his existence into one word, "*Ennui.*"

We might ask the world's poet, and we would be answered with an imprecation by that splendid genius, Byron, who

"Drank every cup of joy, heard every trump
Of fame; drank early, deeply drank; drank draughts
That common millions might have quenched — then died
Of thirst, because there was no more to drink."

The Young Folks.

The Squeezed Rabbit.

It was half-play day. Alfred and Pansy were bent on improving the "shining hours," but they could not agree as to the best way to do it. Pansy wanted to keep school, and Alfred wanted to run a Pacific Railroad and American Telegraph Company through the hall.

Party spirit ran high. The balance of power in Europe was nearly lost, but a bright thought of Alfred's restored matters to a happy equilibrium.

"There, I almost forgot! Sam Hardy promised to lend me his rabbits. Let's go for them now. We'll play, they are a menagerie."

"Won't that be splendid? I never saw a rabbit, except one squirrel, in all my life," said Pansy.

"Well, did I ever!" shouted Alfred.

Pansy joined in the laugh, though she did not see anything funny. They started for the rabbits, but at the gate Pansy drew back.

"Say, Alf, we ought to ask mamma," she urged.

"No such thing. After the rabbits are safe in the sitting-room she won't say a word; but if we ask her beforehand, she'll say she can't have such a clutter."

"Mamma won't like it. I'm going back to ask her."

"If you aren't just as mean as you can be! Here, I've given up my railroad and everything to please you, and now you're going to go and spoil it all."

Pansy was not convinced, but she was silenced, and she followed Alfred submissively.

Sam only lent them one rabbit, because the other was sick. Alfred took possession of that one, and Pansy was only too glad not to have to touch it, for she was afraid of everything that crept, or crawled, or jumped, except White Toes, her kitten.

Alfred led the way round to the end door. Instead of going in, he said:

"Look here, Pansy, you run up and ask mamma if we can bring him in. It is kind of mean not to say a word. If she doesn't want him in the house, we can take him into the shed. I don't care so very much."

Pansy came back in a minute to say "yes," and they brought the rabbit into the sitting-room. They played menagerie. Alfred was keeper, and Bun was elephant, lion, and giraffe, by turns. Pansy had a tender spot in her heart for Bun; but she liked the looks of him better a little ways off than close to. She would call "Bunny, Bunny, pretty Bunny Pinkeyes," just as Alfred did, and hold out some clover, but the minute the rabbit came leaping towards her, she ran with all her might. But Alfred was not a bit afraid, and the rabbit liked him, and would eat out of his hand. They could have played with him till bedtime, and not been tired of it, but their mother came in and said they had had him long enough, and must take him home.

So Alfred caught him, and they carried him back to his pen. After they had fastened him in, and just as they were going to leave him, Pansy thought to herself,

"Now, I will be brave, and take hold of him just once," and as he came up to the front of the cage, she put her hand through the bars and gave him a clutch. He tried to get away, but the harder he tried, the tighter she held.

It was hardly a second before Alfred saw what was going on.

"Oh! Pansy, let him go! Let him go! You'll kill him!" he screamed.

Pansy dropped him as if he had been a live coal, but he had had a tight squeeze, and could only crawl a little out of reach, and lie and pant, and wink his eyes pitifully.

"Oh, dear! Have I killed him?" asked Pansy, out of breath with fright.

"Just like a girl, not to know enough to take hold of a rabbit by his ears," muttered Alfred.

"It's a dreadful way. I guess you wouldn't like to have anybody take you up by your ears," said Pansy.

"Oh, my stars!"

"But, do you suppose I have killed him?" asked Pansy.

"He isn't dead yet," said Alfred, hopefully.

"It would be so dreadful — the other one sick and all! Oh, I would rather have hemmed a whole sheet."

"Perhaps he will get over it. There! he's going to move now."

"If he would only just jump once!" said Pansy, brightening as the rabbit stirred. "Isn't that Sam? Oh, dear! where can I run to?" she added, hearing the grass rattle.

It was only the wind, but Pansy was too scared to stay.

"I guess I'll go home, Alf; and don't you tell who did it. You watch a little longer, and perhaps he'll get over it."

"No, I won't say a word," replied Alfred.

Pansy went home, and Alfred came a little later.

"Is he dead?" Pansy asked, meeting him at the door.

"No, he is jumping all about."

"Oh, I'm so glad."

"Not the one you squeezed, though. He crawled off into the back pen, and didn't come out again. I haven't seen him for ever so long."

"Oh, Alf, what shall I do?"

"Set the mouse-trap and catch a rat, as you wanted to the other day, and give that to Sam."

"It's too bad to laugh at me."

Alfred sobered down a little. "Let's go and tell Sam all about it."

"I never could."

"That's what mamma made me do when I broke old Lucy's gate swinging on it, and when I kicked my ball through Deacon Brown's cellar window."

"But mamma gave you some money to pay with."

"Not for the window. Don't you remember, it took every cent I had, and I had to go without the badge for our foot-ball club? But I don't believe but what she'll give you some money, if you'll ask her."

Pansy shook her head and ran away. But the rabbit's eyes kept staring at her out of every corner. She tried to forget, but it was no use. Everything reminded her of it. Even the purring of her kitten when she went to bed, and White Toes nestled up against her cheek, made her think of the poor, panting rabbit. She gave White Toes a shove that landed her on the floor, for she was angry with herself and everything else. But kitty begged so plainly and so hard to be taken back, that Pansy was sorry, and called her up to her old place, and went to sleep with one hand on her back.

Pansy did not say anything about the rabbit all the next day, till towards night. Then she crept up to Alfred and asked, in a whisper, for fear some one would hear her,

"Do you suppose twenty cents would buy Sam another?"

"I don't know. They cost lots."

"I'd stay in from recess a whole week before I'd touch that rabbit again!" said Pansy, going to look for her money.

"I thought I had twenty cents, but I've lost ten," she said, coming back. "Do you suppose he'd be willing to take White Toes instead?" and Pansy burst out crying, for her heart was bound up in White Toes.

"He'd be a mean fellow if he did. I'd never speak to him again as long as I lived."

"If he would only take White Toes; perhaps he wouldn't fight me then," said Pansy, giving vent to her great fear.

"I'd like to see him touch you!" said Alfred, putting his teeth together. He would have risked anything to protect Pansy.

Pansy pictured to herself Alfred flying off at right angles from under Sam's feet — for Sam was very strong — and did not feel much easier in her mind.

"I never can tell him," she said.

"I'll go for you."

That would never do. She was more afraid for Alfred than for herself.

"No, I'll go myself, and I'll give him White Toes," she said, just above her breath.

"You shan't go alone, anyhow," said Alfred.

They started, Pansy hugging White Toes with all her might, not daring to look at her, nor speak to her, nor think what was going to become of her. Just before they reached Sam's house, Sam came out with both rabbits in his arms. Pansy was too frightened to speak, for she thought both rabbits were dead, and Sam was coming to lay it all to her, but just then they jumped.

"Oh, they're alive!" shouted Pansy.

"Alive! I should think so. Much as I can do to hold 'em," said Sam. "Something ailed 'em yesterday, but they've got all over it."

Pansy whirled round on her toes, and chattered to White Toes:

"Oh, you little darling, humpty, dumpty, you're better than forty-'leven rabbits," and she ran home as fast as she could for kissing White Toes.—*The Advance.*

AGRICULTURAL.

Pretty Poor Practices.

"Cosmos," who edits the rural column of the *Saturday Evening Post*, enumerates a list of pretty poor practices.

It is pretty poor practice for a farmer to dig and delve, tug and grub, and clear up fifty acres of land, at a cost of $2,000, and then, in the third year, surrender about a fifth of it to the briars, brambles, and ox-eyed daisies.

Poor practice to half manure, half plow, half seed, and half cultivate a field, and then harvest from it less than half a crop.

To keep two inferior, scrawny, scrub cows, for dairy purposes, that give less milk than one good one, and consume more food than three.

To purchase in town five hundred loads of livery-stable manure, and suffer six hundred of better home-made manure to run to waste.

To attempt to fatten three hogs into 1,200 pounds of pork on just as much feed as would keep two nicely growing.

To estimate agricultural fairs as arrant humbugs, and spend three days every month saving the country at political meetings.

To depend upon borrowing your neigbors' rakes, mowers, and all sorts of implements in haying and harvesting time.

To house up a thousand bushels of grain, waiting for a rise, till one-tenth has gone to feed rats and mice, and the remainder smells like the essence of rat, and the price is down forty per cent.

To plant a big orchard of fruit trees, with a first thought of money-making, and leave them to do or die.

It is poor policy not to keep posted on the market value of the products you raise, and to allow speculators to make more money out of your labor than you do yourself. So take the papers.

Ruinous Wheat Culture---A Warning to California Farmers.

It is a matter patent to all intelligent persons who have resided in California for the last ten years, that the exuberant productiveness of our wheat lands is, under the present system of culture, rapidly and surely passing away. Less than ten years since, it was the generality and not the exception, that wheat averaged, in most sections of this State, fully forty bushels per acre, while instances were not uncommon of from sixty to eighty bushels being produced in favored localities. At the present time the average product of wheat throughout the State is about twenty bushels, or fully fifty per cent. less. The causes that produced this result are the same as have been active in Ohio, Illinois, and other western States. Our farmers have done more scratching than ploughing—for stirring the soil three or four inches deep is not ploughing—have volunteered crop after crop on the same land, without rest, change of crop, or manure. In fact, in most cases they have burned their straw rather than return it as manure to the soil, thus depriving it of any renovating material. Under these circumstances the average yield of grain is becoming less every year, and the quality of our cereals poorer and poorer as time progresses. It is time that this system of ruinous culture should be abandoned and a better one prevail. It costs but little more to plough deeper, and, by occasionally summer fallowing, the average yield for a given term of years is decidedly increased. It costs no more to cut good bearing grain per acre than it does a light crop, and the former tends greatly to keep weeds down.

Providence has favored our wheat-growers with comparative immunity from the ravages of insects, rust, or blight, but these will doubtless follow in the wake of an impoverished soil. It is for our farmers to look this evil system squarely in the face, and abandon it before the result in the western States is duplicated here.—*S. F. Bulletin.*

PACIFIC COAST ITEMS.

FROM Sitka, our correspondent writes on December 22d, that the winter weather thus far was delightful — preferable to that of San Francisco, and in marked contrast with the dismal, wet weather of the fall season. December 11th, the mercury stood at 58, and on the 20th at 12 above zero. The last named day was clear, and everybody engaged in skating on the little lake in the rear of the town. Gen. Davis was enforcing the law prohibiting the sale of liquors. On the 17th, the Russian ship *Zaritza* sailed for St. Petersburg with a part of the Russian garrison. Our correspondent writes that no new gold mines have been found.

DESPITE the rather sudden changes in the temperature during the past three weeks, the sanitary condition of San Francisco is gratifying. The *Alta* says the number of deaths last week, were forty-four against sixty-one on the corresponding week of last year (1867.) This is a diminution of twenty-eight per cent. The population is now 7,000 to 9,000 greater than at that time.

DURING 1867, there were 33,871 arrivals, and 19,401 departures from this port. The former exceed the latter by 14,470. During 1866, the excess of arrivals over departures was 3,683. The approach of hard times in the Atlantic States, the unsettled state of affairs at the South, the increased farming prosperity of this Coast, and the exemption from the disabilities of paper money, have of late influenced migration to California.

THE Cononers' jury on the Eisner-Robitscheck case, in this city, were unable to agree on a verdict. The medical testimony was, that the pistol could not have been held by Eisner. The will of Eisner, made two years ago, has been found. In it, he gives $100 to each of his three brothers, $200 to benevolent societies, and the remainder, amounting to $60,000, to Robitscheck. The latter is held to appear before the Grand Jury on the charge of murder.

THE California Academy of Natural Sciences held their annual meeting, at their rooms on Clay Street, on the 13th inst. The following are officers for 1868: President, J. D. Whitney; Vice President, Dr. James Blake; Corresponding Secretary, H. N. Bolander; Recording Secretary, Theodore Bradley; Treasurer, Edward Bosqui; Librarian, Dr. A. Kellogg; Director of Museum, Robert E. C. Stearns.

GEN. FREDERICK STEELE, late commander of the department of Oregon and Washington, died suddenly of apoplexy, at San Mateo, on Sunday. He was a native of central New York, and bore a distinguished part in the war of the rebellion, while commanding the Union forces in Arkansas and Missouri.

THE nights, for a week past, have been unusually cold, from Portland to Los Angeles. On the Sierras, the snow has an unusual depth, and the telegrams show a thickness of ice among the mountains such as has not been known for eight years.

MILLERTON, we learn by a private letter, has been inundated, some of its houses swept away, and the newly-sown wheat lands of the upper San Joaquin Valley so long submerged as to be ruined for this year's crop.

VIRGINIA CITY and Carson are this week enjoying first class sleighing.

TELEGRAPHIC SUMMARY.

POLITICAL.—There seems to be a party in Congress, though not the majority, who are bound to oppose any policy foreign or domestic, originated by Mr. Seward. Hence they oppose paying the purchase-money of Alaska, and, in advance, introduce resolutions opposing any further acquisitions.....The Boston *Post*, a leading eastern Democratic paper, says the Democratic party needs a positive policy. It should abandon the dead carcass of slavery and adopt a platform of living issues. Let them, says the editor, cease to be a party of negatives, and adopt, for a platform, economy, integrity, impartiality in the affairs of General and State governments, and they will sweep the country in the next Presidential election.....The Congressional Reconstruction Committee have reported a bill for the readmission of the ten States of the South not represented in the present Congress, on the principle that these ten States, by their own act, have placed themselves outside the Union, and are now to be treated in all respects as if they were so many foreign communities seeking admission into the Union.....The Legislature of Ohio have elected Mr. Thurman, Democrat, to succeed Senator Wade, the acting President of the U. S. Senate. The friends of Mr. Vallandingham urged his claim, without avail.....The U. S. Senate having reinstated Mr. Stanton as Secretary of War, Gen. Grant has resigned the portfolio, but the President refuses to recognize him, and transmits all business through the army headquarters..... Senator Williams, of Oregon, has introduced a bill to fund the national debt on a permanent basis, paying four per cent in gold annually.....The Legislatures of Ohio and New Jersey have voted to rescind the previous legislative action of these two States in favor of amending the U. S. Constitution.

FOREIGN.—News from Siberia states that rich and extensive gold mines have been discovered on the Amoor River. The natives, so remote from Russian rule as to feel independent, have made a California rush to the diggings.....The King of Denmark, by proclamation, has informed his subjects, on the islands of St. Thomas and St. Johns, in the West Indies, that these islands have been ceded to the United States.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, January 15.

FLOUR—Small sales of Oakland and Manhattan Extra, in hf and qr sks, $8; 2,000 bbls Oregon Extra, in qr sks, 7 50. We quote city brands as follows: Superfine, hf sks, ℔ 196 lbs, $6 75@7 00; qr sks, 7 00@7 25; Extra, hf sks, 7 50@7 75; qr sks, 7 75@8 00

WHEAT—Sale of 1,000 sks choice, a few days ago, but not then reported, $2 70; 1,300 sks do in two lots, full price; 500 sks fair, $2 50. We quote the market quiet at $2 50@ $2 65 ℔ 100lbs for common to good shipping; a choice lot of Santa Clara might command $2 70. At the close, 2,200 sks good milling, in lots. $2 65.

BARLEY—Market continues quiet at $1 75@1 87½ for feed and brewing. Sale of 4,000 sks feed, $1 75 ℔ 100 lbs. At the close, 1,500 sks, private.

OATS—Sale of 670 sks light, $1 75; 500 sks good, $1 80; choice heavy quoted at $1 85 ℔ 100 lbs.

POTATOES—Holders of Humboldt are firm in demanding $1 50 for choice; Bodega, $1 20@$1 25 for best description. Sale of 100 sks ordinary Petaluma, $1 10; 200 sks fair Humboldt, $1 25; 400 sks good do, $1 37½; 800 sks choice do, private; 500 sks do, $1 50; 100 sks Puget Sound, $1 50 ℔ 100 lbs.

CORN—Choice Yellow commands $2 25; medium $1 87½ ℔ 100 lbs.

RYE—Is quotable at $1 75@1 87½ ℔ 100 lbs.

BUCKWHEAT—Is still dull at $2@2 25 ℔ 100 lbs.

BEANS—Sales of 250 sks small White, $3 25; 150 sks Pea, $3 25; 150 sks Red, $2. We quote jobbing rates as follows: Bayo and Butter, $3@3 12½; Pea and small White $3 25; Pink $2 25, and Red $2 ℔ 100 lbs.

ONIONS—Are still scarce at $4@4 25 ℔ 100 lbs for choice Yellow.

BRAN—The millers are selling at $25@27 50 ℔ ton, according to quantity.

MIDDLINGS—We quote feed descriptions at $40, and Shorts at $35 ℔ ton.

HAY—Prices remain steady at $18@23 ℔ ton, as extremes for good to choice.

OIL CAKE MEAL—Is in fair demand at $30 ℔ ton from the mill.

BUTTER—Fresh roll, 45@50c; medium scarce.

CHEESE—20@22½, outside figure for new California; Eastern, 22½@25c.

EGGS—50@52½c.

POULTRY—Live Turkeys, 15c per lb: Hens, $6 50; Roosters, $7 50; Ducks, $6 00@6 50 per doz; Geese, $3 00 ℔ pair.

PROVISIONS—California Bacon, 13@14c; Oregon do, 12@ 12½; California Hams, 13½@14c; Lard, 11@11½c for Eastern and California.

HIDES—430 California dry, usual selection, 14@14½c ℔ lb.

WOOL—Inactive at 11@12c for clean fall, and 16@17c for clean spring.

TALLOW—Beef is quoted dull at 7½c ℔ lb.

San Francisco Cattle Market.

We have no change to notice in prices this week. The market remains firm, in consequence of the bad condition of the roads, preventing the driving in of Cattle.

We quote the slaughterers' prices as follows:

BEEF—American, 1st quality, 11@11½c ℔ lb; Spanish, 1st quality, 10½@11c; do 2d do, 9@10c; do 3d do, 8@9c.

VEAL—12½@15c ℔ lb.

MUTTON—9½@10c ℔ lb.

LAMB—10@12½c ℔ lb.

PORK—Undressed, 6@6½c; dressed, 8½@9c.

S. F. Bulletin.

A Thrifty Society.

The Policies of the Equitable Life Insurance Society, 91 Broadway, N. Y., average larger in amount than those of any company in our country, and its losses will not reach more than one-half of the percentage of many older companies. In this as in all that relates to Insurance, it seems has not been paralelled in the annals of the business in this country or Europe. *All Cash* income $3,000,000—*Purely Mutual*—dividends available on the *Second Payment*—and not as in many companies—deferred four years.

Responsible, active agents wanted on the Pacific Coast.

E. BUTTERFIELD,
General Agent.

The articles which appear in leaded type, in the various Departments of The Occident, *and those alone, are original.*

NOTES ON

CURRENT TOPICS.

The true policy for California is to furnish, as rapidly as possible all the facilities necessary for the education of her sons, and for the development of her resources, and the State should therefore have direct supervision of such institutions as may have this design. Senator Stewart's bill in Congress for the establishment of a National Mining School, were all its details practicable, and the locatiou of the school selected in reference to the advantage of the mining region, would be of sufficient importance to warrant the support even of the States not directly interested in this department of national wealth. But, if established according to the provisions of the bill presented, it will be of little value even to this State, which is more directly interested than any other, and it was a wise regard to our own welfare that prompted the Legislature to the passage of a resolution, last week, asking Congress not to act upon the matter in its present form. We can have a better and more available course of study upon all the branches of science connected with mining, in the State University we are about to organize, than could be given in an institution subjected to all the unfavorable influences of national control and patronage. We need to know what would have practical worth in the mines we are to work, or open. The means of knowledge would be at hand, and not hundreds of miles away. New discoveries, which are so often surprising us, would be investigated without delay, and on the spot, and every opportunity afforded for the practical application of the principles and theories which could have such illustration in no other locality more central for the nation. Let us, without delay, and with our eyes fixed on the future of California, provide within our own territory for its most complete development and elevation.

The N. S. Presbyterian Committee on Home Missions has adopted a resolution, the Christian enterprise of which is worthy of all praise. It reminds us of the expression we heard and saw so often a few years ago, "in advance of all others:" and the fruits of the seed the execution of this purpose will scatter over the belt across the continent it proposes to cultivate, will be a glorious harvest, even before all the seed-sowing shall have been accomplished. They have voted to expend $250,000 this year in the support of missionaries and the formation of churches along the line of the Pacific Railroad, as it presses on towards the Black Hills, and is attended by a throng of residents unparalleled and astonishing. A large meeting was held in the Madison Avenue Church, New York, a few weeks ago, by way of endorsement, from the people, of this decision of the Committee, and accounts show it to have been exceedingly interesting and enthusiastic. The idea is grand and wise, almost beyond precedent. The lines of Christian sentiment running side by side with this gigantic movement that is attracting the notice of the world, are brilliant with the spirit of a religion worthy of our times. The men of God who keep pace with the locomotive, and are present with the teeming population when they first wake the echoes of that wide area with the sounds of civilization, will be a power for good, forestalling evil, or grappling it before it is rooted and strong. The churches that shall be reared in the midst of the villages and cities that spring up, as if by magic, along this mighty artery of national life, will be the monuments forever of the foresight that is thus exhibited, and the lighthouses whose rays shall penetrate far into the interior when multitudes shall there, too, seek for homes and success. There need be no fear that such home missionary spirit will not have a blessed and ever-increasing reward.

In our first issue we noticed the fact that, during the Centenary year, the Methodists raised over $800,000 for "general missionary" purposes. This was by no means the full extent of their liberality. The N. Y. *Methodist* contains a series of classified tables, giving the amounts contributed during the Centennary year from forty-five of their sixty-six conferences in the United States; showing that the noble offering of $6,931,255.97 was made by the members of that denomination in that memorable year. This will be increased when full returns are received.

It is a fact worthy of notice, and significant, as effecting the permanent interests of our State, that, since the fare from the Atlantic coast has been reduced, a large number of immigrants have come here to buy and cultivate the soil. A larger proportion of men with families have removed here, expecting to remain, and the ratio of this class increases from month to month. What is needed more than anything else in these States and Territories, is a greater number of those who come to find *homes*, rather than of those who come to get *money*. We want bona fide residents to occupy the inviting regions waiting to be tilled, to develop the resources that require time for their full exhibition, to set in motion the various agencies of productive industry, and, as reliable citizens, assume responsibility throughout the country for the support of the educational and moral and religious interests that both indicate and promote the real prosperity of a land. The day for mere adventurers has passed. The call is now for those who will abide and identify themselves with the fortunes of this coast, and we bid all such men a hearty welcome, while we believe we can offer them a reward that can be found nowhere else on earth. They are not needed so much in the cities as in the country, and they learn this soon after arriving, if not before. There is no special demand for men who wish to do little and get much, nor for those who wish to get all they seek in two or three years. As many of these classes are carried back by the steamers as they bring out, and we are not sorry that they go. Let men come here who will be Californians, and they can have rare success. The welfare of society, of the State, and of the church, makes earnest appeal for such men.

A friend of ours, writing from Montana, manifests symptoms of violent loneliness and homesickness. He says: "Please write me something in the form of news. Did you have chicken, or turkey, on Thanksgiving Day?" Doubtless many of our readers have friends in a similar condition, this winter, back in the territories. A proper degree of compassion for their sufferings would be expressed by placing their names on the mailing list of The Occident. They would thus be sure of receiving the latest news, veryregularly, and in agreeable form.

The Board of Education in San Francisco has accepted a proposition from the Catholics that their school on Tenth Street be received into the Department, on condition that, after school hours, the priests be permitted to use the building for the catechetical instruction of those children who may be assembled for this purpose. No doubt it is a good thing to have as many children as possible in the schools controlled by the Board, and we are especially glad to see a disposition to place Catholic children within the proper range of our public school system. But if Father Gallagher wishes to make such a transfer, for any reason, why not do it as any other person would be expected to do it? No one would restrain him from assembling Catholic children for religious instruction, at the time specified; why make the acknowledgment of this right by the Board of Education the establishment of a *precedent* which may be even revolutionary in its tendency? It is opening a door a little which it will be easy to open wider. It is the letting in of a stream that may become too mighty for the Board to control. No party, no sect, no church, should have even *quasi* recognition in the Board of Education.

The monument in honor of Washington, at the National Capital, rises very slowly. Less than half its height has been reached, and should the remainder be reared with the same rate of progress that has marked what is completed, more than fifty years will be included between the corner-stone and the top-stone. In its present state, and with the prospect made likely by the past, this monument is no

great honor to Washington or the people who have undertaken to erect it. If it can be finished by the voluntary contributions of citizens, this is much to be desired, but if for half a century it is to stand as a reproach to those who only began to build, we trust Congress will relieve the nation of such a possibility and finish the work.

Religious Intelligence.

PACIFIC COAST.

Rev. H. R. Avery, recently of Pacheco, now resides at Walnut Creek, in Contra Costa County. Mr. Avery had preached at Walnut Creek half of the time for more than a year previously.

Rev. S. D. Simonds, a well known minister of the Methodist Church, sailed for the East a few days since, on a six months' visit. He is a gentleman of varied talents and rare industry.

Rev. C. C. Wallace, pastor of the Placerville Presbyterian Church, preached an effective and earnest New Year's sermon on the text: "I would not live alway." Job vii, 16.

EASTERN.

Rev. Dr. Engles.—The Philadelphia *Presbyterian* announces the death of the venerable Dr. Engles, for a long while the sole and, during his connection with it, always the chief editor of that able and influential paper. He was in the seventy-first year of his age. A memorial sermon was preached bs Rev. Dr. Shields, in the Seventh Presbyterian Church in that city.

The Presbyterian Board.—The Treasury of the Foreign Mission Board of the Old School Presbyterians have, by special contributions, paid off the debt of $35,000. But the increase that was hoped for to the Treasury from the contributions, has been small — but little over that of last year.

Rev. Dr. Maclean, President of Princeton College, has resigned the duties of that office, after a long term of service. In a communication to the Board of Trustees, Dr. Maclean referred to his long connection with the College, commencing with his election to a tutorship in 1818.

The Calvary Baptist Church, corner of H and Eighth streets. Washington, D. C., was destroyed by fire, on the 11th ult., from the explosion of a flue. The loss is stated at $117,000, and insurance $55,000. The church was built about two years ago.

Rev. E. B. Parsons, of the New York Fourth Presbytery, has accepted an invitation to the Union Presbyterian Church at Sauquoit, N. Y., where the gifted and devoted McGiffert labored so successfully many years.

Rev. Richard Newton, D.D., (Episcopal) succeeds F. A. Packard, Esq., deceased, as editor of the periodicals of the American Sunday School Union at Philadelphia, and S. Allibone, Esq., will edit their books.

Rev. George D. Baker, late of the Second Presbyterian Church of Watertown, N. Y., was installed, on the 3d ult., in the Presbyterian church (O. S.) of Oneida, Madison County, N. Y.

It was stated by the pastor, Rev. Mr. Dawson, that seven hundred children have left the Sunday School of the Seventh Presbyterian Church in New York, the last year, for want of teachers.

The Rev. Joseph Torrey, D.D., Professor of Moral Philosophy at the University of Vermont, died last month, at the age of seventy. He had been connected with the College forty years.

A revival at Oberlin, during the past term, has been followed by about fifty conversions.

The new Congregational church at Washington, D. C., will cost $100,000.

It is estimated by the American Board, that an average of one cent per day from each of the church members represented by it, would yield nearly $1,500,000 a year for missions.

Dutch Missionary Receipts.—The foreign mission receipts of the Reformed (Dutch) Church for the present year, fall short of the disbursements by nearly $20,000.

Mr. William Kincaid, jr., a recent graduate of Oberlin, was ordained over the church at Rushville, N. Y., October 5th. Sermon by Dr. Heacock, of Buffalo.

The Presbytery of New York, December 2d, voted cordially in favor of the basis of union proposed by the Philadelphia Union Convention last month.

Rev. Dr. H. H. Jessup, of Beirut, Syria, arrived at New York on November 29th, and went immediately to Montrose, Pa.

FOREIGN.

Presbyterian Mission in Bogota, S. A.—Rev. T. F. Wallace writes, September 11th: "Last Sabbath I preached in Spanish, and, although the day was quite unpleasant, our room was crowded. If we have such an encouraging attendance without giving any public invitation, at a private house, in an out-of-the-way place, what might we expect had we a hall or a church in a central position. This we must have if we think of continuing this mission."

Louis Napoleon and the Bible Society.—A deputation from the English Bible Society had an audience with the Emperor Napoleon recently, and presented him with a copy of the Bible. The Emperor made a brief address to the gentlemen of the deputation, in which he declared that it was his first rule to protect all religions.

Dr. Hepburn, missionary in Japan from the Presbyterian Board, has completed his Japanese dictionary, and is soon to begin the work of translating the Scriptures into the same language.

The patriarch of the Copts in Egypt, like patriarchs of the other Eastern churches, enjoys a kind of temporal power over the members of his church.

Franz Bopp, the philologist, died lately at Berlin, aged sixty-six years. He was the most eminent linguist in Europe.

Twenty-five Protestant Missionary Societies are now laboring in India.

MISCELLANEOUS.

Dying Words of Distinguished Persons.

A death bed's a detector of the heart;
Here tried dissimulation drops her mask,
Here real and apparent are the same.

I have endeavored to do my duty.—*Taylor.*
There is not a drop of blood on my hands.—*Frederick V. of Denmark.*
You spoke of refreshments, my Emelie; take my last notes, sit down to my piano here and sing them with the hymn of your sainted mother. Let me hear once more those notes which have so long been my solace and delight.—*Mozart.*
A dying man can do nothing easy.—*Franklin.*
Let not poor Nelly starve.—*Charles II.*
Let me die to the sounds of delicious music.—*Mirabeau.*

Light from Figures.—The statistics of Romanism, particularly in our country, are encouraging to those who take despondent views of the future, through fear of its rapid growth and ultimate triumph. Twenty years ago the Protestants in the world numbered 64,000,000, and Catholics, 167,000,000, being not quite two Protestants to five Catholics. Now Protestants number 93,000,000 and Catholics 185,000,000—not two Catholics to one Protestant. There is a steady decline in the leading Catholic powers, while the leading Protestant powers are advancing. In this country, discovered and largely settled by Catholics, millions have left their church and they now only claim four millions of the population. Without immigration it would speedily decline here. In twenty years the Roman Catholic immigration has only been twenty per cent. in excess of the Protestant. The tide is now turning, the majority of the immigrants last year being Protestant, while the native increase is largely Protestant. In the United States, there are 2,442 Catholic churches to 54,000 Protestant. They have 3,100 priests; while there are 3,000 Congregational, 2,700 Episcopalian, 7,000 Presbyterian, 11,000 Baptist, and 30,000 Methodist ministers. In the once Catholic State of Florida, there are 18 Protestant churches to one Catholic; in Louisiana six to one; in Maryland, fourteen to one; in New York there are five to one; in New Jersey, eighteen to one; in New England, twenty-four to one. Between 1840 and 1852, Romanists admit that 1,990,000 were lost to their church in this country.—*Am. Messenger.*

As there are certain men who become public disturbers in the name of peace, so are there teetotalers who make more noise upon water than other men upon wine.

Want, sorrow, disease, all that men call evils, are but disciplinarians that insist upon the scholar's learning his lesson himself, and punish him till he does.

The cheerful are the busy. When trouble knocks at the door, or rings the bell, he will generally retire if you send him word that you are engaged.

It is to be feared that many a young woman tears her hair ostentatiously at her husband's death, after having torn his much worse in his lifetime.

Teach your child to take care of himself. Many parents use their children only as a kind of spool on which to reel off their own experience.

Some married folks keep their love, like their jewelry, for the world's eyes; thinking it too precious for every-day wear at the fireside.

We should forget that there is any such thing as suffering in the world, were we not occasionally reminded of it through our own.

It is harder for a penurious man to be honest than for a gourmand to keep a fast.

Sense must be very good, indeed, to be as good as good nonsense.

IT is not work that kills men, it is worry. It is not the revolution that destroys the machinery, but the friction.

SATAN can never undo a man without his aid; but a man may easily undo himself without Satan's.

WOULD you make men trustworthy? Trust them. Would you make them true? Believe them.

THEY call the world censorious; but it is oftener favorable to false merit than unjust to true.

A GREAT many drop a tear at the door of poverty, when they should rather drop a sixpence.

HOLD on to the truth, for it will serve you well, and do you good throughout all eternity.

IT is a greater mystery that evil often results from good, than that good springs from evil.

THE drying up of a single tear has more of honest fame than shedding seas of gore.

OLD fools are more foolish than young ones; they have had much longer experience.

GENERAL NEWS.

CALIFORINIA BIG TREES IN THE EAST.—It is an interesting fact in natural history, says the New York *Times*, which we imagine is not known to everybody, that the celebrated big trees of California are now being successfully grown in this State, and are increasing in magnitude, according to the proper order of things. It is now thirteen or fourteen years since a gentleman, resident near Rochestor, made plantations of these gigantic trees from seeds procured in California; and the progress they have already made, gives proof that in 2,000 or 3,000 years they will attain their full growth, and cover an empire with their shadow. When we consider that they reach a height of 300 or 360 feet, and a circumference of 90 or 100, it is evident that this country will not be as destitute of lumber in the far distant future as some people have feared. The experiment of introducing these trees into this part of the world, has excited more interest in Europe, than among ourselves, and the proprietor is constantly receiving inquiries from England as to the procuring of seeds for use there.

OUR HIGHEST MOUNTAINS.—Mount Hood, in Washington Territory, has been claimed to be the highest mountain in the United States, being supposed to be 18,000 feet in height; but one recent survey has made it 11,600 feet, and another 12,500. Mount Shasta. in California, is 14,440 feet in height. There are said to be two peaks of the Sierra Nevada from 16,000 to 17,000 feet high; but a California correspondent of the Boston *Traveler* regards this as a fiction of Prof. Whitney. Mount San Francisco, in Central Arizona, is estimated at 13,000 feet.

IT is stated that the Spanish Government has made a formal offer to our Minister resident at Madrid to sell the islands of Cuba and Porto Rico to the United States for $150,000,000 in gold; the first installment of $50,000,000 to be paid down upon the formal delivery of the islands to the United States authorities, the second $50,000,000 to be paid one year thereafter, and the third at the end of six years.

INDEBTEDNESS.—The public debt of California is stated thus: Counties, $12,000,000; State, $5,000,000; towns, $3,000,000; total, $20,000,000. Annual interest on this debt, $1,600,000. Taxable property in the State, $207,000,000. Tax levied this year, $8,000,000. Cost of governing the 500,000 people in the State, $6,000,000.

THE work on the monument to the Father of his Country, in Washington City has already cost the sum of $240,000. At this time the structure has reached the height of 174 feet, leaving 374 feet to be completed, the entire height of the monument being fixed at 548 feet.

THE United States Senate has expunged the word "Honorable" from its journal. Its members are hereafter to be plain "Mr." This is republican simplicity.

THE State University of Georgia is in a very prosperous condition. It has one hundred and ninety-three students.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.
For Terms and further particulars, address

REV. P. V. VEEDER.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.
The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.
Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.
In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical train ing.
For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.
Further particulars may be obtained by addressing the Principal, at Oakland.

San Mateo Institute.

BOARDING SCHOOL FOR YOUNG LADIES.

Successor to G. W. Bell,

Assayer,

No. 512 CALIFORNIA STREET,
One door west of Montgomery, SAN FRANCISCO.
Gold and Silver Ores Worked.

Electro-Silicon.

This wonderful product of nature and the Pacific Coast (the two do not often work together) has fairly electrified New York. No sooner had its powers been tried on a seal ring, at Ball & Black's, than a rush was made for the establishment, and it required 100 Metropolitans and all their stars, to keep off the mob. Finding the pressure too great to be borne, the police bethought them of applying Electro-Silicon to the rioters' persons, which were consequently rubbed out of existence in a very few minutes. By the last Panama steamer, orders were received, by KEITH & CO., for 200 gross, which, at fifteen dollars per gross, are worth the sum of $3,000, a handsome order for an article discovered but yesterday.

THE OCCIDENT.

SAN FRANCISCO, SATURDAY, JANUARY 25, 1868.

PUBLIC PRAYER.

Much is written, and more said in all branches of the Protestant church, respecting the best forms and modes of prayer for general worship. Some of those who have been accustomed to use liturgies are not satisfied with such use of them as has prevailed, but advocate and practice innovations and additions. Among these are intoning, chanting, burning candles, wearing strange garments, and indulging in other appeals to the senses, to increase the effect of the services. Some of those who have been accustomed only to extemporaneous prayer, are not satisfied with this as it has been employed, but advocate certain supplements and changes, such as the repetition of the Lord's Prayer in unison, responses from the choir, alternate reading of supplicatory Psalms, and other approaches towards a liturgical service.

Those who desire *elegance* to be the chief characteristic of public worship, yet are unwilling, because of their training or habits, to favor either of these advances upon former usage, are pleased with studied, elaborate, artistic periods in the petitions of their ministers, with beautiful statements of truth frequently interspersed, and fancy they are most devotional when they listen to the most eloquent addresses to God.

These various changes have been exhibited in fact as well as argument, until there are Episcopal churches in which an Episcopalian of twenty years ago would be in the midst of unfamiliar exercises; Congregational churches, in which an old New Englander can not feel at home; Presbyterian churches, in which the "Directory for Worship" affords no assurance as to the order adopted, and churches of other denominations, in which men of former days would find themselves quite as really among a people whom they know not. In accordance with the sentiments thus having illustration, new "Orders of Service" are published, and new collections of prayer are offered in aid of Christians who are unable to command sufficiently polished rhetoric for the highest devotion, and we know not to what extent the innovations may yet be carried.

Now, there are arguments in favor of a liturgy, but the experience of those whose hearts are glowing with love and who long to express it, affirms that these are very few and of little weight, unless the prayers proposed for general use are as simple in form, and as direct in language as possible. Had the Episcopal Book of Prayers been a collection of truths, or pleasant figures, or strangely composed petitions, or all of these combined, it would by no means excite the reverence and affection with which it is now regarded. Its charm and power lie in the extreme simplicity by which it is distinguished, and which render it easily understood at once. Were Thomas Carlyle or Ralph W. Emerson moved to give the public a book of prayers, to say nothing of the spirit it might manifest, we should know beforehand that while it would be good reading, and perhaps worthy of study, it would be idle for most of us to try to pray through the forms it might contain. The reason is, that we are checked in our devotion by the necessity to study what we make its vehicle. We are attracted from our position before the Throne of Grace by any strange conceit, or beautiful figure, and we come back only by an effort of the will. Everything, therefore, both in subject and expression, which occasions such necessity or diversion, is inappropriate, if not unworthy. Those who really desire to pray do not wish to study at the same time, nor to be amused by the *manner* in which they are led into the audience-chamber of the Deity. Prayers in which all classes are expected to unite should be as free as possible from what may direct attention to the terms employed — as dykes are the most perfect when they present the fewest obstructions and the least friction to the stream that passes through them — as dress is the most faultless when none of its details are noticed, but the whole contributes most to the symmetry and comfort of him who wears it. Hence, they should not be composed of theological statements, and rhetorical rhapsodies, and the announcement of facts to God; nor should they be expressed in sentences involved, long, and indefinite; but, simple, clear, direct, they should bear the spirit into the presence of Jehovah, and become the medium of its wrapt communion with Him. In short, they should be formed after the counsel of Paul to the Corinthians, which he sums up in the declaration: "In the church, I had rather speak five words with my understanding, that I might teach others also, than ten thousand words in an unknown tongue."

If these remarks are just, there is but little value in the various books which have been published of late, to aid Christians in prayer, so far as they are intended to be forms for use. Take the "Prayers from Plymouth Pulpit" as an example. The volume has much merit as a series of articles upon themes full of interest, and devotional in their tendency. Indeed, we can well understand that, uttered with the explanatory inflection and emphasis of the distinguished occupant of the Plymouth pulpit, they may have been far less objectionable as prayers for others than they are in print. Yet they abound in the peculiarities of thought and language for which Mr. Beecher is noted, and the attempt to appropriate them, on the part of ordinary men, would be as unfortunate as the attempt to imitate their author in any of his distinctive features. So far as such books cultivate a devotional spirit, they have worth; yet it may be doubted whether the matter they contain would not be more profitable in some other form than that of prayers.

Moreover, if these remarks are just, those who conduct the public worship of Christians should be careful to perform this exceedingly delicate and difficult duty so that all may be able, in heart, to say, Amen, when the prayers are ended. Ornate, eloquent petitions need not be framed, yet in style, in substance, in pathos, they should be as free as possible from defects or peculiarities. Then all will feel — not that they have been listening to a beautiful prayer — but that on its wings they have been borne nearer to God and Heaven.

RELIGION THE FRIEND OF PROGRESS.

"I believe religion to be a foe to human progress." What induced the man who made this remark in my hearing, a few days ago, to say so? Does he speak the truth? Does he believe what he says? My acquaintance with him — and it has been somewhat intimate for years — has led me to this conviction: that he looks upon the religion of Christ as he does, because he has never known what it has done for man, in the past, and does not know what it is doing for him now. His declaration recalls to my mind a remark once made by Dr. Samuel Johnson, the Colossus of English literature. He was asked why it was that the most of the literary men of his age were skeptical. His answer was, "Because they are ignorant of the Bible." He contended that if these men could see that book, as it is, free from the prejudices which had arrayed their minds against it, they would have accepted it, as he did, as the Book of Books, not for the heart only, but for the intellect as well.

I could but feel that if my friend, who gave so positive a form to his statement, could understand what the religion of Christ aims steadily, and with all its warmth and wealth of motive, to accomplish among men, the last charge he would ever make would be that it is a foe to human progress, or that it shuts up those who embrace it to a narrow round of thought, or plan, or action.

Suppose he should look only at its effect upon the *men* who are held up as models of its power. Let him see what it did for those men of whom it makes mention, during the sweep of the ages, when the books of the Bible were being filled out from the fresh experiences of the race, and will he not, as a candid man, be compelled to own that he detects in those men, in spite of all infirmities, a worth of character, and an energy in their plans, for their age and for the race, which places them not behind any of those whose names have come down to us? Let him leave the line of sacred history, when it was ended, and follow the race from that time to our own, and will he not find that many of the strongest and noblest men of the eras in which they lived have been the firmest friends of the religion of Christ? Their piety did not take them aside from all the wider movements of human life. The more truly they lived a religious life, the more were they pressed with the activities of business, and the more resolutely were they associated with the enterprises which the world will ever be carrying along for its progress and improvement. They may have loved their closet, but they were not shut up to it. They may have been devout in worship, but they were men of earnest work also. Religion did not damp their ardor, nor put out the fires of genius. It was rather that which roused into a glow all the elements of their manhood, and made them court earnestly all the best gifts in order to success. It was that which gave poise and strength to their intellects, tenderness to their hearts, exaltation to their characters, and beauty to their life. They believed in something which, with every purpose of their being, they endeavored to illustrate in themselves. Their Great Example is perfect, and he who seeks to be like Him must rise to a higher standard of all possible worth than he who has merely a human or ideal model — for all his powers will be quickened and taxed to be and do what his Master requires. How can a principle, or sentiment, or system of faith, which has such influence, be a foe to human progress? It is not, and it never has been.

Our Prisons.

The doctrine that the object of imprisonment for crime is only to protect the public from the designs of base men, and to punish those base men who have violated the rights of others, is unworthy of an intelligent Christian people. Prisons should be institutions for reform, as well as for punishment. The policy of government, in the construction of the buildings, in the management of the prisoners, and in the influences to which they shall be subjected, should be decided chiefly by the purpose to return as many of them as possible to the relations of liberty, with neither the inclination nor the necessity to be criminals again. This subject has been carefully studied by some of the wisest legislators and most

distinguished philanthropists of our country, and the discussions they have urged on the attention of the people have induced changes in many prisons of the eastern states which abundantly convince all, both of their wisdom and humanity. These changes relate to the manner in which prisoners are associated, to the means employed to protect the less hardened from the vile influence of the confirmed felons; to the influences brought to bear on all by way of cultivating self-respect, and stimulating them to well-doing, and to the removal of the whole system from the control of politicians, or unworthy men. In effecting them, the buildings have been divided, so that the inmates can be classified, or confined to separate rooms when this seems wise, those trades have been made prominent in the work-shops which would be of value to the men after they should be released, respectable libraries have been furnished, competent chaplains have been appointed, in some instances schools and Sunday Schools have been permitted, and while the prisoners have never been suffered to forget that they are in durance for crime, and must endure the full penalty, they have nevertheless been treated as though the State would benefit while it punishes them. The result has been a manifest improvement in the physical and moral condition of the men, and great advantage to the State. The young criminals have been reformed, and not confirmed in their evil ways, by their confinement in prison. The more desperate have been more easily controlled while serving their sentence, and sometimes restored to an honest living when it expired. The testimony is universal to the advantage, in all respects, of the revolution that has taken place in prison discipline and management, and it is wisdom to profit by the experience and advance of other States.

The investigations and report of the Prison Commission of the State of California furnish abundant proof that there is urgent need of reform in our prisons respecting the same particulars that have been noticed elsewhere, and the sentiment of the people will not allow them to be satisfied unless the Legislature takes some action on this subject that shall be, at least, the initiation of a new policy in the control and discipline of our various houses for correction and punishment. We are a humane and Christian people, and we should show this as really in the execution of our laws as in the bestowment of our charities. The welfare of the guilty and the interests of the State alike demand the attention we are glad to know they are likely to receive from those who make our laws.

The Sabbath---or Sunday.

In accordance with a promise in our former article, we now proceed to show the effect of the Sabbath "upon man's physical development."

Nature herself, by her immutable laws, establishes the necessity of *rest*. The night follows the day, and thus withdraws those genial influences which produce growth. The winter succeeds the summer, when the whole vegetable kingdom ceases from labor and lies dormant. Although the night is appointed for rest by sleep, we will show that that is not sufficient to invigorate the human system, where constant labor is pursued.

Dr. Farre, a distinguished physician in England, in his testimony before the British House of Commons, when labor was the subject of investigation, said:

"Although the night apparently equalizes the circulation, yet it does not sufficiently restore its balance for the attainment of a long life; hence, one day in seven, by the bounty of Providence, is thrown in as a day of compensation, to perfect by its repose upon the animal system."

He says, further, that "all men, of whatever class, who must necessarily be occupied six days in the week, should abstain on the seventh, and, in the course of life, would assuredly gain by giving to their bodies the repose, and to their minds the change of ideas, suited to the day for which it was appointed by unerring wisdom. I have frequently observed the premature death of medical men from continued exertion. The working of the mind in one continued train of thought is destructive of life in the most distinguished class of society; and Senators themselves stand in need of reform in that particular. I have observed many of them destroyed by neglecting this economy of life."

Six hundred and forty medical men of London England, subscribed a petition to Parliament against the opening of the Crystal Palace for profit on Sunday, which contains the following sentence. "Your petitioners, from their acquaintance with the laboring classes, and with the laws which regulate the human economy, are convinced that a seventh day of rest, instituted by God, and coeval with the existence of man, is essential to the bodily health and mental vigor of men in every station of life."

The most distinguished medical gentlemen in the United States, who have spoken on that subject — such as Drs. Warren and Alden, of Massachusetts, Smith, of New York, and Harrison and Mussey, of the Ohio Medical College — have fully concurred in the humane sentiments expressed in the petition before referred to. Dr. Mussey remarked as follows:

"Under the due observance of the Sabbath, life would, on the average, be prolonged more than one-seventh of its whole period — that is, more than seven years in fifty."

Sir David Wilkie, the distinguished artist, says:

"Those artists who wrought on Sunday, were soon disqualified from working at all."

The testimony of the most distinguished men of every civilized nation, attesting the same facts, if collected together, would fill a volume. Further testimony to the same effect is wholly unnecessary, particularly in California.

Hundreds of our present population, who have crossed the plains, can testify to the absolute necessity of resting one day, at least, in each week, to recuperate the physical energies of both men and beasts. Our mining population, if interrogated, would corroborate the foregoing testimony in one loud acclaim. All Christian people do now, and have ever abstained from secular employments on the first day of each week. The Jews, or Israelites, have always, and most of them do now, abstain from such employments on the seventh day of each week. Barbarous and semi-civilized nations have done the same thing. Those who profess no religious creed or faith, whatever, abstain from secular labor on the Sabbath, and devote it to pleasurable employments, and, not unfrequently, vicious pursuits. All these are tacit evidences of the recognized necessity, among all classes of men, in all civilized, and heathen, and semi-civilized nations, of refraining from labor during a portion of each week. We assume, then, as the result of the foregoing testimony, that to abstain from secular labor one day in seven is necessary to the full development of man's physical nature. We hence conclude that such development is necessary in order to render him most useful to himself and the community of which he forms a part. We likewise conclude, as a necessary sequence, from the foregoing data, that, with such development, a man can obtain and enjoy a vastly greater degree of pleasure and happiness. Z.

Itching Ears.

A large and, in some sense, respectable class of religious persons, possess this peculiar kind of ear. That organ has become diseased, and the disease is chronic. Their ears must be tickled, otherwise they will not listen. Novelty attracts them; in fact, anything antiquated is received at a serious discount.. They are not seekers after the Truth, to treasure it in good and honest hearts, but anxious to find out, like the Athenians, some new thing. It is a misfortune to possess such an ear, and trying to be under the necessity of addressing it, because few are able to meet its requirements, and little satisfaction can arise from efforts to gratify its imperious and fitful exactions. But itching ears are fashionable at present; perhaps they outnumber any other species. You find them in every congregation. They threaten to take the church and lead it captive at their will. What is it but the effects of this disease that furnishes audiences for the *sceance*, or listeners to the utterances of modern infidelity? What but this causes so many to forsake the old and venerated paths in which the fathers walked?

Would that some skillful doctor might discover an adequate remedy by which itching ears could be healed. His name would become renowned among the benefactors of the age.

THE UNION CONVENTION.—The call for a convention of all who favor Christian union, and especially of Presbyterians, which will be found in another part of this paper, should receive attention. In the eastern States similar conventions have been held since the remarkable one in Philadelphia, with marked interest and excellent effect, and here, where we have so much depending on the prospect that union may not be long delayed, there should be at least as much enthusiasm manifested as in the older parts of the country. Let us have a full and representative convention.

Extent of Alaska.

Sitka, A. T., Dec. 19, 1867.

No part of the world, except Central Africa, is so little known to the people of the United States as the northwestern portion of this continent. Remote from the channels of trade, fettered by a harsh climate and impenetrable forests, it is not surprising that even the more intelligent class of Californians should have a rather indefinite knowledge of that portion of North America lying north of Vancouver Island.

It is rightly said that the "War of the Rebellion" has led to a wonderful increase of our knowledge of the southern and southwestern States. In like manner, the purchase of Russian America will make our people more familiar, not only with Alaska, but with the vast region which trends toward the Frozen Ocean.

Between the 130th and 188th degrees of west longitude, with the shores of the Arctic on the north and of the Pacific on the south, is that broad area of territory newly acquired by the American Republic, now designated Alaska. It is by far the most northern portion of our national domain. Its area, in square miles, is not definitely known. Most of the geographies put it at 390,000. Mr. Sumner thinks it is about 570,000. He is more nearly correct — though it may be 20,000 more, or perhaps 20,000 less. No American map gives, as yet, a correct idea of its topography. There are rivers as large as the Sacramento, and islands of twice the area of the State of Rhode Island, which have no name or locality on our school room maps.

In the absence of a Russian chart, if the reader will turn to a map of the world exhibiting the American continent as occupying its *center*, he will see that the territory of Alaska consists of a nearly square body of land, with two arms — one extending to the southeast and the other to the southwest. The main body has a length of 720 miles, from north to south, and a width of nearly 700 from east to west.

The southeastern arm extends from Mount St. Elias, 480 miles, down to the latitude of 54 deg. 40 minutes. It has a width of thirty miles, and is bounded on the west by the Pacific. Sea-faring men designate it as the "Sitka Belt."

The southwestern arm is the Alaska Peninsula, projecting into the ocean between the Kamtschatkan Sea and the Pacific. It is a rugged promontory, having a length of 400 miles, and a width varying from twenty to eighty. So much as to the area of the mainland.

NUMBER AND SIZE OF ISLANDS.

But, in practical importance, of greater value than even this vast mainland surface, is the long and well nigh unbroken series of islands belonging to this territory — reaching from the most eastern of the Sitka group, in longitude 132 deg., to Attou, the most western of the Aleutian Isles, in longitude 188 degrees west.

It is this topographical feature of Alaska — its multiplicity of islands — that is especially worthy the notice of every reader of The Occident. Hitherto, the United States have owned comparatively few islands. On the Atlantic coast are Long Island, Nantucket, a few cotton bearing islands off the Carolinas, and a few sandy ones off Florida. On the Pacific coast are the half-dozen of the Santa Barbara group. In all there are perhaps thirty, having each an area of over one thousand acres. The annexation of Russian America has made a vast addition to our insular possessions — increasing them more than ten-fold. We now hold a first class rank among the nations for the number and size of our "sea-girt" acquisitions. The British empire alone surpasses us in the extent of her island dependencies. The best Russian authorities say that the number of islands belonging to the late Russian possessions in North America, having a surface of 1,000 acres and upwards, is not less than *four hundred*. Eleven of these have areas larger than Rhode Island and six larger than Delaware.

In truth, very few of our people are aware of the vast sweep of longitude to which the territory of the Republic has now attained. It has been more than doubled by the recent annexation of the Russian possessions. Between Eastport, Maine, and Cape Flattery, our previous longitudinal extremes, the distance is fifty-seven degrees — a difference in time of three hours and forty-eight minutes. But the "transfer" of ten weeks ago gives the United States a reach from the eastern boundary of Maine, in the 67th degree of longitude, to the island of Attou, in longitude 188, showing a difference of time between the two limits of eight hours and four minutes.

When to-day, at noon, the robust Aroostook farmer sits down to his Yankee repast of baked pork and beans, the most western inhabitants of the American Republic will be buried in sleep on the beach of a little harbor of the island of Attou — the fish still swimming in the bay which, five hours later, are to furnish them a breakfast. They are as yet unconscious of the fact that they are included among the Universal Yankee Nation.

The southern base of Alaska Territory has a long range. Starting from Sitka, the present Capital — the mariner sails to Kodiak, 560 miles. From thence he sails westward 640 miles, and reaches Ounalaska. But the end is not yet. Passing scores, and even hundreds of islands, in a continuous line, he finally reaches Attou, the western limit of the national domain — 700 miles beyond Ounalaska.

Alaska, from its eastern boundary, thirty miles inland from the head of Portland Channel, stretches westward, in an air line, 2,000 miles. In the extent of its boundaries, it is an empire in itself — having 4,500 miles of sea-coast, and more than three times the size of California.

Orient.

Correspondence from the Capital.

Sacramento, Jan. 20, 1868.

The fact that the Legislature is now in session here may attach special interest to Sacramento, and make some notes from one whom you have requested to act as your special correspondent from the Capital, of interest to the readers of The Occident.

Though it took some time for the members to get the harness on and accustomed to the traces, they are now quite earnestly at work.

As there is considerable difference between the political complexion of the present Legislature and that of its immediate predecessor, much that was done in that session must now be done over, or repealed. But while one party has a large majority in the House, there is a sufficient majority in the Senate, on the other side, to keep down the brakes, so that there will be very little undoing of what has been wisely done before.

A bill has just been introduced in the Senate for the repeal of the Registry Law. It no doubt needs to be clearer and more effective than it now is. It is a wise measure, tending greatly to purify the ballot-box, and, though modified, will not be repealed. It has the unanimous support of one party and friends in the other.

There are some questions of particular interest, relating to public morals, that will soon be brought under consideration.

Most of the actual work of the Legislature is done by the committees of the two houses. They give shape and impetus to the legislation.

Imagine how a Sunday Law, for instance, will fare before the Committee on Public Morals in the Assembly. Of its five members one is a German, bitterly opposed to everything we prize in the Sabbath, and the author of enough bills to repeal every safeguard previous legislatures have thrown around it. He is pledged, as not a few others are, to a clean sweep of everything in shape of a Sunday law. Another member is a Jew, who, of course, will oppose all legislation for the observance of the Christian Sabbath. One other member, who does not care whether there is any Sunday or not, and opposes all laws on the subject, settles the question, so far as the committee is concerned.

We shall watch the handling of this important subject with interest, and report how the battle goes, for there will be a gallant fight made to retain at least what we now have.

The noble protest against repeal, presented in the name of the actors of the theatres of San Francisco, carries might with it. They, with thousands of others, know that there is nothing but ceaseless drudgery in store for them if the law is repealed.

Quite an animated discussion sprung up in the House on Friday, on the question of repealing the capital punishment law. Some of the members quoted Scripture very well and to the purpose, while others made strange applications of some passages.

One gentleman said the Jews themselves got tired of the law prescribing the death penalty, and conveyed the idea that they became rid of it by building cities of refuge. As though the Lord himself did not appoint those cities of refuge and forever shut their gates against the cold-blooded murderer.

Men that now, under the law, are executed for murder, could find no refuge there. They were for the *unintentional* murderer only.

The question was made a special order for three weeks hence, so that all of those interested may have an opportunity to give their opinions through the press, and as much light be gained on the subject as possible.

Let those who favor order, peace, temperance, and the highest welfare of the community, take an interest in these questions, and labor and pray for the triumph of righteousness and godliness.

Alpha.

CONTRIBUTIONS.

Christian Sympathy.

The law of love has its highest instruction in the intercourse of true believers. The "*charity*" of which Paul speaks in his epistle to the Corinthians, is comprehensive of the double idea involved in this law. Love to God can not exist without love to man. One is the outgrowth of the other. The lower is proof of the higher. "If any man love not his brother, whom he hath seen, how can he love God, whom he hath not seen?" "By this we know that we have passed from death unto life, because we love the brethren." Christians have *fellowship* with one another. The very tie that binds each to Christ, binds each to all the rest. A common spiritual life pervades all. They are many branches, having vital connection with the same vine. This

being so, a warm and brotherly sympathy must necessarily diffuse itself over all their conduct towards the members of the one family of faith. It is not enough that we avow our belief in the general truth of this principle. Unless we give it a practical force, exemplifying it as an ever-present law or rule of action, the truth becomes a mockery, and our professed creed lifts up the voice of a solemn reproach against us.

We have thought that, in this age of the church as a whole, and even in many local congregations, a mighty barrier in the way of progress and efficiency is to be found in the want of a *manifested* love to "the brotherhood." We say manifested, because, however kindly a man may feel towards his brethren, unless there be an exhibition of his regard for them, only very partial, if any, results can follow. It is like a "light put under a bushel." There are times of disquietude and depression in the experience of the most robust Christians — periods in which the voice of fraternal sympathy falls gratefully on the ear and brings the inspiration of almost new life. A glance of the eye, a kind word of encouragement, a cordial grasp of the hand, even a smile on the lips, or a tearful emotion, announcing a brotherly interest in another's behalf, have each and all the power to carry the light of joy and gladness to the burdened heart. There are, also, many timid and shrinking natures, that need to be drawn into the circle of larger activity. They require the warmth and attraction of the stronger and less retiring. Tender and considerate attentions to such, gentle and amiable courtesies, would wonderfully increase their usefulness and add to their happiness. Our religion can never be of any positive advantage to us, unless it be made a benefit to others. We must endeavor to weave it, like a golden thread, into the spiritual life of other Christians. Common trials and common enemies assail the children of God. These call for mutual sympathy, which none can withhold, without a violation "of the law of Christ," that enjoins the duty of "bearing one another's burdens." And apart from the immense blessing and benefit secured to the church, as constituting the family of God, by the constant observance of the principle we are considering, the influence of Christianity over the mass of the world would be greatly enlarged. The logic of love and sympathy, as exhibited among the members of Christ's body, would stand like an impregnable Gibraltar against all the assaults of infidels and the "summoned hosts of hell." No amount of theology in the head — however true as a formula of faith — can conquer mankind, without *love in the heart.* No amount of reason, argument, cold demonstration, mere objective truth, can do it. The fire that melts this rock is love. If we could reach the conscience of every reader of this paper, and especially every Christian reader, whether minister or layman, we would say to him: Let the blood-bought church of Jesus and a dying world, behold in your life an illustration of the law of brotherly love and sympathy.

CENTRAL.

Home Conversation on an Important Subject.

"The doctrine of *God's sovereignty* and *man's freedom of will* has always been to me a very puzzling subject, in some sense a contradiction, and yet I know I exercise perfect freedom of will, and I feel as surely that God is sovereign over all. Is it one of those things that are incomprehensible? A subject of passive faith, rather than clear mental apprehension?"

Such was the remark of a church member to his pastor, as they were seated in the parlor engaged in a pleasant conversation. I listened attentively for the reply. The questioner was a shipping merchant in the prime of life, a man of large experience and comprehensive mind.

The pastor was a young man, scarcely past thirty years, thoughtful and intelligent, and a close observer of life. His reply was:

"I, too, have felt the same difficulty, and, until recently, could not have answered your question; but now it is all plain to me, and I will try to show you how my difficulty was removed.

"A few months ago I saw the keels of two vessels laid in adjoining ship-yards, and I watched the rearing of the hulls of those vessels with much interest. Design was manifest in every part, from the keel to the rail and truck-head, and as the parts were brought together, you might see the design more fully in its development, until, every part being properly fitted and put in its place, the vessels were complete in all their graceful proportions.

"I watched, with much interest, the mechanical arrangements for launching them, and as they slid from the ways and floated buoyantly upon the water, I felt that there was a perfect illustration of *God's sovereignty, man's freedom of will, and man's personal responsibility,* all working together in perfect harmony, and I was thankful for the lesson learned from those workmen and their work.

"Let me explain more minutely, and I will try to give you the lesson as I there received it.

"Before any work was performed, a model was made, exhibiting in miniature the form of the vessel. Here the proportions were all given, and the specifications all accorded with the model. Then some one superintended the building of the ships, and, in so doing, undertook to complete the work according to the design and specifications.

"Then the labor was divided: to one man was assigned one part, and to another another, until the whole work was in progress. One set of men contracted to furnish timbers of given dimensions. Another set adjusted the several parts — every timber, every rib, every plank, every knee, and brace, and bolt being made according to a specific design, and intended for a particular place.

"It can not be said that in this work, thus carried on, any man's freedom of will was destroyed. The man who professed to know the use of the broad-axe became responsible for hewing the timber according to the given form and dimensions. If he had changed the plan, because he thought it would look better in some other shape, would he not be justly held responsible for doing the work according to the directions given? And if he spoiled the timber by his own willfulness, ought he not to pay for it?

"His free will was in no way restrained, if he obeyed the instructions given. If he did it otherwise, he was still in the exercise of his free will, but was surely responsible.

"As with one timber, so with the formation of every part. Every man assumed responsibility for the faithful performance of *his* work, but he was not responsible for any other.

"If a stick of timber is found defective, or a workman incompetent, such things are taken into consideration as contingencies liable to occur. The defective material is rejected, the incompetent man exchanged for one who is capable and willing, and the work goes on.

"In this work of building the vessels, the plans and specifications may represent the *divine decrees;* the master architect may represent the *sovereignty of God;* each workman, in the performance of his work, represents the exercise of *free will,* and in their personal obligation to do faithfully the work they had assumed to do, is clearly expressed *individual responsibility.* By their united labor, through the development of a plan, we find the work carried to completion.

"God's Word contains the directions as to how we are to work, and we are held responsible for working in accordance with the directions there given. But if we prove incompetent, through willfulness and a malicious disposition, God will set us aside and give the privileges and rewards to others, that might have been ours. We shall suffer injury, but God's plan will not be deranged.

"Do you now see, as I did, that God's sovereignty and man's freedom of will are absolute necessities, and work in perfect harmony? And that out of these grow man's *personal responsibility?*"

His reply was, "I do, and am thankful for light where all was so dark before."

M. M.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,
305 Montgomery Street.

University College School of Mines,

CORNER GEARY AND STOCKTON STREETS.

ON THE 6th DAY OF JANUARY, 1868,

A COURSE OF LECTURES ON

CHEMISTRY, METALLURGY, MINING, AND GEOLOGY,

Will be commenced, and to continue for four months from date. The special objects of these Lectures will be to afford those practically engaged in metallurgical and mining pursuits, full and complete information on all points bearing on the useful minerals of this coast, together with practice in the Chemical and Metallurgical Laboratories.

Price for the full Course of Lectures and Practice in the Laboratory, $120.

Terms for Lectures alone, $10 for each subject.

For particulars, apply to

THOMAS PRICE,
University College, San Francisco.

Current Literature.

RECENT PUBLICATIONS.

THE HUGUENOTS. By Samuel Smiles. New York: Harper & Brothers. San Francisco: Bancroft & Co.

The purpose of the author of this book is not to give a general history of the Huguenots, but to present the reasons why they migrated from France into England, and the effect of their presence as an element of English national life. Very properly, in the execution of this purpose, he refers to much collateral history, and there are some views which will be accepted or not, according to the position held by those who judge of them. Yet all who will examine the book must agree that one more readable or valuable as a contribution to popular literature, is rarely published. There is a peculiar fascination in the very name of Huguenot, and our own nation is largely indebted to those who have, directly or indirectly, infused the blood and spirit of the people who bore it into our body politic. Not only, therefore, will Americans be interested in the work of Mr. Smiles, but also in the article appended by Mr. Disosway, which relates especially to the Huguenot colonies that came to these shores, and their effect upon the characteristics for which we have been distinguished.

Such books as this throw much light upon the mosaic of American character, and this will be pleasant always. It may be very suggestive and useful.

BIBLE HOURS. By Mary B. M. Duncan. New York: Robert Carter & Brothers. San Francisco: Bancroft & Co.

It is not often that a book like this is given to the public, because few persons have both the ability and the attending circumstances necessary for its production, and perhaps a less number are in the habit of studying the Bible as the author did. She studied the text, comparing part with part, rather than commentaries on the text. She first caught the spirit of the Sacred Word, and then allowed this to give her essential aid in its interpretation. The result, furnished in these pages, leaves no doubt that while the notes of others, especially the thoughtful and good, as well as great, are very valuable oftentimes, if one would have the Scripture come with blessings fresh and full to his *heart*, as well as to his *intellect*, he must know the "mind of the Spirit" by such study as is beautifully seen in this charming book. Mrs. Duncan was an invalid for many years, and therefore had leisure for "Bible Hours," whereas most who would imitate her, can give only fragments of time to such a use. Yet any one who has a desire for other than the careless reading of the Bible which is common, will be assisted and profited by these "Leaves from her Note Book."

EXTEMPORARY PREACHING. By F. Barham Zincke. New York: Charles Scribner & Co. San Francisco: Bancroft & Company.

There are many who advise ministers to preach "without notes," and speak in glowing terms of the advantages of such preaching, but there are not many who are very successful in giving rules by which this may be made possible in all cases, or counsel by which those who attempt it are really made any wiser. The author of this book does not indulge largely in the usual assaults upon men who find serious difficulty in extempore speaking, made by those who have no such difficulty; nor does he insist that such speaking is the only worthy preaching of the Word; but feeling, as all should, that, when it can be will done, this is the most effective, he gives the result of his own self-training and experience on the subject. No other preacher can accept and adopt exactly the same course, with like success. Yet we commend to all young ministers especially a careful perusal of this book. It will furnish them much that they can make useful, and every such sincere attempt to render the ministry more powerful for good should be welcomed.

LIFE AND LETTERS OF THE DUCHESS OF GORDON. By A. Moody Stewart. New York: Robert Carter & Brothers. San Francisco: Bancroft & Co.

Religion can not be said to be honored by the consistent piety of those who occupy high rank among men, but it is often very beautifully illustrated in such persons.

The daughter of Lord Brodie, married to the Marquis of Huntly when nineteen years of age, and a few years later becoming Duchess of Gordon, by succession, the eminent Christian lady of whom this volume is a memorial, had ample opportunity, through a long life, to bear witness among the nobility of Scotland and England, to the beauty and worth of genuine devotion. Yet not among the nobility alone did her piety shine, but its rays cheered and blessed the humble and the poor, nor did they grow dim even in old age. The book is neither a dull nor an exaggerated memoir, but will be read with much pleasure and profit, as the exhibition of a really noble Christian life.

COMPREHENSIVE DICTIONARY OF THE BIBLE.

This is a very valuble work, mainly abridged from Dr. William Smith's Dictionary, with important additions from the works of the most eminent scholars and authors of America and Europe. As it is issued in numbers, we have no opportunity to judge of the whole book, but so far as it has appeared, it is thorough, elaborate, and reliable. The engravings and maps are unusually good, and the style and execution are very attractive.

The numbers are delivered to subscribers only, and the agent for this State is Mr. A. Snyder.

PRAYERS FROM PLYMOUTH PULPIT. New York: Charles Scribner & Co. San Francisco: Bancroft & Co., and Roman & Co.

We have made reference to this book in another column. Mr. Beecher's name will make it popular, notwithstanding prayers are not regarded as very attractive reading.

EDUCATIONAL.

The City College.

This institution has special interest for those who live in the city, because it brings the advantages of college education within reach of our youth while they are still in their homes. And it has further advantage, in the view of those who appreciate education, in that it is under healthful religious influences, being in effect, though not in form, directly connected with the Presbyterian church.

It was founded, in 1859, by Rev. Dr. Burrowes, now Professor of Biblical Literature in Lafayette College, and was incorporated in 1863, under the name of "University College," with a board of eighteen Trustees.

The seventeenth session has opened with a larger number of students than usual, in most of the departments, the regular College classes having eleven students, two of whom will graduate in May next. The School of Practical Chemistry and Metallurgy, in the Laboratory on Stockton Street, under the able instruction of Prof. Thomas Price, is in successful operation, and a number of young men are pursuing an extended course in this department. In the list of excellent institutions which we shall take pleasure in noticing, from time to time, we are glad to make the City College prominent.

Rhythm.

In our schools it often occurs that many students are required to move at the same time in the same direction. We think those teachers right who prescribe that, in such movements, the students shall "keep time" with their feet. This practice tends, in the first place, to the preservation of order and decorum. But it tends, also, to train the ear in rhythm. Such a training is very valuable in connection with composition. Even if we do not desire that students should compose poetry, where rhythm is so prominent, we yet must desire that they shall avoid poetical rhythm in prose. Hence, the power of discerning rhythm is important in any event. An example of rhythmical prose (and faulty because rythmical) can sometimes be culled even from the master-pieces of composition; and can almost always be discovered with ease in more ephemeral writings. The following is the opening sentence of the N. Y. *Tribune's* (Dec. 2, 1867,) account of Dickens' first reading. It will be seen that it is rhythmical in the highest degree; to show which we arrange it as poetry.

> "Dickens is not quite so rigid in his punctuality,
> as dear Fanny Kemble used to be;
> who began, like a beautiful fate,
> the moment the clock struck eight,
> no matter whether people had come or not,
> and treated the laggards to bewitching frowns
> as they crept belated up the aisles."

But an ear for rhythm is very necessary, also, to good reading. A middle-aged man once called on one much younger to read a little from Burns. The young man began with the song; "O, whistle, and I'll come to you, my lad." But his ear failed him on the rhythm, and he put the accent on *you*, instead of *to*. The elder became impatient at once, and took the book himself.

Superintendent's Report.

We have received the Annual Report of Mr. John C. Pelton, late Superintendent of Public Schools in this city, and examined it with pleasure and pride. Its exhibit of the extent and prosperity of our schools is occasion for surprise, unless one is aware of the interest taken by our people in this noble agency for both development and protection. Mr. Pelton accompanies his report with some suggestions and advice, upon a portion of which we are hardly able to form a judgment; but there are two or three points, at least, to which we would call attention. We think, with him, that the whole educational system should be removed from the control of political influence, as far as possible, and that the election of officers by the people should be an independent election; that more permanent support of the Public Schools should be provided; that text-books, when once wisely selected, should not be frequently changed; and last, but not least, that care should be taken that young children be not *overtasked*, by the regular working of the system to which they are subjected, or because of the ambition of their teachers. We have an excellent School Department, and all should feel interested to make it better and better.

Law Students.

Students of law are warned most earnestly, by Judge Sharswood, that the temper of an advocate should be always equal; because, when passion is allowed to prevail, words are spoken, or things done, which the parties afterwards wish could be unsaid or undone. (Essay on *Professional Ethics.*) This

warning has been well illustrated in a Supreme Court decision at the recent October term. "The petition for a rehearing in this case is conceived in bad temper, and expressed in disrespectful language. It is therefore ordered that it be struck from the files of this Court." Of course we know nothing of the merits of this case; the decision may be altogether unjust. Yet, even then, it remains true that untempered language is, at least, bad policy, since it may give, under some circumstances, a pretext for rebuff, and an apology for injustice.

Oakland Academy.

The Third Annual Catalogue of this excellent school gives proof of marked success. Rev. David McClure is Principal, and he has an able corps of teachers, and ninety-eight students. The military feature is attractive, especially to those who have not strong constitutions, and the general course of instruction is extended and thorough. The new edifice is beautiful, and, no doubt, well adapted to the wants of such a school, and the situation is unsurpassed.

THE undersigned, ministers and members of Presbyterian Churches, on the Pacific Coast, desirous of responding to the sentiments and utterances of the Presbyterian Union Convention, which met in Philadelphia, in November last, invite all members of our churches and congregations, and all interested in the matter of Christian union, to meet in February, for the purpose of considering and ratifying the proceedings of that body:

RELIABLE SEEDS.

EDWARD E. MOORE.

425 WASHINGTON STREET.

The undersigned, a Practical Agriculturist, is now prepared to supply the wants of Merchants, Ranchmen, and all others, by wholesale or retail, of such seeds as will not disappoint those who use them, as our seeds after using the utmost care in their selection, in getting them true to their kind. We have suitable grounds prepared to test the different varieties, so as to insure their entre reliability. The assortment consists of ALL KINDS OF VEGETABLE SEEDS, ALL KINDS OF FLOWER SEEDS, ALL KINDS OF GRASS AND RED AND WHITE CLOVER SEEDS; also, ALFALFA AND LUCERNE.

EVERGREEN SEEDS, NATIVES OF CALIFORNIA AND ADJACENT STATES. ALL KINDS OF TREES AND SHRUBS. ALL KINDS OF FLOWERS IN THEIR SEASON. ALL KINDS OF BULBS IN THEIR SEASON, STRAWBERRY AND RASPBERRY PLANTS, Etc., Etc.

The subscriber deems it superfluous to name every article for sale, but merely remarks, that no one has a superior assortment, and no one will deal more honorably by his customers, to whom he refers with confidence, as universal approval has been awarded him. Small papers at wholesale or retail. All communications, or orders, by Mail, or Express Companies, attended to promptly. Catalogues furnished on application, by letter or otherwise.

EDWARD E. MOORE.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Family Reading.

Nothing Lost.

Nothing is lost! the drop of dew
That trembles on the leaf or flower,
Is but exhaled, to fall anew
In summer's thunder shower;
Perchance to shine within the bow
That fronts the sun at fall of day—
Perchance to sparkle in the flow
Of fountains far away.

So with our deeds for good or ill,
They have their power, scarce understood;
Then let us use our better will
To make them rife with good.
Like circles on a lake they go,
Ring within ring, and never stay.
Oh! that our deeds were fashioned so
That they might bless alway!

The Poetry of Home Life.

One vice of our times is that almost everything is valued according to its direct contribution to utility or display, and our homes are being degraded from the elevated position held by the homes our memories cherish, by the prevailing evil. The mass of our people know little about *home life*, and less about any charms and beauty that may attach to such life. With multitudes, home is only a place of convenience, a kind of private hotel, and its worth is estimated according to its facilities for refreshment and rest, when these are necessary, that they may be prepared the better for business or society. With multitudes more it is only a place for display, a kind of exhibition hall, in which elegant furniture, and pictures, and works of art in all departments, may be gathered, and a family may pass their time in the midst of these when obliged to be confined there, finding their highest satisfaction in the belief that their neighbors have not so many.

There is need that we cultivate more love for home, for its own sake, and that we take some pains to make it lovely. There is need that we entice the graces into our households, and make them welcome, whether it be to a palace or a cottage. We should be ashamed that we have been content with hotels, and change these into *dwellings*, within which we are careful to introduce those sweet and gentle influences that may give their tone and value to pleasures only here to be enjoyed. Books, pictures, ornaments, even the articles of furniture, should be identified with the family life and history, and all the daily scenes that come to be sacred and delightful because uniting all the members, should be radiant with the happiness that each one may share.

In such homes there is more than utility — or rather, there is utility in its most beautiful form — there is more than display, for display can never furnish what here abounds. In them the most exquisite poetry breathes its constant blessing, that ever cheers and strengthens human hearts. And those hearts that feel its inspiration make their path abroad vocal with the songs that utter it to others. One familiar with its effect can almost know who of the men he meets on the world's great thoroughfares has such a home. Its blessed influence will shine in his face, and he will need no other attraction to its scenes than the music and charms that only there are found.

Education of Women.

The wives of Luther, Jonathan Edwards, Burke, Fennimore Cooper, Mill, and Hitchcock, have shown how greatly educated women may aid their husbands in literary pursuits. Educated mothers are qualified to instruct their children and to awaken in them a taste for learning. The mother of Miss Maria Mitchell was much distinguished in her youth for her fondness for books. The distinguished and wise-hearted Duchess of Kent was able to arrange and superintend the whole manner of the education of her daughter, the illustrious Queen of England, and she did this, making it her great purpose to train her to be worthy of the crown which she now wears.

"I was mainly educated by my mother," says Sarah Josepha Hall. Alfred's mother "made him all he was in his own age, and all that he is to ours." Felicia Hemans had an accomplished mother. The mother of the great and departed John Quincy Adams was a woman of rare attainments and of a bright genius.

Cuvier's mother was pious, a lover of nature, and used to accompany him to and from school, and to point out the interesting natural objects they met, and to excite in him a taste for the study of the works of God. She stimulated his passion for reading, and judiciously selected his books, and he acquired in childhood an accurate and extensive historical knowledge. At the age of fourteen he formed a society of intelligent lads.

Says M. Girardin: "There is no instance of a mother who can read and write, whose children are not likewise able to read and write."

The mother, then, under whose sole influence the child is for years, from whom it acquires its tastes and its character, should not only be educated, but educated in the most thorough manner, and have her mind stored with varied learning, so that she may be able to answer the multitude of questions that will be put to her by her inquisitive child on art, science, literature, and religion, and thus to stimulate his curiosity and awaken his mind. An ignorant and narrow-minded woman will not be likely to make her son or daughter the opposite of herself.

And if she is never to become a wife and mother, her happiness and her influence for good, other things being equal, as a teacher, physician, writer, or in any capacity, will be in proportion to the extent of her education. On this point history is full of examples.—*Pittsburg Gazette.*

Be Gentlemen at Home.—There are few families, we imagine, anywhere, in which love is not abused as furnishing a license for impoliteness. A husband, father, brother, will speak harsh words to those whom he loves best, and those who love him best, simply because the security of love and family pride keeps him from getting his head broken. It is a shame that a man will speak more impolitely, at times, to his wife or sister, than he would to any other female, except a low and vicious one. It is thus that the honest affections of man's nature prove to be a weaker protection to woman, in the family circle, than the restraints of society, and that a woman is usually indebted for the kindest politeness of life to those not belonging to her own household. Things ought not so to be. The man who, because it will not be resented, inflicts his spleen and bad temper upon those of his own hearthstone, is a small coward, and a very mean man. Kind words are circulating mediums between true gentlemen and ladies at home, and no polish exhibited in society can atone for the harsh language and disrespectful treatment too often indulged in between those bound together by God's own ties of blood, and the still more sacred bonds of conjugal love.

Family Economy.—There is nothing which goes so far toward placing young people beyond the reach of poverty as economy in the management of their domestic affairs. It matters not whether a man furnish little or much for his family; if there be a continual leak in the kitchen, or in the parlor, it runs away, he knows not how, and that demon *Waste* cries "More," like the horse-leech's daughter, until he that provides has no more to give. It is the husband's duty to bring *into* the house, and it is the duty of the wife to see that nothing goes wrongfully *out* of it.

He who truly wishes the happiness of any one, can not be long without discovering some mode of contributing to it.

Be what you are. This is the first step towards becoming better than you are.

The Young Folks.

Over the Fence.

Boy.

Over the fence is a garden fair—
How I would love to be master there!
All that I lack is a mere pretense;
I could leap over the low white fence.

Conscience.

This is the way that all crimes commence;
Sin and sorrow are over the fence.

Boy.

Over the fence I can toss my ball,
Then I can go in for it—that is all;
Picking an apple up 'neath a tree
Would not be really a theft, you see.

Conscience.

This is a falsehood, a weak pretense;
Sin and sorrow are over the fence.

Boy.

Whose is the voice that thus speaks so plain?
Twice I have heard it, and not in vain;
Never shall I venture to look that way,
Lest I should do as I planned to-day.

Conscience.

This is the way that all crimes commence,
Coveting that which is over the fence.

—*N. W. Christian Advocate.*

The Proposed Exchange.

Little Martin was a poor boy who gained his living by going on errands. One day, as he was returning home, he seated himself by the wayside, when a carriage passed him containing a gentleman and his son. "Look how that little boy's eyes are fixed upon you. I imagine that he says within himself, 'I wish I was in that young gentleman's place.'"

"Well," said the youth, "suppose we ask him if he would like to change places with me."

The indulgent father beckoned little Martin to the carriage and said: "Seeing how attentively you looked at this boy, it appears to me, my little friend, that you would like to be in his place. Will you change places with him?"

"Ah, sir," replied Martin, "you must be jesting; but, if he is willing, it shall be done. Our neighbors would be surprised to see me riding home in a fine carriage."

The gentleman called his servant, and desired him to assist his son out of the carriage.

Alas, what a sight! The legs of the youth were completely crooked and incapable of supporting him; he was obliged to be held by the servant till crutches were brought to him.

"Now," said the gentleman, "have you any inclination to change places with him?"

"O no! I have no such wish," said little Martin. "The health I enjoy, and the use of my limbs, are of more value than anything he can give me. I had rather eat my dry bread, and not want any one to help me to walk."

"You are right," said the gentleman. "If you could only give him your legs, he would cheerfully strip himself of all he possesses to give you in return."—*Gospel Herald.*

Agricultural.

Good Advice.—"Our young men," says the Charleston *Mercury*, "must seize the plow-handle and spade, and use them with as much energy as they used the musket and cannon. This has been done in South Carolina, and scores of men of gentle blood are gaining their bread by work that now is honorable indeed. Educated young men may be found on the wharves, in the cotton-fields, in the barns, fighting against want as they fought against the bullet and sabre. This is as it should be; but the whole duty will not be accomplished until there is not, in this State, one man in sound health who is without employment. There is work in abundance for every one; but if the desired work can not be found, the work that can be found must at once be taken. Work is the true panacea for all our evils; and there is more health and better fortune in the tilled fields than in billiard rooms, under hotel piazzas, or in lounging along our streets."

THE New York *Times* says: "It may surprise many to learn, what is nevertheless a fact, that fully one-third of the whole amount of sugar consumed in the world is manufactured from beets; and not only so, but immense quantities of raw beet sugar are imported in England for their refineries, competing very successfully with the cane sugar from their own colonies. While the soil needed by the sugar beets is very different from the grape-growing soil, the required climate is identical. Much money has been sunk in abortive attempts to raise it in the moist air of the British Islands. But in California it finds a congenial home, and already San Francisco refines over 12,000 tons of raw sugar yearly, with a present capacity in her four refineries to greatly enlarge the production. Others are taking up the cultivation and manufacture of this sugar for purposes of exportation. The California beet secretes about two per cent. more of saccharine matter than the European plant, and every condition seems favorable.

A. Roman & Co.

BOOKSELLERS,
PUBLISHERS,
AND IMPORTERS,
417 & 419 MONTGOMERY STREET,

SAN FRANCISCO, CAL.

International Hotel,
SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.
The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.
The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents. F. E. WEYGANT, Proprietor.

PACIFIC COAST ITEMS.

THE Legislature is now near the close of the second month of its session. No positive action has been taken on any of the leading topics before it. An act to regulate the hours of labor, the codification of the laws of California, the abolition of capital punishment, the enactment of laws regulating the privileges of citizenship, and of the coining of money, the modification of the marriage law, and the establishment of a State Mining School, are under consideration.

HAY brings, at Virginia City, from $100 to $125 per ton, with no prospect of a lower price till the coming of a new crop. Barley is eight cents per pound. The sleighing continues to be good in that section, and the stages and hacks use runners. Only a few heavy quartz wagons make a show of wheels. The cold weather favors the catching of quail and rabbits.

TROUT, from twelve to eighteen inches in length, have been frequently caught in the mountain streams of Santa Clara and Santa Cruz counties, the present month. They have been driven out from their hidden summer retreats by the turbid waters of the winter floods.

SHOULD the bill before the Legislature, authorizing the compilation of the laws of this State, pass, Solomon Heydenfeldt, John Currey, and H. P. Barber are named as the Commissioners to do the work. Judge Currey is a Republican — the other two are Democrats.

THE Insane Asylum at Stockton has a thousand inmates — the largest number in any lunatic institution in America. The applications for admission number nearly one per day. The question of establishing a branch asylum is being considered by the Legislature.

THERE is a prevailing tendency to speak of the present winter as remarkable for its coldness, but the "record" shows that, within twenty-five years, there have been, on this coast, seasons surpassing the present for falling snows on the mountains and floods in the valleys.

JUDGE WILLIAM R. TURNER, who was about to undergo an impeachment trial before the Legislature, has made a timely resignation. He will be succeeded by John P. Haynes, of Crescent City, a man of fine legal attainments and unquestionable integrity.

THE citizens of Vallejo are again discussing the superiority of the location of that town over San Francisco as the site for the great commercial metropolis of the Pacific Coast. They have no earthquakes, no salt-water worms, and no terrific sand-banks.

NEWS from the Owyhee District, in Idaho reaches us, to the effect that the wind and snow were never half so fierce as during the present winter, since the time the "oldest inhabitant" reached that rough locality.

A LETTER from Austin, dated January 19th, says: "The Reese River country never looked so attractive as for a week past, having its mountains heavily covered with snow. The unsightly crags are smoothed over."

MARIN, the butter and cheese county, is placing an increased value on her farms. The price of land has doubled, in many localities, within three years. About San Rafael the rise has been still more rapid.

FARMERS in San Joaquin Valley argue, with good reason, that a railway through that region would, in five years, triple the value of their lands, and enable them to raise 40,000,000 bushels of wheat annually.

THE health of San Francisco is still above par, compared with the corresponding week of last year. There were, however, during the past week, two successful and four unsuccessful attempts at suicide.

THE culture of trees — ornamental, shade, grove, and woodland — is beginning to receive the attention of some of our California farmers. It is a subject worthy of general and earnest attention.

THE Ukiah *Herald* says the snow covers the hills, and "slosh" the vallies of that county. Added to this, money was never so scarce as during this winter.

THE recent floods have done great damage in Los Angeles, San Bernardino, and other southern counties, in the destruction of vineyards, fences, and buildings.

ZACK MONTGOMERY and Eben. Knowlton debated the merits and demerits of the common school system at Lincoln Hall, on last Monday night.

THE people of the staid old town of Martinez are waking up, and have astonished their neighbors by a successful trial of the steam-plough.

OF the 2,932 names of voters on the Great Register of Solano County, only three are classed as gentlemen!

AT Marysville, skating parties are a favorite amusement of late.

TELEGRAPHIC SUMMARY.

POLITICAL.—Congress proposes to limit the amount of tax to be levied by internal revenue to $150,000,000, about half the sum now raised, and to secure that amount mostly by taxing liquors, tobacco, stamps, and luxuries. We hope the proposition will become a law. The present law is unjust in many of its features.....Gold, really the most unchangeable in value of all substances, is apparently "kiting" up and down at the East with as much unreliability as during the midst of the rebellion. The latest quotation is 139. Times are growing hard in all the Atlantic cities.....Ross Browne, Mark Twain, and other California irrepressibles, are reported at Washington. There is one vacant chair as yet — that of Seth Kinman.....William T. Hamilton has been chosen U. S. Senator from Maryland, to succeed Reverdy Johnson, now the oldest member of the Senate..... Thaddeus Stevens, in his speech on the 22d inst., charged that certain members of the House had procured shirts, pantaloons, and toilet articles, under the name of stationery, at public cost.....Gen. Butler offered a buncombe resolution for an investigation of the sufferings of the troops in Sitka by cold and hunger.....John P. Hale has resigned his post as Minister at Madrid.

FOREIGN.—The West India Danes are strongly bent on annexation. On the vote taken by order of the Danish Government, at St. Thomas, the ayes were 1,244; noes, 22. Go ahead, Mr. Seward — you are sure to win; and we are to have 40,000 new fellow-citizens.....George Francis Train, having landed from the steamer at Queenstown, *en route* for England, was arrested by the British authorities as a confederate of the Fenians. This is exactly what George Train wanted. His antics out in the "buffalo regions" had proven stale and unprofitable. The officers did a very foolish thing. They had better furnish him pocket-money and give him a free pass all over Ireland. Fenianism would be stone dead in less than six months....Wheat is on the rise in England, selling at Liverpool at $3 84 per hundred. By reference to our market table, it will be seen that the rise in this city has been very slight during the past week.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, January 22.

FLOUR—Market quiet. We quote city brands firm as follows: Superfine, hf sks, ℔ 196 lbs, $6 75@7 00; qr sks, 7 00@7 25; Extra, hf sks, 7 50@7 75; qr sks, 7 75@8 00.

WHEAT—Sales 800 sks inferior, $2 40@2 50; good to choice, firm at $2 50@$2 65 ℔ 100 lbs.

BARLEY—Sales include 500 sks prime brewing, $1 87½; 1,500 sks feed, $1 75; 4,000 sks, $1 72½. We quote the range of the market at $1 65@$1 85 @ 100 lbs, weak at the outside.

OATS—Sale of 100 sks good, $1 82½; quotable, as to range, at $1 75@$1 85 ℔ 100 lbs.

POTATOES — Sale of 200 sks choice Petaluma, $1 25. Humboldt are quoted at $1 50 ℔ 100lbs.

CORN—Continues scarce at $2 25 ℔ 100lbs for good Yellow.

RYE—Is still dull at $1 75@$2 ℔ 100 lbs.

BUCKWHEAT—No demand; market nominal at $2@$2 25 ℔ 100 ℔s.

ONIONS—We note a still further advance, owing to scarcity, small lots selling at 5½@6c for Bay, 6@7c for San Joaquin, and 10c ℔ lb for Oregon.

BEANS—The market is quite firm for nearly all descriptions. Pea and small White are very scarce; quotable at 3½@4c; Bayo and Butter, 3¼@3½c; Pink, 2¼@2½c, and Red, 2c ℔ lb.

BRAN—The mill prices are $23@25, according to quantity.

MIDDLINGS—Feed descriptions, $40; Shorts, $35 ℔ ton.

OIL CAKE MEAL—In demand at $30 ℔ ton from the mill.

HAY—We quote the market quiet at $16@23 ℔ ton.

BUTTER—Fresh roll, is scarce at 45@50c.

CHEESE—20@22½c for California, and 22½@25c ℔ lb for Eastern.

EGGS—scarce, at 55c, having sold a few days since as low as 45c ℔ doz.

POULTRY—All descriptions are firm at an advance, owing to the unusual demand for Chinamen. Live Turkeys are quoted at 18c ℔ lb. Hens and Roosters, $8 50@$9; Ducks, $5 50@$6 50 ℔ doz and Geese, $3@$3 50 ℔ pair.

PROVISIONS—California smoked Bacon, 13@13½c; Oregon do, 12@12¼c; California and Oregon Hams, 13@14c: California and Eastern Lard, 11½@12c ℔ lb—a slight improvement.

HIDES—Sale of 500 California dry, usual selection, 14@14½c ℔ lb, weak at the outside price.

WOOL—Is inactive at 11@12c for clean shipping grades of fall, and 15@16½ for spring clip.

TALLOW — Sales of about 10,000 lbs good Beef, 7½c; quotable at 7@7¾c @ lb, according to condition.

San Francisco Cattle Market.

We have a considerable decline in prices to notice this week, particularly in Veal, of which there is a large stock.

We quote the slaughterers' prices as follows:

BEEF—American, 1st quality, 9½@10c ℔ lb; Spanish, 1st quality, 9@9½c; do 2d do, 8@9c; do 3d do, 7@8c.

VEAL—7@10c ℔ lb.

MUTTON—7@9c ℔ lb.

LAMB—9c ℔ lb.

PORK—Undressed, 5@5½c: dressed, 8c.

S. F. Bulletin.

DIED.

In Buffalo Grove, Iowa, Nov. 8, 1867, Mrs. Hannah Taggert, widow of Dr. Robert Taggert, of Byron, N. Y.

Her end was not only peaceful — it was triumphant. She had so longed to depart and be with Christ, that her happiest day was that of her death. She watched its approach as we watch for the coming of a dear friend. Not a doubt or cloud came over her mind, so that death and the grave were emblazoned with glory. Nor was this strange, for she had lived to do good. One incident will illustrate. When her residence was in Byron, I called upon her one evening and found her very sad, the occasion for which she thus gave me: "While I lived in Preble, Courtland County, I had a Bible Class of nine girls. All but one of them became pious and united with the church, before I left. That one is still unconverted, and I have just written, urging her to spend a few months with me. I feel that could I have her with me, she might become a Christian." It was manifest that, from the depths of her soul, she was now praying for that young friend. The very atmosphere surrounding her was like that of the Fulton Street Prayer Meeting, and I left her with my mind so deeply impressed that, though thirty-five years have passed, the whole scene is as fresh as are those of yesterday. About three weeks after this I called again and found her very happy. "Oh," said she, "I have good news. A letter from Preble says that C—— is converted. All the members of my class are now Christians." A few weeks later this dear pupil was dead. "I heard a voice from heaven, saying unto me, 'Write. Blessed are the dead which die in the Lord from henceforth. Yea, saith the spirit, that they may rest from their labors, and their works do follow them.'" W.

The articles which appear in leaded type, in the various Departments of The Occident, *and those alone, are original.*

NOTES ON

CURRENT TOPICS.

Conventions of manufacturers have recently been held in Cleveland, Ohio, and Worcester, Mass., the discussions and spirit of which should be noted. For months factories of all kinds have been doing but little work, and now many of them are closed, so that their owners not only, but the public, have an interest in knowing why there is necessity for such a general loss, and how it may be removed. No doubt the demand for almost every kind of fabric is less now than it was during the war, or immediately after the war was ended, but the gentlemen in these conventions do not find in this fact a sufficient reason for the difficulties they experience. They insist that they are obliged to pay unnecessary and unjust taxes, and that the whole theory of the Government based on the belief that the generation that has carried all the other burdens of the war should remove all the debt that results from it, should be abandoned, or the industrial interests of the country will all be paralyzed. There is truth in the sentiments which find such expression, and the manly utterance of them will be likely to have some effect. A people may even be willing to be taxed more than any principles of political economy will warrant.

It is not beneath the dignity of the Legislature of California to receive and consider a bill, the object of which is to have shade trees planted by our road sides. We are reminded by it of a remark made by one who had just landed on these shores from the midst of the foliage and beauty at the East, that there should be a law compelling every one who comes here to plant a tree, as his first act. We hardly lack anything else, but oh! how we miss the trees! And how readily and soon they would grow if we would give them a chance! The contrast with the bald and bare landscapes that now greet our vision would make our people better, as well as happier. It may not be that the mode of paying for tree-planting proposed by the bill is the best, but let us have them planted, and we shall certainly find that it *will pay* to find them growing along our roads that may thus be rendered delightful.

Revivals of religion are reported in the eastern papers of sufficient interest and extent to awaken the gratitude of all Christians, though not in such large number as in some former years. There is one feature, however, of these we have specially noticed, which may be observed with encouragement and profit. They have been, for the most part, conducted, and often commenced, in connection with the ordinary services of the church. It will be an occasion of joy when pastors and church members shall expect revivals as the normal and promised result of the faithful use of the regularly appointed means of grace.

Affairs in Crete, at the last advices, had assumed an importance that commands the attention of all. Not because of any political or commercial value in itself, but because of its relations to the Great Powers which interest themselves in its condition, that little island may open a series of commotions that will shake Europe to its center. Turkey resists the desire of its inhabitants to become independent of her rule and annexed to Greece, because she does not dare to lose control of a strategic point her history proves to be essential to her defense against invasion. Russia favors this desire, because she knows that if it is only under the protection of Greece she can take possession of the island in the prosecution of her plans, when she shall find this necessary. All that Russia desires is that the other Powers shall not interfere, and this, according to the latest news, seems quite likely. The "ultimatum" proposed to Ali Pasha was, that his government grant absolute equality to all religions in Crete, and the General in command accompanied this proposition with the threat that unless it was accepted the war would be continued and increased. The result will be received with great interest, not only in Europe, but over the world, though it will be a strange sign of progress if the Turk shall give a pledge of security to all religions within his dominions. That he must do this soon can hardly be doubted by any who have watched the march of events during the past fifteen years; but he knows as well as we do, that the firman which gives this pledge will be the death knell of Mohammedanism from the towers of Constantinople.

The American Christian Commission is a society of good men, of various church relations, which is doing much in a general way for the spiritual elevation of the lower classes in the Eastern States. The object is not to supersede any of the established agencies that have long been successfully at work, nor to interfere in any way with the methods of evangelization through which good men may prefer to make their influence felt, but by appropriate means to stimulate, and inform, and aid those who are working now, and rouse those who are not to a just sense of their obligations. Among these means they have found conventions to be very useful, and a number of these have been followed not only by greater effort for the good of those whose wants are especially considered, but also by revivals in the churches that were represented in them, and a feeling of Christian union that fully demonstrate their incidental influence.

Why may we not have such conventions in this part of the country? They would encourage many who toil in the midst of discouragement in the new settlements, and furnish much valuable information and stimulus for those who try to reach with the Gospel the population of our cities that can only thus be brought under its power. We are glad to learn that in the interest of Sunday Schools such conventions have already been very successful in different parts of the State; and we hope they will be repeated, and that Christians will be moved to come together for conference respecting many other means of doing good among the multitudes who are unevangelized.

The Occident has now been published one month, and many inquiries are made as to its state of health and prospects. We do not wish to give any particulars at so early a period of its history, but can say with much gratification, that in expressions of interest and material support it is receiving more than we anticipated; whether it is returning *quid pro quo* we leave others to decide. The design of all connected with the paper has been from the beginning, not merely to make it what its patrons will be willing to accept, but what they will warmly welcome; and it is believed that this design can be more and more fully realized as the necessary friction attending the working of the various machinery shall become less from use. We are specially pleased that so much interest in its success has been manifested in the country towns, not often forward in support of the religious press, where no agents have sought subscribers; while the cities have furnished evidence that The Occident is not an unnecessary addition to the list of religious and family newspapers. Thus far Nevada, all things considered, has the banner among the regions that have sent unsolicited subscriptions, and we are glad to be welcomed so warmly in the mining districts. We hope soon to add one-fourth to the size of the paper, and to find the number of our friends increasing at least as rapidly as they think we deserve.

The condition of both whites and blacks in the southern States is such as to awaken the sympathy of all who can be moved by either suffering or danger. The problems relating to the future prosperity of those States involve so many questions exceedingly difficult of solution that much delay must attend the process by which the result may be reached, but in the meantime almost every form of distress is experienced by the people, terminating, in multitudes of instances, in actual death. Some of the prominent men have proposed to the General Government that money be lent the South on mortgage of the crops, for present relief, but it is not certain that this proposition will be accepted. There is surely occasion for prayer on the part of all who pray, and for the gift of money from all who have it to give, that

the poor of that portion of our country may be saved from starvation while they are being "reconstructed."

Religious Intelligence.

PACIFIC COAST.

Union Convention.

The undersigned, ministers and members of Presbyterian Churches, on the Pacific Coast, desirous of responding to the sentiments and utterances of the Presbyterian Union Convention, which met in Philadelphia, in November last, invite all members of our churches and congregations, and all interested in the matter of Christian union, to meet in the Howard Presbyterian Church of San Francisco, on Wednesday, February 12th, at 7¼ o'clock, P.M., for the purpose of considering and ratifying the proceedings of that body:

H. M. Scudder,	Charles Wadsworth,
S. H. Willey,	George Pierson,
E. B. Walsworth,	Chas. Russell Clarke,
L. Hamilton,	James S. Wylie,
Richard Wylie,	James Wylie,
T. E. Taylor,	M. M. Gibson,
James Eells,	S. D. Phelps,
Fred. Buel,	W. A. Palmer,
A. W. Loomis,	Cyrus Palmer,
S. T. Wells,	Charles A. Hawley,
J. H. McMonagle,	J. D. Arthur,
J. K. S. Latham,	Nathaniel Gray,
James B. Roberts,	Geo. L. Kenny,
Erwin J. Crane,	H. P. Coon.

A Pleasant Service.

The chapel of the City College seems to be doing good service as a nursery of sound churches. The United Presbyterians now occupy it, under the ministry of Rev. Mr. Gibson. We had the pleasure of worshipping with them on a recent Sabbath. The pastor is commencing a series of seriatim and expository readings of the Bible, in connection with his Sabbath exercises before sermon. This practice is certainly sanctioned by the example of many of our most edifying religious teachers. Theoretically, also, it has the recommendation of securing that Bible truth shall come before the minds of the people in its revealed order and proportions. The sermon was upon "*Sins of the Tongue.*" Although the theme was ethical in its nature, yet the discourse preserved an entirely spiritual character. The points made were fortified by Scripture quotations; and the arguments used against evil speech were such as: the peace of the church, and the adornment of Christian doctrine. Altogether, we felt entirely at home among these brethren, except that the book from which they sing (handed us by a little boy with a Shorter Catechism peeping out of his pocket) felt a little *thin.*

Austin, Nev.—A friend writes to us from this town on the 24th ult., thus: "The people of this locality are sociable, moral, intelligent, beyond what is usual in remote mining communities. Shut out from the rest of the world, we make the best of our circumstances, and are by no means at a loss for sources of rational enjoyment. The Presbyterian and Methodist churches are prospering, hold union prayer meetings, and are endeavoring, not to outdo, but to assist each other. Rev. Mr. Pinney, of the Presbyterian church, is an able preacher, a faithful pastor, and an uncompromising opposer of evil. The Catholics have a strong hold here as elsewhere, but their direct influence is limited to their own people. Yet, by their schools, they are exercising an indirect power of which Protestant parents are not aware."

Marysville.—Rev. W. W. Macomber, of the Presbyterian church, gave, on Sunday morning, his sixth lecture on the character of the Apostle Paul, embracing his labors while encountering "perils on the deep and perils by land." Rev. N. Reasoner, Presiding Elder of the Marysville District, has left on a visit to the East.

Watsonville.—A revival of religious interest has been in progress at Watsonville for some weeks, especially in the Methodist church.

Stockton.—The *Gazette* says: Religious meetings are being held daily in the Presbyterian church, under the superintendence of Rev. J. W. Ross and Rev. J. A. Skinner. The Presbyterian and Methodist congregations have united for this purpose.

EASTERN.

The Essex North Congregational Association having restored Rev. Charles Beecher, of Georgetown, to full fellowship, his church members have asked him to withdraw his resignation, made some time since, and he has consented.

Rev. John K. Davis, for a long period engaged in the service of the Presbyterian Board of Domestic Missions, died at Troy, N. Y., on the 5th inst., in the seventy-sixth year of his age.

Rev. T. D. Moore, D.D., of Richmond, Va., was chosen Moderator of the General Assembly of the Presbyterian Church of the South, which recently met in Nashville, Tenn.

Rev. J. T. Duryea, D.D., was installed December 21st, pastor of the Classon Avenue Presbyterian Church, Brooklyn, N. Y. Sermon by Dr. R. R. Booth, of New York.

Rev. Wm. R. De Witt, D.D., of Harrisburg, Pa., died suddenly. He had been pastor in that city nearly fifty years.

Rev. A. B. Earle has commenced a series of meetings with the Somerset Street Baptist Church in Boston.

Notes of the Surrender.

With seven hundred other returned Californians, I landed in New York the 14th of April, 1865. When we left San Francisco, Grant and Lee were grimly watching each other from the intrenchments around Richmond. Sherman was working up through the Carolinas; Sheridan, after sweeping the Shenandoah Valley with the besom of destruction, had joined Grant, and greenbacks were down among the forties.

Having been thirty days on the passage, we were all agape for news; so, when the health officer came aboard, we beset him with questions. "Somebody said Grant was in Richmond." We knew better. We had heard that too often clicked by the telegraph. Next came another official, with some other doubtful intelligence of startling importance. We shut our ears — tricked too often.

Finally we reached the wharf. "Here's the *Herald* and *Tribune;*" and there we read, with our own eyes, of Lee's surrender, and greenbacks up to sixty. Happy those who were real patriots! Happy those who had turned their gold to Government paper. That Friday was a joyous day to returned Californians. But the next day came the news of the President's assassination, and the pall of sorrow fell around all hearts. Yet to none was the shock so sudden as to those who yesterday took in at one draught the exhilaration of the past month's success.

The following day was Easter Sunday, always observed with peculiar solemnity by the Episcopal Church, and the white flowers with which their churches had been profusely decorated, in anticipation of that joyous Sabbath, mingling strangely with the funeral drapery which this sudden grief had thrust in among them, was in keeping with the pulpit utterances of the day, and with the feelings of the people.

BALTIMORE.

Soon after our arrival we turned southward, to view the scene of the great struggle which had determined the destiny of the nation. On the way to Baltimore we found that we were not yet out of the range of military movements. Several cars crowded with the "boys in blue" were attached to our train. Jollity prevailed. Their work was done. Their return to camp, they felt, was a mere form, and they would soon be home again. The flag they carried and the uniform they wore, the army of which they were a part, were now, beyond any doubt or cavil, those of the *United* States, and the work had been theirs and God's. One thing was peculiarly worthy of notice. Remove their uniforms and they were just like the rest of the people — there was none of the roughness of the soldier, none of the stiffness of the martinet about them. Called into the camp and to the battle-field by the voice of their country, when the country no longer needed their service they could go back to the people again, and take their place in the field, in the workshop, at home, as before, in any of life's ordinary duties. They had saved the country, and the country's prayers and service had kept them, in a measure, pure from the pollution of the camp. This of those who returned. But what of the dead left behind, and the hearts and households made desolate; the towns, and villages, and hamlets shrouded in mourning? Should any man stretch forth his sacrilegous hand, ever again, to disturb the perpetuity of the Union, let all the patriot blood shed in this war, from the Susquehannah to the Sabine, rest upon his head, and let the north and the south, the east and the west, say Amen!

DOWN THE CHESAPEAKE.

At Baltimore we found, sure enough, that the hand of the military was upon us. On the steamer we took our places in the line which approached the clerk's office, with soldiers on guard. At the office we paid for and procured *transportation*, not *passage.* We went down to our meals between a couple of muskets, with bayonets at one end and the other in the grip of a stout soldier. I think, too, they called the meal *rations*, but I will not be sure. I know that, whether meal or rations, the fare was slim and not well served, and we were made to know that we were on an United States transport, and civilians were there rather on sufferance than by desire. And a motley crowd we were. Soldiers everywhere, the rank and file in the steerage, officers in the cabin. Some graybacks, too, mingled in the crowd. And who were they? Paroled prisoners, whom their old uncle was sending back to their homes. And there were some deserters who had snuffed the result of the contest from afar, and left the Confederacy and made their peace with the Government before the final catastrophe. There were, also, several delegates of the Christian Commission, who yet found plenty of work to do in the various hospitals near the seat of the war; and sons of trade, mostly Hebrews, crowding down to Richmond, to

see what chances there were for profitable traffic. Joyous families, too, long separated from the husband and father, were going to spend a few days with him at the camp. What a sense of quiet enjoyment there was on the face of the wife and mother, and how cheery and jubilant were the children! According to the custom of those times, when men of the Christian Commission were traveling, taking Christ with them down into the army, a space was cleared around the table in the cabin, and the steward rang the bell for worship. The busy hum of the passengers was silenced. Some familiar hymn was sung, a chapter was read from the Word of God, a few short, stirrring addresses were made, prayers were offered, and thus God was honored in that strange and varied company, on their way to Richmond.

Such of the very few as obtained state-rooms, retired to rest. The vast majority, stretched on the cabin floor, with their carpet-bags for pillows, sought repose, and scarcely found it. F. B.

MISCELLANY.

MANHATTAN, the name of the island on which the city of New York stands, is taken from the names given by the Indians to the original Dutch settlement, and means "the place where they all got drunk."

PUNCH says the entering upon an argument with a metaphysician is like getting into an omnibus — you know where you start from, but it is impossible to tell where it will carry you.

THE servant girl, who was taking a ride in her mistress' carriage, and who "longed to stand by the roadside and see herself go by," expressed a very natural curiosity.

A GENTLEMAN asked a negro boy if he would take a pinch of snuff.

"No," replied the darkey, very respectfully, "me tank you. Pomp's nose not hungry."

"What will you leave me in your will?" said a lady to an Irishman. He very coolly answered, "The wide world, my darlint."

THE idle should not be classed among the living; they are a sort of dead men who can't be buried.

BLACKSTONE tells us that husband and wife are one, and that *one* the husband — her whole being is merged in him — she is the property of another.

THE courts have recently decided that a man is sane who pays the printer just before he makes his will.

CHOOSE well your friends; have but few, and be careful of following their advice in all matters.

THE blossoms on a toper's nose, like early peas, are forced by the system of glass culture.

WHEN ill news comes too late to be serviceable to your neighbor, keep it to yourself.

WHEREVER you find a grog-shop, there you will find poor-houses, prisons, and human misery.

A WOMAN may have more sense than her husband, but she should never seem to know it.

FEAR God, shun grogeries, and love your wife and children.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

San Francisco, Saturday, February 1, 1868.

THE KINGDOM OF GOD FIRST.

The theory and practice of Christians do not always agree. Our theory is that it is better to die than to live; that Heaven is a better world than earth; that sacrifice is to be desired as a means of developing the most worthy character; that the Kingdom of God should be made most prominent in our thoughts, and plans, and actions. But our conduct often reverses all this, so that we beckon death far away as an enemy, make earth too attractive to be exchanged for Heaven until necessity forces the exchange upon us; shun sacrifice as an affliction, and place the Kingdom of God quite low on the catalogue of objects that excite our interest. We accept it as part of our creed that if we seek first this kingdom, all other needed things will be added unto us; yet think it altogether more prudent in fact to add together these other things for ourselves as we have opportunity, and then incidentally, and with powers and time not thus demanded, we seek to promote what we declare to be prominent. A just inference from the lives of many good men is, that God is the best adviser touching spiritual affairs and preparations for Heaven, but that He is a very unsafe counselor in matters pertaining to success in this world, and that any business would be ruined were He made a partner with a controlling voice in the management.

Nevertheless, the *injunction* remains in full force that our theory in this respect be the rule in our practice, and the results when we refuse to heed it should receive our most careful study. When, in the cultivation of Christian character, the object sought is the mere happiness of the individual, or relief from fears, or the possession of certain graces, or safety and content in their general influence, we behold no such piety as when the glory of God is the paramount object, and the whole life glows with the devotion thus inspired. When usefulness is made to depend on only perceived results, the proofs to the senses day by day that we do not live in vain, and those rewards that thus urge us on in our labor, there is no such beauty in the exhibition as when the motive is that our Master may be honored, and the stimulus is our united faith and love; nor does usefulness ever assume so heavenly a mien as when she leads her votaries along that elevated path where they think of nothing save the Lord who walks with them, and their songs make known their joy. When a church seeks, as its chief aim, increase of members, release from embarrassment, a comfortable enjoyment of religious blessings, content if those thus bonded together may sit under their own vine and fig tree, with none to molest or make them afraid, it does not assume its highest position nor manifest its greatest power. But when the members are filled with the Holy Ghost, and are so ravished by their communion with Jesus as to forget all other interests except those related to His kingdom, and the whole purpose of the church is to make her King a praise in Zion, then she becomes "the perfection of beauty," and streams go forth from beneath her altars that "make glad the city of God."

The demand is urgent that we make the Kingdom of God and His righteousness *first* in our affections and devices for success. He will honor us when we honor Him. He will give His people an open way, and strength to walk in it, if they will acknowledge Him as they advance. His Kingdom shall be glorious and supreme when its subjects *exalt* it as seen within them and in all their relations in life.

THE RELIGIOUS PRESS.

Those who have been aware of the influence upon all valuable interests of the religious papers and periodicals in the older portions of the country, will need no argument to convince them that there is real gain when such influence is increased and made permanent in the more recently settled States. Men who are not Christians admit that Christianity has been, for the most part, in support of whatever may promote the public good. Secular journals, devoted to political, scientific, literary, or industrial interests, welcome the incidental co-operation of papers devoted more directly to the moral and religious welfare of the people, because it is believed that this co-operation is generally intelligent, honest, and influential. With the great majority of readers, also, an article evincing common sense, and having a worthy purpose, has all the more power because found in any of the established Christian papers of the land. These facts should affect the religious press. Those who control its influence should by them be encouraged and rendered vigilant, lest anything appear with their sanction which may do harm, private or public. The calamity would be serious, and it would be acknowledged, if any such power for good on this coast as *The Pacific*, or *The Evangel*, or the *Pacific Churchman*, or the *California Christian Advocate*, should be crippled, or perverted, and the advantage to all our people will be accepted with gratitude, in proportion to their perceptions of its extent, if these papers, and others having a like object, shall continue to have greater breadth of view, more vigor in their contents, and a more just sense of their obligations and worth. We read with pleasure an article that lately appeared in the *Christian Advocate* on this subject, of which the following is the conclusion:

"Members of the several denominations may well be commendably ambitious to sustain the papers that reflect their peculiar views of theology and church progress; but, beyond the pale of the churches, these papers prefer a valid claim to patronage by virtue of their intrinsic worth and healthful moral and religious influence. No family should be without one or more of them, though the daily, the monthly, etc., have a place in the daily reading of the household. No home, no cabin, in all our cities, towns, valleys, mountains, whatever other reading may be had, should be without the weekly religious paper. Its influence will indefinitely more than compensate for its cost. Besides the news summaries and other miscellany they furnish, the solid reading found in them is more, and more valuable, than can be had in any other form for the same money. And then, the support of the religious press is aid given to all that is valuable in the formation of right public sentiment on the great questions that underlie our social and civil institutions. The pulpit and the Church press must conserve the interests of our commonwealth, and preserve and perpetuate our religious liberties, not so much by the direct and explicit discussion of current issues, as by the inculcation of divine truth, and the formation of individual character on the model of revelation. We plead, on the grounds indicated, for the generous support of the religious papers of our coast."

THE SABBATH—OR SUNDAY.

We now proceed to show the effect of the observance of the Sabbath upon man's moral and religious development. We assume, then, in the outset, as an established axiom, that there can be *no true* morality *without religion.*

THE RELIGIOUS AUTHORITY FOR THE OBSERVANCE OF THE SABBATH.

The first mention of the seventh day is in Genesis, 2: 2, 3: "And God blessed the seventh day, and sanctified it."

Mannesseh Ben-Israel, a learned Spanish Rabbi, declares, "that according to the tradition of the ancients, Abraham and his posterity, having preserved the memory of the creation, observed the Sabbath also, in consequence of the natural law to that purpose." Without multiplying authorities in further support of the foregoing proposition, we shall refer only to the *positive* law given by Moses to the Israelites, (Exodus: 20) "Remember the Sabbath Day to keep it holy." The importance attached to the command, and the sacredness of its character in the estimation of Moses, may be learned from the penalty visited upon those who violated it. In Exodus 21st it is declared that "Every one that defileth it (the Sabbath) shall surely be put to death." This law, like very many of the laws of Moses, involving *general* duties, not peculiar to the Israelites, has either been adopted, or formally recognized, by nearly all nations, both savage and civilized. This fact furnishes very strong, if not conclusive, evidence that this law is a natural law, *instinctive in mankind.* This may account, likewise, for the universality of the recognition of a seventh portion of time for rest.

THE CHRISTIAN SABBATH.

The Evangelists and Apostles, having recognized and established the *first* day of the week for special religious service, that day has been generally, if not universally, observed since by all Christian people. The mass of mankind, among all nations, and during every period of the world, have been compelled to labor constantly to subsist themselves and those dependent upon them. Unless, therefore, a portion of time shall be set apart for the acquisition of religious knowledge, extreme ignorance must prevail. The Sabbath, when religiously observed, enables the laboring classes, who consitute eight-tenths of the community, to receive religious instruction from others, and by reading and meditation improve their minds and elevate and purify their moral sentiments.

THE SUNDAY SCHOOL.

The abstinence from secular labor, secured by the Sabbath, has enabled Christian philanthropists to establish that Heaven-derived institution, the Sabbath School. By its agency, hundreds of thousands of children have been taught, not only to read, but to read and even expound the sacred Scriptures. By this glorious agency thousands, in all Christian lands, have been wrested from destruction, qualified for the duties of life, and prepared for a happy immortality. No man can fully estimate the value of the Sunday School in reclaiming vicious children and youth, and preserving them from future contamination, degradation and destruction. No man can fully estimate the effect of the influences of Sunday Schools in lessening crimes, decreasing pauperism, and reducing the expenditures of government, which necessarily result from the existence and prevalence of crimes.

The effect upon all Christian communities, by the introduction of Sunday Schools, and the moral and religious influences thus disseminated, entitle them to universal approbation. If those influences were properly appreciated, all men and women would not only respect the Sabbath, but aid in protecting it from secular and vicious desecration.

THE TESTIMONY OF PHILOSPHERS.

We have room for two extracts only. We might

multiply them almost without limit. Adam Smith, the distinguished political economist, thus speaks of the necessity of religious instruction: "If man would hope for happiness, he is conscious that he can not demand it from the justice, but that he must entreat it from the mercy of God. Repentance, sorrow, humiliation, contrition, at the thought of his past conduct, are, upon this account, the sentiments which become him, and seem to be the only means he has left for appeasing that wrath which he knows he has justly provoked." * * "The doctrines of revelation coincide, in every respect, with these original anticipations of nature; and as they teach us how little we can depend upon the imperfection of our own virtues, so they show us, at the same time, that the most powerful intercession has been made, and that the most perfect atonement has been paid for our manifold transgressions and iniquities."

Sir James Mackintosh says: "Those who preached faith, or, in other words, a pure mind, have always produced more popular virtue than those who preached good works, or the mere regulation of outward acts."

We have *purposely* omitted, in this connection, the testimony of clergymen, because skepties and *quasi* philosophers are wont to charge that it is the interest and trade of those persons to sustain religious observances.

THE SABBATH ESSENTIAL TO CHRISTIANIZATION.

The principles and duties of Christianity are embraced in the following apothegms. "Love the Lord thy God, with all thy heart, soul, mind, and strength, and thy neighbor as thyself." "Do unto others as ye would that they should do unto you." If any shall inquire, with the "lawyer" in the parable, "Who is my neighbor?" they will find an answer and illustration of our Savior, referring to the good Samaritan, which, for force of illustration, pertinency of application, and the heavenly charity it exhibits, is unsurpassed. To extend and promulgate those great principles among mankind, the most efficient agencies employed are pulpit preaching, Sunday School teaching, and the various and numerous means employed by religious teachers, both clerical and lay. But for the instruction thus disseminated, and the moral and religious influences thus created, the world would be immersed in ignorance, vice, and barbarism. As the result of *these* teachings and influences, we have almshouses, asylums, and benevolent and charitable institutions of every character, for the amelioration and relief of human misery. The Sabbath affords the principal opportunity for religious instruction, and enables teachers to enforce the practical duties which produce the noble results above specified. No man can fully estimate the amount of human misery relieved, and vices restrained and prevented by those agencies. No man can estimate a tithe of the happiness secured to afflicted humanity, resulting from Sabbath influences and Christian benevolence. We conclude with the poet's address to the Sabbath.

"Hallow the day which God hath blest,
That thou and all thy house may rest;
Keep hand and heart from labor free,
That God may have His work in thee."

Agriculture in Alaska.

Sitka, A. T., Dec. 29, 1867.

The resources of Alaska when developed, will be fourfold, depending on her farms, forests, mines, and fisheries. The last named promise to be the most profitable. The quantity of rich, arable soil is very limited, and the agricultural interests of the territory will always have to contend against a constant opposing force — a harsh climate.

The climate of Alaska is varied. Here on the Sitka group of islands and the adjacent coast the climate is mild, and the weather almost incessantly rainy. Reaching here early in October, there were only two really sunny days for the ensuing two months. The thermal stream of the Pacific, passing the Japan Islands, turns to the northeast, and terminates among the eastern Alaskan isles, making Sitka the most of the year the region of incessant storms, dripping forests, dank morasses, dense mud, and drifting mists. Here Pluvius reigns with undisputed sway. It is the paradise of ducks and gulls, of seals, salmon and shell-fish. Three Arizona miners, disgusted with the aridity of that sunny region, and yearning for the sight of a cloud if no bigger than a man's hand, decided last June to come to——Sitka. They arrived just in time to enjoy the delightful humidity of August, the rain-fall averaging about an inch daily. The desire of their souls has been satisfied.

According to the Russian meteorological tables the average amount of rain-fall during the past seventeen years has been eighty-nine and two-thirds inches annually — a fraction of an inch less than Senator Sumner's figures. The average number of fair days annually is *ninety*. May, June and July are the dryest months. All of the rest are rainy, and all except December and January, intensely so. According to the measurement at the Russian Observatory over twenty-one inches of rain fell during last August, and three inches in a single day. The sky continued unremittingly dubious until the middle of the present month. When the sun did break through the clouds, it was laughable to see the cattle, dogs, cats and hens, as well as humans, seek the brief sunshine and bask in its transient warmth. For ten days past the weather has been clear and cooler.

How the mercury stands.

The temperature among these islands is very equable. Often the mercury will not vary a degree in eight hours. In September only the summits of the mountains were snow-capped. Early in October one could notice of a morning that a white sprinkling lay upon the dark foliage on the higher peaks. The old "perennial drifts" were soon covered, and the snow-line slowly and surely descended until it reached the base of the mountains. We now have fine skating on ice six inches thick upon the little fresh-water lake back of the town. It does not, however, freeze enough to make the storing of ice for the San Francisco market profitable. This is done at Kodiak, where the winters afford a thickness of twenty inches.

The Russian records affirm the highest point which the mercury has ever reached at Sitka was sixty-nine degrees, and the lowest twelve degrees above zero. The average is about forty-four. A dozen miles in the interior has a much colder winter, and a correspondingly warmer summer. The mainland about Cook's Inlet has a climate like northern Vermont and Canada — the mercury sometimes reaching eighty degrees in summer, and occasionally going down to zero in winter. Further north the winters become intensely hyperborean. Last winter, at Grantley Harbor opposite Behring Straits, mercury congealed, and the spirit thermometer went down to forty-six below zero, while at the Esquimaux villages lying on the Arctic coast, we were told by the employés of the Telegraphic Company, that on the third of February it sunk to sixty-three degrees below zero.

As to snow in Alaska Territory, the quantity depends on the locality. On the shores of this and the adjacent islands it seldom falls over ten inches. It is soft, and rarely lasts over a week at a time. It is not solid enough for runners, but has a consistency which among Yankees is called "slush." Yet in an air-line there is perpetual snow within three miles of the town, and at an altitude of 2,500 feet. Ten miles distant among the mountains of this island there are always drifts of snow coming down to within five hundred feet of the ocean level.

Among the mountains on the mainland the snow reaches a depth almost fabulous. Mr. Whitford, of Victoria, who passed the winter of 1863–64 at a mining camp among the Stikeen mountains in latitude fifty-seven degrees, tells me that for two months of mid-winter there was a depth of over twenty feet covering the entire district. It did not disappear even from the valleys until the last of May. On the Alaska peninsula and the region about Cook's Inlet, the snow-fall is about the same as in Canada — five to six feet — while in the broad district further north, embracing the highlands about the head waters of the Youkon, the average depth is said to reach forty feet. Eleven feet has been known to fall in a single storm.

Agriculture about Sitka.

Upon the numerous islands about Sitka, agriculture can never be a lucrative occupation. The continuous rains of August and September prevent the raising of grain, and destroy the nutritious qualities of the grass. The amount of arable soil about the town is very limited — hardly exceeding twenty acres. It is black and full of small pebbles. As to gardening, I have seen more value upon a patch one hundred yards square in Oakland than is raised on this island. Aside from the Indians, not half a dozen families pretend to raise anything. The garden of Prince Maksoutoff, the late Russian Governor, which had in its culture the constant care of an adept, yielded a fair supply of currants and a few indigestible raspberries. The cabbage, turnip, artichoke, parsnip and cauliflower exhibited a respectable display of leaves, but the cabbages were headless, the turnips watery, the artichokes tough, the parsnips stale and the cauliflowers tasteless. Some eight years ago apple, pear and cherry trees were brought here from Victoria. They have been well cared for, are thrifty, and last season had a fine growth of foliage. They blossomed early in June, and a few dozen apples and a few pears attempted to mature, but failed. A quart of pale red, insipid cherries completed the yield of fruit in the only orchard of this portion of Russian America.

The Indians raise potatoes for the market on the adjacent islands, perhaps 400 bushels in the aggregate, in beds sharply thrown up to avoid the excess of water. In size they never exceed a hen's egg. They are only tolerated in the absence of a better quality. Whoever visits Sitka will not be long in deciding that, while her temperature may not be prohibitory, the excessive rains beginning the last of July and continuing till winter will prevent any other than a *very* incidental kind of farming.

Farming on the western islands.

Five hundred and sixty miles west of Sitka is the island of Kodiak, having a length of eighty-six and a width of forty miles. Lying in the same latitude as Sitka, it is very unlike it in climate. The summers are warmer and the winters are colder. One-third of the island is woodland, and the rest an open rolling region covered with a thick, fine grass resembling red-top. The forest trees are spruce, fir and cedar, covering the northern shores of the island, with a few belts stretching across to the southern. The climate in summer is dry, resembling that of San Francisco. The sea air prevents the raising of grain; but potatoes, turnips, peas, and other hardy vegetables are grown of excellent quality. Grass is very abundant, and affords the best of pasturage. There are a hundred head of cattle on the island, mostly of the Siberian breed, small and short, with round, plump bodies and short horns. There is now no market, and no inducement to raise cattle. The natives are satisfied with wild meat and fish.

The cost of growing cattle at Kodiak will be greater than in California, as they must be fed and housed four months of the year; but the beef is better, reminding the whalemen of the finest Vermont steak. Both American and Russian visitors say that Kodiak has pasturage and hay enough to support 10,000 head of cattle. Lieut. Andrews of the revenue cutter *Lincoln* says that while traversing the island last September both the climate and the face of the country forcibly reminded him of the State of Maine. It has the best soil of any of the islands of Alaska Territory.

The population of Kodiak is about 1800. The Russians number 120. St. Paul, the chief town, is next to Sitka in size, having a population of 480. It is on the northern side of the island. Near by is Spruce Island, the home of the retired list, or superannuated officers of the Fur Company. They have the best farms in the territory, 130 of the finest cattle, and raise an abundance of potatoes and vegetables.

Ounalaska, the second in importance of the long series of islands which stretches fifteen hundred miles westward from Kodiak, is seven hundred miles beyond that island. It has seven hundred inhabitants, only one of whom is a European — the late Russian Superintendent. There is no wood on the island, and turf is used for fuel. No cattle are here, although grass abounds everywhere. The surface is more rough, and the soil inferior to that of Kodiak. One active volcanic peak, six thousand feet high, has vast quantities of lava in the gorges leading down from its crater.

Extending eight hundred miles west of Ounalaska is an uninterrupted range of islands, having a surface varying from one thousand to twenty square miles. They are all of volcanic origin, and destitute of trees. Only a few of the more attractive are inhabited. Three of them had Russian trading-posts — Atka, Amchitka and Attou. They are more or less covered with grass, and like Ounalaska, have no land animal except the fox. The natives live on fish and seal.

Farming on the mainland.

I have already mentioned that the ocean air prevented the growth and maturity of grain at Kodiak. On the mainland opposite is Cook's Inlet, to the west and north of which is a wide reach of nearly level land having a good soil. Beyond the effects of the sea-air, and protected on the west by a high range of

mountains, the summer is warmer than upon the islands. The grass is taller, and the vegetable products larger and of better flavor. It is occupied by two small tribes of natives. The Russians, intent on the development of the fur trade alone, made no attempt at agriculture. But in 1865 and 1866 experiments were made at Fort St. Nicolas in the raising of grain. Wheat grew three feet high, but was killed by the frost before maturity; while both rye and barley yielded large sized and ripe kernels. There has been no inducement for the natives to engage in grain raising, but as rye, barley and oats are raised in Europe further north, and where the temperature is lower than at Cook's Inlet, there is no doubt these grains can be successfully grown in quite a large section along this coast. All authorities I have met with agree that the region east of Cook's Inlet — an area of 12,000 to 15,000 square miles — is the only region in Alaska where any grain can mature, and where agriculture can be carried on in its several departments.

Alaska Peninsula has too rugged a surface, and the coast from Prince William Sound east and south to British Columbia is too mountainous and wet for agricultural purposes; while all the vast inland and northern region of Alaska is for ten months of each year bound with arctic fetters.

Such are the facilities for agriculture in Alaska Territory. California farmers proposing to emigrate thither, will bear in mind that as yet grass is the only abundant product of this hyperborean region. This grows spontaneously, and over a widely extended range of country. ORIENT.

Correspondence from the Capital.

SACRAMENTO, Jan. 28, 1868.

If we have but little sunshine here now-a-days, we have an occasional breeze. Quite a stiff one was felt in the political atmosphere last week, and agitated it considerably. Rumors of political corruption connected with the late Senatorial election have been floating far and wide, and, like birds of evil omen, have come flapping their wings around here, where least of all they are welcome.

The Senate, by an almost unanimous vote, undertook to investigate the subject. But the movement was defeated in the House. No one seems to be able to bring a specific charge. If any one has either given or received money, no one can point to him and say, "Thou art the man." Proof is wanting. But this agitation will do good. Men should be warned to make no tracks if they do not wish to run the risk of discovery.

It will be a sad day for us when men secure positions of honor and power by money, and not by merit; or when wealthy corporations, and not the people, control elections.

But without distinction of party, politicians, with no exception, are in the habit of bidding for votes, and wielding influence in a manner that deserves the rebuke of all good men.

Representative men have done the thing on a large scale here during the last year. But seldom a voice is lifted up against the demoralizing practice. Were not the popular standard very low in some things it would be branded as dishonorable, and in every case lead to defeat.

Men seeking the highest offices in the gift of the people come here and "keep open house." One, for instance, takes the "Magnolia," which has long been a popular rallying point for leading politicians. It is a whisky saloon with some convenient and commodious apartments attached. But the bar is the principal thing in a political fight. The charm is in the *free drinks*.

There have been several open houses kept here lately, where wine and brandy flowed profusely. Thousands of dollars were spent mellowing voters and seeking their favor. Why this expense and publicity if there is not a potent influence in baskets of champagne and demijohns of whisky? Who, in view of these facts, can doubt the power of free drinks? In estimating the elements of political strength they must not be overlooked.

Men who run for county offices must be liberal with the whisky and beer if they expect to succeed. This belongs to a system that has no redeeming feature about it. The drinking habit formed by a large proportion of our population is an unmitigated evil. "Wine is a mocker, strong drink is raging; and whosoever is deceived by it is not wise."

It becomes religious journals and Christian people to condemn the thing in every form. The curse of wine, beer, and whisky drinking will become more and more grievous until there is an earnest, concerted movement among the friends of virtue, religion, and temperance to elevate public opinion and warn men who hold and seek offices not to disregard its voice. It is sad to see our legislative halls flanked and confronted by drinking houses that would not be there but for a liberal patronage. But when majorities become strictly temperate, they will see that they are represented by men of like principles. The work is going on, but let it be thorough and wide-spread. May the time soon come when something can be done in the way of legislating the liquor traffic into decency, if not entirely out of the land.

One of the first acts of the new Creek government was to banish whisky utterly, so that it could be said, "the utmost peace and quiet prevail in the country." That is well for Indians. When will their more civilized neighbors do as well? Peace and quiet can not otherwise prevail.

The Committee on Public Morals in the Assembly have reported in favor of the repeal of the Sunday Laws. That is a movement directly in the interests of the liquor traffic.

The experience of such cities as New York settles the question as to the damning extent of drunkenness on the Sabbath, when not restrained by a stringent law.

Mr. Oliver, of the committee, gave notice that he would present a minority report. What the result will be is uncertain.

But the Sabbath is God's gift to the race, and it shall not be lost to the Church and people. It will yet be observed over all the earth, and become the beautiful emblem of that rest which remaineth unto His people in Heaven. ALPHA.

REV. N. W. CONKLING, successor of the Rev. Dr. Wadsworth in the pastoral charge of the Arch Street Presbyterian Church, Philadelphia, has been called to become the successor of the late Rev. Dr. John M. Krebs, as pastor of the Rutgers Presbyterian Church in the city of New York.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

BANCROFT & COMPANY,
San Francisco, Cal.

Pacific Medical and Surgical Journal.

NEW SERIES. PUBLISHED MONTHLY.

The editorial management is in the hands of Dr. Henry Gibbons, a veteran in his profession, formerly Professor of Theory and Practice in the Philadelphia College of Medicine, afterwards President of the California State Medical Society, and now Professor of Materia Medica and Therapeutics in Toland Medical College, and Dr. Henry Gibbons, Jr., whose extensive experience in a large hospital in Washington, during the war, has familiarized him with modern surgery, and qualified him to take charge of this department. Besides, we have secured the assistance, as collaborators, of a corps of eminent physicians, representing the body of the profession on this coast.

TERMS.—$5.00 a year, or $3.00 for six months, payable in advance, in gold coin. Postage pre-paid by the Publishers.

PUBLISHED BY BANCROFT & COMPANY,
San Francisco, Cal.

One copy of the PACIFIC MEDICAL AND SURGICAL JOURNAL and one copy of THE OCCIDENT (subscription price $4.00) will be forwarded one year, to one address, for $8.00.

Sermon,

BY REV. HENRY M. SCUDDER.

Psalms, 104: 10.—"He sendeth the springs into the valleys, which run among the hills."

I spent my June vacation among the summits of the Sierras, where I found the words of the text delightfully verified. A mountain stream is one of God's poems embodied. It is not written in hieroglyphics. We may read and interpret without difficulty.

I traced each stream through great pine forests. The winds that rage in the winter months through those woods have done the tourist a kindness, for they have, at frequent intervals, cast down a princely tree athwart the stream, adding to the picturesqueness of the scene, and furnishing him with bridges, so that he may often shift his position from bank to bank.

Have you ever traced the course of such a stream, one that comes down from a range of snowy heights? You should begin from below, and work your way steadily upward. You must plunge through undergrowth, and jump from rock to rock, crossing and recrossing, as best you can. It is fine exercise — better than shooting or fishing. At every step new views burst upon you, and new thoughts flash with fresh illuminings over your soul.

As I gaze upon the stream, the Author of it seems, through it, to express to me certain things respecting Himself.

1. From every point of view I am impressed with the reality of beauty.

The stream is very clear. It comes from the snow that lies far up beyond the dust. Its color is a pale green, almost the reflected tint of the stately trees which line the banks. Wherever the stream can exempt itself from encounter and consequent agitation, it maintains this pale green translucency.

Look down at the bottom. There are spotted and striped stones, and there are many-colored glistening pebbles, and the current appears to flow over a pavement of variegated gems. A little farther on are sullen, submerged rocks, with patches of sparkling sand between, and into these interstices the sunlight insinuates itself, filling them with a mellowed splendor.

Watch the stream. Just here, how noiseless it flows! How contemplative its silent lapse! It wears a glossy, varying hue, like that of changeable silk, and it moves with the unctuous facility of oil. There is not even a rustle nor a murmur, but just a whisper that your ear strains to catch. The surface is a mirror, and in the flawless bosom of this softly flowing, unruffled, liquid emerald, the sky builds another hemisphere below to complete its globe of ethereal blue.

Take another step, and see how the stream releases itself from this seeming inertness. Its glides swiftly over the back of a broad, flat rock, and flashes out from its edge in a silvery sheet, as though it issued directly from that ledge as from its fountain; and now it has found its voice, and has a different melody for every object that touches it. It murmurs as it breaks into ripples around a clump of grass; it chatters to the dipping bough of an overhanging bush; it brushes, as with the touch of dew, the flower-petals that stoop to it; it darts up into little exclamation-points of foam around a hostile rock, at the same time generously covering its ruggedness with the lace-work of a rainbow mist; it utters a remonstrance as it wheels with dignity around a stony promontory; and it runs gleefully down a staircase of rocks, with a sprightly step and the song of a child.

Now it waxes merrier, and rolls, and gambols, and disports itself, tumbling wave over wave, and curl over curl; here it tosses up a wreath of water, to be touched by the sunlight and glorified into diamonds; and there, composing its features, it steals with more equable flow under a tree, whose leaf-shadows, swayed by the wind, tread the watery floor in a beautiful dance — the leaf-shadows dancing hand-in-hand with the spangles made by the intervening sunbeams.

Onward it goes, at increased pace, with the rush and tumult of quickened motion, and, as far as you can see, are ridges and fissures of foam, and crested waves, marching like battalions until they come to a basin, into which they bravely fling themselves, changing the water's delicate green volume into a bulk of creamy foam, from the edge of which fleets of bubbles arise and sail off down the stream to surrender their existence to the first shock that they meet.

Once again the stream subsides to gentleness. There are ripples, but they are voiceless — tremulous dimples, without audible laughter — smiles breaking out upon its face, as if it were tired of singing and talking and roaring, and wished now to think, and only to smile out its own thoughts.

Whatever aspect it assumes, it never assumes uncouthness; it never sacrifices its loveliness; it never forgets to be graceful.

What exhaustless beauty there is in this one stream! I could not find it all out if I were to study it for years. If this stream, then, is one thought, one musical thought of God, one single ray from that infinite Intellect, how beautiful must He be! I gaze upon the stream as an expression of the beauty of His character, and I exclaim,

> "Thou hidden love of God, whose height,
> Whose depth unfathomed no man knows!
> I see from far Thy beauteous light,
> And only sigh for Thy repose;
> My heart is pained, nor can it be
> At rest till it find rest in Thee."

2. I discern a unity.

Upon the interposed edge of a rock the stream gives way and splits, but its force is not weakened, nor its energy shivered, nor is the unity of its career impaired. Its several currents meet again on the other side; and they magnanimously moisten, as they pass, even the lichens on the rock that opposed them.

The diverse directions inio which a stream is broken up by the hindrances distributed through it, and along its shores, are remarkable. Here a portion of the water, arrested and twisted by a rock, will run at right angles with another portion that is maintaining the direct line of advance; and there, another part, caught by some barrier and turned back, will pour itself for a little space in a direction which is the exact retrograde of the normal current. Nevertheless, the stream is in harmony with itself. The entire body of water, working out a thousand side issues and results by these apparent contrarieties, arrives, without defeat or waste, at its goal, in a sublime exultation. Is there no lesson here for me? In the march of events, in the scheme of Providence, as it transpires before us, are there not apparent contrarieties which seem to be thwarting each other, but which, under the guidance of the Mind that sees the end from the beginning, are really working in unison to produce those grand results which shall cause the universe to exult with God in a perfected beneficence?

And I, too, in my littleness, may yet catch here a thought of joy. If I am in sympathy with God, the conflicting currents of my own life shall work out a unity of bliss for me.

3. The stream presents an amazing variety of expression. At first sight, one might say, it is very simple; it is only water going through an appointed channel. Is that all? Yes, but that one element of water is endlessly modified in its expression, by sunlight and shade; by trees, bushes, and grasses; by rocks, pebbles, and sands. When you take all these into account, how complicate the liquid structure appears! It never repeats itself. You cannot find two spots alike in all its course. It reveals new thoughts and new emotions to your every glance. Are not these marvelously diversified forms of loveliness like unto a cloud of witnesses, which testify to the variety of thought and feeling that must reside in the mind and heart of the great Being who devised, created, and continues this stream, and all other streams, in their infinite details?

Moreover, the stream has this lesson for us. It whispers to our inmost soul, and tells us what a glorious variety God will evoke from the currents of our life, if we will run as He appoints, and yield ourselves to all the influences which He will bring to bear upon us. It encourages us. It tells us to submit wholly to God, and then be ourselves, not some one else; to imitate no one. It tells us not to be stiff and stereotyped, but to be original, and fresh, each stream differs from every other; to be free, governed only by the two laws of love, as the stream, by its two bounding and directing shores; it bids us mark the difference between the dullness and the deadness of parallel ditches, dug in dreary similarity through a drained field, and the freeness of many streams, running each its own way, down from a chain of mountains.

These, then, are its lessons to me, respecting God. It witnesses to me of the beauty of His character, the unity of His providence, and the infinite variousness of His mind.

But man is the miniature of God; not man as he is now, but as he was when he came from the hand of his Maker. Man was made in the similitude of God, and that which teaches us about God must necessarily, at the same time, teach us something about man, who is the image of God.

1. This mountain stream is a symbol of life. It possesses ceaseless activity. It knows nothing of indolence and stagnation. Where its surface is calm, it is not the stupid calm of laziness, but indicates the quieter movement of a deeper volume, which carries in its breast all the forces and utterances that it lavishes on the cataract below. It typifies the soul's unceasing current of thought, feeling, and action.

It is an emblem of everlastingness. Sit down upon its shore. The faded pine leaves which form the rug upon which you sit, are an emblem of death, of your dying body; but look upon the water that runs by you, and never runs out. It can not rest. It can not stop. The soul of man is a stream that runs from under the throne of God; it runs ever and forever. Tell me: can you contemplate the running stream and not fall into a thoughtful mood? Can you help thinking of your past life, and your present condition, and of the eternity of your soul's activity, either for good or for evil, for joy or for woe?

The stream is like a good soul, that distributes itself in a life of love. Alike afar and near it gives life. It wears off particles from the ungainly rocks, and carries them down to enrich the wheat fields and meadows of the lowlands. Thus it is a perpetual grist-mill grinding food. That which it triturates from the rocks becomes in time the grain that men eat; and the minerals which it washes down in its course become a part of the animal structure; it builds up your bones with phosphate of lime, your muscles with the phosphates of magnesia and potass, your cartilages with soda, your teeth with fluorine, your hair and nails with silica, and your brain with phosphorus. It gives life to those that dwell afar.

Near by it doth likewise. It hath in itself the attractiveness of life. The tall trees, which look so self-sufficient and independent, are drawn to it; subdued by its power, they reverently meet over it in the obeisance of interclasped branches; they run their roots into the strips of soil which it wets; and, in their gratitude, they would fain embrace the stream and lie upon its bosom.

The stream is the symbol of a soul that passeth on to God. It runneth to the great lake, where it seeks and finds its final rest, and as it runs through the old pine forests, it makes them its temple, even as the Christian makes a life-career a temple. It worships as it travels, offering its pure incense of spray, and singing its everlasting hymn, now louder, and now more subduedly, according to the specialty of its condition. Yes, it is the fittest type of exuberant gladness, of liberty of thought, freedom of emotion, and joy of action. It is the symbol of a trusting, determined, loving soul, moving on towards God, exhibiting as it goes, now a childlike faith, now a masculine energy, and now a womanly gentleness; and by the diligence and perpetuity of its motion, it shakes itself clear of the contaminations which cluster around the sluggish and stagnant soul.

2. It teaches us a lesson of courtesy and consistency. The stream accommodates itself, with a charming readiness, to all positions. It fills up deep

hollows instantaneously. It diffuses itself over shoals and shallows. It maintains the equilibrium of its liquid life with a rare politeness. But while it walks so gently among the hindrances that do not wall up its course, it will not tolerate an obstacle which would break up its consistency and arrest its progress. Over every object that would aim to erect itself into an absolute barrier, it grandly swells, and wreathing its own brow with a coronet of triumph, it rolls on and pursues its course; and in all this there is the grandeur of consistency, rather than the waspishness of ill humor, or the turbulence of anger, or the petulance of impatience. You can not miss its instruction. Be kind, gentle, and accommodating in all things where no moral inconsistency is involved, yet ever be grandly true and persistently loyal to your life-direction.

3. The reverses and set-backs of the stream are significant. They are parts in a scheme of blessings. Lo, there, a hatchet-faced rock severs a liquid slice from the stream. Why? To turn it aside into a tinkling rill, which shall diverge far enough to moisten the root of a languishing tree, or comfort some lonely, struggling bush, or drooping flower, and then return again. Here a part of the stream is rudely stopped and forcibly flung back. Why? In order that its reflex bound may form an eddy, whose outermost circle shall sweep the edges of a little cove, and nourish its mossy border, which can not be reached directly. All the apparent reverses prove blessings to something else, and therefore a choice blessing to itself; for this is the highest blessing — to be made to bless others, even though this be wrought out in us by a rough instrumentality. Does not this speak like an angel's voice in my ear, and say: "All the reverses which you suffer, if borne aright, and sweetly acquiesced in, will be made, by infinite love, to work out good for others, and good to yourself." Doubtless I would, if left to myself, choose the conditions of my own intellectual and spiritual development far otherwise than they are chosen for me, and forced upon me. I would have no splits, no eddies, no setbacks, no reverses. I would have more health, more strength, more available time, more opportunity of choice. The denials are of God. The reverses are from Him. Meekly met and manfully endured, they fall into the succession of blessings. Trust, submit, and work just as He permits, and all will be well. All things work together for good to such. Be content with the providential arrangements of your life.

Lastly: I learn perseverance.

I see the stream compressed in agony between two stern, unyielding rocks. It is agitated. But what does it do? In the narrow gorge it rolls over upon itself; it becomes like a contracted muscle. It gathers itself together and contracts its power that it may strike with a strong arm against some obstacle, or with sinewy limb, make an unusual leap. Agony fits it for mightier work. It perseveres through persecution.

I look again. It creeps, with a sort of foreboding, into a deep dell. Thickets overhang it with dismal shadows. Trees have fallen across it, and rough, half-decayed branches pierce it. Driftwood, rubbish, and a vast variety of rottenness have accumulated there in unsightly masses over it, and through all this superincumbent ugliness the sunlight struggles only here and there with a solitary beam; yet the stream keeps on. It does not give up heart; its footstep is as blythe, its music as gleeful, and its flow as resolute as ever they were in brighter spots, and soon it comes out from under these gross overtoppings, causing even their deformities to magnify, by contrast, its beauty. What does it say to me? "Persevere, O sad soul, through all sorrow and dejection. Thou wilt find it a difficult task; but keep on; never give up."

Yet again I look. The stream comes towards a precipice, a wild steep of perpendicular granite. Does it admit the impossibility? Does its stop and retrace its course, or find some more facile path? No, it simply says: "I am in the line of my duty," and over it goes. It takes the sublime leap, creating in this new and daring movement, the chiefest glory of its career — a magnificent cascade, which fills the woods with the thunder of its vast descent. Neither is this exhibition of force, this defiance of all hostility, made in a rude and boorish form. The curve which it describes is the perfection of beauty, as graceful as it is grand; and just where it takes the leap, at the very point of its resolution, God puts His rainbow signature. Is there no teaching here for me? Verily there is. It bids me mind nothing that I encounter in the path of duty. Even though it be like a precipice of granite, with a chasm of darkness at its base, fear not; trust in God, and leap it.

Once more. It runs unchecked, undisturbed. Every drop is a reflector. The sunbeams bathe their radiant forms in every part of its clear, crystal depths. It is so illumined that you can see the individual sands upon its floor. But it does not stay to wanton with the sunlight, and it speaks to me as it flows, and says: "In the day of prosperity, still persevere; forget not that thy way is still on, far on to the great lake."

Thus I have tried to interpret to you this one thought of God — a mountain stream.

I make one remark in conclusion: How freely God lavishes His beauty, where He can consistently do it. These lakes, and mountains, and streams have been known for ages to the roving Indian alone, who cared only for the deer he could slay upon these heights, or the fish that he could spear in these depths, or the game that he could trap along these watercourses. Why does not God lavish some of this superabundant beauty upon me, upon my soul and my life? Why is my spirit barren and dead? Why do not God's glad thoughts flow down me, as the streams go merrily down the hills? Why am I flung outside of the great circle of a harmonious Nature? Why do I feel the twang of discord within myself? Why am I conscious of distance from God, of alienation, of aversion? Why is there bitterness and weariness in my spirit? Why is there fear, legal dread, shrinking, dismay, and foreboding? Why does not God shed some of His beauty upon me? Because He cannot. I have sinned. My trangression has set me outside of the vast circuit of accordant Nature. I am out of that Paradise, not in it. What shall I do? Nature can not redeem me. I must have something higher. A loftier revelation than nature must come to me. Some agency unknown to nature must atone for me, cleanse me, and introduce the sweet accord of holiness into my heart and life, and thus bring me back, not only into the circle of nature, but into the lost lordship over it. If there be no such revelation, no such agency, then I must shut my eyes, fold my arms, aud yield to despair.

"Blessed be the Lord God, the God of Israel, who only doeth wondrous things; and blessed be His glorious name forever," since He has answered for us this deepest question of our immortal spirits. The beauty of God is made available even to us sinners. Listen to the voice: "Out of Zion, the perfection of beauty, God hath shined." (Ps. 50: 2.) There is a temple higher than that of nature. It is the temple of redemption. Its High Priest is Jesus Christ. His blood shed for our sins is our passport of entrance into that new temple. By faith and repentance we enter, and once received there, we become God's children, heirs of God, joint heirs with Christ, and God will lavish His beauties upon us forever, and we shall be reinstated as princes over nature.

Miners' Foundry and Machine Works,

Nos. 245 TO 255 FIRST STREET,

SAN FRANCISCO.

HOWLAND, ANGELL, & KING, PROPRIETORS,

Manufacturers of Machinery for

QUARTZ MILLS, SAW MILLS, POWDER MILLS, FLOUR MILLS, SUGAR MILLS, PAPER MILLS, STEAM ENGINES OF ALL KINDS, AMALGAMATORS OF ALL KINDS, MINING PUMPS, OIL WELL TOOLS, ROCK BREAKERS, HOISTING WORKS,

—AND—

Machinery and Castings of all kinds, either of Iron or Brass.

Boilers and Sheet Iron Work, in all its branches.

Shoes and Dies of White Iron, manufactured for, and imported by us, expressly for this purpose, and will last 25 per cent. longer than any other made on this coast.

Russia Iron Screens, of any degree of fineness. We are the only manufacturers on this coast of the "Hicks Engine," the most compact, simple in construction, and durable, of any Engine in use.

W. H. HOWLAND, E. B. ANGELL, E. T. KING, CYRUS PALMER

Attention!!

RELIABLE SEEDS.

EDWARD E. MOORE.

425 WASHINGTON STREET.

The undersigned, a Practical Agriculturist, is now prepared to supply the wants of Merchants, Ranchmen, and all others, by wholesale or retail, of such seeds as will not disappoint those who use them, as our seeds after using the utmost care in their selection, in getting them true to their kind. We have suitable grounds prepared to test the different varieties, so as to insure their entre reliability. The assortment consists of ALL KINDS OF VEGETABLE SEEDS, ALL KINDS OF FLOWER SEEDS, ALL KINDS OF GRASS AND RED AND WHITE CLOVER SEEDS; also, ALFALFA AND LUCERNE.

EVERGREEN SEEDS, NATIVES OF CALIFORNIA AND ADJACENT STATES. ALL KINDS OF TREES AND SHRUBS, ALL KINDS OF FLOWERS IN THEIR SEASON, ALL KINDS OF BULBS IN THEIR SEASON, STRAWBERRY AND RASPBERRY PLANTS, Etc., Etc.

The subscriber deems it superfluous to name every article for sale, but merely remarks, that no one has a superior assortment, and no one will deal more honorably by his customers, to whom he refers with confidence, as universal approval has been awarded him. Small papers at wholesale or retail. All communications, or orders, by Mail, or Express Companies, attended to promptly. Catalogues furnished on application, by letter or otherwise.

EDWARD E. MOORE.
425 Washington Street,
Nearly opposite Postoffice, San Francisco.

E. A. LAWRENCE,

No. 620 WASHINGTON STREET, ROOM 3,

SAN FRANCISCO,

Counselor at Law.

Particular attention given to Suits concerning Real Estate.

BANCROFT & COMPANY, San Francisco, Cal., are the exclusive Publishers, for the Pacific Coast, of

Putnam's Magazine,

FIRST NUMBER, JANUARY, 1868.

This publication will be similar in character and general appearance to the former series of *Putnam's Monthly*, which ranked, during its existence, as the ablest periodical in America.

High-toned papers on matters of national interest, popular science, and industrial pursuits; and sound information and instruction on important topics, will be specially cultivated.

In the lighter articles, healthy entertainment and pure amusement for the family circle, will be carefully chosen from the ample resources presented by a large circle of contributors.

TERMS OF SUBSCRIPTION.—Four dollars per annum, in gold coin, payable in advance. Postage prepaid by the Publishers. Direct all communications to

BANCROFT & COMPANY,
San Francisco, Cal.,
Publishers for the Pacific Coast.

THOMAS J. MYER & CO.'S

Extra Baltimore Fresh Cove Oys ers

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equa to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

WILLIAM LLOYD,

Undertaker,

HOWARD STREET, BETWEEN SECOND AND THIRD,

Adjoining the Methodist Church, - - - - - - San Francisco.

Funerals conducted in the best possible manner, with promptness and dispatch, and at the most reasonable rates.

Family Reading.

An Oregon Pebble.

BY MRS. JAS. NEALL.

This little heart of stone
Was once a pebble on a distant strand,
With sea-weed overgrown,
Buried beneath the sand.

I lifted it from thence —
Washing away the crust and clinging sand —
For, to my inward sense,
The mark of God's own hand

Was in its rounded form;
And thus, methought, perhaps within did lie
Something which I could warm
To beauty 'neath my eye.

I poured on cleansing oil;
A little clearer, then, its face did seem.
But wasted was my toil.
I saw no distant gleam

Of any heart within the shining stone.
The instrument was but within my hand
To *polish* it alone.
Thenceforth I did command

The carving lapidaire
Chisel the crusting, that mine eyes might see
The hidden things which there
Did strangely puzzle me.

He ground it o'er and o'er;
For many days he ground it all alone;
And then unto me bore
Only a heart of stone.

Ah! thus, methought, may I
On life's shore reach some human castaway;
Alas! such pebbles lie
Too often in our way.

We may pour on the oil,
And pray for instruments our work to aid;
Washing the stain and soil
Which wrong and sin have made.

We may call out the heart,
But ah! our human labor endeth there.
Well, if we work our part
As doth the lapidaire.

To *change* the heart of stone
Only the Father knoweth all the way,
As instruments alone
We work His will upon the human clay.

Then let us crave that we
Be softened with the touches of His grace,
And "polished stones" may be
Reflecting but His face.

So shall hard hearts we touch
Melt into softness and repentance sweet —
And thus, forgiven much,
Attain the mercy seat.

Female Intelligence and Energy.

I have noticed, says Washington Irving, that a married man falling into misfortune, is more apt to retrieve his situation in the world than a single one, chiefly because his spirits are softened and relieved by domestic endearments, and self-respect is kept alive by finding that although all abroad be darkness and humiliation, yet there is still a little world of love at home, of which he is a monarch; whereas, a single man is apt to run to waste and self-neglect; to fall to ruin like a deserted mansion for want of inhabitants. I have often had occasion to mark the fortitude with which women sustain the most overwhelming reverses of fortune. Those disasters which break down the spirit of man and prostrate him in the dust, seem so call forth all the energies of the softer sex, and give such intrepidity and elevation to their character, that at times it approaches to sublimity. Nothing can be more touching than to behold a soft and tender female who had been all weakness and dependence, and alive to every trivial roughness, while treading the prosperous path of life, suddenly rising into mental force, to be the comforter and supporter of the husband under misfortunes, abiding with unshrinking firmness the bitterest blast of adversity. As the vine which has long twined its graceful foliage about the oak, and has been lifted by it into sunshine, will, when the hardy plant is rifted by the thunderbolt, cling round it with its caressing tendrils, and bind up its shattered boughs; so, too, it is beautifully ordained by Providence, that woman, who is the ornament and dependant of man in his happier hours, should be his stay and solace when smitten with dire and sudden calamity, winding herself into the rugged recesses of his nature, tenderly supporting his drooping head, and binding up his broken heart.

"Teach the Women to Save."

There's the secret. A saving woman at the head of a family, is the very best savings bank ever yet established—one that receives deposits daily and hourly, with no costly machinery to manage it. The *idea* of saving is a pleasant one, and if "the women" would but imbibe it once, they would cultivate and adhere to it; and thus many, when they are not aware of it, would be laying the foundation for a competence, security in a stormy time, and a shelter in a rainy day. The woman who sees to her own house has a large field to save in, and the best way to make her comprehend it, is for her to keep an account current of expenses. Probably not one wife in ten has an idea of how much are the expenditures of herself or family. Where from one to two thousand dollars are expended annually, there is a chance to save something if the attempt is only made. Let the housewife take the idea — act upon it — and strive over it—and she will save many dollars—perhaps hundreds—where before she thought it impossible. This is a duty—not a prompting of avarice—a moral obligation that rests upon all — upon "the women" as well as the men; but it is a duty we are sorry to say, that is cultivated very little, even among those who preach the most, and regard themselves as examples in most matters. "Teach the women to save," is a good enough maxim to be inserted in the next edition of Poor Richard's Almanac.

THE YOUNG FOLKS.

Highest.

"Well, I'll do something yet to show them I'm somebody. You wait. Jarvy Williams shall see it too, the mean little chap."

"Don't be angry with Jarvis, Arty; he is a kind-hearted, good boy. If you failed, and he won the prize, you know it isn't because he tried to injure you; and he would try to do you a kindness at any time, if he had an opportunity, I'm sure."

"I'll have my name above his yet, Marion, see if I don't. I'm bound for Martin's Ledge."

And, with a dark face and a darker heart, Arty Fisher left his gentle sister, who had failed to soften his hard feelings towards his classmate.

Martin's Ledge was the name of a huge rock that formed one side of a hill which was a favorite playground with the boys; and the largest of them often had trials of skill, or rather strength, in climbing its steep front. It was not a very easy task, for there was not much for either hands or feet to get hold of, and the rock stood nearly upright, and stretched away up some sixty feet, so that there was danger in the sport. Here and there, upon its sun-burnt and storm-beaten face, were initial letters rudely cut, fifteen, twenty, thirty feet from its base — memorial marks of the climbers; and one could be seen fully forty feet high, where Tommy Black, who, always more venturesome than the rest, and who afterwards went to sea, managed to leave a large T, but who did not wait to add his other initial. Tommy never owned that he felt dizzy, and didn't dare to stay longer, though the boys all said it was so.

It was Wednesday afternoon, and many of the boys were there, as usual, playing about Martin's Ledge. Arty Fisher joined them. A hammer showed its handle from his pocket, and clinked against the iron chisel inside, telling that he was all ready to climb.

"Now, boys, let's see if I can't put my mark highest of all. I'll be first here, anyhow! Who cares for Jarvey Williams?"

They all knew what had happened at school. They all knew Arty's vexation at his failure, and at the success of Jarvis, and they also knew the unmanly spirit he had shown, but none of them wished to quarrel with him.

"Go ahead, Arty!" cried several voices, as he started.

He went rapidly up the ledge, at first; but there was less and less to hold upon the higher he went, so that he got on slowly. Twenty-five feet, thirty, thirty-five — the boys knew from old marks when he reached these points. Forty, forty-one; and the boys shouted,

"Highest of all, Arty!"

The face of the rock was almost without a break here; still he held on, and gained one foot more; forty-two — he was two feet higher than the bravest!

He managed to get out his tools, and clinging to the rock, began to make his mark. Slowly and painfully he worked on the letter A, for there was danger every moment that he would lose his balance and fall backward. It was very hard. His limbs trembled under him. He glanced down for a moment, and his foot slipped. Down over the steep rock he fell, to the gravel-bed below. He had made his mark highest of all; but it was unfinished.

Arty was carried home, bruised, and bleeding, and unconscious. He came to himself to find that a broken arm and other injuries were the result of the day's work. He learned, too, that little Jarvis Williams had been the first to run for help, and to bring the surgeon; and that, with the heart of a brother, he had lingered near for hours after the accident, offering any service in his power. And then he remembered his sister's words:

"I believe Jarvis is a Christian."

The next day Jarvis came to see him, and though he spoke hopefully, and tried to comfort his suffering playmate, Arty saw the tears in his eyes, and knew they were from sympathy. And then Arty "came to himself" in another way. He held out his hand.

"Forgive me, Jarvis."

That was all he said; but it came from a penitent heart, and a loving word, in reply, from Jarvis, made them friends. And so, through Arty's long confinement, Jarvis came every day to do what he could to cheer him, telling him all about the boys and their play.

"Jarvis," said Arty, one day, "what made you so kind to me when you knew I hated you?"

"Don't Arty; you didn't hate me; or at least you couldn't have, if you knew how I felt. And how could I help coming to see you when you were hurt so badly? Besides, Arty," and Jarvis' eyes glistened now; "I'm trying to be a Christian; and, if you would only try with me, how much we could help each other."

When Arty's sister came in, the boys were talking softly but very earnestly.

There is a place in Arty's heart where are written the names of all his playmates whom he loves best, and on that record the name of Jarvis Williams stands "highest of all," for Jarvis conquered by love, and the two boys walked in love together.

Boys' Evenings.

Many a boy ruins his character and wrecks all his hopes by misemploying the evening hours. School or business has confined him during the day, and the rebound with which his elastic nature throws these duties off, carries him often almost unawares beyond the limits both of propriety and prudence.

Besides the impetuous gush of spirits whose buoyancy has thus been confined, there are influences peculiar to the time, which render the evening a period of special temptation. Satan knows that its hours are leisure ones for the multitude, and then, if ever, is he zealous to secure their services; warily planning that unexpected fascinations may give attractive grace to sin, and unparalleled facilities smooth the path to ruin. Its shadows are a cloak which he

persuades the young will fold with certain concealment around every error, in seductive whispers telling them, "It is the black and dark night; come."

How many are thus solicited to come, "as a bird hasteneth to the snare, knowing not that it is for their lives," let the constantly recurring instances of juvenile depravity testify.

Parents acknowledge the evil here pointed out, and anxiously inquire, "What is to be done? Can we debar our children from every amusement?"

Boys themselves confess it, but plead in reply to the remonstrances of their friends, that "evening is the only play-time, and that they must have some sport."

It is certainly proper that the young should have amusements. None better than ourselves are pleased to hear the lips of childhood eloquent with the exclamation, "Oh! we have had such lots of fun." It seems like our own voice coming back to us from out a long-lapsed past.

These amusements should, however, be innocent; *and innocent amusements are easily secured and best enjoyed at home.* Here parental sympathy may sweeten the pleasures and parental care check the evils of play, frequently intermingling its incidents with lessons of instruction. If parents would use half the assiduity to render an evening spent at home agreeable, that Satan employs to win to the haunts of vice, they would oftentimes escape the grief occasioned by filial misdeeds, and secure a rich reward in having their children's maturity adorned by many virtues.

A word to boys concludes all that we would now say. Spend your evening hours, boys, at home. You may make them among the most agreeable and profitable of your whole lives, and when vicious companions would tempt you away, remember that God has said: "Cast not thy lot with them; refrain thy foot from their path. They lay in wait for their own blood; they lurk privily for their own lives. But walk thou in the way of good men, and keep the paths of the righteous."

AGRICULTURAL.

State Statistics.

From the last report of the Surveyor-General, we gather the amount and value of the leading staples of California, during the year 1866, as follows:

14,080,752 bushels wheat, at $1, $14,080,752; 11,605,922, bushels barley, at 45c, $4,722,615; 1,864,379 bushels oats at 50c, $932,189; 358,584 tons hay, valued at $8, $2,868,672; 4,449,835 lbs butter at 30c, 1,334,950; 2,110,058 lbs cheese, at 15c, $316,508; 5,229,826 lbs wool, at 16c, $836,772; 1,791,633 gallons wine, at 40c, $716,653; 1,983,068 bushels potatoes, sweet and common, valued at 60c, $1,195,841; 181,850 bushels peanuts, at $3, $545,540; 242,213 bushels beans, at $1.50, $363,319; total value, $27,913,818.

The gold product is estimated at $24,000,000, so that the agricultural products are in excess by nearly four million dollars. Besides, the quantity of these products is generally estimated at too low a figure by the assessors, making the excess above gold still greater.

Total assessed value of property in the State for 1866, $197,789,107, as follows: Real estate, $93,379,737; improvements, $15,306,817; personal property, $88,239,585.

Total population, (estimated) 470,597; registered votes, 119,481; poll tax collected, $288,494.

The report also gives the following figures relative to 1867: Land cultivated, 1,793,286 acres, of which 846,377 acres were in wheat, and 354,873 acres in barley. The largest wheat counties were: Solano, 160,000 acres; Santa Clara, 150,000; San Joaquin, 91,790 acres; and Sacramento, 30,000 acres. It will be seen from the foregoing, that only 18,959 acres of additional land have been cultivated in 1867. The total of wheat and barley in 1866 was 1,163,366 acres, while, in 1867, there were 1,201,250 acres, showing an increase of 37,884 acres cultivated in those grains.

DIFFICULTIES are whetstones to sharpen our fortitude.

SAN FRANCISCO, CAL.

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents. F. E. WEYGANT, Proprietor.

PACIFIC COAST ITEMS.

The *State Capital Reporter* argues that the "surplus female population of San Francisco should transport themselves up among the mining districts, where they can find comfortable situations in private families, with a good chance for a life contract with bed and board." Now to our mind, while the "chances" are plenty enough, a large per centage of these rural, like our city bachelors, drink too much whisky, and have habits too reckless and questionable to make a "life contract" desirable. While a good chance should never be passed by, a bad partnership is many-fold worse than "single blessedness."

"Once a Californian, always a Californian," has rightly passed into a proverb. The Chico *Courant* is reminded of this by the return of an old resident of that town who went East two years ago with the firm resolve to remain there. He found nothing to compare with California, and has returned to make this coast his home. The *Courant* says: "He was surprised at the improvement Chico has made in the past two years. Nor has our friend visited New Jersey without a substantial improvement. He left single, but has come back double."

The *Call* has a pleasant letter from Hon. S. B. Axtell, Member of Congress from this district, in which he writes of the social and political situation at the East. In speaking of California he says: "People here (in the Eastern States) are more excited over your wheat than they were over your gold. They were not a mining people and feared to experiment. They thought that the gold would soon be dug out. But they can understand wheat. I was through the West, and I could *feel* the population moving toward the Pacific."

In consequence of the closing up of the Columbia and Willamette rivers by ice, Oregon apples have become very scarce in this market, and have advanced more than one hundred per cent. in price. California apples are partially supplying the deficiency. We remember in October, farmers in Contra Costa and other adjacent counties complained of a want of market for apples, and allowed them to go to waste. Just at present no crop is more remunerative. They bring from $4 to $5 per box.

Messrs. Wallace & Wilson are giving practical exhibitions of their peculiar theory of horse training at the Dexter Stables on Bush Street. It is really surprising how readily they will get the control of an untrained, vicious, kicking animal. They are averse to all harsh treatment. Thoroughly understanding the disposition of the horse, they, by determined yet kind usage secure entire control and confidence.

Bad roads, sunshiny days, and moonlight nights are the local topics of the past week from exchanges in the interior. The Owyhee *Avalanche*, however, says the roads in that section were never in better condition, and adds that it seems like "old times" in Northern Pennsylvania to listen to the jingling of the bells, mingling with the merry laughter of the young folks. The temperature goes down to zero at night.

At the meeting of the Chamber of Commerce on Monday night, an able report was given in favor of a fence law, the substance of which is embodied in the New Jersey law, which "compels owners of all live stock to keep them on their own premises." Such a law is not only just, but it is needed to protect the most important interests of this State — the raising of grain and other field products.

The Austin *Reveille* reports from the Sweetwater mines that six hundred men are there, who have erected about one hundred cabins. There is but little whisky at the mines, consequently everything is peaceful and orderly. Placer diggings have been discovered which yield good returns, and the prospects are very favorable for lively times and general prosperity the coming spring.

The *Alta* reports a rain-fall this season of 23 inches and 84-100. This is nearly two inches in excess of the annual average. Although some of the sown grain lands, perhaps one-third, will need to be resown, and some which will be sown hereafter will fail to yield a full crop, yet the prospect for a large grain harvest in the summer of 1868 is hardly doubtful.

The San Francisco Board of Education, at their meeting on Tuesday, rescinded the resolution passed at a previous meeting, admitting Father Gallagher's school into the Department and allowing him to catechise the children. The Board have evidently improved by taking a "sober second thought" upon their action.

The new Chinese theatre on Jackson Street was inaugurated on Monday night. This occasion, and the New Year festivities have made our "celestial" population especially demonstrative on Sacramento, Dupont, and Pacific streets during the past week. The theatre is reported to have cost $40,000.

The Virginia *Enterprise* says the novelty of sleigh-riding has worn off, and out-door pleasure seekers have turned their attention to skating. The "rink" is the name given to the little artificial pond just below town, where only four bits are charged for the use of both skates and ice.

At Carson, Virginia, and Gold Hill, wood is now brought upon sleds into market. The Gold Hill *News* thinks that as the price is much above summer rates, owners of wood ranches would find it to their advantage to rush in all they have out while the sleighing lasts.

The Legislature has been busy in preliminaries the past week, but no important bills of general interest have passed. It is said that an act repealing all Sunday laws will certainly pass the Assembly. In the Senate the result is doubtful.

The U. S. Steamer *Resaca* arrrived at this port on Monday, making the trip from Sitka in eight days. She brought the family of Prince Maksoutoff, the late Governor of Russian America, who are *en route* for St Petersburg.

Ned. Buntline is reported to be about to come from New York to California as a temperance lecturer. Unless he has changed since we saw him a few years since he will do the cause no good.

A paper mill costing $300,000 is to be built on Truckee River. Clear water and proximity to the Central Railway make the location desirable.

The wheat crops in Lake, Napa and other counties in the northern part of the State have been injured by the snow and freezing weather.

Capt. Winsor of the *Intrepid* has sued the *Bulletin* for $50,000 damages on the charge of publishing a very libelous sensation article.

Washoe Lake is frozen hard enough to allow heavily loaded quartz teams to cross it. A foot of light snow prevents skating.

Of the seventy-one deaths in this city last week, sixteen were heart disease, apoplexy, and convulsions — all sudden.

Brigham Young is a widower to a considerable extent — having lost five wives the present winter.

Herman Robitscheck has been admitted to bail in the sum of $20,000.

The navigation of the Columbia River is still obstructed by ice.

TELEGRAPHIC SUMMARY.

Political.—Congress is chiefly occupied in discussing the Reconstruction Bill and the bill to repeal the cotton tax. No final action has been taken.....Poverty and famine even threaten a large section of the Southern States.....J. Ross Browne is nominated and confirmed Minister to China. ....Gen. Banks and other Congressmen favor the purchase of Cuba if it can be had for $1,000,000.

Miscellaneous.—Two heavy fires at Chicago. The Young Men's Christian Association building, costing $170,000; and seventeen of the largest business buildings in the city, mostly on Lake Street. Loss $2,500,000. Insured partially.....The Albany Academy of Music was burned on the 30th ult.

Foreign.—Santa Anna, whose ambition defies age, and who has been shot and buried a dozen times, has been ordered to leave Cuba....Great distress prevails among the poor in London....Manufactures are paralyzed in France, and laborers are suffering for food....George Francis Train is addressing Irish crowds at Cork.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, January 29.

Flour—We note a fair demand at full figures. Stocks of Oregon have been much reduced. We quote city mills as follows: Superfine, hf sks, ₱ 196 lbs, $6 75@7 00; do qr sks, $7 00@7 25; Extra, hf sks, $7 50@7 75; do qr sks, $7 75@8 00.

Wheat—Sales include 300 sks Santa Clara, at the cars, $2 70; 500 sks choice Bay, $2 70; 600 sks prime milling, full figure; 2,000 sks Santa Clara, $2 70. We quote the market firm at $2 65@2 75 ₱ 100 lbs, the outside figure for extra choice. At the close, 3,400 sks good shipping, private.

Barley—Sales of 400 sks brewing, $1 77½. The range for feed and brewing is $1 65@1 75. Choice Chevalier is offered at $1 85, with $1 80 bid. At the close, 3,400 sks choice Chevalier, in two lots, at $1 90 ₱ 100 lbs.

Oats—In fair demand at $1 75@$1 85 ₱ 100 lbs for light to choice.

Potatoes—Sales include 800 sks choice Bodega in three lots, $1 25; 300 sks Pigeon Point, $1 50; 200 sks Humboldt $1 50 ₱ 100 lbs.

Corn—Continues scarce. There is no White to be had at any price. Good to choice Yellow commands $2 30@2 37½ ₱ 100 lbs.

Rye—Is still dull of sale at $1 75@2 00 ₱ 100 lbs as nominal quotations.

Buckwheat—We note a slight decline, the market being quoted nominal at $1 75@2 00 ₱ 100 lbs.

Onions—Very few in market; a small lot of choice Yellow sold this morning at 7½c; quotable at 7@8c ₱ lb.

Beans—Market quite firm at 3½@4c for Bayo, 4c for Butter, Pea, and small White, 2½@2½c for Pink, and 2@2¼c ₱ lb for Red.

Peas—Are jobbing at 2@2½c ₱ lb.

Bran—Sells at $23@25 ₱ ton, according to quantity.

Middlings—Feed descriptions, $40; Shorts, $35 ₱ ton.

Oil Cake Meal—The mill price is $30 ₱ ton.

Hay—No sales to report; quotations remain steady at $18@23 ₱ ton for fair to choice.

Dairy Products—The inclement weather of late has restricted supplies of all kinds. Choice roll Butter is quoted at 45@50c; Cheese 20@22½c, with 25c ₱ lb as an extreme figure; Eggs, 60@65c ₱ doz.

Poultry—Dressed Turkeys sold yesterday at 18@20c; live Turkeys are to-day quoted at 16@18c ₱ lb; Hens and Roosters $7@8 50, the latter an outside figure; Ducks $5 50@7 00 ₱ doz; Geese $3@3 50 ₱ pair.

Provisions—California smoked Bacon 13@13½c ₱ lb; Oregon do 12@12½c; Hams 13½@14c; California and Eastern Lard 11½@13c ₱ lb, the latter price for small cans.

Wool—Market quiet and prices nominal—say 11½@12c for clean fall, and 15@16½c ₱ lb for clean spring.

Hides—Sales since last Wednesday of 600 California dry, 13⅜@14½c, according to selection.

Tallow—Sales for the last ten days foot up 130,000 lbs good Beef, for local consumption, 7½c, quotable as to range at 7¼@7½c ₱ lb.

San Francisco Cattle Market.

Wednesday, January 29.

We have but little change to note in prices this week.

We quote the slaughterers' prices as follows:

Beef—American, 1st quality, 10@11½c ₱ lb; Spanish, 1st quality, 9@10c; do 2d quality, 8@9c; do 3d quality, 7@8c.

Veal—7@11c ₱ lb.

Mutton—9@10c ₱ lb.

Lamb—9@11c ₱ lb.

Pork—Undressed, 6@6½c; dressed, 9c.

NOTES ON

CURRENT TOPICS.

Action upon the bill before the Legislature respecting capital punishment has been postponed, that the members might have opportunity to learn more fully what is the sentiment of the people on the subject. After all that has been said and written on both sides of this question within the past few years, while the older States were deciding it in the form of the law they should adopt, there seems to be little necessity for argument on the abstract points involved. They have been ably discussed, and the discussion is accessible, and in our view, it is conclusive in favor of capital punishment. But the logic of experience is more important, in the present state of the case, than that upon the abstract merits of the question. What says the history of those States that have substituted some other penalty for this which has always had opponents? In several instances the substitute has been repealed. In others, the popular judgment has been reversed. And, so far as we know, the conviction is becoming more general, and more confirmed, that life is in less danger when death is before the eyes of those who are tempted to destroy it. Among a population composed as is ours in California, there can hardly be a doubt that crime would increase most fearfully were men to understand that imprisonment, with the possibility, if not the probability, of escape or pardon after a few years, is all they will suffer if they commit murder. The risk is too great for any experiments now.

About nothing concerning which they are so much interested do Christian people allow themselves to be so ignorant as respecting the details of what is being done by our missionaries among the heathen. Yet nothing connected with passing history, all things considered, is more worthy of careful note. The mere statement of difficulties surmounted, of enterprises commenced, of prejudices removed, of schools established, of churches formed, and the numbers converted and educated, and prepared for Christian work among their countrymen through the various missionary agencies, would be news, and would be startling, as well as encouraging, to most who think themselves quite intelligent in respect to the progress of the Gospel. These remarks are suggested by the perusal of reports recently sent us of Christian Hospitals located in Pekin and Canton, China, the contents of which much surprised and delighted us. The Christian gentlemen from England and America who have these Hospitals in charge have been able to conduct them so well, and to effect such cures, both by surgery and medicine, that the Chinese confess their superiority to themselves. This alone is a great triumph for Christianity, which has the credit of such superior skill. But much more is gained because of the door which is opened for direct religious instruction thus emphasized, for these Hospitals are devoted to the cure of souls as well as bodies, and no doubt one of the most effective reasons for overcoming the prejudice, and compelling the respect of those people, has been the success of these institutions.

The dispatch that the President has presented an ultimatum to the British Government respecting the Alabama claims, with a threat of war if not accepted, took all very much by surprise. We were inclined at first to think it a *canard*, but there seems to be no opportunity for such a judgment, and it is certainly difficult to comprehend what new aspect of the case could have wrought so powerfully on the President that he felt constrained to take the position assumed by him. War is sometimes a necessity, as we have had occasion to know; and Great Brtiain has had occasion to know that when it is a necessity, we shall not hesitate to accept it. But we are not now in a condition to be eager in the discovery of what may be so interpreted, and delay even if it must come at last, would be of great advantage to our nation. Our great debt, and the still unsettled affairs of our country, and the approach of the general election which always sufficiently disturbs the people, suggest the wisdom of prudence as to our relations with foreign powers. Long-suffering is not synonymous with surrender, nor is discretion the want of valor. Let us have no war, if it can be honorably avoided. If we must have it, let us choose our own time when this is possible.

Lectures upon themes of general interest and profit seem to be unpopular among our people. Why this is so can hardly be understood, for there is no more pleasing mode of gaining knowledge of such indefinite character as is thus communicated, and there is no region, the population of which would seem more likely to regard it with favor. The manner in which lecturing has degenerated in the older States, until now it is only made a means of amusement, may have had some influence in creating the dislike for lectures apparent among us, and were this the legitimate result of the system none would condemn it more earnestly than we. But it seems probable now that there will be radical reform in this respect at the East, and able lecturers will again be permitted to furnish the public what may be of real value, in this very agreeable form. Why may we not welcome a like improvement, and even offer inducements for the ablest men to give us on this Coast the benefit of their researches? Associations, having for their object the culture of their members, might be formed in many parts of the State, which could elevate the public taste in this regard, and make good lectures useful and popular.

Accounts from all parts of the country represent this as a winter remarkable for severe storms and cold. They also tell us of unusual electrical phenomena and commotions in nature — unusual in the manner and violence of their manifestation, and in the regions in which they are known. May not these facts have some relation to each other? May not scientific research yet define more accurately the influence of electricity, positive and negative, upon earth and air, by which much of the mystery and apparent lawlessness of nature, as now comprehended, may be exp'ained? There is certainly a wide field within which science may yet benefit men and honor God.

The British police in Ireland arrested George F. Train while on the steamer *Scotia*, because of the sentiments he had often expressed in this country respecting the Fenians and the Government of Great Britain. By the intervention of Minister Adams he was released, and has since prosecuted the Government for unjust imprisonment, claiming large damages. We have little sympathy with Mr. Train, but the fact indicates a fever in the English blood just now that does not generally attend a consciousness of full strength, while it shows a readiness to correct acts of manifest injustice we are glad to see.

Peter Bayne, one of the finest essay writers of England, has written a long article on the "*Moral Beauty* of the Life of Rev. Dr. James Hamilton, of London." This moral beauty he characterizes in this language, which is as unique as it is forcible: "He has left no heavenlier human soul behind him. He had more of the Christ in him than any man we ever knew. Without the slightest effort, without a trace of graciosity in his demeanor, or of sentimentality in his speech, from the thorough interpenetration of his nature by Christian love, he won the affection of every one into whose presence he came. The fine, full harmony of his being was irresistibly felt; it beamed from his eye; it gave cordiality to his shake of the hand; it thrilled in deep, melodious tones from his voice. We have been much struck with the illustration of this fact, which has come within our personal observation. When Dr. Hamilton mingled in any gathering of men, in room, in lecture-room, in church, though he might say little or nothing, people were somehow impressed by him, and said to each other, 'What a loveable man that is!' He was a living epistle of Christ, written in characters so clear and so beautiful that it was impossible not to read it."

The *Banner of Progress*, published in this city, does not at all like the article in our first number, on

Demonology. It has had quite long replies in its last two numbers on the subject. In its last number it falls away from all attempt at argumentation or reasonable reply, and becomes personally severe. Its main aim is to identify and characterize the author of that communication. But what has the supposed discovery of the author to do with the *telling points* which the article itself has made against the truth of Modern Spiritism? It matters not who wrote "Demonology," if the paper shows, as it does, that Spiritism is unworthy of confidence or belief.

Religious Intelligence.

PACIFIC COAST.

Change of Time.—Unforeseen circumstances render it impossible to hold the Union Convention on the 12th, as announced in the call published last week. We regret this, as any such change is always attended with loss of interest. The time cannot now be stated, but we are requested to invite all who are interested in the subject to meet in the pastor's study of the First Church in this city, on Monday, the 10th of February, at 11 o'clock, A.M., to confer respecting the matter and make full arrangements for the Convention.

Revival in Stockton.

A revival meeting conducted by Rev. J. W. Ross, of Sacramento, is now in progress in this city. The Congregational, German Methodist, Episcopal, and Presbyterian churches are united in the services which are held in the First Presbyterian Church. The attendance is very large, many going away for want of room to accommodate them. The interest is unusual. Forty have already been hopefully converted, and many more are anxiously seeking the Savior. The tone of piety in the churches was never more cordial and harmonious. Many members of the Episcopal church are interested workers in the meetings, and give them their hearty support.

It is the unanimous wish of all engaged in the revival that Brother Ross remain for several weeks. His congregation (Sixth Street Methodist Episcopal of Sacramento) have generously given him up for a few days, but it is the heartfelt prayer of those with whom he is now laboring that he may be permitted a much longer leave of absence from his charge. The Lord has wonderfully blessed his work in this city, and present indications point to a much wider extension of his influence.

The revival meeting conducted by Rev. Jacob Knapp, at the Baptist church in this city, still continues in interest, and many have been led to Jesus. The number of converts is not known, but is quite large. Will not our Christian friends pray for Stockton, that multitudes here may learn the truth as it is in Christ? Iota.

Oakland Presbyterian Church.—There were ten added to the membership of this church at its communion service last Sabbath. At that time a father brought forward for baptism his five children, recently made motherless. Rev. Mr. Hamilton announced a course of sermons for Sabbath evenings, on India. He contemplates a similar course on China. His aim is to show the history, workings, and results of modern missions, and awaken among his people a more intelligent and earnest interest in the cause of missions itself.

Placerville.—On Sunday, January 19, Rev. C. C. Wallace, pastor of the Presbyterian Church for four years past, tendered his resignation, preparatory to making a visit to the East. The congregation passed unanimously a highly complimentary resolution, expressing their deep regret at the severance of a pastoral relation which has been so fruitful of blessings to the church and people, and tendering thanks for his faithful and judicious labors.

Santa Cruz.—On Sunday last the "Church of the Unity," erected recently in Santa Cruz, held its introductory exercises, and henceforth will hold religious services in the forenoon and evening of each Sunday. The society is composed of persons of "liberal views."

Rev. Mr. Knapp, who has been actively laboring in the First Baptist Church at Stockton, has returned to this city, and will occupy the First Baptist Church.

Arcata.—The Ladies' Sewing Circle of the Presbyterian church realized $664 at their late Christmas Festival.

Prof. Van Dorn, late of Visalia, and formerly of Westminster College, Mo., is about starting a High School, with encouraging prospects, at Watsonville.

Stockton.—Tuesday of this week was observed as a day of fasting and prayer by the members of the Presbyterian, Methodist, and Congregational churches of Stockton.

Napa.—Revival meetings are in progress at the Methodist church, and the ministers and members of both the Methodist and Presbyterian churches are uniting their efforts.

Rev. John Newton, member of the Presbytery of Benicia, now laboring at Knox Hill, West Florida, intends to return to California in the spring.

Paying for the Privilege of Preaching.

A Presbyterian minister in one of the outposts of Oregon recently made the following remarks to his congregation: "I am paying three hundred dollars per year for the privilege of preaching the Gospel in this valley. I came here by invitation — also by the appointment of Presbytery. I receive two hundred and ninety dollars from the Board of Domestic Missions, with the expectation of receiving two hundred dollars on this field of labor. But my expectation has not been realized. I have received almost nothing from the congregation. I have fallen four hundred dollars in debt. Now, as an honest man, I must and *will* pay my debts; consequently, as I cannot get a support here, I must of necessity go where I can."

EASTERN.

Presbyterians are alive in Indianapolis. There are now seven Presbyterian churches in that city. Three have lately been organized — two Old School and one New School. One of those lately organized is called the Fifth Presbyterian Church. The pastor is W. B. Chamberlin, of the last graduating class of the Presbyterian Theological Seminary of the Northwest. The other Old School lately organized has for its pastor Rev. Charles Howard, of the same class.

Westminster Church, Detroit.—The Old School Presbyterian church in Detroit has been recently enlarged and much improved, at an expense of $17,000. The completed edifice was, on the 8th inst., dedicated to the worship of God, in which the services were conducted by the pastor, Rev. William E. McLaren, assisted by his father, Rev. Dr. J. F. McLaren. The attendance is large, and the accessions to its membership highly encouraging.

A Layman's Call.—The Philadelphia *Presbyterian* proposes that each Presbyterian church in that city shall annually elect a fixed number of delegates, who shall form an association, having a charter and the necessary officers to carry out the following objects: 1. To promote the greater usefulness of the laity. 2. To carry on mission work in the city. 3. To promote a closer intimacy between Christians of our various churches.

Rev. Henry Harbaugh, D. D., died recently at Mercersburg, Franklin county, Pa., age fifty years. Dr. Harbaugh, at the time of his decease, was Professor in the German Reform Theological Seminary at that place, and Editor of the Mercersburg *Review*, a theological quarterly. To the religious world he was favorably known as an author. His series of works on "Heaven," his "Birds of the Bible," "True Glory of Woman," and others, enjoyed a popular circulation, running through many editions.

First Church, Philadelphia.—At a meeting of the congregation, held December 9th, a unanimous call for the pastoral services of Herrick Johnson, D.D., was made out, at a liberal salary. It is earnestly hoped that Dr. Johnson may see his way clear to accept the call, especially as the First Church are prepared to wait until he has fully tested the effects of the Lake Superior climate upon the health of his wife.

At the Fifth Avenue Presbyterian Church, Rev. Dr. John Hall, pastor, one Sabbath afternoon recently, twenty-five were admitted to the church — sixteen on profession. The afternoon was devoted to the communion service. The whole lower floor was filled with the communicants, and the gallery with those who were not members.

Rev. Dr. Henry Darling, formerly pastor of the Clinton Street Presbyterian Church, Philadelphia, and at present of Albany, N. Y., has been appointed Secretary of the Education Committee of the Presbyterian Church, (N. S.) in place of the late Rev. Dr. Thornton A. Mills.

Rev. J. S. Jenkins, of the Congregational church at Amherst, has had a unanimous and earnest call from the First Congregational Society of Cincinnati, late Rev. Henry M. Storrs', with double the salary he has at Amherst; but he remains at the latter place.

Henry M. Storrs, D.D., late of Cincinnati, was installed pastor of the South Congregational Church of Brooklyn on Monday evening, December 25th. Sermon by Rev. R. S. Storrs, jr., D.D.

FOREIGN.

Austria.—The Emperór has addressed an autograph letter to the Christian prelates, declaring that under no possible circumstances will he commit himself to any formal act which has not previously received the sanction of his constitutional advisers, at the head of whom happens to stand a Protestant, in the person of Herr Von Beust. The letter rings the knell of ecclesiastical and political despotism.

The Austrian Legislature have passed a bill making the ceremony of marriage independent of any church organization. Mixed unions between Christians of various sects are to be allowed unreservedly. If a priest refuses to celebrate a mixed marriage a civil marriage is valid.

An order has been issued abolishing the obligation hitherto imposed upon soldiers in the Austrian army, when on duty, of rendering military honors to the Holy Sacrament.

Prussia.—The King of Prussia has given assurance to the Protestants of his new dominions that the allegiance they now owe to him shall not in any way affect their ecclesiastical relations. The Lutheran churches in the annexed provinces are not to be compelled to enter into union with the United or National Protestant Church of Prussia, but are to maintain their present independence.

The Pulpit in Germany.—The German pulpit could scarcely have less influence than it has. Those who visit the services are rarely affected, save for the moment, and the vast majority of the population

never enters a church, save possibly at the principal festivals, three or four times a year. For example, Hamburg, with its 200,000 inhabitants, sends no more than 5,000 to church on Sunday; Stettin, with 60,000, no more than 2,000; Berlin, with 630,000, no more than 20,000. Personally, too, the clergy have little or no influence in any direction, save as far as their official position gives them power.—*English Independent.*

ENGLAND.—Six hundred gentlemen, from various parts of Great Britain, met in London, November 26th and 27th, under the auspices of the Church Association, to take measures for the repression of ritualism and Romanizing tendencies. It was resolved to raise £50,000 to resist these tendencies in the courts.

The English Bible Society, in sixty years, has distributed some 53,000,000 copies of the Scriptures. An ingenious person has calculated that at the foregoing rate it will be 1140 years before every member of the human race will have received a Bible, and that it will cost £120,000,000.

AFFAIRS IN CRETE. The accounts from Crete are of a stirring character. The Turks at Dialiscari had fired upon a company of five hundred women and children, who were on the eve of embarking for Greece. A number of them were killed, and those who escaped were picked up by the commander of a Russian man-of-war, and safely landed at the Piræus. All the Christian powers, excepting the United States and Great Britain, unite in placing their ships at the disposal of those who wish to escape from Crete to Greece.

The Reformed religion is making rapid progress in Algiers. The work is almost entirely among the Spanish settlers.

CONTRIBUTIONS.

The Violated Pledge of Love.

"And when he had dipped the sop, he gave it to Judas Iscariot, the son of Simon."

A sop was a small piece of bread dipped in wine, and presented to a guest in token of offered friendship and love.

Judas had already the traitor's fee in his possession, having contracted to betray his Lord.

Yet it were impossible that he was not at least somewhat affected by the exceedingly tender discourse and wonderfully sweet manner of our Lord at this last pascal supper and first holy communion.

While thus affected, the Master informs him by this offer of the sop, that he is aware of his designed betrayal, yet that he is ready still to forgive all and be his loving friend.

He well knew its meaning, and he accepted the offered boon, it may be, almost sincerely — perhaps half resolved to return the silver and annul his wicked contract. But after the sop, Satan came with fresh power over his corrupt heart. The thirty pieces of silver were greatly magnified, and he left the little company and went forth into that cold, dark night which supplied fit surroundings for the deed he contemplated.

Now, lest after all his heart should fail him, he hurried up his band of men, his officers, and lanterns, and torches, and weapons. Away he hied to where he knew Jesus, in his present troubled, yet peculiarly devout and heavenly frame, was sure to go to pray. There he met him, and still feigning an honest acceptance of the sop and its offered love, said, "Hail Master!" and kissed him.

How dreadful such wickedness! But alas! are there not some now who receive from Jesus the morsel of bread and wine, the emblem still of offered and accepted love, only half resolved to turn away from sin, from unrighteous gain, and who go out immediately from their Savior's presence into the dark, cold world, to betray and dishonor Him by wicked ways, and for far less than thirty pieces of silver?

"O, that the Lord would guide my ways
To keep His statutes still;
O, that my God would grant me grace
To know and do his will."

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.
☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.
The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.
For Terms and further particulars, address

REV. P. V. VEEDER.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.
The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.
Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.
In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.
For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.
Further particulars may be obtained by addressing the Principal, at Oakland.

PRESBYTERIAN UNION.

We have received a number of communications on this subject, which is now occupying so much space in our papers, so much time in conventions, and so much thought in all branches of the Presbyterian family. We should be glad to publish all these articles, were this possible, for the interest manifested is not greater than the subject fully warrants, and nothing proper to be said or done should be omitted that may have influence in hastening a consummation which all seem devoutly to wish, though all do not see how it can be effected in the present condition of the churches. While it was regarded, for the most part, as a matter of negotiation and compromise, we confess that there seemed to be little prospect of organic union. This cannot be accomplished by those agencies which work only on the external. But now an element is general in its influence from which there is everything to hope, unless it shall be stifled. The spirit of Christian love and of duty to our common Head is apparent in newspaper articles, and made especially prominent in the great meetings which have been held at the the East, which is likely to melt down the obstacles that logic and schemes of policy could not affect. There is much opposition in some quarters to the word *fusion*, as expressive of the result should all the parts of our Church become one; but we think it is the word of all others that should be illustrated in the union. We must be *fused* together or we shall have no lasting organization. The process most to be desired is *melting*, by which our hearts shall be made to flow in one, and our chief anxiety shall be that God may be honored, and the difficulties grow small that stand in the way of this end. We agree with one of our correspondents from Nevada, who writes:

"It is evident that we have reached a point from which we may not recede, at which we may not stop. Does not the Providence of God urge us to move forward to the consummation of this grand result? Is not the conviction general among us that we could do more to advance the Redeemer's Kingdom if we were united, than as we now are? If so, can we sincerely pray the Lord to send forth more laborers when we, by uniting, might greatly increase the efficiency of those already in the field, and fail to do it?

"It would seem, from the sentiments expressed in the union meetings, and in various other ways, that a large part of the *laity* are not merely willing, but anxious for reunion. We think there are good reasons why the laity are quite as likely to be correct in their feelings and judgment on this subject as the ministry. It is probably safe to affirm that if we do not come together, the responsibility of the failure will rest upon the ministry. My brethren, in view of the broad fields already white unto the harvest, to be gathered soon, or to perish forever, are we prepared to assume this responsibility?"

Another, whose entire communication has unusual interest, regards the subject in the light of God's Providence, and after showing, from the votes of the Presbyteries, that those who know most by experience respecting the evils of division, are largely in favor of union, he writes:

"Does not the voice of our Captain speak plainly to the Church on this subject in the fact that nearly the whole world is open now to the Gospel?

"The brightness of Christ's coming and the glory of His power will easily subdue His widely scattered foes unto Himself.

"Why is it that all the powers opposed to the religion of Jesus are either crumbling or yielding to the pressure of the Gospel for admittance? Slavery, serfdom, and tyranny of all kinds and everywhere, feel this pressure. God is rapidly removing every power that stands between himself and the individual man.

"At the present rate of revolution in that direction, very soon indeed will every man in this world stand face to face with his Maker. There will be no tyrant or tyrant laws, no driver's whip, no priestly terror, but alone he must stand, with only his conscience, his sins, his Maker, his Savior.

"Why is it that 'the sun never sets on the banner of Protestant England?' Our own nation, too, has spread across our mighty continent, and has direct contact with the most powerful and populous heathen nations of the world.

"Why then is it that, just at this juncture, there is such a wonderful, such an unprecedented struggle in the Church of God to wheel her armies into solid phalanx?

"Surely, the tread of this mighty host is the tread of the Almighty, or the hearts of very many of His elect fail to interpret the sound aright.

"'Can ye not discern the signs of the times?' Let those who oppose take heed!

"What praying *for this object*, in our Conventions, in our Synods, in our Presbyteries, and in the closet! Our great Captain is the leader in this prayer, 'That they all may be one.' I once heard the good Dr. Swift, of Alleghany City, remark: 'Brethren, I never fight men who fight on their knees. Better be a Gallio, or a Sosthenes, than a Jew, or a Greek, in such a controversy.'"

There is much ground for hope when sentiments like these find general expression. They will have their effect on the Joint Committee in preparing their report to the Assemblies, and we are unwilling to doubt that as soon as the necessary arrangements can be completed, we shall be one in organization, as we seem now to be so nearly one in spirit.

THE PUBLIC SCHOOLS.

The Board of Education have "taken a new start." Two weeks ago they resolved to take under their fostering care a school which was avowedly sectarian, and with such arrangements as virtually to preserve its character in this respect. At the last meeting they not only rescinded their former resolution, but adopted another, providing for a committee to visit and examine thoroughly all the schools in the Department, for the purpose of ascertaining whether or not there is any sectarianism taught in any of them. They even went further. They resolved that the school-houses should hereafter not be used for any purposes but those specified by law. This closes them against all Sunday Schools, debating societies, religious services, and everything else over which the Board has not full and exclusive control, so that, with the measures it may be supposed they will adopt, our schools will soon be expurgated from all leaven of sectarianism, and assume that character which will make them unexceptionable to any one, no matter what may be the shade of his religious belief.

This is all very well, and would elicit our unhesitating praise, were it not that the temper manifested in the movement is such as to give us some unpleasant doubts as to the disposition of its authors. A proposition is made by a Catholic priest, to the Board of Education to take charge of and pay the expenses of a school which he has gathered together, and which has heretofore been strictly and confessedly a Roman Catholic institution, the privilege of imparting religious instruction to the pupils being retained by the holy Father himself. This proposition is promptly accepted, but the people, or some of them at least, on learning of it, enter a protest, and at the next meeting of the Board the action is reversed, on the ground, as is alleged, of the complaints made against it. Then follows immediately the order to shut out the Sunday Schools; and then, prefaced by a speech concerning the rights of the Catholics, comes a resolution for the Sectarian Investigation Committee before referred to.

The movement looks too much as if prompted by a spirit of revenge, or a determination to compel those who oppose placing our public institutions, or any portion of them, in the hands, to any extent, of any religious party or sect, to yield to the wishes of themselves and of the denomination they appear to represent. However, let the investigation proceed; and let us see what definition the Committee will put upon the word "sectarian" in their instructions. Such inquiry, if properly conducted, will undoubtedly result in good. More of the same sort, in other directions, would be beneficial. It would bring to light facts which the people ought to know.

SPECULATIVE TRUTH—THE ORDER OF NATURE.

That keen logician and subtle thinker, Henry L. Mansell, in one of his Bampton lectures on "The Limits of Religious Thought," sets forth the doctrine that right action, and not accurate knowledge, is man's destiny and highest duty in this life, with greater force and clearness than we remember to have seen it elsewhere stated. In the present condition of religious thought throughout the world, and in the attitude assumed by so many of the devotees of physical science, with reference to theology, there is much that is calculated to impart fresh value and significance to every new illustration of this doctrine. There never was a time, at least in our own country, when the general tone of the secular press was so skeptical and so flippantly irreverent as the present. The signal triumphs of the human intellect, the grand march of physical science, and the boldness of philosophical speculation, that have characterized the age in which we live, have naturally dazzled the popular mind, and tended to fortify that pride of intellect that prompts us to reject all beliefs not founded upon principles that satisfy the demands of the speculative reason. Minds of more activity than depth, and not much addicted to profound thought, constitute the majority of those who are immediately influential in shaping popular opinion. Great thinkers are generally incapacitated by their intellectual constitution from acting directly upon the popular mind; like Kant, Bentham, and Coleridge, they must raise up disciples and interpreters who, after imbibing their ideas and becoming infused with their spirit, can act as middle-men between them and the general public. At the present day, and in the United States, a majority of the intellectual middlemen who directly operate upon popular thought through the secular press, are unfortunately themselves so thoroughly imbued with the tendency of the age to deify reason and to exaggerate the powers of the human intellect, of the just limits of which they seem to have no philosophical conception, that the general tenor and effect of their teachings is to revive in a more pretentious shape the old type of shallow infidelity that refused to believe what it could not understand.

The distinction between "speculative and regulative truths" no matter in what form it is stated, is more or less repugnant to the pride of intellect; but we fear it is too often set forth in the pulpit, and in a certain class of religious publications, in such a way as to make it unnecessarily offensive. Mr.

Mansell, translating the language of theology into that of philosophy, insists that the distinction is one that follows inevitably from the abandonment of the notion that the human mind is capable of receiving absolute truth. If the popular teachers who talk so much about what is reasonable and unreasonable, and make such a parade of logical forms, would reflect upon the reason itself and its necessary limits; if they would consider that our highest attainable truths are found to be relative, not absolute, and that they "bear marks of subordination to something higher and unattainable," they might perhaps be led to perceive that if men are to act at all, or to believe in anything, such action and belief must frequently be "irrational" in the sense of lacking full justification by the speculative reason. For the distinction between speculative and regulative truth is not confined to religious subjects. "It is shown," says Mansell, "that in all departments of knowledge alike — in the laws of thought, in the movement of the limbs, in the perception of the senses — the truths which guide our practice cannot be reduced to principles which satisfy our reason, and that if religious thought is placed under the same restrictions, this is but in strict analogy to the general conditions to which God has subjected man in his search after truth."

The practical inference from the philosophical principle is, that such knowledge of truth as our minds are capable of receiving is not given us to be enjoyed as an intellectual luxury, but to enable us to regulate our actions. If we ambitiously thirst for a knowledge of abstract truth, we may be baffled in the pursuit; but truth enough to suffice for the guidance of life and the performance of duty — truth required for action and use — is at least as attainable in religion as in philosophy.

A very striking and interesting analogy (though a rather remote one) to this doctrine of regulative and speculative truth, is to be found in an idea advanced by Mr. Mozley, another Bampton lecturer, in discussing the question of the absolute and necessary uniformity of the "Order of Nature." This question in regard to the invariable and uninterrupted operation of natural laws, is, in some of its aspects at least, familiar to all intelligent persons at the present day, and its bearings upon religious questions are well understood. The contest between those who insist on the permanence and absolute uniformity of the order of nature as it has become known to us, and those who maintain that that order has at certain times, and for certain purposes been interrupted, of course involves the question of miracles and special providences; and here in fact has generally been the starting point of the discussion. The circumstance of the bearing of the inquiry upon these religious subjects has caused it to assume a more popular character than it would have had as a mere speculative question. In its latter aspect, it engaged the attention of philosophers; but in its former, it possesses the most vital interest for every believer in the Christian miracles and in the Providence of God.

The general grounds of Hume's famous "Argument against Miracles," and of Bishop Watson's reply, are familiar to most educated persons. But Mr. Mozley handles the question with much greater originality and boldness than either the learned Bishop or any other writer with whom we are acquainted who has entered into the discussion. In fact, the Bampton lecturer treats the "Argument from Experience," which Hume deemed wholly impregnable, and which so many of the savants and men of physical science regard it as heresy to question, with utter disdain, when presented as a philosophical foundation for the belief in "The Order of Nature." The idea of Natural Law, of the inexorable and universal reign of a fixed order of things that is never interrupted, is, in the language of the Duke of Argyll, in his chapter on "The Supernatural," a product of that immense development of the physical sciences which is characteristic of our time. We cannot read a periodical, or go into a lecture-room, without hearing it expressed. Sometimes, but rarely, it is stated with accuracy and with due recognition of the limits within which law can be said to comprehend the phenomena of the world. But generally it is stated in language vague and hollow, covering inaccurate conceptions, and confounding under common forms of expression, ideas which are essentially distinct." There are smatterers in science, and some who are more than smatterers, who discourse volubly of the inviolability of Natural Law, when they mean by it merely an observed order of facts with regard to natural phenomena, and who seem to think that the assortment and arrangement of facts into a system is a real explanation of them. To this class of minds Mr. Mozley's line of argument must seem startling indeed. He insists that an observed order of facts proves nothing philosophically; that experience can only deal with the past, and that the moment we attempt to project it into the future, or a single step beyond the point it has at any moment reached, we are condemned by reason. Thus, when it is urged that miracles are incredible because "contrary to the order of nature," the Bampton lecturer replies: "Our belief in this order is simply *a belief that the future will be like the past;* and for this belief there is not the slightest rational basis." He admits its existence, but only as an unreasoning instinct, insisting that we have no evidence that any cause in nature is more permanent than its known effects, no evidence that it will produce other instances additional to those produced already. By way of illustration, he supposes the case of the occurrence of a particular physical phenomenon for the first time. The witnesses of the single occurrence would, he assumes, have but a faint expectation, if any, of its repetition. If it should, however, occur once or twice more, a cessation rather than *another* repetition would, he thinks, seem the most natural event. But let it continue a score, or a hundred times, its recurrence would be expected with confidence; "and after it had occurred every day for years, its occurrence would be a certainty to us, its cessation a marvel." Such are the facts in regard to the effect produced upon the mind by witnessing the regular recurrence of natural phenomena; but what do these facts prove? What ground of *reason* can be assigned for the expectation that the course of nature will continue to be the next moment what it has been up to this moment? Mr. Mozley boldly affirms that no such ground can be assigned. "No reason," he declares, "can be given for this belief. It is without reason. It rests upon no rational ground, and can be traced to no rational principle." Our nature, he tells us, though endowed with reason, contains large "irrational departments," and it is to one of these that the instinctive belief in the order of nature belongs. But this belief, however "irrational," philosophically speaking, is widely diffused — is, in fact, universal. How is this to be explained? Mr. Mozley's answer is, that its purpose is "regulative" and practical, not scientific. This belief, he says, "is necessary, all-important for the purposes of life, but it is solely practical, and possesses no intellectual character. The proper function of the inductive principle, the argument from experience, the belief in the order of nature — by whatever name we designate the same instinct, is to operate as a practical basis for the affairs of life and the carrying on of human society." In short, it is an intelligent, but conservative impulse, by virtue of which we till our fields, provide our winter food and fuel, and adapt ourselves to the expected exigencies of life. "When we analyze this belief," says Mr. Mozley, "in relation to science, as the so-called inductive principle, we find that it is only on an unreasoning impulse applied to a scientifically ascertained fact. Science has led up to the fact; but there it stops, and for the purpose of converting this *fact* into a *law*, a totally unscientific principle comes into play, the same as that which generalizes the commonest observations of nature."

Such is the bold theory of the Bampton lecturer, and it is one that cannot be disproved. But though it may perplex and irritate the materialistic men of science, it is not likely to convince them. Not only is there a class of minds to which the idea of a God outside of nature and above her, prescribing her laws, and at times interfering with them, is utterly repugnant; but there is also a class which seems either unable or unwilling to accept the idea presented in so able and original a manner by the Duke of Argyll in "The Reign of Law," of a supreme personal Intelligence employing natural means to bring about the results and produce the effects which are commonly spoken of as "supernatural," but of which we only know that they are superhuman or supermaterial. There is still another class of minds, certainly not inferior to either of these in intellectual power or training, to which the latter, at least, of these two ideas is congenial and acceptable. It is probable that the differences referred to do not reside altogether in the intellect, and that they cannot be reconciled by any merely logical process.

We call attention to the communication from our Philadelphia correspondent, who will hereafter contribute to our columns regularly. He has long been a writer for the *New York Observer*, having written a series of valuable articles during his residence of two years in Europe. He was for some time a resident of this State, and knowing well our peculiar wants, will be able to write for us intelligently and with adaptation. In a private note to us he expresses what we are glad to know many others feel: "You do not know how my heart rejoices at the starting of a staunch Presbyterian paper on the Pacific side of the world. May the stars shine propitiously on the undertaking, and 'The Occident' (a happy name) prove a right lusty champion for the truth in California. May your sun never set, though in the Occident."

Seeds! Seeds!

FRESH SUPPLIES OF

GARDEN, FLOWER, FRUIT, AND TREE SEEDS!

Received by every steamer. Also,

GRASS AND CLOVER SEEDS,

Of suitable varieties for this climate, comprising, in all the

To be found on this coast. Also,

CRANBERRY VINES.

10,000 Cranberry Vines, in fine condition, and for sale in desired quantities.

Orders, by mail or express, promptly attended to in their turn. Address

GEO. F. SILVESTER, Seedsman,

317 Washington Street, San Francisco.

Correspondence.

Philadelphia, Dec. 18, 1867.

It has occurred to me that your readers may be interested in a more detailed account, from one who was present, of the National Presbyterian Convention held in this city last month. There were 313 delegates, and George H. Stuart, Esq., was unanimously chosen as permanent chairman, and served with zeal, ability, and entire success.

Never in the history of Presbyterianism on this continent had such a gathering been witnessed, or grander objects been achieved. Its influence no man can begin to measure. Never had the writer beheld a scene of greater moral grandeur in an ecclesiastical point of view, or enjoyed so fine an opportunity for hearing the best talent of the whole Presbyterian Church.

The Convention was inaugurated, continued, and closed in the spirit of love and prayer. This was the resistless bulwark of its strength. The work was of God. Opposition seemed impertinent and impossible. The spirit of unity and of brotherly love carried all before it. Men looked on in amazement. It seemed like a kind of ecclesiastical pentecost. All felt that no human power alone could weld together so many hitherto antagonistic parts. The only help must come from God, who alone can turn the hearts of men. Thus deeply sensible of their natural inability and dependence on God, and in firm reliance on Him, men went to work. With what success the history of the Church of Christ will best decide. To His name be the glory.

Six denominations were represented, viz: the Old and New schools, the United Presbyterian, the Reformed Presbyterian, the Reformed (Dutch), and the Cumberland Presbyterian. The latter being anti-Calvinistic, could not vote for the Basis, but they exhibited the most fraternal spirit, sympathized with the movement, and were present out of courtesy to the body that had invited them. It was a spiritual "mount," a real communion of saints below. Heart answered to heart, as face answers to face in a glass, and results were reached beyond all anticipation. The presiding spirit doubtless received much of his zeal and unction from his long and wide experience as President of the U. S. Christian Commission. He declared, "I never knew the value of union until I stood on the battle fields and heard men speaking to those who were standing in their grave-clothes of Jesus and His salvation, and singing together the songs of Zion. Satan, brethren, is marshaling his forces. Christ is calling us to come together."

Hardly any other than a layman of broad catholic views, of warm heart, of consummate tact, and of courage, could have held successfully so trying a position. But Providence put the right man in the right place. Whenever questions of moment arose for deliberation and action, the members were summoned to engage in silent prayer for the space of two or three minutes, to be followed by a public petition from some one designated for the special purpose. Prayer was uttered by the President, who vacated the chair for the purpose, when about to select and appoint a committee charged with the momentous work of preparing articles of agreement for the Convention. As you read them in this light, they will perhaps strike you with new force. On completing their task they ascribed their harmony and success to the superintending guidance of the Spirit of God, in direct answer to prayer. Truly, with Him "all things are possible." Ceaseless prayer ascended before the important final "vote by churches on the Basis" was called, and when all was over, God alone received the praise.

But do not think that there was no opposition. This was looked for, since all great issues are born of antagonism. In triumph only does their moral grandeur shine forth. But the opposition here was brief, for men came together, not so much to argue and dispute as to pray for the peace of Jerusalem; not to exhibit their old-time differences, but to ascertain in what they could mutually agree for the furtherance of the Gospel.

The true church universal is a unit. The light of eternity dispels all mere denominational lines, and so does the spirit of an enlightened and progressive Christianity.

Friday morning, toward the close of the usual devotional exercises, unexpectedly appeared the Episcopal Delegation, in a body, from their Convention then in session in Philadelphia, to respond in person to the salutations that had been extended to them through our committee. All the seats and the benches in the aisles of the church (capable, by the way, of accommodating over 1,300 people) were filled as water rushes into a box. It was headed by Bishops McIlvaine and Lee, Rev. Stephen H. Tyng, jr., and Messrs. Conyngham and Brunot, who proceeded to the platform. They were introduced to the audience by Prof. H. B. Smith, of New York, and were cordially welcomed by the President. The addresses of the Bishops were excellent, as were the responses, by the President and Dr. Hodge, of Princeton, who never appeared to greater advantage before the Christian world than in such an assemblage, representing, to use his own words, "about five thousand ministers, an equal number of churches, and over a million of souls, who have been baptized in the name of Jesus Christ." He alluded to the circumstance that Bishop McIlvaine and he were fellow students over fifty years ago in Princeton College, and that they had together passed through the great revival of 1845 in that institution. "I will venture to say," he continued, "in the presence of this audience, that I do not believe, in all that time, that you have preached any one sermon which I would not have rejoiced to have delivered. I feel the same confidence in saying, that I never preached a sermon which you would not have publicly and cordially endorsed. Here we stand, gray-headed, side by side, for the moment the representatives of these two great bodies, feeling for each other the same intimate and cordial love, looking not backwards — not downwards at the grave at our very feet, *but onward to the coming glory!* Brethren, pardon these personal allusions; but is there not something that might be regarded as symbolical on this occasion? Sir, were not your church and ours rocked in the same cradle? Did we not receive the same baptism of the Spirit and of fire? Do they not bear the same testimony to Christ and the Apostles? *There is no more difference between the Thirty-nine Articles and our Confession of Faith than the difference between the parts of one great Cathedral Anthem rising to the skies!*"

During the afternoon session Dr. Hodge spoke eloquently on the question concerning Prof. Smith's amendment to the second article of the Basis of Union. He expressed surprise at the overwhelming sentiment manifested for an organic union during all the meetings; disclaimed the charge that the Old School demanded assent to philosophical theories and theological speculations before they could agree to affiliate with the New School brethren. He affirmed that all that could reasonably be required of any body was a simple assent to the Confession of Faith, without asking further questions. Then turning around to Dr. Fisher, one of the Vice Presidents of the Convention, who sat behind him, he inquired:

"Is there any metaphysics in this?"

"No," said the gentleman, "I agree to all that."

Then, advancing to him, Dr. Hodge replied, "I give you my hand," amidst thunders of applause from all parts of the house. Thus was exemplified what sort of union may exist between the New and Old School bodies.

It was not until Friday, late at night, that the final vote could be taken on the whole resolutions as amended, when the paper was adopted, together with an "Address to the Churches."

You may be interested to learn that most of the discussions were with our Psalm-singing brethren, four of whom voted together regularly in the negative on many of the proposed resolutions. Finally, by common consent, it was agreed to incorporate the versified Psalms in our republished hymn-books, to be used in the churches as occasion should require.

On the Old School side Rev. Dr. Musgrave did noble work in furtherance of union. His speeches told with homely, convincing effect, and would have suited the young spirit of the church west of the Great Basin. There is nothing contracted in the mind of this sturdy debater, though now much advanced in years.

Of the Reformed Church, Rev. Dr. Wylie proved a most eloquent champion of the advance movement, and made an exhaustive speech on the use of Psalmody, his arguments being drawn from the history of this branch of the church.

The vote was taken by churches, the various representatives rising. Much merriment occurred whenever the Reformed (Dutch) was named by the Clerk, one delegate only being present, who sat upon the platform as one of the Vice Presidents, behind the Chair. But he always voted with the majority. When, according to rule, the negative was called, the President would look quite around upon the solitary representative of his church, and then formally announce to the house, "Carried unanimously," amid peals of laughter. So, in the kind orderings of Providence, did little things conspire to promote unity and to dispel the demon of discord.

H.

Correspondence from the Capital.

Sacramento, Feb. 3, 1868.

A bill has been introduced into the Senate to regulate the sale of liquor. It provides that the Supervisors of the various Counties shall have power to give or withhold license. It was ordered to engrossment after quite a thorough discussion of its merits. But the opposers of the bill moved a reconsideration of the vote ordering it engrossed, which again opened the question for discussion. Speeches of considerable length and ability were made *pro* and *con*, when the Senate refused to reconsider by a vote of 22 to 10.

Should this become a law, a county with a temperance board of Supervisors could do a great deal towards throttling the monster whose ravages are now wide-spread and fearful. Should they be of a different spirit, they could scarcely give a fuller sweep to the liquor traffic.

One Senator, in the course of his remarks, drew this dark picture:

"I have no hope or expectation that in long years to come, this matter of the sale of spirituous liquor will be controlled by legislation, as it ought to be; but this fact I know, that it is a matter to which I

have given a great deal of attention. I have had a sad experience in this matter of the use of intoxicating drinks, and I will say here that a man cannot go through a city of this State, nor in any of the Western States, and count the houses inhabited for ten years, without finding that every other habitation has sent, within the last ten years, one of its tenants to a drunkard's grave. I know that is so. Statistics will show that fact more strongly than I have stated it. And this particular necessity, that a class of persons should be protected so carefully, who are bringing so much ruin upon the country, seems to me to be out of place. I think something is due to society. Something is due to the young men who are growing up here—and more too than is due to those engaged in this kind of traffic."

In my last letter I said that there were *but few* politicians of either party who did not depend largely upon *free drinks* as an important element of political strength. My assertion was not so sweeping as it appeared in print. There are politicians who scorn such expedients. The present discussion shows that there are temperance men in high places, who begin to measure the magnitude of this gigantic evil.

The Senatorial bribery question has become one of considerable interest since the publication of Gen. Howard's Comedy. The charges are very damaging to some parties indicated in the pamphlet. The Assembly doubted his ability to prove his charges, and again refused to investigate. It stands on its dignity, refusing to condescend to probe what many regard as a festering, serious wound.

As is usual, there is a great deal of special legislating done, that is of interest only to particular localities.

This week will be one of more than ordinary importance and interest to all who love the Sabbath and the highest welfare of the State. Last week a petition was presented from the friends of the Sabbath, signed by more than twenty-four hundred of the best people of the State, who have a right to be heard on the question of repealing all Sunday laws.

The Roman Catholics are earnestly protesting against the repeal of these laws. One of their priests said to me last week, "If these laws are repealed, two hundred members of my congregation will stay away from church." Their hold upon many in their flocks in this country is not very strong, and they are not blind to the interests at stake.

The weather is so bad now it cannot be made worse, and may be improved.

Rev. James S. Todd, a graduate of the last class of Princeton, is one of the new comers to this coast. He is now on a visit to this city, and preached with much acceptance here last Sabbath. He is on his way to Arcata, Humboldt Bay, having been invited to take charge of the church there for a year. We congratulate the people of that church in securing the services of a minister who gives promise of much usefulness among them.

ALPHA.

Correspondence from the Bodega Country.

BLOOMFIELD, Feb. 3d, 1868.

Near the northwest extremity of San Pablo Bay is Petaluma, with a population estimated at over four thousand. It is the natural shipping point and center of trade for a large region of country, and is steadily growing. It has large Congregational, Baptist and Methodist churches, and smaller ones of the Episcopal and Southern Methodist denominations. It has been thought strange by many that a Presbyterian church has never been organized here. But the Congregationalists occupied the ground first, and there has appeared to be no great desire among Presbyterians to crowd upon them, so that they have absorbed the most of the Presbyterian element of the place. A year ago, however, there were about twenty persons who wished to be organized into a Presbyterian church, and perhaps, if the enterprise had been carried forward, others would have been found to join them. They began a prayer-meeting, and kept together for a considerable time; but as no one could be obtained at the time to take charge of the enterprise, the Presbytery thought best not to organize a church. Several of these persons then connected themselves with the Congregational church; others have left the place, and but few are known who yet retain their connection with Presbyterian churches.

TWO ROCKS.

Eight miles west of Petaluma is the Two Rocks church, situated in a beautiful valley. There is no town here, but the country is settled by intelligent farmers, the most of them Presbyterians, or descendants of Presbyterians, who attend quite regularly the church where the Rev. Thomas Frazer, on alternate Sabbaths, holds forth the Word of Life. The church is the fruit of his labors, and is now able to sustain preachiug all the time. This they ought to do, and intend to do before long, thus having a pastor living among them, who can the better attend to all matters relating to the church and the good of the people in general. They appreciate, however, the faithful labors of Mr. Frazer, and do not like to give him up as long as they can have his services, though it be but for half his time.

BLOOMFIELD

Is not as large a town as San Francisco, and is not so important to the country. It has interests, however, that are as dear to it as are those of larger towns to them. It is located in one of the best agricultural portions of the State, about fifteen miles west of Petaluma, and about the same distance south west of Santa Rosa. It is surrounded by hills that are fertile to their very tops, and yield large crops of grain and potatoes.

The subject of railroads is now agitating the minds of the people, and two routes are under consideration; one to connect with a road from Healdsburgh to Vallejo; the other to connect with a road from Healdsburgh to Petaluma. Which of these routes shall be chosen, or whether both shall for the time be rejected, will probably be left to the people to decide by ballot, as bills have been brought before the Legislature, asking that an election may be appointed for the county to determine whether or not it shall be taxed to assist in building the roads. The county would be greatly benefited by a railroad, and it is only a question of time where and how it shall be built.

Rev. Thomas Frazer preached here regularly for a number of years until 1863, when the Presbyterian church was organized by him and given in charge to Rev. W. H. Cain. He was succeeded in August, 1864, by Rev. J. S. Wylie, and measures were taken for building a house of worship. The Methodists commenced about the same time to build for themselves a neat and comfortable house, which they have finished and nearly freed from debt.

The Presbyterian house is much larger, with a stone basement for lecture room and Sabbath School. The superstructure is in imitation of brownstone and has a tall spire. It was inclosed while Mr. Wylie remained.

In February, 1866, Rev. O. Hemstreet succeeded him, and the house was occupied and will soon be completed, without any debt upon it. There has been a constant increase of members, so that though nearly half the original members, and several others, have removed or died, it has now more than double the original number. One was received last Sabbath on profession of faith. There are several other churches in this important part of the State, from which you may hear more at another time.

X. Y. Z.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

LIFE AND LETTERS OF REV. GEORGE W. BETHUNE, D.D. By Rev. A. R. Van Nest, D.D. New York: Sheldon & Co. San Francisco: A. Roman & Co.

We confess to both disappointment and pleasure in reading this memoir, which has been promised for months. In appearance and arrangement it by no means equals our expectation, but the materials were so varied and abundant and rich, that access to them could hardly fail to furnish a delightful view of Dr. Bethune's character and life. Probably no man of the last generation had more versatile talents, more thorough culture, and more appropriate positions in which to make reputation and exert influence, than had he. And there are few who have more distinctly left their impress on their age than has he, from whatever point it be considered. As a preacher he was preëminent, convincing by his logic, thrilling by his appeals, persuading by his exhortations. As a platform orator, when he was really roused and taxed by his theme, or his opponent, he had no superior in this country. As a man in social life he was charming, both by reason of his resources and his nature. In the more intimate relations he sustained towards his friends he was not always without fault, as the memoir illustrates, and as those who knew him best well understood. Yet no one ever had truer friends, nor those more willing to forgive and disregard the peculiarities he could not at all times repress, and no one more intensely loved those who were really admitted to his heart than did Dr. Bethune. The different phases of his character and the chief end of his public career are exhibited in this book, and these are tributes to his greatness and memory from those who were well qualified to judge, which add to its interest. There are many on this coast who knew him in person or by reputation, and they will gladly avail themselves of the opportunity to learn in detail respecting the eminent man whose name was for so many years upon lips that found it difficult to utter anything but praise.

ARCADIA. By Sir Philip Sidney. New York: Hurd & Houghton. San Francisco: H. H. Bancroft & Co.

Hurd & Houghton certainly understand the art of producing beautiful books, and they could hardly have selected one more worthy to be republished with all their art than this celebrated and delightful work of Sir Philip Sidney. The contents are too well known and too highly appreciated to receive the passing commendation of a mere notice, but they will be thought even more attractive in the exquisite guise in which they are here presented, than they were when we used to read them in the homely type and sheepskin binding of former days. It will be well if by the reproduction of the old standard literature in our language in modern and beautiful type, publishers can cause it to be substituted for a large part of the reading accepted as literature in these days. The sign will be hopeful if by such experiments a taste shall be cultivated respecting books, as respecting wine, when it may be truely said, that no one having tasted the old, straightway desireth the new, *for he saith, the old is better.*

THE TURK AND THE GREEK. By S. W. Benjamin. New York: Hurd & Houghton. San Francisco: Bancroft & Co.

Had this volume no other merit than that it appears with its fresh information respecting the regions of the Levant, just when all eyes are turned towards that part of the world with deep interest, it would be welcome. Anything new, at this time concerning the Ottoman Empire, or Greece, or Crete, finds eager readers, and it may be that this fact has prejudiced us in favor of the book, as we have looked through it. Yet we incline to believe it would be read with pleasure, at any time, for the style is easy and inviting, and the descriptions of places and people are very pleasing. The author makes no display of philosophy or predictions, but gives his observations when a traveler through the countries he describes, and one gains a clear and fresh view from his pages, although he may have read a score of ancient and modern works that treat of the same. It is not unlikely that the structure of Southern Europe may be entirely changed within the next few years, and therefore, those who wish to be intelligent should keep themselves versed in the geography and history of passing events.

ORIGIN AND PROGRESS OF MORMONISM. By Pomeroy Tucker. New York: Appleton & Co. San Francisco: Roman & Co. and Bancroft & Co.

It was to be desired that a full revelation of the origin, nature and effects of this great delusion should be given by one familiar with those connected with its inception, and with the means by which it has been promoted. As we read the narratives and statements of Mr. Tucker we are amazed again, as we have often been before, at the susceptibility of many persons to the most bald deception, and we finish the book with a feeling of pity, rather than of anger, for both the deceivers and the dupes. This is the best — probably the fairest — work that has been written respecting the Mormons. It has much interest in itself, and as a history will be authority for those who wish to become acquainted with one of the most remarkable impostures of *modern times.*

THE LIFE AND TEACHINGS OF CONFUCIUS. By James Legge, D.D. Philadelphia: J. B. Lippincott & Co. San Francisco: Bancroft & Co.

Dr. Legge has given us a more extended and elaborate work than was attempted by Mr. Loomis in the book edited by him, and published a few months ago. Still there are features of this volume which render it less popular and perhaps of less value to the mass of readers than that with which we are familiar here. For students, and those who wish to obtain the most accurate and widely reaching information respecting the great Chinese Teacher, there is here a large supply, and more is promised. We are not likely to learn too much about the strange people who have come among us in such numbers, nor shall we find their literature unworthy of our study, though we may smile at some of its sentiments, and reject all its absurdities.

We have received with pleasure,

The Catalogue of Hamilton College, which gives evidence of the increased and increasing prosperity of that excellent institution, which has a number of graduates on this coast.

The New York Teacher and Educational Monthly, a periodical full of valuable suggestions and instruction in the field it occupies.

Our Mutual Friend, a new weekly paper published in this city, of fine appearance and good contents, and devoted, for the most part, to temperance. We have no doubt that it will succeed.

Hunt's Merchants' Magazine, for December, in which several questions of commercial and financial interest are discussed.

The Revolution. A paper edited by Parker Pilsbury and Mrs. Stanton, a sufficient warrant that it will be readable, though one may doubt whether the reading will be very valuable.

Putnam's Magazine for February. The table of contents gives assurance that this is an excellent number.

The North American Review. A Quarterly we always read with interest and profit.

The Law Review, with other good matter, has an excellent article on "Sunday Laws."

The Pacific Medical and Surgical Journal, for February. We are not able to judge on such subjects, but this copy of the *Journal* is said to be of much interest.

The Christian Family Almanac; published by the American Tract Society of New York.

The World Almanac.

The Tribune Almanac.

The Democratic Almanac; all abounding not only in the ordinary calculations, but also in really useful information of many kinds.

EDUCATIONAL.

The Teacher's Office.

The business of the teacher is development, not discovery. From the discoverer in natural philosophy he learns the truths of nature; from the mental philosopher he receives the laws and capacities of mind; and he uses the former to the quickening of the latter. Some student of mind, for example, relates to him the value of a cultivated imagination. "It is not too much to say that there is perhaps no faculty of the mind which, under due cultivation, and within proper bounds, is of more real service to man, or is more worthy of his regard, than this." And he adds the means of culture. "Even more indispensable is the study of nature." Then some student of nature, on his part, relates to the teacher some great fact of creation. Thus, Huyghens: "There may be worlds in the immensity of space whose light, owing to their distance, has not reached our globe, though still destined to come within range of the eye." Or Herschel: "It may more easily be suggested in words than conceived, what variety of illumination two suns — a red and a green, or a yellow and a blue one — must afford to a planet circulating about either; and what charming contrasts and grateful vicissitudes — a red and a green day, for instance, alternating with a white one and with darkness — might arise from the presence or absence of one or the other, or both above the horizon." Thus supplied — with a knowledge of the imagination, for example, by the metaphysician, and with a knowledge of the distance and coloring of the stars by the *savant* — the teacher proceeds to employ the latter in a development of the former. These facts of nature he brings before the pupil's attention, brings within the pupil's understanding, fastens in the pupil's memory, that they may act their part in giving power to the pupil's imagination. This is his proper business, and not discovery.

Acquiring French.

The chamois-hunter leaves his home in the night, that he may reach the high pasture where the chamois feeds in advance of the flocks. Perceiving them he carefully endeavors to mount higher than they, and to approach them under shelter of some rock or ravine. But if the vigilant animal perceives him first, then begins the chase, and the probabilities are that the hunter will become so absorbed in it that he will venture, in pursuit of his game, into places of most imminent peril. The chamois-hunters seldom live to be old.

The mastery of such a language as the French is certainly worthy of early, earnest, and continued effort. But in the pursuit of no knowledge let us forget discretion; and discretion says that we may be borne by our zeal to acquire French into very dangerous quarters. This appeared plainly during the visit of Rachel, the actress, to the United States. The temptation to take a lesson in the elegant utterance of French overcame the reluctance of not a few to patronize even the Stage. Another dangerous direction in which we may turn for the knowledge in question is opened by French literature. The mass of that which is offered hereabout, at least, is either trashy, impure, infidel, or Romanizing. We do well to examine very carefully all French books which are offered to our schools and families. Finally, no amount of acquisition in this direction would repay one for seeking it in the room of an infidel lecturer, or in the aisle of an idolatrous church. The right observance of the Sabbath, and the proper care of our spirits, are duties far before that of mental acquirement and culture.

The Pulse.

Some of our young readers may have received, during the holidays, the gift of a watch. If so, let them use it in timing their pulses. The day may come when they will find a little skill in timing their pulses a very useful thing. In some diseases it is highly important to detect the least approach of fever; and the pulse is a faithful herald. Moreover, in acquiring skill in this direction, we cultivate the sense of touch. This sense, with the doctor and the appraiser of goods, serves a purpose absolutely indispensable; but do we not all at times have to play the doctor and the appraiser? Then you may make this matter of pulse-counting a matter of entertainment. Doctors say the pulse beats quickest while standing; less quick while sitting, and least quick while lying. Try this. They say that it beats slower in the evening than in the morning; and slower before eating than after. Try this, also.

Fit to be Burned.

Our Alaska correspondent speaks of the practice of cremation among the Kolosh tribe. The same practice, we think, might be introduced with happy results into San Francisco. Not that we would apply it to the bodies of the dead, but rather to certain other things, less sacred and more corrupting. We refer to the majority of the wretched patent medicine almanacs with which our thresholds are desecrated in the beginning of the year. The best use to which they can be put is kindling fires; awaiting which service they may be carefully torn in twain as soon as caught, and then consigned to the wood-box. Parents may easily satisfy themselves of the justice of these remarks by glancing within the covers of almost any one of the publications referred to. Good almanacs are published by the different religious societies, and these should grace (as the others disgrace) our tables.

The Napa Female Seminary, under the care of the Misses McDonald, enters upon the year with very encouraging prospects. The buildings are pleasantly located and have an inviting appearance. Accommodations for thirty boarders.

FAMILY READING.

The Reward.

Who, looking backward from his manhood's prime,
Sees not the spectre of his misspent time;
And, through the shade
Of funeral cypress, planted thick behind,
Hears no reproachful whisper on the wind,
From his loved dead?

Who bears no trace of passion's evil force?
Who shuns thy sting, O terrible Remorse?
Who would not cast
Half of his future from him, but to win
Wakeless oblivion for the wrong and sin
Of the sealed Past?

Alas! the evil, which we fain would shun,
We do, and leave the wished-for good undone;
Our strength to-day
Is but to-morrow's weakness, prone to fall;
Poor, blind, unprofitable servants all,
Are we alway.

Yet who, thus looking backward o'er his years,
Feels not his eyelids wet with grateful tears,
If he hath been
Permitted, weak and sinful as he was,
To cheer and aid, in some ennobling cause,
His fellow-men?

If he hath hidden the outcast, or let in
A ray of sunshine to the cell of sin;
If he hath lent
Strength to the weak, and, in an hour of need,
Over the suffering, mindless of his creed
Or hue, hath bent:

He has not lived in vain; and, while he gives
The praise to him in whom he moves and lives,
With thankful heart
He gazes backward, and with hope before,
Knowing that from his works he never more
Can henceforth part.

J. G. WHITTIER.

George Muller.

George Muller, the renowned founder of the Orphan Establishment, Bristol, England, has received and expended $2,750,000, every penny of which was sent voluntarily, without solicitation. He has twelve hundred orphan children under his charge, occupying five large stone houses, each distinct from the others. The following personal description is from the Boston *Journal* correspondence.

"He lives in the simplest style, and does not allow himself a lounge or rocking-chair, unless he is sick. He was a poor man when he began, and is a poor man to-day, though he has handled millions of money and could have spent it as he would. Muller is a Prussian, and was born in 1805. He was in the Prussian army. He was very wicked and was converted by some signal displays of grace, and he devoted himself from that hour to the cause of the poor. He is a tall, slim man, with the bearing of a soldier — with dark hair and gray whiskers — wears a black frock coat buttoned to the neck, and a white cravat without a collar. He speaks with a brogue. His preaching is very simple, earnest, and full of Christ. He is a man of great executive ability, and is the sole manager of this immense concern. I have been all over his establishment. It would do credit to any government on the face of the earth. I have talked with the people of Bristol about Muller — merchants, tradesmen, draymen, storemen, and all classes, religious and irreligious — and they all express the highest confidence in his piety and integrity and honor, and assign him a high place among the model men of the world. His theory is this: that God is a hearer of prayer; that He is the same faithful God that He ever was; that this he believes and this he trusts, and has never been disappointed."

Uneasy and Unhappy.

There are more men driven to death by anxiety in America, than in any other country. We are the hardest worked people on the earth. The rush of mind in this country is unexampled abroad. In England and on the Continent of Europe there is mental activity and competition, and rivalry, and greed, and great industry, and earnest devotion to useful labors, and men accomplish great things and aim at more; but they are not in such haste to be rich, nor so fierce in the pursuit of good, nor so restless in their ambitions. You may see the difference in the street as men walk to their several callings. Here they go with a rush, as if they were to be ruined if not at the place of business in time. Four thousand merchants on the same floor in Hamburg present a widely different spectacle from the same number in New York. In no city but ours could an exchange be opened for business in the evening. Our people are in such haste to do what is to be done, and are so fearful that others will get ahead of them in the race, that they sacrifice health and life in the pursuit of what is often of no use to them when they have got it, for they are then hopeless invalids or dead men.

GREAT men learn very little of what the world admires them for knowing during what is called their "educational course." They are men who are constantly observing little things and great things passing around them, and they remember what they observe. They take advantage, too, of spare moments to pick up information from cyclopedias, dictionaries — any books which happen within reach. Mr. Beecher remarked a short time since, that he read the whole of Froude's England between the courses at dinner. We do not commend him for this particular practice, for the dinner table is a place for sociability, and not for study; but as an illustration of the principle by which great men gain their information, it is excellent. This being constantly on the alert wherever you may be, constantly exercising the mind and the memory, is the secret of success in this direction. Direct and laborious study, if one has time, is of course essential; but it is the constant accumulation of little things and small parts of great things which give the grandest results.

LIFE AND EXISTENCE.—The mere lapse of years is not life. To eat, and drink, and sleep; to be exposed to darkness and the light; to pace round in the mill of habit, and turn thought into an implement of trade — this is not life. In all this but a poor fraction of the consciousness of humanity is awakened, and the sanctities still slumber which make it worth while to be. Knowledge, truth, love, beauty, goodness, faith alone can give vitality to the mechanism of existence. The laugh of mirth that vibrates through the heart, the tears that freshen the dry wastes within, the music that brings childhood back, the prayer that calls the future near, the doubt which makes us meditate, the death which startles us with mystery, the hardship which forces us to struggle, the anxiety which ends in trust, are the true nourishment of our natural being.

A VERY learned man has said: "The three hardest words in the English language are, 'I was mistaken!'" Frederick the Great wrote to the Senate, "I have just lost a great battle, and it was entirely my own fault." Goldsmith says: "This confession displayed more greatness than all his victories."

DR. SOUTH, when once preaching before Charles II, observed that the monarch and his attendants began to nod, and some of them soon after snored; on which he broke off in his sermon, and said:

"Lord Lauderdale, let me entreat you to rouse yourself. You snore so loud that you will awaken the king."

TACITUS committed a trifling error when he said that "in the early ages man lived a life of innocence and simplicity." The first woman went astray, the very first man that was born in the world killed the second. When did the time of simplicity begin?

A LATE English writer says the only day an American devotes to "*relaxation*," is the day he takes medicine.

THE managing editor of the London *Times* is paid the same salary as the President of the United States.

THE YOUNG FOLKS.

Our Baby.

Two little feet with sinless tread
Come pattering across the floor;
A little face of innocence
Peeps in at the open door;
Two little hands, with baby touch,
Meet mine with soft caressings,
And in my soul a new, great love
Springs up with its waves of blessings.

Two little lips of purity
Whisper "mamma," with love;
A little heart of tenderness,
Eyes like the blue above.
O God, who gave this darling one,
This dove unto our breast,
Help us to guide its flight to Thee
And regions of the blest.

Help us to lead those little feet
Away from sins and strife;
Help us to keep that little face
Pure with a spotless life.
Dear Father, shape those baby hands
For works of noble usefulness;
O, make them patient, faithful hands,
That earth's children will love and bless.

And when those lips are marble cold —
Marble forevermore —
The precious heart in slumber still,
Her faithful life-years o'er,
O, Father, take unto Thy breast
Our bird to realms above,
And clasp it safe, forever safe,
Within thine arms of love.

—*N. Y. Independent.*

Only one Brick upon Another.

A boy watched a large building, as the workmen from day to day carried up bricks and mortar.

"My son," said his father, "You seem much interested in the brick-layers. Do you think of learning the trade?"

"No," he replied; "I was thinking what a little thing a brick is, and what great houses are built by laying one brick upon another."

"Very true, my son; never forget it. So it is in all great works: all your learning is but one lesson added to another. If a man could walk all round the world, it would be by putting one foot before the other. Your whole life will be made up of a succession of moments Learn from this not to despise little things. Be not discouraged by great labors They become easy if divided into parts. You could not jump over a mountain, but step by step take you to the other side. Do not fear, therefore, to attempt great things. Always remember that the large building rose by laying one brick upon another."—*N. W. Presbyterian.*

EYES AND EARS.—The most acceptable compliment one can pay in conversation is attentive listening. And the most appreciative listening is done with the eyes. For the human ear, unlike that of the lower animals, is a fixed institution. It cannot be elevated or directed forward when attention is aroused. Hence its function is limited. It cannot give signs either of attention or appreciation in conversation. Thus, as a writer in Blackwood well says: "We do our most effective listening with our eyes." And in many respects, listening is far more effective in impressing a conversational companion than speech. No unspoken affront short of absolute rudeness rouses resentment so readily as wandering attention manifested in wandering glances. A man's thoughts are wont to follow his eyes, and be engrossed by what they see rather than by what he hears. Thus, though a speaking eye is a rare social gift, a listening eye is even more rare and valuable.

"That's How."

After a great snow storm a little fellow began to shovel a path through a large snow-bank before his grandmother's door. He had nothing but a small shovel to work with.

"How do you expect to get through that drift?" asked a man passing along.

"By keeping *at it*," said the boy, cheerfully, "that's how."

That is the secret of mastering almost every difficulty under the sun. If a hard task is before you, stick to it. Do not keep thinking how large or hard it is, but go at it, and little by little it will grow smaller and smaller, until it is done.

"If a hard lesson is to be learned, do not spend a moment in fretting; do not lose a breath in saying, "I can't," or "I do not see how;" but go at it, and *keep at it. Study.* That is the only way to conquer it.

If a fault is to be cured, or a bad habit broken up, it cannot be done by merely being sorry, or only trying a little. You must keep fighting it, and not give up fighting until it is got rid of.

If you have entered your Master's service, and are trying to *be* good and to *do* good, you will sometimes find hills of difficulty in the way. Things will often look discouraging, and you will not seem to make any progress at all; but keep at it. Never forget "that's how."

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents. F. E. WEYGANT, Proprietor.

PACIFIC COAST ITEMS.

THE *Alta*, in speaking of a delusion prevalent among a certain class of the farming people of this State, says:

"The man who does not at least hope that he may some day become a resident of San Francisco does not live inside this State."

This is rather a wholesale expression of the state of feeling which really does exist among thousands, especially of the young men and women of the rural districts. Their desire to live in the city is a serious error, based on an ignorance of the privations, hardships, and perplexities which beset the laboring classes in all cities. Farming, in an intelligent neighborhood, with good soil, is now the most desirable occupation in California.

SOME wag writing from this city to the Boston *Post* said: "It is two months since I arrived in San Francisco, but it did not take me half that time to find out that its inhabitants are chiefly employed in two occupations — letting rooms and acting as insurance agents." We were reminded of this the past week by seeing an insurance petition lying on the head of every box on Montgomery Street. Many a boy signed it. There was a large and enthusiastic meeting at Platt's Hall on Wednesday night — but when the money question came up there was a manifest cooling off in the zeal of the audience.

FARMING LANDS.—The price of grain for the two last seasons has given a stimulus to land speculating, so that the price of arable ground in the central part of the State has doubled within two years. We hear of some locations in Solano, Contra Costa, San Joaquin, and Stanislaus, where the value has tripled. Doubtless, some will be carried away by the land mania, and make injudicious investments; yet there is no doubt that all productive lands in the vicinity of water, or prospective railway communications with this city will rapidly advance in value within the next ten years.

LATE SOWING.—The *State Reporter*, referring to the prediction that the coming grain crop will not be average because the grain sowing on all the richer valley lands must this season be done at a late period, says that such an inference is not sustained by precedent. In the winter of 1862, owing to heavy rains similar to the present winter, plowing in certain places did not commence until the month of March, and the sowing not until April; full crops of wheat and barley, however, were gathered. Such, however. is not the general fact in California.

THE Santa Cruz *Sentinel* says the powder mills of that vicinity make a market for 2,000,000 hoop-poles, 500,000 feet of lumber, 6,000 bushels of charcoal, and 4,000 cords of wood. This shows the importance of manufactures on this coast, in order to create a home market. Every acre of farming land within ten miles of Lowell and Lawrence doubled its value in a few years after the starting of these manufacturing towns. Let us encourage the growing up of manufactures at home by using the products of home manufacture.

THE Opposition line of Steamships has reduced the fare so low between this coast and the Atlantic States that a person can travel almost as cheaply as he can live at home. First cabin ranges from $75 to $120; second cabin, $50 to $60; steerage, $25 to $35. Without disparaging the Pacific Mail Steamship Company, we can truly say, after having tried both during the past year, the Opposition line is its equal in speed, safety, and accommodations.

THE brilliant weather of the past ten days gave an impetus to all kinds of business. It is hoped that the coming rains will be brief. We have a line from a wheat-growing farmer in Santa Clara County who predicts a coming California wheat crop of 20,000,000 bushels above what is needed for home use. That amount, sold at a fair price, would make money very plenty on this coast.

FROSTY.—It is a novelty to hear of persons being badly frozen in this State, west of the Sierra Nevada. Yet instances have occurred in Siskiyou, Klamath, and other northern counties during the past month, where parties in crossing the mountain ridges between the valleys, had their feet and faces severely frozen and narrowly escaped death.

THE Legislature continues to be occupied in debate, but has done very little positive legislation. Some of the past law-making bodies of this State did altogether too much work. Better too little than too much. Gentlemen, don't linger too long at the Capital.

TELEGRAPHIC SUMMARY.

EASTERN.—Congress is doing nothing but *talk*....Mr. Adams has tendered his resignation as Minister at the British Court. The resignation has not been accepted....The February statement of the United States debt shows an increase of $20,000,000. Gold is therefore on the rise. Latest quotations 141....Congress proposes to issue $160,000,000 in new greenbacks, to keep off hard times....There are rumors that the President and Congress are for a war with England in case of a refusal to pay the Alabama claims. Buncombe....The attempt to impeach Judge Field proves, as it ought to, a failure....Massachusetts, after trying prohibition a dozen years, goes back to a license law in regard to the sale of liquors. We were a listener to the discussion before the Legislature in Boston ten months ago, and heard the able arguments of Rev. A. A. Miner in favor of, and ex-Governor Andrew against forcible prohibition. The Legislature, by a vote of more than two to one, refused to repeal the prohibitory law. The reaction is not so much the conviction that a license law is better than prohibition, as public sympathy for Gov. Andrew, whom the over-zealous prohibitionists attempted to ostracise politically and as a citizen. A *rigid* license law may suffice, but we think prohibition is still better. The question of license is now before our own Legislature.

FOREIGN—London despatches confirm the news of the opening of Hiago and Osaka, in Japan, to foreign trade, on New Years....The depreciation of confidence in U. S. Bonds continues, and causes the rise of gold in New York....The price of wheat, February 1st, at Liverpool, was $3.81 per sack, against $3.45 same date last year.....The Cretes bid fair to succeed in securing annexation to Greece ...The Abyssinian expedition is progressing favorably.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, February 5.

FLOUR—Sales of 400 bbls choice Family and Extra, hf and qr sks, $8@8 25. We quote city brands as follows:

Superfine, hf sks, ℔ 196 lbs	$7 00@7 25
qr sks	7 25@7 50
Extra, hf sks	7 75@8 00
qr sks	8 00@8 25

WHEAT—Sales include 3,000 sks fair milling, in two lots, $2 50; 500 sks do, $2 50; 2,000 sks choice shipping, $2 70; 300 sks prime milling, $2 75. We quote the range for fair to extra choice milling at $2 50@2 75, and choice shipping, $2 70. At the close, 1,000 sks fair milling, $2 55 ℔ 100 lbs.

BARLEY—500 sks good brewing, $1 80. The extremes for feed and brewing are $1 70@1 85. At the close, 450 sks brewing, $1 80 ℔ 100 lbs.

OATS—Sales of 500 sks choice, $1 87½; 200 sks very heavy, $1 90. We quote light to extra choice, $1 75@1 90 ℔ 100 lbs.

POTATOES—In consequence of liberal receipts during the past few days, prices favor the buyer. Sales include 200 sks Petaluma, private; 100 sks inferior Pajaro, $1; 100 sks Bodega, $1 10@1 12½; 100 sks Petaluma, $1 12½; 400 sks Pigeon Point, $1 40 ℔ 100 lbs.

CORN—Is still scarce. Good to choice Yellow is quoted at $2 30@2 37½ ℔ 100 lbs.

CORN MEAL—Sale of 580 eighth sks (each 25 lbs) White and Yellow, 3¼c.

RYE—No transactions to report; quoted at $1 75@2 00 ℔ 100 lbs, the outside figure for seed.

BUCKWHEAT—Sale of 50 sks private; quotable at $1 75 @$1 85. This article seems to be a drug in the market, and yet it is said to be good for chicken feed, for which purpose it is cheaper than wheat.

BEANS—The market is quite firm, though prices are understood to be a little inflated. The quotations to-day are as follows for small lots: Bayo, 3¼@3¾c; Butter, 4c; Pea, 4½@5c; small White, 4½@5c; Pink, 2¼@2½c; and Red, 2¾@2¼c ℔ lb.

PEAS—Small sales at 2@2½c ℔ lb.

ONIONS—The absence of the usual supplies from Oregon gives strength to the market for California, now quoted at 7@7½c ℔ lb.

BRAN—We quote the range at $24@26 ℔ ton.

MIDDLINGS—Feed descriptions, $40; Shorts, $35 ℔ ton.

OIL CAKE MEAL—Continues in fair demand at $30 ℔ ton from the mill.

HAY—Market steady, and prices unchange—say $18@23 ℔ ton for fair to choice.

DAIRY PRODUCTS—The favorable weather during the past week has increased the volume of supplies, and prices are generally lower. Choice roll Butter, 40@45c; Cheese, 20@22½c ℔ lb for California and Eastern. Eggs, 50c ℔ dozen, weak.

POULTRY—Live Turkeys, 14@15c ℔ lb; Hens and Roosters. $6 50@7; Ducks, $5 50@6 ℔ doz; Gesse, $2 50@3 ℔ pair.

PROVISIONS—Cured Meats are well maintained. We quote California Smoked Bacon, 13@13½c; Oregon, 12@12½c; California Hams, 13½@14½c; Eastern Lard, 12@12½c; California do, 12@13c ℔ lb, an advance from last week's prices.

WOOL—Sale of 10,000 lbs clean fall, private; quotable at 12c ℔ lb.

HIDES—Sales since last Wednesday embrace 400 California dry, usual selection, 13¾@14½c ℔ lb. The supply is said to be limited and the demand fair.

TALLOW—Sales of 4,000 lbs Beef and Mutton, 7½@7¾c. Good Beef is quoted at 7¼@7½c ℔ lb.

San Francisco Cattle Market.

We have but little changes to note in prices this week. The consumption is small, owing to high prices.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 10@11½c ℔ lb.
Spanish, 1st quality, 9@10c.
do 2d do 8@9c.
do 3d do 7@8c.
VEAL—7@11c ℔ lb.
MUTTON—9@10c ℔ lb.
LAMB—9@11c ℔ lb.
PORK—Undressed, 6@6½c; dressed, 9c.

—*S. F. Bulletin.*

Presbyterian Board of Publication.

The publications of this extensive house comprise works in all departments of Religious Literature, including Commentaries, Annotations, Religious History and Biography, Sermons, Bible Dictionaries, Devotional Books, etc., etc., together with a large assortment of

SUNDAY SCHOOL LIBRARIES,

To which the attention of Sunday School Teachers and Officers is requested.

Besides the Presbyterian Psalmodist, the Presbyterian Juvenile Psalmodist, and Children's Praise, this house publishes that new and popular collection of Hymns and Tunes, called

THE HYMNAL,

An admirable compilation of Hymns and Tunes suited to Congregational Singing.

The Depository for the Pacific Coast of the works of the Presbyterian Board of Publication is at the store of

BANCROFT & COMPANY,
609 Montgomery Street,
San Francisco, Cal.

Pacific Medical and Surgical Journal.

NEW SERIES. PUBLISHED MONTHLY.

The editorial management is in the hands of Dr. Henry Gibbons, a veteran in his profession, formerly Professor of Theory and Practice in the Philadelphia College of Medicine, afterwards President of the California State Medical Society, and now Professor of Materia Medica and Therapeutics in Toland Medical College, and Dr. Henry Gibbons, Jr., whose extensive experience in a large hospital in Washington, during the war, has familiarized him with modern surgery, and qualified him to take charge of this department. Besides, we have secured the assistance, as collaborators of a corps of eminent physicians, representing the body of the profession on this coast.

TERMS.—$5 00 a year, or $3.00 for six months, payable in advance, in gold coin. Postage pre-paid by the Publishers.

PUBLISHED BY BANCROFT & COMPANY,
San Francisco, Cal.

One copy of the PACIFIC MEDICAL AND SURGICAL JOURNAL and one copy of THE OCCIDENT (subscription price $4.00) will be forwarded one year, to one address, for $8.00.

FORDHAM & JENNINGS,

Grocers,

CORNER OF FRONT AND JACKSON STREETS.

THE OCCIDENT

A comprehensive Family Newspaper, Religious, Literary, Educational, and Social; also the special organ of the various branches of the Presbyterian Church in the Pacific States.

Published every Saturday, at 609 Montgomery Street, in accordance with the terms of the Prospectus, which will be found on the first page.

Current Topics.

It is bad enough when the representatives of a Christian people are known, as individuals, to be men who have no fear of God before their eyes. But when, as a body, they outrage the convictions of a large portion of their constituents, and bring public disgrace on the State they ought to honor, the exhibition is pitiable and sad. What apology those legislators who desecrated the Sabbath by their official visit to San Jose on that day may be able to render, we do not care to know. We can but look upon the journey and the attending scenes as lamentable evidence that the people have not been mindful, when selecting their representatives, of the historical fact that God visits upon the State the wrath awakened by the sins of its rulers. For the true men who would not show contempt for the opinions of the good, nor for the authority of Jehovah, we hear expressions of respect; but for those who were willing so far to disregard their position as thus to misrepresent us, expressions come from all classes of surprise and grief — from some of thorough indignation.

The Portland (Oregon) *Herald* severely criticises the practice of a class of lawyers in Court, who make it a point to abuse and insult witnesses where testimony is adverse to the interests of their client. It cites a recent illustration where a Jewish witness was constantly referred to by the opposing counsel in contemptuous terms as "the Jew Isaacs," the "modern Shylock." That such language should have passed unnoticed by the bench, and been repeatedly indulged in by the counsel, argues in the opinion of the Editor, a sad want of dignity and sense of propriety in the Court. The *Hebrew Observer* of this city, takes a similar view of the practice, and, in regard to this instance, uses language not exactly judicious. There are Judges on this coast, who maintain as strict decorum as exists in the courts of any country, yet it is true that the general practice of the bar needs reform. The bench should never tolerate the abuse, effrontry and brow-beating which is often practiced by some lawyers, especially resorted to if the witness is timid and unaccustomed to the court-room. Some counsel make it a special purpose to attempt to gain by impertinence, trickery, and abuse, what they must lose by plain equity. Such violation of justice as well as propriety should not be tolerated, and it is gratifying to know that in this matter the bench of this State has greatly improved within a few years.

Poor Mexico seems to be doomed to some form of anarchy, whatever party may have temporary rule. The late accounts are favorable as to nothing but further commotion, and the issue can hardly be predicted. The radical causes of the difficulties are the ignorance and religious superstition of the people, and until these are diminished or removed, no better state of things can be anticipated. A permanent, peaceful Republic of such elements as prevail is impossible, and while Juarez appears to understand this, and would inaugurate the needed changes, perhaps, were he able, the suspicious and restless masses will give him no opportunity for the attempt. The news from that country will be very important within the next few months.

The English expedition into Abyssinia was making little progress at the last accounts. The forces were suffering no serious loss, but the animals were dying in great numbers, and the prospect of advance into the interior seemed much more formidable than when the expedition was first planned. There is no doubt that the British Government will effect the release of those whom the heathen king has imprisoned, notwithstanding the unexpected cost in money and men, and in doing this, new and broad avenues for the introduction of civilization and Christianity may be opened into this land that has had a history full of interest in former days. War has often beaten down walls within which ignorance and superstition have felt secure. Cannon have broken through the prisons of darkness which shut millions away from the light, and let in the beams of a brighter and better era upon those who might not otherwise be thus cheered. Theodore has displayed a vigor and resolution seen in no king who has preceded him for centuries, and it may be that when he is forced to see what he does not court, and to grant to his subjects what he would never give without constraint, his ambition may take a new direction, and policy may render him the patron of what will elevate and bless his people. It is said, we know not with what truth, that his position of hostility was occasioned by the prompt rejection of his offer to marry England's Queen. If this is true, it is only another proof that God often employs the folly of men as the means of effecting His purposes, and causes their wrath to praise Him — and this, whatever may be the motive of the English in the war.

A recent letter from the General Secretary of the Freedmen's Commission furnishes some facts that deserve notice and thought. Their work is double what it was last year, though their income is but little increased. They have fifty-seven churches, and twenty-five schools, and twenty-seven houses of worship in process of erection. The Biddle Institute, at Charlotte, N. C., for the training of Catechists, has twenty students, and one hundred could be placed in it at once, had the Commission means for their support. It requires from $90 to $150 a year for each student, and they maintain prayer-meetings, teach catechism, and hold Sunday Schools during the week and on the Sabbath, when not engaged with their studies. It is proposed that Sunday Schools and individuals at the north and west establish scholarships in this Institute by monthly subscriptions, and that some one be placed on each of these scholarships who shall correspond with those who support him, thus creating and increasing interest in this important work.

The Secretary confirms other reports respecting the suffering of all classes at the South, and says that every consideration calls on us for temporal and spiritual help, to be furnished as soon as possible, with the promise of cheering results if the call shall be answered. The Pacific Coast should not be behind in doing its part, when thus urged both by humanity and our Lord.

Drunkenness is now so notorious and abounding in Congress that it is lamented and rebuked even in the political papers of the East. Surely the nation may well consider the import of the fact, when men who have been sent to make our laws and determine our policy in this critical time are daily so drunk as to be unfit for business for a part of the day, and must be watched by their friends lest they do what is indecent, if not criminal. The evil is appalling when we are told there are scores of such Members of Congress. All temperance men must unite, and brace with all their force against a tide whose force is thus indicated, or it will sweep away much that we love and cannot prize too highly. It is folly that tells us temperance has had its day. Of all others, *this* is its day, and we should "work while the day lasts."

After the display of last Sabbath, we might despair of any restraints from petitions or arguments upon the designs of those members of the Legislature who seek a repeal of the Sunday law, were hope to rest upon any influence brought to bear on those who thus advertise their sentiments. But there is some reason for hope that the Senate will not refuse to heed the wishes of a large part of the permanent residents of the State, who tremble at the reckless progress of those who seek only their own ends for the little time they intend to stay here. Send in petitions therefore. It will be a woful day, when California shall follow the lead of those representatives who take Sunday for trampling on the ordinance of God, instead of His worship and service.

The Wheat Crop of this State in 1864, was 4,581,236 sacks, having a value of $7,281,987. That of 1867, was very near 15,000,000 of sacks, having a value of more than $30,000,000. It is this increase of production and of wealth among our people which is lowering the rate of interest in loans, and rapidly raising the price of land.

Religious Intelligence.

PACIFIC COAST.

The Convention.

It having been decided in a preliminary meeting to call a Union Convention of Presbyterians, to be held in the Howard Presbyterian church of this city, on Wednesday evening, the 26th of February, at 7 o'clock, the undersigned cordially invite all interested in ratifying the action of the great National Convention in Philadelphia, to meet together at that time. A general prayer-meeting will be held in the same place at 3 o'clock of the same day, which it is hoped will be largely attended.

Presbyterial Notice.—The Presbytery of California stands adjourned, to meet in the First Church, San Francisco, on Wednesday, March 11th, 1868, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James Eells, D.D., the retiring Moderator. The attention of ministers and churches is called to the instructions of the Presbytery, requiring brief narratives of the state of religion, together with statistical reports, to be sent to the Chairman of the Committee on Narratives, ten days before every spring meeting. Rev. F. Buel is the present Chairman of said Committee.

Feb. 11th, 1868. John G. Fackler,
Stated Clerk.

The pastor of the First Presbyterian Church in this city was invited to meet his congregation on Thursday evening of last week at the residence of one of their number. It was the anniversary of his arrival in California, and was made the occasion for a year's review that all seemed to enjoy, and for such expressions of regard as were especially grateful to the pastor. That one coming as a stranger among the people should be treated with such unwearied kindness from the first, was sufficient cause for thanks, but the generous gift with which the year was closed was noble and cheering proof that they are resolved to make his new home delightful, while he labors with them for success in this honored church.

The Calvary Church Mission seems to be making rapid advance. Rev. Mr. Marr, the young minister who has it directly in charge, is well adapted to the work, and with such support as he will receive there is hardly a doubt of his success. A lot has been purchased on Howard Street, and a building will soon be erected, to cost about $4,000. That part of the city is growing so rapidly that in a little time this building will be supplanted by a larger and better one. The spirit is to be commended in a church that strives to keep pace with the increase of population.

The Marysville *Appeal* says that unusual interest prevails in the congregation of the Presbyterian church. On Sunday the pastor, Mr. Macomber, was assisted by Rev. James S. Todd. Meetings are to be continued every evening.

Rev. H. H. Dobbins preaches at Amador in the morning, in the afternoon at Sutter Creek, and at night at Jackson on every Sunday. At Jackson the Presbyterians and Methodists propose to build places of worship the coming summer.

At Chico, the *Courant* says, the Rev. J. M. Woodman is giving a series of instructive lectures to a crowded audience, on the "Voyage of Life."

At Woodland, Rev. Mr. Curry, of the Methodist church, has added twenty-six to the membership since last fall.

Rev. Mr. Shaw, pastor of the Methodist church at Eureka, has an unusual degree of interest among his people. One thousand dollars have been raised for the church.

Rev. Charles G. Ames is the pastor of the Unitarian church, which is now occupying a new and handsome edifice at Santa Cruz.

EASTERN.

The Brick Presbyterian Church New York City, is one hundred years old. On the first Sunday of this year its centennial anniversary was celebrated. Dr. Spring, the senior pastor, and Dr. J. O. Murray, junior pastor, conducted the services.

Rev. John Cotton Smith preached in St. George's (Dr. Tyng's) Church, New York City, on the last Sunday of December, a strong discourse in support of evangelical views as opposed to ritualism, and of the right of Episcopal ministers to preach the Gospel wherever they can find an opportunity to do so.

William M. Gillespie, LL. D., for thirty years Professor of Mathematics and Civil Engineering in the Union College, Schenectady, N. Y., and a graduate of Columbia College, died in New York City on New Year's day. He was the author of several valuable works.

Rev. E. D. Morris, of the Second Presbyterian Church, Columbus, Ohio, preached his farewell sermon January 3th, to a large congregation. He has been connected with the church twelve years. He left for Cincinnati immediately.

The Pearl Street Church of Hartford have unanimously invited Rev. W. L. Gage to become their pastor, in which call the society will undoubtedly concur.

Rev. A. T. McGill, of Princeton is elected President of the Presbyterian Board of Publication in place of Dr. Engles, deceased.

FOREIGN.

The Census of Rome.—A census of Rome has been taken, which gives its population on July 1st, 1867, at 215,573 persons, an increase in one year of 4,872. Of these, 30 are Cardinals, 35 Bishops, and 2,292 priests and ecclesiastics of different grades. The city also contains 2,832 monks and 2,215 nuns, belonging to 61 different orders or congregations; and for religious purposes it is divided into 59 parishes. There are 49 colleges and seminaries in Rome, and 7,360 of its male citizens are in the military service. All the people are Catholics, excepting 4,650 Hebrews and about 800 Protestants.

There are ninety-two religious sects in England besides the established Church and the Roman Catholics.

A movement is being made in Paris to have the Papacy removed from Rome to Jerusalem.

MISCELLANEOUS.

A Firm Reliance.—"Only believe," and not only will the gates of the celestial city open to receive us, but even here we shall rest in the shadow of a great love.

But dangers stand thick on every hand, suggests Faint-heart; how can we help being anxious?—Only believe: the Lord is a shield to them that put their trust in Him.

Silver-tongued temptation may assail us—He is able to succor them that are tempted.

What if poverty be our lot?—the Lord knoweth the poor.

What if riches, and we are encumbered with many cares? Give to the poor and thou shalt have treasure in Heaven.

We may be homeless?—Our Lord had not where to lay His head.

Friendless?—There is a Friend that sticketh closer than a brother.

Afflicted?—He bindeth up the broken-hearted.

Unjustly accused?—The Almighty shall be thy defense.

The night cometh?—He that keepeth thee will not slumber.

Accidents may befall us?—The Lord shall preserve thy going out and thy coming in.

Pain and sickness?—The Lord will make all thy bed in thy sickness.

The infirmities of old age?—They shall still bring forth fruit in age.

There are heavy burdens to be borne; perchance incessant daily toil?—There remaineth a rest.

Wearisome nights may be appointed to us?—He giveth songs in the night.

Death will surely come. It knocketh alike at the lordly palace and the lowly cottage;—It is well with the righteous. Death is swallowed up in victory.

To the believer every providence is but another stroke of the chisel upon the marble block, shaping it for its position in the heavenly temple.—*American Messenger.*

False Social Life.—There are Christian lives to which the following paragraph from an English writer does not apply. Setting them aside, are not his sweeping statements true?

"The whole science of social life needs revision in the light of a juster philosophy and a purer faith. We are lapsing yearly further and further from simplicity and sense; we are wandering deeper and deeper into heavy luxury which brings no enjoyment, and is inspired and sanctioned by no æsthetic taste. In plain truth, and by nearly unanimous admission, the life of no class in the community is either dignified or happy. Yet we toil hardly enough and spend freely enough to succeed, if only we were not sailing on a wrong track. If we fail, as we certainly do, in being happy and noble and truly great, it is not from want of taking pains, but from want of knowing how."

If any truth is taught in the Bible, it is that the Christian and the Church may expect great things from God; and if we have any positive command, it is to attempt great things for God.

When Plato was told that his enemies were making free use of his name he quietly replied:

"I will endeavor so to live that no one will believe them."

Anniversary of the Orphan Asylum.

The seventeenth annual meeting of the Protestant Orphan Asylum Society of this city was held on Tuesday morning, February 4th, in the ladies' room of the First Presbyterian Church, when the officers and Trustees were elected for the ensuing year.

The Anniversary took place the same evening in Platt's Hall. As usual, the Hall was crowded almost to suffocation some minutes before the time for commencing the exercises; but every one seemed willing to oblige, and by dint of pushing and squeezing, room was made for the orphans to pass when, exactly at half past seven, they entered the rear of the Hall, singing as they came, and, after marching entirely around it twice, took their places on the stage — 216 as happy, rosy, neat-looking children as one would wish to see. Owing to the unavoidable absence of Gov. Haight, Mr. I. P. Rankin was re-

quested to preside, and the children sang their opening song, which was exceedingly pretty and very well rendered.

Rev. Mr. Briggs offered prayer, after which came an echo song, the verses of which all the children sang together, and the echo of the chorus came sweetly and clearly from the distance. Next followed a recitation, entitled "What I Love," by a sweet little girl, who spoke with a remarkable distinctness, and this with her cunning looks and ways, elicited much applause. Following this was the first part of one of the most attractive features of the evening, the calisthenic exercises, by twenty children — ten boys and ten girls, all about the same size. They performed all the usual gymnastics, singing meanwhile, and keeping the most perfect time. They sang "Marching through Georgia," "Tramp, Tramp, Tramp," "Rally Round the Flag," "On, On, On," some of the multiplication table, and a number of other airs, less familiar, but not less pleasing.

The reports were then read, showing that there had been altogether, during the past year, two hundred and eighty-three children in the Asylum. Of these, forty-two have been removed by their friends, twenty-two have been placed in good families where they can learn to support themselves, and two have died, leaving two hundred and seventeen now in the Institution.

The Treasurer reported a balance on hand of $1,808 04, and showed that a little less than one hundred dollars is required for the annual support of each child.

After other pleasing exercises, the audience was addressed by the Rev. Mr. Lathrop, who spoke in an interesting manner for about twenty minutes, showing particularly of how much service the Orphan Asylum is to both Church and State, and urging each one to give as liberally as possible to its support.

Then came a part of the programme which was by no means the least important to those who have charge of the Institution, viz: the collection. Though the audience was larger than last year, the amount collected fell considerably short of that then realized, being $601 03.

When the money had done rattling, the children sang their "Good-night Song," and after the benediction, pronounced by the Rev. Mr. Bush, the crowd dispersed, seemingly much pleased with the evening's entertainment.

Much credit is certainly due to Mr. Elliot, who taught the children singing, and to the teachers who trained them in the other exercises, and to the children themselves, for performing their parts so nicely.

The Asylum is open for visitors every day, except Saturday and Sunday, and the managers are pleased to have the friends of the Institution go and see it for themselves. They are doing a noble work. May God speed them in it! M.

PERSONAL.

GOVERNOR HAIGHT has vetoed the Yosemite bill, which proposed to donate to two occupants several hundred acres of land in that beautiful valley, belonging to the State.

REV. DR. WADSWORTH.—*The Spectator*, alluding to this gentleman, says: "We confess a partiality for Dr. Wadsworth. Calvary Church has had two pastors — Scott and Wadsworth — very different from each other, and yet each almost without an equal in his own peculiar way. May they both live long to preach Christ."

ZACCHEUS GREELEY, the father of the editor of the *Tribune*, died at Wayne, Pa., recently, at the age of eighty-six years. He was a farmer, a native of New Hampshire, and, like his celebrated son, an honest and industrious man.

REV. MR. OLIVER and wife have been appointed to the Napa City School, and have left San Leandro to take charge of the same.

REV. DR. KNIGHT, pastor of the Congregational church at Salem, Oregon, recently preached a sermon on "Common Honesty." The *Journal* says: "The subject, as treated, is so vastly different from the kind usually practiced that it ought to be read by all, and after being read, practically carried out."

SENATOR CORBETT has introduced a bill into the United States Senate, "to provide for the issue of gold notes in place of legal tender notes, and to facilitate resumption of specie payments."

EX-GOVERNOR DOWNEY and others are about to establish a banking-house in Los Angeles, for exchange, deposit, and the negotiation of loans — an institution the want of which has long been felt by the business community of that place.

ALEXANDER H. STEVENS takes a very despondent view of affairs at the South. He sees nothing in the future but gloom and disaster, and the result of the reconstruction policy will be the destruction of either the black or the white race.

EDWARD DILLON,

Chronometer and Watchmaker,

Merchants' Exchange Building,

A. J. Ralston, Esq.

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.
☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.
The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.
For Terms and further particulars, address

REV. P. V. VEEDER.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

San Mateo Institute.

BOARDING SCHOOL FOR YOUNG LADIES.

The Eighth Session of this Institution will commence on Thursday, January 9, 1868.

For Catalogues, containing full information, address

San Francisco, Saturday, February 15, 1868.

RATIONALISM.

Were a definition of rationalism asked, even of those who most frequently use the word, probably very few would give the same answer. Yet error assumes its most formidable and dangerous phases under this general name, and practical evils find shelter in public esteem under its shadow and countenance. In the days of Kant, and Hegel, and Fichte, and Schleiermacher, it had dignity, and claimed to rest in philosophy and to support morality. Rationalists were men who made the reason supreme in their judgment of truth, but were eminent in the defense of morals and right. They were led astray in philosophy by the very strength and brilliancy of their intellects, but their hearts were in full harmony with whatever might promote the welfare of man; and with all their errors, mankind will always speak their names with respect and honor.

But what would those philosophers say could they see what they are made to favor in our days? Imagine Kant turning from his splendid efforts to determine the "philosophy of religion," to ridicule the claims of Christ, or to attack the church and its doctrines! Think of Hegel descending from the sublime theme on which he expended his strength — the absolute comprehension of Christianity by the human reason — to low attempts to banish the system which in its essential features he felt to be grand! The early Rationalists would scorn the company of those who now carry their banner, and they would repudiate their object. Now it is thought to be rationalistic to question the divine authority of the Bible, without offering reasons for the doubt; to advocate skepticism in strange language; to gather fog over what has been regarded as truth, and call this philosophy. It is thought to be rationalistic to express ideas that have enough sense in them to mislead, but too much nonsense to permit them to be sharply defined, so that they may be opposed with any success. Men say severe things about religion, insist upon extreme license in sentiment, set aside as folly the established opinions of Christians; demand that the Sabbath be made a play-day, and that everything be upturned to suit their views, because, forsooth, they are Rationalists. If all systems of free-thinking should grow base in their degeneracy as rapidly as that which now has such representatives, the prayer would be philanthropic, at least, that they might not survive the honest men who originate them.

At the beginning, there was opportunity for argument in dealing with the grave errors that were so distinctly announced and so ably defended, and in the belief of most, not of those who opposed them, but of those who thoroughly weighed the points discussed, the arguments presented were too powerful to be put aside, even by the giants who had provoked them. And, in succeeding years, the history of its influence upon all questions of human welfare and progress affords convincing proof that it could not supply what men need to satisfy the mind, or purify the heart, or guide to worthy action. Those who could not fully comprehend the creed it had given them were led by it into grievous mistakes, and the mass, in attempting to make its conclusions and inferences practical, were guilty of conduct and general habits that were a sad commentary on their faith. The just record of this history — such, for example, as that given by Dr. Horst, in his recent most valuable work, as he himself says—is "the best method for the refutation and extirpation of Rationalism," as thus far known.

And this is equally true respecting the more recent system, if it may be so called, which is working such mischief, especially in our own land. Arguments avail little, for they affect what they oppose much as did the sword that cut off the head of the hydra, when another would appear as soon as one was removed. There is need of the logic of facts, and when experiments have been sufficiently multiplied to leave no room for doubt, or when attention can be directed to results that may render further experiments unnecessary, this mighty evil will have less sway among our people. Hence, a general, sensible, practical exhibition of religion, in its bearing on the character and life of the individual, and on the best interests and progress of the race, will be the most successful opponent it can ever encounter. The comparison will leave Christians nothing to fear, for history gives no truth in clearer statements than that genuine piety reforms, elevates, and ennobles, in the ratio of its influence, while this which is offered in its place scarcely imposes a check on man's natural tendency to degradation and ruin. The lesson never had more practical importance than it has now, and it is folly not to heed it.

RELIGIOUS LITERATURE.

A wise and inspired author has declared that "of making many books there is no end." Had he lived now, instead of when he wrote, he would have felt the force of his statement far more than perhaps he did. The world is full of books, society is insatiable in its demands for literary food. Christians, as a class, are preëminently a reading people. The duties of the pulpit are very much changed within the last century by this fact. The danger is that Christians in their reading acquire a vitiated taste which shall excite them to read rather for amusement and pastime than for profit and culture. We see the influences of this pernicious habit in the way many good people read the Bible. They have favorite writers and selections which are read to the exclusion of equally valuable portions. If you would form a well balanced religious experience, it is necessary to build upon the foundations of the whole Bible. The same principle applies to the perusal of uninspired literature. How few Christians there are who cultivate a taste for books designed to promote true spirituality! There is a need for attention to this duty, and in order to give a practical hint, we would recommend "The Way of Holiness," by Rev. H. Bonar — Carters, publishers — as an exceedingly valuable and desirable little work, setting forth the nature, methods, and scope of a Christian life. Let those who can do so, avail themselves of this, or some similar work. Such studies will lead to the better understanding of the Bible — will restrain from a vitiated literary taste, and most needful of all assist in the cultivrtion and exhibition of a truly holy life, which is the highest qualification for usefulness here and glory hereafter.

THE SABBATH — ITS EFFECT UPON GOVERNMENT.

Having considered, in the last article, the effect of the Sabbath upon the moral and religious development of man, we now proceed to show its influences on government. We have endeavored to establish the proposition that Sabbath influences are essential to the development of man's moral and religious character. We hence concluded that such development was necessary to render him most useful to himself and the community of which he constitutes a part. All writers are agreed that, in a government like ours, virtue and intelligence are essential to secure the perpetuity of our institutions, and the preservation of liberty. Virtue, in the sense here used, is expressive of moral excellence — the practice of moral duties and abstaining from vicious habits and practices. The virtue contemplated by the founders of our government was synonymous with religion. It implied the *highest* obligations of duty.

THE CHARACTER OF OUR GOVERNMENT.

Our government is based on *Christian* obligation. The oath administered to all officers and witnesses is a *Christian* obligation of the very highest and most solemn character. It is an appeal to the Christian's God, and *none other*. Its purpose is to secure the faithful performance of duty and the protection of the most sacred rights of every citizen. It presupposes a conscience which will *condemn*, and a just God who will *punish*.

Although the Constitution of the United States does not recognize any religious sect or creed, and prohibits *test* oaths, yet it recognizes the Christian's God and the duties prescribed by Christianity, when it requires that an oath shall be administered as a pre-requisite to the performance of every official duty. It likewise recognizes the *Christian Sabbath, or Sunday*, as a *non*-secular day. (See Art. I, sec. 7, U. S. Const.

Of all the great men who constituted the Convention of 1789, which prepared and adopted the Constitution of the United States, *not one* was indifferent to the Christian religion, and a very large majority were exemplary members of Christian Protestant churches. As a conclusive evidence of the estimation in which religion was held by the illustrious founders of our government we record the following historical fact. In the Convention of 1787, when the evidence of disagreement had manifested itself and dissension began to run high, Benjamin Franklin moved that the Convention be opened by prayer, as the *only* mode of securing the Divine guidance and blessing upon their deliberations and discussions. The motion was adopted *unanimously*, and the Rev. Dr. Duché, an Episcopal clergyman of Philadelphia, was requested to officiate. That event has been commemorated by the pencil of an American artist, and "The First Prayer in Congress" has ever since been a standard national representation, highly prized by every American and Christian.

When, on July 13th, 1787, the Congress of the United States passed the ordinance organizing the Northwestern Territory, it declared, in the third article, that "*Religion*, morality, and knowledge are necessary to good government and the happiness of mankind."

General Washington, in his first inaugural address, speaks as follows: "There is no truth more thoroughly established than that there exists in the economy and course of nature an indissoluble bond between virtue and happiness — between duty and advantage — since we ought to be no less persuaded that the *propitious smiles of Heaven* can never be expected on a nation that disregards the eternal rules of order and right *which Heaven itself has ordained.*" In his farewell address he thus speaks: "Of all the dispositions and habits which lead to prosperity, *religion* and *morality* are *indispensable supports*. In vain would that man claim the tribute of patriotism who should labor to subvert these great pillars of human happiness — *these firmest props of men and citizens.*"

Since the issuance of the first inaugural address by General Washington, to the present day, no inaugural or annual message to Congress, by any President of the United States, has ever been issued and proclaimed that did not contain similar recognitions of Christian duties and Divine interposition. The *first* Congress established, by law, *Sunday* as a day of rest and a non-judicial day. On that day no judicial act can be performed legally, except in *criminal* cases. Congress has always recognized the Christian duty of prayer and the necessity and duty of seeking Divine aid in *governmental action*. All the States have, by their legislative enactments, recognized and venerated the Christian Sabbath. The Presidents of the United States and the Governors of all the States have, since the establishment of governments in the United States, constantly, by proclamation, set apart a day for special religious duties. The people of the United States have, along the whole line of their political life, recognized and approved those duties as obligatory, and likewise have observed religiously the duties thus enjoined.

OUR NATIVE POPULATION.

From the landing of the Pilgrims to the present, our native population have, for the most part, recognized the sacred obligations enjoined by the principles of the Christian religion, and they have uniformly and always regarded the Sabbath day as an essential means of promoting and preserving those principles. It has ever been regarded by every true native citizen that the prevalence of those principles and their inculcation and dissemination among all classes of the community, were essential to the promotion of good government and the preservation of our institutions.

OUR COMMON SCHOOLS.

As a necessary means to accomplish that great purpose our common school system was established. It has been fostered and enlarged until it extends throughout every portion of our vast domain. While sectarianism was positively excluded the Bible was permitted to be read and the principles of pure morality thus inculcated upon the youthful mind. With the aid of Sabbath teachings and the moral and religious influences thus created, our children have grown up with a proper appreciation of their personal, social, religious, and political duties. No *systematical* effort has ever been made by native citizens to *resist*, much less to *destroy*, those influences. That sad experiment was initiated and is now being prosecuted by those who have been generously invited by our Government to enjoy the blessings of liberty under the genial influences and protecting power of the nation. To that class we will pay our respects in our next article.

Z.

To Contributors.—Those who are so kind as to send us articles for publication may not find their contributions in the paper as soon as they anticipate — and they may not find them at all — but it is no evidence that they will not appear when they are delayed for a time. Our space is limited, and we are obliged often to postpone what we would like to publish at once. We hope this announcement will not have effect the to diminish the number of articles, for we receive them with thanks.

When the most insignificant person tells us we are wrong, we ought to listen and to examine ourselves, and see if it is so. Let us believe it is possible that we are in error when any one thinks we are.

The poor are they who only feel for the poor; and poverty consists only in feeling poor.

CONTRIBUTIONS.

"He would not Make a Fuss about it."

Such is the justification of Mr. Beecher respecting the use of his name in connection with the theatrical play of Norwood. At a meeting of his own church when many of his members, shocked and grieved from seeing his name conspicuously placarded as endorsing its performance, inquired as to the matter, he replied that an unwarrantable use had been made of his name; that he only intended by his communication to Mr. Bonner, his publisher, to say that if "Norwood" was dramatized and brought out on the stage, "He would not make a fuss about it."

Why did not Mr. Beecher say No! with an emphasis that would have been understood as allowing no compromise on his part with the theatre? He says he has "never been to a theatre in his life and, never expects to go." And in his "Lectures to Young Men" he has given a most truthful and warning sketch of the theatre.

We do not understand, in his present embarrassed position, that he really abates anything he has ever said against the evils and dangers of these whirlpools of vice. But in an unfortunate moment he has lost a valuable opportunity to practice his own teachings, and hence has become the instrument of doing incalculable harm wherever his popularity has gone. His reply to Mr. Bonner, viewed in the most charitable light, was a concession which he must have known, had he reflected, would be acknowledged as giving his tacit consent to the dramatizing and acting of his popular novel. And who can doubt that just this very remark was all that Mr. Bonner needed, all that theatre managers desired, and was the speech to verify the proverb, "Behold, how great a matter a little fire kindleth?" Did not the great Adversary stand by as Mr. Beecher penned these words, "He would not make a fuss about it," and say, "A capital success; a grand stroke of policy — the theatre endorsed by one of the most noted and influential divines now living?" From that mistake how much grief in this world, and what beginnings of a ruined eternity will result to many who have never before been enticed within the giddy mazes of these schools of depravity?

Ought not this lamentable mistake of Mr. Beecher's, which has arrested attention all over the country, to become a lesson to all to be mindful of their influence? How much evil is done because prominent men tie their hands by saying, "I will not make a fuss about it." How are theatre-going, ball-visiting, card playing, social drinking, and such like, encouraged by the silence and tacit consent of those who should lend the whole weight of their influence against them. All that evil asks is simply not to be assailed and repealed, but "to him who knoweth to do good and doeth it not, to him it is sin."

C. C. W.

A Good Man Gone to his Reward.

The Rev. H. Harbaugh, D.D., Professor of the Theological Seminary at Mercersburg, Pa., died on the 28th of December, after a protracted illness of bilious and remittent fever. All medical skill and the united and fervent prayers of a bereaved family, his devoted pupils, and a grateful church, were unavailing to preserve his useful life. His race was run, his earthly labors ended, and the Master whom he had loved and served so well in life said to him: "It is enough; come up higher. Well done, good and faithful servant; enter thou into the joys of thy Lord." Having long been a friend and admirer of this great and good man, we feel that by his death the church, especially that branch — the German Reformed — with which he was more immediately connected, has lost a worthy member, a useful minister and able theologian. God moves in a mysterious way.

Dr. Harbaugh died in the prime of life and had just entered a period of unbounded usefulness to his church and the cause of Christ in general. He was of a tall, stout, but symmetrical form; patriarchal and commanding in appearance. His expressive countenance and majestic forehead portrayed at once the indwelling of a noble and great soul. He was affable, genial, courteous, and kind to the humblest saint or sinner, but inflexible against sin. He recognized no compromise with the devil, under any form. Christ, the incarnate God-man, was to him all in all, and upon His glorious person and redemption he centered all his personal faith and hopes. In the historical fact of the mysterious incarnation of the Son of God, he found the ground of redemption for the world.

He was a strong advocate of temperance, and has spoken and written ingeniously and forcibly in support of that cause. He was a good citizen; loyal to the core, maintaining the doctrine of the common brotherhood of man by creation and redemption.

As an author, Dr. Harbaugh was original. Though learned, he was not mystically profound, but inclined to the poetic. While he was conscious and appreciated the visible and terrestrial constitution of life, in its various forms, he fixed his eye of faith on the invisible and eternal kingdom, as the destined home of fallen man and the sure abode of Christ's redeemed. When we say he was inclined to the poetic, we mean to the Truth under a sublime aspect. His books, entitled "Heavenly Home" and "Sainted Dead," have been republished in England, and are worthy the perusal of every one desiring a better knowledge of the future state of the soul, reviewed from the Gospel stand-point. Many other important works, on various subjects, remain as monuments of the holy, earnest, and laborious life of a faithful minister of Jesus Christ.

Dr. Harbaugh rose to the highest position in the gift of his church, as Professor of Didactic Theology, which position he filled with laudable ability for the space of several years, when life was ended and he was called to his reward. He died, as he lived, in the faith of the Redeemer of the world as his personal Savior. His burial was attended by a large concourse of ministers and Christian friends. His remains are deposited in the graveyard in front of the German Reformed Church of Mercersburg, and opposite the cenotaph of the learned Dr. Rauch. There he sleeps in the firm hope of a glorious resurrection of the just, according to the comforting assurance of 1 Thess. iv: 13, 14: "But I would not have you to be ignorant, brethren, concerning them which are asleep, that ye sorrow not, even as others which have no hope. For if we believe that Jesus died and rose again, even so them also which sleep in Jesus will God bring with Him." Peace to his ashes.

F. Fox.

There is an excellent precept which he who has received an injury, or who thinks he has, would, for his own sake, do well to follow: "Excuse half, and forgive the rest."

God's care for the lower creatures is but a faint shadowing of his intense care for his people.

Truth is the hope of mankind. Salvation is in truth only.

Correspondence.

Philadelphia, Dec. 29, 1867.

The last prayer-meeting of the Presbyterian National Convention assembled in Dr. Breed's large church on Spruce Street, on the afternoon of Sunday, the tenth of November. The exercises were deeply interesting. George H Stuart presided, and addresses were made by Drs. Musgrave and Breed, Rev. Messrs. Chidlaw, Duffield, and many others. It was urged that the spirit of the late meetings of the Convention should be sacredly cherished and extended throughout the churches. The early gathering of the delegates for the first two days represented the expectant band of disciples who tarried at Jerusalem in waiting for the promised descent of the Holy Spirit; while the very last presented the spectacle of united fervent wrestling with the God of Jacob. The interest increased grandly until the close.

Mr. Duffield beautifully spoke of the wonderfu nearness to Christ which all had enjoyed. It was as though His seamless garments had been actually touched, and that virtue had gone out of Him.

Several alluded to a prayer offered in the Convention by an elder, whose praise is in all the churches. Dr. Musgrave, the sturdiest of the Old School champions, acknowledged that it was through this instrumentality that he decided to leave the ranks of silent neutrality, if not of opposition to the whole scheme of organic union, and to come out in favor of at once combining our forces. From beginning to end, the Philadelphia Convention was an e xemplification of the triumphs of prayer. "The Kingdom of Heaven suffereth violence, and the violent take it by force."

A historian of the church came in during the session, armed with elaborate documents setting forth the differences of theologic sentiment entertained by the ecclesiastical bodies there represented, but discovered that not one of the articles he had so carefully prepared was of the slightest use; so he opened not his lips. He was *behind* the sentiment of the Convention from the start. The presence and work of the Holy Spirit were too plain to justify a doubt.

AN EVENING WITH ALBERT BARNES

Was lately most agreeably and profitably spent by your correspondent. His daughter showed me a strikingly faithful bust of the great writer, the work of a young man at the time belonging to his own congregation. I could not but admire its classic, serene and life-like beauty of expression. The repose of the eloquent marble in the soft light of the room was most beautiful. Could it be that a mere image was capable of expressing so much? The original must have been handsome in his younger days — his hair luxuriant and tending to curl, the features almost severely intellectual, and his figure above the medium height.

During the evening the conversation was in part upon the subject of preaching, when Mr. Barnes related the following anecdote. His predecessor in the ministry had, among the people of his charge, a young hearer of very superior ability and culture, at whom the Doctor leveled his most labored productions. In fact, his pulpit preparations were made with especial reference to the advanced intellectual attainments of this particular individual. The sermons, however, seemed not to affect him in any wise. At length he was brought to Christ by some unstudied remarks made by his pastor in a conference meeting.

Mr. B. had preached without notes for the last fifteen years, but believes that ministers should write out their sermons entirely before preaching, and then deliver them from their manuscript. He modestly affirms that none of his extemporary efforts were worth printing. Newman Hall, at tea with him not long ago, declared that in an average congregation only a very few individuals of rare intellectual training could be found, perhaps but a single one. Whereas more than two-thirds were women, young boys and girls, and poor classes in the social scale, to whom the preacher must chiefly address himself. Simplicity, strength and unction are hence the most effective elements of popular preaching.

You may not know that Albert Barnes is more industrious now out of than within doors. He has a passion for gardening and farming. All the vegetables, except potatoes, in use by his family are raised by his own hard-working hands upon a single acre of land, where stands his residence. I was told he always works *too hard*. The same trait of individuality marks the man, whether engaged in the lore of antiquity or in spading his garden. So Moses Stuart, in declining years, devoted much time to horticulture, becoming the best gardener in Andover.

In Mr. Barnes' intensely practical and domestic tastes I was reminded of Thomas Carlyle, who was cultivating his garden and looking like an American farmer when I visited him in London.

NEWMAN HALL

Created quite a stir in Philadelphia. I only heard him once. It was in Dr. Wylie's large church, which can seat 1,300 people. The building was filled to overflow, many standing about the doors and in the aisles. The preacher spoke for the *fourth* time that day. He acquired his facility of utterance by practicing extempore for fifteen minutes in his room every day. Now he nurses himself, as he says, like a race-horse at the start, but puts the whip on always towards the last, showing no signs of exhaustion. Besides preaching, he walks many miles on the Sabbath. He is not alone in pedestrian achievement for a literary man. Dickens, of all writers, walks probably the most every day.

The subject was from the Psalms: "He shall come down like rain upon the mown grass; as showers that water the earth," (72: 9) and was tenderly and eloquently handled. He dwelt upon its gentleness and universality as illustrative of the Blessed Spirit's mode of operation. The application, though simple, was singularly appropriate and effective. He appeared to use no notes. His voice is sweet and conversational, and could be heard with perfect distinctness all over the crowded house. But the manner and pronunciation were, to my mind, decidedly Anglican. It was that of a fine and courageous English gentleman, talking to you personally of the great Salvation, effectually disposing of one's objections and cavils, and convincing you that what he says must commend itself to every man's conscience in the sight of God.

While speaking he leaned gracefully over the desk most of the hour. The *attitude* itself seemed to preach. It was one of expostulation and entreaty. At length, toward the peroration, after closing the Bible, he straightened up into the fair proportions of a handsome man.

I lately saw his photograph at the house of a friend, taken while talking with Theodore L. Cuyler, in Brooklyn. They were represented to the life as they were eagerly consulting about the interests of the Kingdom of Christ. Mr. Hall's face is in no wise striking, and in an album would not arrest attention.

H. S. H.

Alaska in Winter.

Sitka, A. T., January 24, 1868.

I have already written that for sixty days after our arrival at this remote locality, the weather was damp and dubious without mitigation. But on the 9th of December the sky became clear, and since then (forty-six days) we have had very few storms. The winter has been far more unpleasant than we anticipated. Meteorologically, December footed up thus: Mean temperature, 30° 26'; coldest, 12° above zero; fair days, 17; cloudy or stormy, 14; prevailing winds, north and northeast.

January thus far foots up as follows: Fair days, 16; cloudy and snowy, 7; coldest night, 11° above zero. This was the lowest point to which the mercury has fallen within fourteen years. The ice is eighteen inches thick on the little fresh water lake back of the town, but none has formed in the harbor.

As to society, there has been much pleasant intercourse between the American and Russian officials. Surprise parties and masquerade balls have been frequent, especially during the Russian holidays. We had parties of twelve to twenty call every night, disguised with fur skins and hideous masks. Our Thanksgiving was on the same day as in the States, though we knew it not at the time. On New Years, I was surprised to see how many nice and novel dishes the American ladies prepared for the dinner at the "Club Room," the largest hall in the town. On the table were baked venison, roast goose (wild), stewed duck (wild), fried grouse, boiled salmon, stewed cod, and clam chowder — all dishes peculiar to this region.

There are some intelligent Russian families here, who are refined and moral, but the servants and private soldiers are neither. The latter, in their habits, are the filthiest of white people. Quite a number left on a vessel a few days since for the Amoor. To-day the late Governor, Prince Maksoutoff, leaves on the *Fideliter* for San Francisco. About one hundred Russians have filed their applications to become American citizens.

Supplies of vegetables and provisions of all kinds are ample, as one brig, two little schooners, and two steamers have reached here since New Years. Snow has covered the ground since the 22d of December. Improvements of late proceed slowly. One dwelling-house, two stores, a market-house, two drinking saloons, and two billiard shanties have been put up since the transfer, while every vacant lot has been claimed and recorded. A city government has also been organized, and a police court established. Several of the lower class of Russians have been fined for whipping their wives, and other abusive conduct.

Intercourse between the whites and Indians has not been quite as pacific as desirable. Gen. Davis, on the 19th of November, presented our national flag to the old chief of the Sitka Indians, accompanying it with appropriate remarks. The reply of the chief was characteristic of the red man; "Goods and money will turn to mist, but the words of the great chief would never change." He should hold the flag sacred, and would ever defend it.

A party of Indians from the mainland came here early in December, and have been troublesome. The leader goes by the name of "Sitka Jack." He has done all he could to induce the Indians here to remove their families and declare war. He argues that the Americans will not furnish them with powder and whisky — but the Hudson Bay Company, who are friends, will do it. Gen. Davis has dealt firmly with the natives and frustrated "Jack's"

schemes. He is now inclined to be peaceable. I do not see the indications of any rush to this Territory next spring. Enough will doubtless come to begin an exploration in search of the resources of this wide-spread Territory. Orient.

Correspondence from the Capital.

Sacramento, Feb. 10, 1868.

The question of the removal of the State Capitol, like the ghost of Banquo, will not down. The people of Sacramento are supposed to be somewhat nervous upon the subject just now. They should have become used to such agitation by this time. They have fought the battle over so often, they ought not to feel sensitive now in the presence of the grand building so rapidly approaching completion, and that, with a liberal appropriation, will be ready for the next Legislature. Seven hundred thousand dollars, the amount already expended upon it, ought to be a strong anchor to hold it here.

But one bill introduced into the Legislature puts the Capital up to the highest bidder, and the city that will build a new State House and generously donate it to the State will be entitled to the prize. In that case the present incomplete structure can stand as a monument to the folly of the men who did not, in the first place, conceive of such a brilliant project, and thus save to the State those precious thousands.

The Legislature, from presiding officers to pages, are off now on a grand excursion to San Jose, on the strength of the present agitation of this question.

There are a great many people who have scruples about cheating their fellow men, but have no conscience about robbing God. Especially is this true of the time that He claims as peculiarly His own. In the present instance, in order to save time, arrangements were made by those who extended the invitation to run an extra train from San Francisco to San Jose on Sunday. Scarcely a voice was lifted up against this Sabbath-breaking arrangement in either branch of the Legislature. One man said, if San Jose could stand it, he supposed they could, and thus closed about the only protest against it. There are a few members who could not approve of it, and no doubt did not go on that account.

It was sad to think of the good people of San Jose who were thus deluged at an hour when they desired quietly to assemble for worship. We are sorry that the State has been compelled to witness such a desecration of the Lord's day by its chosen representatives. If the present Sunday laws, which many are anxious to have repealed, had anything religious in them, the friends of the Sabbath might well feel discouraged. But it is simply the civil Sabbath that this legislation favors, and those who are friendly to the Sunday law will, no doubt, return and vote just as though they had not been on a Sunday excursion in search of a site for a new State Capital.

The great objection against Sacramento now is its supposed insecurity amidst the floods that sweep down upon it from the mountains. But the water has never been so high since there was a city here as during the present winter. The principal danger is from the American River, which comes in at the north of the city. It has been decided by the Levee Commissioners to raise the north levee four feet higher than the highest water mark of this year at Sixth Street, gradually rising to five feet above the same level at the railroad trestle-work, and five feet from thence to the high lands at Brighton. As soon as the report of the engineer is submitted and adopted, the work will commence, Capital or no Capital.

The city is rapidly improving now, and will be more prosperous during the coming summer than for years past. Work is about to commence on the railroad from here to Stockton. This will be an important contribution to its railroad interests.

Alpha.

Correspondence from Contra Costa.

Walnut Creek, February 3, 1868.

The weather, that never-failing topic for both writing and speech, we have all experienced enough of within the last month to disgust the most ardent admirer of the "web-foot" country, and to justify the most ardent longings for the frosts and snows of "Yankee land."

The beauty of our country scenery, which has been so often praised by tourists, is just now as effectually shut out from explorations as the snow-deluged white mountains or the "open seas" of the polar regions. Nothing but dire necessity entices wheeled vehicles from their winter housings, and then with not less than four horses attached to a light express wagon.

Footmen and equestrians occasionally congregate at the country store and post office to await the arrival of the tardy mail on horseback, instead of in a four-horse coach, and talk over the weather, politics, bad roads, and gloomy things generally. In short, the country has the "blues."

We have awaited for weeks past the return of bright skies and a more genial time, to bring up the subject of building a church in the flourishing little village of Walnut Creek. There is also great necessity for a school house in the same place. Most of the people seem to think it impossible to effect both these objects. But I have a plan to suggest to the farmers of this neighborhood and the State who find it so difficult to pay their minister, build churches and school-houses, and meet the many demands of Christian benevolence on them. It is that they set apart five, ten, twenty, or fifty acres of their wheat, not less than one-tenth of their crop, to be faithfully accounted for and applied to these several objects. We have little doubt that if any farmer will pursue this course for three or four years, he will find himself so blessed and prospered that he will not be willing to return to his loose and impulsive way of benevolent contribution. We know one man who purposes to devote twenty acres of wheat to the Lord's work this year, and he is in moderate circumstances and does not own any land. If the farmers in this region will carry out this plan faithfully, we can have both church and school house before the summer is past. Aleph.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

RECENT PUBLICATIONS.

HISTORY OF RATIONALISM. By John Hurst, D.D. New York: Carlton & Porter. San Francisco: H. H. Bancroft & Co.

We have alluded to this history in another article, but will not fail to call attention here, also, to a book full of interest to all who desire to be informed upon subjects of great moment. Dr. Hurst has had abundant means of information, by study and observation for a course of years in the midst of the land where Rationalism has produced most of its fruits, and his ability to form a just judgment will be questioned by no one who reads his book. As an antidote to Lecky, who writes from the point of manifest sympathy with the results which are here presented so forcibly, and with such apparent honesty, we commend the History of Hurst to the careful reading it will richly repay.

We have received *The Californian* this week in a new form. It has taken the folio dress, and looks well in it, yet we do not like it, in regard either to taste or convenience, as well as the quarto it has exchanged. The quarto form is being extensively adopted by Eastern and English papers, as preferable, and the verdict of readers, so far as we have had opportunity to judge, is largely in favor of the new style.

Mad. Swetchine's Life and Letters.

This volume is one both to read and study — and especially does it commend itself to women, for in the life it exhibits, we see the germs of moral greatness, cultivated and matured by the same assiduous care and industry which marks its intellectual development. The benevolence of Madame Swetchine was never spasmodically exercised. Underlying its growth, was an instinctive prompting to goodness, fostered by an atmosphere of appreciation, and owing much to favorable surroundings. But its gradual unfolding, was the immediate result of a conscientious stewardship, and a systematic occupation of talent.

Her father, M. Soymonof, was a Russian noble, and added to his high rank the office of Private Secretary to the Empress, Catherine II. He is represented as "grave and scholarly, with a countenance and manner full of nobleness." Upon his daughter Sophia, afterwards Mad. Swetchine, was lavished all that could gratify taste, and minister to intellectual culture. As a child, she was brilliant, precocious and affectionate; and from her earliest years, a familiarity with court etiquette lent a grace and charm to her natural refinement of manner which rendered her conspicuous in the distinguished circle of society she was destined to enter.

The sudden death of the Empress having advanced Paul I. to the throne, Sophia Soymonof, just entering her tenth year, was appointed Maid of Honor to his consort, the Empress Mary, who controlled the imperious and irritable Paul, by her illustrious example of high principle and sweet serenity of spirit. A strong affection for the Empress sprang up in the sympathetic heart of Mlle Soymonof, and under the auspices of this beautiful and gifted woman, her studies were still pursued, while her manners, always refined, acquired a polish which gave her "an air of great distinction."

At the age of sixteen, she married Gen. Swetchine, a man of twice her years, but of upright character and imposing presence, who occupied the post of Military Commander, and was subsequently, in addition to his high rank, entrusted with the post of Provisional Governor of St. Petersburg.

Surrounded from this time with society as brilliant as any in Europe, and daily encountering the finest minds of the age, we may well imagine that Madame Swetchine reaped to the utmost its advantages. Politics, religion, literature, were discussed in her saloon. But it was sorrow which unfolded to her the needs of her own soul. The death of her father, M. Soymonof, occasioned profound grief, and in that first fainting of the soul, when it reaches out for the support earth cannot give, she cried in her anguish to the Heavenly Sympathizer. The phœnix of prayer sprang from the fires of affliction, and winging its way to the throne of the Eternal, brought healing to her wounded heart.

Her moral activities were more keenly alive than ever; her sympathies responded to every touch of misery or sorrow. She visited the poor; allotted hours of each day to projects for the amelioration of the condition of the peasants on her estates, remote from St. Petersburg; arranged Houses of Industry; interested herself in Asylums for the Deaf and Dumb; kept up an extended correspondence, with the object of furthering her benevolent designs; gave largely of her means; and especially investigated those delicate cases of extreme poverty, whose wants are felt, rather than expressed. In the midst of these occupations, she found time for study—reading, and making voluminous extracts from, and comments on, the works she read; superintended the education of her youngest sister, and after her marriage, adopted a daughter, who reaped the benefit of her immense literary resources, and the influence of her illustrious example. She was, at this period, a member of the Greek Church—the powerful influence of the Count de Maistre having inclined her more than ever to the contemplation of religious subjects; nevertheless, "her mind, familiar with the great intellects of all lands and ages, watched modern controversies keenly, and her researches were then tending in the direction of the German philosophy."

It is interesting to observe the processes by which this craving soul reached at last the source of all truth, but established itself under the autocratic dominion of the Roman Catholic Church, clogged its onward progress by stately ontward observances, and the dominion of a priesthood. Overlooking the tyranny and ignorance born of its inflated supremacy, Mad. Swetchine accepted in the spirit of St. Augustine, the best and noblest teachings of the church. From a severe study of the philosophy of Kant, Fichte, and Hegel, she had failed to satisfy more than her intellectual ambition, and she now proposed to herself a laborious research among the ecclesiastical documents she had amassed, preparatory to her renunciation of the Greek Church.

Says her biographer: "She ascended the sources of History; she studied languages; she compared dates; over and above all, she gave herself to prayer; and the infinite and all compassionate Father said 'Peace, be still,' to the hitherto unquiet thought, and became indeed the sole treasure of her heart."

She writes: "My last Greek Communion, on the 20th of June, 1815, in the Chapel of Peterhof, was partaken with the sole purpose of disposing of my remaining hesitation. God, in His goodness, did not despise my choice of means; and, on the 27th of October, in the same year, I accomplished my abjuration."

During this period she compiled, from various authors, nineteen books of extracts; and her letters written to intimate friends, richly repay perusal. Those addressed to the Countess Edling are full of life and interest.

Her notes and descriptions of nature and art, written from Italy, render the volume valuable, apart from the life it represents; and her social relations involve the mention of so many names known to fame, that this adds a deeper interest to a volume already so rich. N.

EDUCATIONAL.

Educating the Heart.

The story is often told of Sir Walter Scott, when a lad in school, cutting off his classmate's button. This he did in order to confuse him, and thus get above him in class; as he perceived that the boy always fingered this button in recitation, and seemed in some way to be helped by it in remembering his lesson. The plan succeeded, and the boy, from that day, lost heart in study and, as a man, subsided into some very humble place. The most authentic form of this anecdote seems to be printed in "Rogers Recollections." A teacher once related this story to a class of young ladies, in illustration of the power of bodily habit. They paid little attention to the force of the story, as thus employed, but were at once indignant at the transaction on account of its stupendous meanness. The teacher gladly dropped the text with which he began, and hastened to nurse the wholesome indignation. And is not this the true theory of education — to elicit all that is best, not only from the minds of the pupils, but their hearts? So at least say some of the best thinkers the world has ever seen; and among them, Edmund Burke, as quoted in the same volume which we have mentioned above. "Education should be considered as improving the head as well as the heart. It is too often mentioned as a mere school acquirement." He proceeds to add, however, an idea which we are disposed to qualify; as professional men in any calling are allowed to criticise non-professionals of even the greatest eminence in other spheres. "The last may be bought by any rich, vulgar parent; the first can only be imbibed from [domestic] guardians, who have themselves a thorough and refined sense of true virtue." In this sentence we would omit the word "domestic," as facts abundantly show that the improvement of the heart may be carried forward in the school as well as at home. Is not the scene mentioned at the beginning of this very article an example in point? C.

Railing.

The life of Gurowski reads an important lesson to young men. (*Atlantic Monthly*, November, 1866.) He was a Polish Count, at first warmly interested in the deliverance of his native land, but afterwards employed by the Czar at St. Petersburg, in connection with the Department of Public Instruction. Leaving that place he became a lecturer on Political Economy in the University of Berne. Coming to America, he lectured on Roman Law at Cambridge, contributed to the New American Cyclopedia in New York, and was employed by Secretary Seward at Washington. Thus, he was a man of noble extraction, of profound erudition, and of wide acquaintance with the world. But his life was a complete failure. He held no important position for a long period, and he retained permanently none of his many distinguished friends. He lived the life of a wanderer, and died almost wholly unregretted. The explanation of all this was an uncontrollable tongue. He wrote against Poland; insulted his

master the Czar; denounced all that was revered at Boston; fell out with the editors of the Cyclopedia, and vilified Secretary Seward. To meet him was to be railed by him — sooner or later. Railing accusations are emphatically rebuked in God's Word. The example of the archangel Michael is adduced in exhortation against them. The archangel would not use them even in the extreme case of contending with so evil a being as the devil, and disputing for so hallowed a thing as the body of Moses. C.

Lawyers' Penmanship.

Daniel Webster compared the word "would" in Rufus Choate's handwriting to "a small gridiron struck by lightning." Many of the stock pleasantries of the newspapers refer to the bad penmanship of certain lawyers. These are harmless so long as they do not insinuate the idea into some unguarded mind that good penmanship is not, after all, very desirable in a lawyer, as well as in any one else. Against such an idea we have the following remarks from Sharswood, of Pennsylvania. "The importance of a good handwriting cannot be overrated. A plain, legible hand any man can write who chooses to take the pains. A good handwriting is a passport to the favor of clients, and to the good graces of judges, when papers come to be submitted to them. It would be a good rule for a young lawyer, though at first, perhaps, irksome and inconvenient, never to suffer a letter or paper to pass from his hands with an erasure or interlineation." (*An Essay on Professional Ethics.*) C.

Reconciled.

O, years gone down into the past;
What pleasant memories come to me
Of your untroubled days of peace
And hours almost of ecstacy!

Yet would I have no moon stand still,
Where life's most pleasant valleys lie;
Nor wheel the planet of the day
Back on his pathway through the sky.

For though, when youthful pleasures died,
My youth itself went with them, too;
To day, aye! even this very hour,
Is the best time I ever knew.

Not that my Father gives to me
More blessings than in days gone by—
Dropping in my uplifted hands
All things for which I blindly cry:

But that His plans and purposes
Have grown to me less strange and dim;
And where I cannot understand
I trust the issues unto Him.

And, spite of many broken dreams,
This have I truly learned to say—
The prayers I thought unanswered once
Were answered in God's own best way.

And though some dearly cherished hopes
Perished untimely ere their birth,
Yet have I been beloved and blessed
Beyond the measure of my worth.

And sometimes in my hours of grief,
For moments I have come to stand
Where, in the sorrows on me laid,
I felt a loving Father's hand.

And I have learned the weakest ones
Are kept securest from life's harms;
And that the tender lambs alone
Are carried in the Shepherd's arms.

And sitting by the wayside blind,
He is the nearest to the light
Who crieth out most earnestly,
"Lord, that I might receive my sight!"

O, feet, grown weary as ye walk,
Where down life's hill my pathway lies,
What care I, while my soul can mount,
As the young eagle mounts the skies!

O, eyes, with weeping faded out,
What matters it how dim ye be?
My inner being sweeps untired
The reaches of eternity!

O, death, most dreaded power of all,
When the last moment comes and thou
Darkenest the windows of my soul,
Through which I look on nature now;

Yea, when mortality dissolves,
Shall I not meet thine hour unawed?
My house eternal in the heavens
Is lighted by the smile of God!

Phebe Cary.

Wouldn't Take Twenty Dollars.

Some waggish students of Yale College, a few years since, were regaling themselves one evening at the "Tontine," when an old farmer from the country entered the room and inquired if he could obtain lodging there. The young chaps immediately answered in the affirmative, inviting him to take a glass of punch. The old man, who was a shrewd Yankee, saw at once that he was to be made the butt of their jests, but taking off his hat and telling a worthless little dog he had with him to lie under the chair, sat quietly down. The students anxiously inquired after the health of the old man's wife and children, and the farmer, with affected simplicity, gave the whole pedigree, with numerous anecdotes about his farm, stock, etc.

"Do you belong to the church?" asked one of the wags.

"Yes, the Lord be praised, and so did my father before me."

"Well, I suppose you will not tell a lie?" asked the student.

"Not for the world," added the farmer.

"Now, what will you take for that dog?" pointing to the farmer's cur, who was not worth his weight in Jersey mud.

"I would not take twenty dollars for that dog."

"Twenty dollars! why, he is not worth twenty cents!"

"Well, I assure you I would not take twenty dollars for him."

"Come, my friend," said the student, who, with his companions, was bent on having some capital fun with the old man; "Now, you say you won't tell a lie for the world; let me see if you won't do it for twenty dollars. I'll give you twenty dollars for your dog."

"I'll not take it," replied the farmer.

"You will not? Here, let's see if this won't tempt you to tell a lie," added the student, producing a small bag of half dollars, from which he counted small piles on the table, where the farmer sat with his hat in his hand, apparently unconcerned.

"There," added the student, "there are twenty dollars, all in silver. I will give you that for your dog."

The old farmer raised his hat to the edge of the table, and then quick as thought scraped all the money into it except one half dollar, at the same time exclaiming,

"I won't take twenty dollars. Nineteen and a half is as much as the dog is worth. He is your property."

A tremendous laugh from his fellow students showed the would-be wag that he was completely "done up," and that he need not look for help in that quarter; so he good-naturedly acknowledged himself beat, shook hands pleasantly with the farmer, and they parted in great glee, the student retaining the dog, which he keeps to this day, as a lesson to him never to attempt to play tricks on men older than himself, and especially to be careful how he tries to wheedle a Yankee farmer.

The Poor Musician and his Mate.

A STORY FOR THE LITTLE FOLKS.

One beautiful summer day there was a great festival in the large park at Vienna. This park is called by the people the "Prater." It is full of lovely trees, splendid walks, and little rustic pleasure-houses. At the time of which I am speaking there were a great many people there, some young and some old, and many strangers, too. And all who were there enjoyed such a scene as they had probably never beheld before. Be that as it may, the Prater was almost covered with the crowds of people. Among the number were organ-grinders, beggars, and girls who played on harps. There stood an old musician. He had once been a soldier, but his pension was not enought to live on. Still he didn't like to beg; therefore, on this particular festival day, he took his violin and played under an old tree in the park. He had a good, faithful old dog along with him, which lay at his feet and held an old hat in his mouth that passers-by might cast coins in it for the poor man.

On the day of the festival which I have mentioned, the dog sat before him with the old hat. Many people went by and heard the old musician playing, but they didn't throw much in. I wonder the people did not give him more, for he was truly a pitiable object. His face was covered with scars received in his country's battles, and he wore a long gray coat, which he had kept ever since he had been in the army. He even had his old sword by his side, and would not consent to walk in the streets without carrying his trusty friend with him. He had only three fingers on his right hand, so he had to hold the bow with these. A bullet had taken off the other two, and almost at the same time a cannon-ball had taken off his left leg. The last money he had had been spent in buying new strings for his violin, and he was now playing with all his strength the old marches he had learned when a boy, from his father. He looked sad enough when he saw the multitudes pass by in their strength and youth and beauty; but whenever they laughed it was like a dagger to his soul, for he knew on that very evening he would have to go to bed supperless, hungry as he was, and lie on a straw couch in a little garret room. His old dog was better off, for he often found a bone here and there to satisfy the cravings of hunger. It was late in the afternoon; his hopes were almost like the sun—they were both going down together. He laid his old violin down by his side and leaned against the tree. The tears streamed down his scarred cheeks. He thought none of that giddy throng saw him, but he was mistaken. Not far off stood a gentleman in fine clothes, who had a kind heart. He had listened to the old musician, and when he saw that no one gave him anything his heart was touched with pity. He finally went to the dog, and looking into the hat saw only two little copper coins in it. He then said to the old musician:

"My good friend, why don't you play longer?"

"Oh! my dear sir," replied the old man, "I cannot; my poor old arm is so tired that I cannot hold the bow; besides, I have had no dinner, and have little prospect of supper."

The old man wiped the tears away with his feeble old hands. The kind gentleman resolved to aid him as best he could. He gave him a piece of gold and said:

"I will pay you if you will loan me your violin for one hour."

"Oh!" said the musician, "this piece of money is worth more than half a dozen fiddles like mine."

"Never mind," said the gentleman; "I only want to hire it one hour."

"Very well; you can do what you will," said the old man.

The gentleman took the violin and bow in his own hands and said to the old man:

"Now, my mate, you take the money and I will play. I am quite sure people will give us something."

Now, was not that a singular musical association? They had but just become acquainted, and immediately entered into an arrangement to work together for the public.

The strange gentleman began to play. His mate looked at him with great wonder; he could hardly believe it was his old violin that made such beautiful music. Every note was like a pearl.

The first piece was not finished before the people, observing the strange sight and hearing such wonderful music, stopped a moment in curiosity. Every one saw that the fine looking gentleman was playing for the poor man, but none knew who he was. By-and-by the people began to drop money into the hat, and the old dog seemed delighted to receive so many pieces of gold for his master. The circle of hearers became larger and larger. Even the coachmen of the splendid carriages begged the people inside to stop and hear the music. Still the money increased. Gold, silver and copper were thrown into the hat by old and young. The old dog began to growl. What in the world could be the matter? One gentleman, as he dropped a large piece of money into the hat had struck him on the nose, and he came very near letting the hat and money fall. But it soon became so heavy he could not hold it any longer.

"Empty your hat, old man," said the people, "and we will fill it again for you."

He pulled out an old handkerchief and wrapped the money in it, and put it in his violin-bag.

The stranger kept on playing, and the people cried out, "Bravo! bravo!" in great joy. Even children seemed carried away with rapture. At last he played that splendid song, "God bless the Emperor Francis!" All hats and caps flew off their heads, for the people loved their Emperor. The song finally came to an end. The hour was ended, and the stranger handed back the violin to the old musician.

"Thank you," said he. "May God bless you!" and the stranger disappeared in the crowd.

"Who is he? Who is he?" said the people. "Where does he come from?"

A person sitting in one of the carriages said: "I know him. It is Alexander Boucher, the distinguished violinist. It is just like him. He saw that the old man needed help, and he determined to help him in the best way he could."

The people then gave three cheers for Boucher, and put more money in the old man's hat. When he went home that evening he was richer than he had ever been before. Before he went to his bed he folded his hands and prayed that God might bless good Boucher, so that when he should get to be an old man he might have good friends.

AGRICULTURAL.

System on a Farm.

There a thousand little things that really do not take any time at all to attend to, because they come in as a part of one's general management, and occupy odd hours only. One man in passing through his fields may see a mullein or a dock, or some other vile weed of a stranger sort, and up it comes. He will not allow such growth to sap the goodness of his soil. Another will pass them by unobserved. A whole pasture of mulleins, a whole field of white weed, a whole garden full of yellow dock, would hardly excite his notice.

Now, the farmer who takes a few steps to pull up a yellow dock really spends but little time in keeping down the vile weed, and he probably effects more in his day's work than the man who neglects it. He will soon have less, till his fields are clean and free from such worthless growth. It is the system that one adopts, and the want of system on the part of the other, that makes the difference between the thrifty farmer and the careless one. If you find a man's fields reasonably clean and free from weeds, his pastures free from mulleins and such like growths, you will expect to find his barns kept in order, and would observe but little waste of feeding substances, or other things about the premises; you would find his heart in his business; and it makes a wonderful difference at the end of the year whether this general system of economy is adopted or not.

A farmer who keeps his tools scattered about, and who suffers the hay to go to waste on the barn-floor, will justify it on the ground of want of time; but the fact is, a reasonable degree of order and neatness saves time; and not only that, but it makes the difference between success and failure in any farming enterprise. It makes a vast difference in the results of the year, for instance, whether a herd of cows in a dairy are regularly milked, regularly fed, and regularly turned out of the barn, or not. Everybody at all conversant with farm management knows that. In one case it is a steady, persistent system; in the other it is chance, and the chance is that it won't pay.

In conducting any farm, many things have to be done that do not in themselves pay any immediate profit. It is the future results that are to be looked to for the returns in money. If the fields are kept clear of weeds, the grass will flourish and yield good crops. If the pastures are cleared of brush and mulleins, they carry more stock, and the good crops of hay and the good pasture put on flesh, and beef and mutton which, in the form of these products, or in the form of milk, or work, or wool, must be expected to pay in dollars and cents. Here is the result of system, and the farmer who adopts the true system and follows it up will be sure to succeed, or if not, he ought to, for the result will generally measure the value of the system.—*Kentucky Ploughman.*

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents.
F. E. WEYGANT, Proprietor.

PACIFIC COAST ITEMS.

The Legislature, after voting to themselves the usual *per diem* pay, adjourned from Saturday last to Tuesday, and took a pleasure trip to San Jose. They left here on Sunday at 11 A.M., and returned on Monday in season to take the steamer for the Capital. Of the crowd who left on the Sunday train the *Alta* reports forty-seven legislators and the others hangers-on. The ostensible object was the examination of the advantages of San Jose for the State Capital.

The Vallejo *Recorder* says the laying of the railway track to Sacramento is to go on rapidly as soon as the ground is dry, and leads us to infer that the cars will be running between that town and Sacramento by the fourth of July.

It is announced that the cars are to begin to run between Suscol and St. Helena, on the Napa Valley Railway, this week. Distance, twenty-two miles. In June, the Company propose to run the trains from Vallejo to Calistoga, forty miles.

The precise locality of the terminus of the Great Pacific Railway is becoming a leading topic of discussion with the leading land-owners and merchants of this city. One project of growing probability is the construction of a bridge across the Bay from the Alameda shore to Hunter's Point.

The grading of the railway between Sacramento and Stockton is to be finished by the first of June.

The roads in the rural districts have been rapidly improving under the influence of the sunshine and prevailing west wind. There is a manifest increase of visitors to the city during the past week.

The Central Pacific Railway propose to have their trains running to a midway point in the Humboldt River Valley by the first of July.

The San Jose Railroad Company propose to extend their line to Gilroy before the rains of another winter.

The *Alta* argues that the agricultural future of this coast depends upon new markets. It says: "It cannot be expected that what is now an exceptional state of things abroad, by which California wheat meets there with ready sale, is to be continued when prices return to their natural level. If California is to produce largely and profitably, she must find her market in China, where the consumption may be indefinitely extended so long as the price does not rise above the rice equivalent as human food.

In Idaho the prevailing winter amusement is sliding on snow-shoes. The Owyhee *Avalanche* says; "At almost any hour of a fine afternoon parties can be seen on long Norwegian snow-shoes, coming down our mountain sides with the speed of the wind — often running at the rate of a mile per minute. Riding thus is quite an art, and it is amusing in the extreme to see a company of novices attempt it for the first time.

It has been a week of rare excitement in mining stocks in San Francisco. There is a general improvement; but the coming election in the Hale & Norcross sent that stock, on Wednesday, up to a fabulous price. Actual sale was made at $10,000 per foot, and afterwards $16,000 was offered. This distances by far the palmiest day of the Gould & Curry.

The Steam Plough had another trial at Martinez last week. It appears to be a success — dresses a strip of land twelve feet wide, and moves one hundred feet a minute. It not merely turns over, but thoroughly pulverizes the soil. It will dress twenty-five to thirty acres per day. Of course it cannot handle stones of large size.

The Napa *Reporter* justly denounces the practice of turning into the streets half starved cattle, to destroy the shade trees which are so essential to the beauty and enjoyment of our villages and rural homes. "The nocturnal thief who visits our wood-piles is not half so dangerous."

The Senate has passed a bill providing for the election of our Congressmen next November, and at each general election every second year thereafter. The House will probably concur.

The San Jose papers report an active emigration from the northern part of this State to the coast counties of Santa Barbara and San Luis Obispo. They cannot find a finer climate.

The dentists, at their recent State Convention, estimated the business of the profession in this State at $5,000,000 per annum — quite a per centage of which is done by quacks.

The Columbia River is now open, and our citizens are awaiting a large arrival of grain and apples.

The Assembly, by a vote of 41 to 11, passed the bill giving Hutchings and Lamon 160 acres each in Yosemite. This over-rides the Gubernatorial veto.

TELEGRAPHIC SUMMARY.

Eastern.—The new Constitution submitted to the people of Alabama has been defeated by the popular vote. The entire white vote of the State is only 900....Congress is once more talking about impeachment....A resolution in the House to remove the Capital to the Valley of the Mississippi was defeated by a majority of only 20....The President charges Gen. Grant with duplicity in his conduct on leaving the War Office....The *Henry Chauncey* left New York for Aspinwall with 987 passengers, on Wednesday....Senator Guthrie, of Kentucky, has resigned on account of ill health. ....The mercury was forty degrees below zero in Minnesota on Sunday....Rumor says Gen. McClellan will be nominated Minister to England....Gold is 142, at latest accounts.

Foreign.—It is rumored that Napoleon has changed his policy of sustaining the Pope, and will renew his friendly relations with Victor Emanuel....Prussia, through her Prime Minister, gives assurance of her friendly feeling toward the United States. She may be the umpire between us and England in settling the Alabama claims....The Fenian excitement still rages in Ireland....The Emperor of China has gained a victory over the insurgents....Affairs at Paris indicate that within a twelvemonth Louis Napoleon may find it convenient to look after the real estate he is said to own in this city.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, February 12.

Flour—Sales of 2,000 bbls Superfine, $7; 2,000 bbls Stockton Superfine, for export, private.

We quote city brands as follows:

Superfine, hf sks, ₱ 196 lbs.....$7 00@7 25
qr sks..... 7 25@7 50

CURRENT TOPICS.

Young Men's Christian Associations are assuming a more prominent place among the means of usefulness in our cities than ever before. Accounts in late papers show that those who have carefully watched the influence of these associations, unwilling to give large sums for their permanent establishment and the supply of proper facilities for success till fully convinced that they are likely to do what they propose, are now contributing liberally for the erection of buildings and the purchase of libraries, and the equipment generally of agencies so valuable in the support of all good. Revivals are reported, having their origin in the Associations. Missionary work is conducted by those united in them. Regular, systematic, extended efforts are made for the aid and profit of young men who are in the cities without any to express interest in their welfare. Opportunity is furnished for them to have society, reading, exercise, recreation, without exposure to the dangers that elsewhere attend these means of advantage and pleasure. Men of wealth see this to be an economical mode of promoting public morals. Men of business see it to be an efficient mode of protecting and benefitting those under their employ. Christians are convinced that great good may be accomplished by such an auxiliary of the church. And young men are glad to avail themselves of so useful an agency in the attainment of any worthy ends. Let us not fail to profit by the experience and action of those in the older cities. Our Young Men's Christian Association is doing a noble work, is preparing itself to do more — is in need of money that it may do this well, and without hindrance. Let all good men regard those thus engaged with favor, and give them sympathy and help.

Many of the leading papers, of all parties, are very busy now, thinking themselves charged with the responsibility of President-making. It is really sad to see how completely depraved, and senseless, and destitute of good generally a man can become by simply being presented by either party as a candidate for the highest office. Men of different political relations, whom we had been wont to regard as at least worthy of respect for their talents, or achievements, or character, we suddenly find to be by no means the men we thought they were. Even those whose praise was in all mouths, and in all papers, until they were so unfortunate as to be mentioned as possible representatives of one or another party in the coming election, are now declared to be of but small ability, and their success is attributed to circumstances, or to the better men they had about them. These facts are humiliating — they are well nigh disgraceful. Can any one tell why we should represent to other nations that those whom we select to be our chief officers are only fit to be targets for abuse? Shall a man's life and character have no shield when his countrymen wish him to be their leader? Party spirit, as exhibited by not a few of those who assume to be party dictators, deserves the people's prompt and emphatic rebuke. We trust that in conventions, in the canvass, and at the polls, they will not hesitate to administer it.

The Presbyterian Historical Society is moving in the matter of obtaining a fire-proof building for its library in New York City. This Society has been common ground for the different branches of the Presbyterian Church, and the influence of leading minds on each other, as they have come in contact at its meetings, has been one of the prominent means by which the prevalent union feeling has been promoted. Here all learn to hold in less esteem the peculiarities by which the parts are distinguished, because of the grander interest connected with their common history, and creed, and aim. Here schools and divisions are forgotten, and all are Presbyterians. Of late a larger number have derived unwonted pleasure from the effect of a society hallowed by so many sacred associations, and possessing power to reach to many noble men, and a new interest attaches to its movements. We hope soon to hear that an edifice worthy of the purpose has become the treasure-house of its valuable books and documents.

The news from Japan, though not entirely unexpected, is full of interest. The resolution to open the ports has roused the Daimios to insurrection, and for the time they seem to have pressed the Mikado to abandon his policy, but the feeling of the people is too clearly in favor of this policy to render opposition permanently successful. We shall wait with anxiety, yet without much doubt, for further news, believing that the marvelous advance of that people towards civilization, apparent during the past ten years, will not now be seriously checked, when they are more than ever convinced of the advantage that must attend the change which only prejudice or jealousy resists.

Kentucky, according to the report of the Agricultural Bureau, has raised 60,000,000 pounds of tobacco in a year, or nearly enough to furnish two pounds to each person in the United States — men, women, and children. Many boys smoke or chew, or both; but we are glad to know that comparatively few women do either. Well, two pounds a head ought to be sufficient, and hence Kentucky should supply the whole country. But she does not. Millions of pounds are consumed in the United States beyond her production. It is a serious reflection that every pound of this material is not only a waste in itself, but a sad waster of health. If men used only what they need for health and enjoyment, they would not be the slaves they are to employers and tax-gatherers.

Those people of our State who think their vicinity desirable as a site for the Capital are now applying their various kinds of logic to the Legislature to convince that body that a change would be wise. It is not probable that any change is seriously contemplated, though it has long ago been proved that Legislatures may do what the people think impossible, and we may find ourselves with a new center before the session ends. That this State should transfer its seat of government, however, would not be so much to be lamented as that the proposition should find favor which urges the removal of the National Capital to some new locality. The Legislature of Missouri is said to be about to make such offers to the general government that St. Louis may become the capital of the country. To say nothing of the loss in money, were any other place than Washington to be the national center, it would be a great and irreparable loss were all the associations and history of Washington no longer to cluster around the government of the nation. No merely geographical advantages could balance that loss, and no citizen can tell beforehand how much he would grieve if the name of Washington, and the place in which he planted the government, were no longer identified with its administration. There can be but one Washington, though there may be a multitude of places called by that name, and that should be the country's capital for generations to come, if not while the nation lives. We do not think it should be an open question whether it may be abandoned.

There is new evidence that the Indians will not abide by the treaties which were supposed to make peace with them certain for some years at least. The telegraph announces that two thousand Indians are making extensive depredations in the territories of Idaho and Montana. New treaties may avail to satisfy these tribes, but the truth seems to be more and more fully confirmed that only most relentless and vigorous war will reduce them to a condition in which they can be trusted.

The time was when life insurance companies had opportunity to take advantage of those who availed themselves of their offers, and a prejudice existed against them which should not now be felt. The calculations upon which their rate tables are based are so thoroughly and carefully wrought out, and the principles upon which insurance on life may be demonstrated to be safe are so clearly developed that it is as legitimate a business as any other. The competition also is so sharp between different companies that one becomes a check upon another, and no company can long flourish that does not accept the gene-

ral system, which is so simple that any one can comprehend it, with a little study. The recent introduction of several additional companies from the East among us, with the effort to establish others that may be managed only here, has excited more than ordinary interest in the subject, and new legislation has been sought that may protect, or assist, as the case may be; and if judicious, such legislation may be desirable. Still it is more wise, in all ordinary cases, to permit the natural influence of business competition, by which, in matters of this kind, the rights of the people are quite as likely to be protected as by any forms of legislation in detail.

Religious Intelligence.

PACIFIC COAST.

The Convention.

It having been decided in a preliminary meeting to call a Union Convention of Presbyterians, to be held in the Howard Presbyterian church of this city, on Wednesday evening, the 26th of February, at 7 o'clock, the undersigned cordially invite all interested in ratifying the action of the great National Convention in Philadelphia, to meet together at that time. A general prayer-meeting will be held in the same place at 3 o'clock of the same day, which it is hoped will be largely attended.

H. M. Scudder,	Charles Wadsworth,
S. H. Willey,	George Pierson,
E. B. Walsworth,	Chas. Russell Clarke,
L. Hamilton,	James S. Wylie,
Richard Wylie,	James Wylie,
T. E. Taylor,	M. M. Gibson,
James Eells,	S. D. Phelps,
Fred. Buel,	W. A. Palmer,
A. W. Loomis,	Cyrus Palmer,
S. T. Wells,	Charles A. Hawley,
J. H. McMonagle,	J. D. Arthur,
J. K. S. Latham,	Nathaniel Gray,
James B. Roberts,	Geo. L. Kenny,
Erwin J. Crane,	H. P. Coon,
S. S. Harmon,	James Pierpont.

Presbyterial Notice.—The Presbytery of California stands adjourned, to meet in the First Church, San Francisco, on Wednesday, March 11th, 1868, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James Eells, D.D., the retiring Moderator. The attention of ministers and churches is called to the instructions of the Presbytery, requiring brief narratives of the state of religion, together with statistical reports, to be sent to the Chairman of the Committee on Narratives, ten days before every spring meeting. Rev. F. Buel is the present Chairman of said Committee.

Feb. 11th, 1868. John G. Fackler,
Stated Clerk.

Sunday School Consultation.

We, the undersigned, Pastors and Sunday School Superintendents, cordially invite all Sunday School teachers, officers, and friends of the cause to be present at a preliminary meeting at the First Congregational church, on Tuesday evening, February 25th, at half past seven o'clock, to consider the propriety of holding a State Sunday School Convention during the coming summer.

Rev. M. C. Briggs, D.D.,	Rev. L. P. Webber,
Rev. H. M. Scudder, D.D.,	Rev. Geo. Mooar,
Rev. Jas. Eells. D.D.,	James B. Roberts,
Rev. A. L. Stone, D.D.,	L. B. Benchley,
Rev. Chas. Wadsworth, D.D.,	R. S. Davison,
Rev. H. D. Lathrop,	J. A. Eaton,
Rev. J. A. Benton,	J. Palache,
Rev. John G. Fackler,	Wales L. Palmer,
Rev. M. M. Gibson,	E. D. Sawyer,
Rev. W. J. Nichols,	R. J. Trumbull,
Rev. L. Hamilton,	W. H. Coddington,
Rev. E. C. Bissell,	S. Franklin,
Rev. H. A. Sawtelle,	Jas. Kirkpatrick,
Rev. I. N. Hurd,	H. H. Lawrence,
Rev. Selah Merrill,	S. B. Stoddard,
Rev. W. A. Loomis,	Amasa Pratt,
Rev. J. B. Knight,	H. B. Holcomb,
Rev. W. S. Birney,	Chas. Geddes,
Rev. Joseph Rowell,	C. J. King,
Rev. Geo. Pierson,	L. L. Alexander,
Rev. J. M. Alexander,	F. W. Gill.

Presbyterian Church in Alameda.—Alameda is one of the thrifty little towns growing up in the vicinity of San Francisco Bay. In November, 1865, the Presbyterian church was organized with twelve members. S. A. Hastings was elected Elder, and John Wiggin, Deacon. Previously, the only religious organization was the Methodist. In 1864, Rev. George Pierson, of Brooklyn, held an afternoon Sunday service for six months. He was succeeded by Rev. W. W. Brier, then laboring in behalf of home missions. A Board of Trustees was chosen, and for a time services were held in the High School building.

Temporary supplies were procured till August, '66, when Rev. F. L. Nash accepted a call to labor as stated supply for one year. In March following, he was installed pastor by the Presbytery of San Jose. During the past year the church has been abundantly prospered. The regular Sabbath exercises have been well attended, and the Sunday School and Bible Class have been constantly increasing in numbers. Elder S. A. Hastings is Superintendent. Twenty new members have been added to the church, making the whole number thirty-seven. Dr. Haile has been ordained Elder, and has, by his liberality done much for the prosperity of the society.

The new church edifice, built in gothic style, is now completed. It is neat and spacious—an architectural ornament to the town. It is, probably the best church edifice in the State, outside of the larger towns. Success to its pastor and people.

The New Presbyterian Church.—We last week referred to the Calvary Church Mission and its rapid progress. The new church edifice is to be completed by the 20th of April. It will stand on a lot 60x122 feet, on Howard Street, between Twenty-first and Twenty-second streets. The edifice will be a neat structure, accommodating 300 persons. The means for the purchase of the lot were mainly contributed by the residents of that rapidly growing neighborhood, who feel the want of church and Sabbath school privileges in their vicinity.

This enterprise is under the charge of Rev. Jas. H. Marr, a graduate of Princeton, who has recently come amongst us. He has not had the opportunity to be heard in that locality, as a preacher, on account of the absence of a place to hold meetings; but he has interested those with whom he has come in contact, and, as soon as the new church will allow, he intends to organize a church and maintain regular services.

In connection with this enterprise, we call attention to the Fair to be held by the ladies of Calvary Church, the second week of March. The proceeds will be applied toward the erection of the proposed church edifice. All who desire the extension of the Church of the Redeemer in our city are invited to take an interest in the success of this occasion.

Stockton appears to be well supplied with "stated preaching." The *Gazette* announces the following clergymen as officiating at their respective churches last Sunday: Rev. J. H. Giles, First Baptist Church; Rev. J. King, Second Baptist Church; Rev. O. Fisher, Methodist Church South, Rev. Mr. Guhl, German Methodist church; Rev. Elias Birdsall, Rector Episcopal church; Rev. Father Motter, St. Mary's (Catholic) Church; Elder J. W. McCorkle, Christian Church.

Rev. W. M. Armstrong writes to *The Spectator* on the 8th inst., that the Southern Methodist church under his care at Oroville is prospering. He says: "On last Sabbath, God in a special manner poured out His Spirit upon us. Believers rejoiced and sinners were convicted. One old man of near seventy years was happily converted, gave his experience, and united with the church. Others are seeking the pearl of great price."

Rev. James Daly, pastor elect of the Congregational church of Stockton, writes thus in regard to his acceptance: "It is my intention to unite my labors with the church in the cause of Christ. If I come among you, I hope you will be earnest. I feel that I must have earnest co-laborers. You have to build up a church; slow, painful, and full of disappointment, perhaps; but be brave—be earnest, be faithful—hold out before your faith the splendor of success, and, God willing, your reward shall be great."

Immersion.—The ordinance of baptism by immersion was administered for the first time at Vallejo on Sunday, the 9th inst. Rev. J. D. Bengless, Chaplain at the U. S. Navy Yard, Mare Island, officiated. Two men were immersed—one a Methodist, the other a Lutheran. A very large concourse of men, women, and children lined the banks of the strait as spectators.

Rev. J. W. Ross.—On Friday, Rev. J. W. Ross, of Sacramento, left, says the Stockton *Gazette, en route* for his home. He has been for several weeks past engaged in conducting religious services in the First Presbyterian Church of this city, and has done good service in the cause of Christianity in our midst. Quite a large number of members of the church and other friends assembled at the wharf to see him depart.

Rev. B. S. McLafferty, of Petaluma, pastor of the First Baptist Church, has been voted, by his congregation leave of absence for four months, with continuance of salary, to enable him to take a voyage to China. Mr. McLafferty will probably take his departure for the Flowery Kingdom about the fifth of March next. He is in feeble health.

Bible Agent.—Rev. H. Richardson, Assistant Agent of the California Bible Society, is now canvassing Solano County for the purpose of supplying those who desire them with Bibles. Mr. Richardson visited 3,166 families and sold and gave away 1,700 Bibles last year, in the counties of Santa Clara, San Mateo, Santa Cruz, and Monterey.

Elder Knapp publishes a card in Saturday's *Bulletin* in which he desires to correct the impression that he came to California to labor for the Baptist denomination exclusively. He desires the coöperation of Christians of all sects.

Rev. J. S. McDonald, of Sacramento, has been passing a few days at Marysville, occupying the pulpit of the Presbyterian church each evening.

The Oakland Baptist church is making preparations to build a new edifice on Fourteenth Street.

Rev. B. H. Paddock, of Detroit, has been elected Missionary Episcopal Bishop of Oregon.

EASTERN.

Bishop John H. Hopkins died at Burlington, Vt., January 12th. He was the oldest Episcopal Bishop in the United States, and the most conservative of the old school prelates, advocating the most extreme high church ideas, and sympathizing with

the South in the origin of the late rebellion. The Lord Bishop of Quebec and Bishop Williams, of Connecticut, attended the funeral.

"The Tyng case, the trial of which stands adjourned to next month, is of itself comparatively unimportant. It concerns simply an individual. But the principle involved," says the New York *Observer*, "is of vital importance. The whole question of a free Gospel or a bound Gospel — of liberty to go into all the world, or only in selected parishes to preach the Gospel — this is the principle in question. Mr. Tyng's trial will not settle it — it only agitates it. The settlement is to come afterward. We are not mistaken in saying that the crisis between the Romanizing and the Evangelical parties is at hand. If the High Church party in power will not crush out this new apostacy to Rome, the Low Church must raise the standard of a new reformation. If they too are silent, the very stones of Zion will cry out."

A writer in Boston says: "Theodore Parkers' vast congregation of twenty-five hundred is now of the things past. Music Hall opens her doors as of old, and smilingly invites the multitude, but few there be that heed the call. A remnant of the congregation hold together, and (we believe) the Rev. Samuel Longfellow, formerly of Brooklyn, semi-occasionally ministers to it."

Another Harp in Silence.—There are few teachers or scholars of Sabbath Schools in this country who will not be saddened by the intelligence of the death of William B. Bradbury, the compiler of the *Golden Chain*, and several other Sabbath School music books, and the composer of a large portion of their contents. He died on the 7th inst., at his late residence in Montclair, N. J.

Rev. John G. Brown, D.D., preached his twenty-first anniversary sermon as pastor of the Third Church, Pittsburg, on the first Sabbath of January, which was a review of the past year, showing gratifying results, and closing with appropriate reflections for the season. The congregation is in a very flourishing condition.

Rev. Isaac N. Freeman, of Princeton, has received a call to the church at Peekskill, lately under the pastoral care of Dr. Halliday. Mr. F. is a son of one of the missionaries of the Presbyterian Board (in India) who was massacred at Lucknow.

Rev. Samuel J. McCullough, for more than twenty-five years pastor of the Presbyterian church of Tioga, Pa., died last month of paralysis. His funeral was attended at Tioga, and sermon preached by Rev. James F. Calkins.

Mr. Wm. S. Hubbell, son of Rev. S. Hubbell, of North Stonington, Ct., and nephew of Rev. Dr. Stone, of San Francisco, accepts the unanimous call of the South Evangelical Church, West Roxbury, late Rev. Dr. Laurie's.

Dr. Bellows says marriages between Jews and Christians are becoming quite common; Jewish women like Christian husbands, and Christian husbands like Jewish dowries, and Jewish beauty and brightness.

A Third Presbyterian Church was organized in Fort Wayne, with thirty-eight members, from the First, late Dr. Lowrie's. Rev. N. S. Smith has charge of the new church.

Rev. G. L. Foster, formerly of Michigan, after a sojourn in Connecticut of two years, has returned to Michigan, and accepted a call to the Presbyterian church of Howell.

Rev. S. S. Mitchell, pastor of the church in Harrisburg, Pa., received and accepted a call to the pastoral charge of St. Peter's Presbyterian Church, Rochester, N. Y.

Rev. George D. Baker, late of Watertown, N. Y., has been installed pastor of the Presbyterian church of Oneida, Madison County, N. Y.

Rev. Mr. Camp, of New Jersey, was unanimously invited to take the pastoral charge of the Second Church, Lexington, Kentucky.

Rev. Alexander McKelvey was installed pastor of the Presbyterian church at Greenpoint, L. I., on Sabbath afternoon, the 15th ult.

FOREIGN.

Philarete, Archbishop of Moscow, died recently at the age of 85. He was called to his high ecclesiastical post at the age of thirty-nine holding it for more than forty-six years. He assisted at the coronation of the Emperor Nicholas and the Empress Alexandra in 1827. On the day of his death he preached in the Cathedral of St. John, apparently in his usual health.

Isabella, Queen of Spain, has volunteered a pledge to give the support of her nation to sustain the temporal power of the Pope. Poor woman! Popery has well nigh robbed her and her people of the power to support themselves.

Alphabetical List of Clergymen

BELONGING TO THE OLD AND NEW SCHOOLS OF THE PRESBYTERIAN CHURCH ON THE PACIFIC COAST.

Rev. Jas M. Alexander, N. S., San Leandro, Cal.
Rev. H. R. Avery, O. S., Walnut Creek, Cal.
Rev. B. B. Bonham, O. S., Sebastopol, Cal.
Rev. I. H. Brayton, N. S., Principal College School, Oakland
Rev. W. W. Brier, N. S., Alvarado, Cal.
Rev. Frederick Buel, O. S., agent California Bible Society, 757 Market st., San Francisco.
Rev. W. H. Cain, O. S., San Francisco.
Rev. Charles Russell Clarke, O. S., Principal City Female Seminary, cor. Mason and O'Farrell sts., S. F.
Rev. A. J. Compton, O. S., Watsonville, Cal.
Rev. Eli Corwin, N. S., Honolulu, H. I.
Rev. H. H. Dobbins, O. S., Jackson, Oregon.
Rev. Henry Durant, N. S., Professor College of California, Oakland, Cal.
Rev. John Edwards, O. S., Visalia, Cal.
Rev. James Eells, D. D., O. S., pastor First Church, Stockton st., residence 127 Kearny st., San Francisco.
Rev. Ben. E. S. Ely, O. S., Healdsburg, Cal.
Rev. J. G. Fackler, O. S., Pastor Central Church, Mission st., residence 121 Fifth st., San Francisco.
Rev. A. Fairbairn, O. S., Bloomfield, Cal.
Rev. Fred'k Fox, N. S., Pastor Emanuel Church, cor. Folsom and Seventeenth sts., San Francisco, Cal.
Rev. Thomas Frazer, O. S., Santa Rosa, Cal.
Rev. Ed. R. Geary, O. S., Claposia, Oregon.
Rev. M. M. Gibson, U. P., residence, 608 Pine st., San Francisco, Cal.
Rev. L. Hamilton, N. S., Oakland, Cal.
Rev. J. R. Hammond, O. S., Solano, Cal.
Rev. Joseph A. Hanna, O. S., Ashland, Oregon.
Rev. Silas S. Harmon, N. S., Oakland, Cal.
Rev. Oliver Hemstreet, O. S., Bloomfield, Cal.
Rev. I. N. Hurd, N. S., Pastor Westminster Church, Hayes Street, San Francisco, Cal.
Rev. N. B. Klink, O. S., Vallejo, Cal.
Rev. A. K. Lindsey, O. S., Portland, Oregon.
Rev. A. W. Loomis, O. S., Missionary among the Chinese, chapel and residence, cor. Sacramento and Stockton sts., San Francisco.
Rev. B. I. Lowe, O. S., 10 Martin's Block, San Francisco.
Rev. W. F. B. Lynch, N. S., Alvarado, Cal.
Rev. Wm. W. Macomber, N. S., Marysville, Cal.
Rev. James H. Marr, Calvary Mission, San Francisco.
Rev. David McClure, N. S., Principal Oakland Academy, Oakland, Cal.
Rev. Robert McCullough, O. S., Yreka, Cal.
Rev. J. S. McDonald, O. S., Sacramento, Cal.
Rev. James McLaughlin, N. S., Rio Vista, Cal.
Rev. J. H. McMonagle, O. S., pastor Larkin st. Church, residence, 1312 Jackson st., San Francisco,
Rev. W. J. Monteith, O. S., Albany, Oregon.
Rev. Joshua Phelps, 38 Stanley Place, San Francisco.
Rev. James Pierpont, N. S., San Francisco.
Rev. F. L. Nash, N. S., Alameda, Cal.
Rev. J. B. Pinney, N. S., Austin, Nev.
Rev. George Pierson, N. S., Brooklyn, Cal.
Rev. John S. Reasoner, O. S., Brownsville, Oregon.
Rev. Robert Robe, O. S., Brownsville, Oregon.
Rev. Henry M. Scudder, D.D., N. S., Pastor Howard Church, Mission street. Residence, 1 Vernon Place, San Francisco.
Rev. John Sessions, D. D., N. S., Oakland, Cal.
Rev. Anthony Simpson, O. S., Corvallis, Oregon.
Rev. J. A. Skinner, O. S., Stockton, Cal.
Rev. W. R. Sloan, Steilacoom, W. T.
Rev. T. E. Taylor, N. S., Virginia, Nev.
Rev. James S. Todd, O. S., Arcata, Cal.
Rev. Lewis Thompson, O. S., Astoria, Oregon.
Rev. P. V. Veeder, O. S., Principal City College, cor. Geary and Stockton sts., San Francisco.
Rev. Charles Wadsworth, D. D., O. S., Pastor Calvary Church, Bush st., residence 920 Pine st., S. F.
Rev. C. C. Wallace, N. S., Placerville, Cal.
Rev. E. B. Walsworth, N. S., President Pacific Female College, Oakland, Cal.
Rev. L. P. Webber, N. S., Santa Clara, Cal.
Rev. S. T. Wells, O. S., agent Presb. Board of Publication. Depot at Bancroft's Bookstore, 609 Montgomery st.
Rev. Samuel P. Whiting, N. S. Mendocino, Cal.
Rev. A. F. White, N. S., Carson, Nev.
Rev. Geo. F. Whitworth, O. S., Seattle, W. T.
Rev. Ed. P. Willard, N. S., Columbia, Cal.
Rev. S. H. Willey, N. S., Vice President College of California, Oakland, Cal.
Rev. M. A. Williams, O. S., Jacksonville, Oregon.
Rev. S. Woodbridge D. D., O. S., Benicia, Cal.
Rev. James Woods, O. S., Healdsburg, Cal.
Rev. James S. Wylie, N. S., San Jose, Cal.
Rev. Richard Wylie, O. S., Napa, Cal.
Rev. James Wylie, O. S., Napa, Cal.

San Francisco, Saturday, February 22, 1868.

PRAYER FOR COLLEGES.

The last Thursday in February is a memorable day in the esteem of those who have been in our colleges within the past twenty years. It has been observed by many Christians with special prayer and conference respecting those who are in process of education, and it is probable that no proof of answer to prayer can be found on record more encouraging and positive than is furnished each year by the religious history of these institutions.

At first the interest was, for the most part, confined to the higher seminaries and colleges, but of late all schools have been included, and there should be none who believe in the efficacy of prayer who decline to observe a day set apart for such a purpose. There is peculiar cause for its observance at this time in this State. Most of our schools have been recently established, others are to be commenced with the increase of population, and their character and influence will depend largely on the spirit with which they are conducted in their early history. We are to have a State University, according to present intimations from the Legislature, and it is likely that the consultations respecting its organic law may be transpiring when this annual day of prayer occurs. All believe that the expectations of the world in relation to the future of this coast must be realized, if at all, by the next generation, since they must inaugurate and begin the execution of schemes for business and general advance that will be necessary, if our hopes are not blighted; and there must be a large number of men in that generation of broad views, and clear conceptions, and great ability, or they will be blighted. It is an occasion for congratulation that this is being felt somewhat by men in office, and that they are disposed to provide so wisely for the mental development of those into whose hands such vast interests are to be committed. But there will be even greater occasion for congratulation if, in answer to prayer, and through the Christian influence of our people, the talent thus to be developed and disciplined may, at the same time, be inspired with a just apprehension of the opportunities here to be enjoyed for extending and honoring our holy religion, and the grandeur of the era which may begin under its control. There is no part of the world in which it is more important to observe the day of prayer for schools than it is in California. Have our churches realized this as they should? Surely, it will not be neglected this year at least, when the baptism of the Spirit thus invoked may be felt for ages.

OUR NEW CITIZENS.

Every steamer reaching this city from Panama brings its full quota of passengers, and a tabular statement appears in the New York *Tribune* showing that the number of people who have left that city for San Francisco, by both lines of steamships, since the first of October, 1867, is nearly fourteen thousand. Of those leaving here for the East, a large majority induced in many instances by the low fares of the present season, are merely visitors to their friends; while of the new arrivals nearly all will become permanent residents.

We allude to these occurrences as evidence that the tide of immigration from the Eastern States and from Europe is not diminishing; but the same current that began nineteen years ago, from every State east of the Mississippi, and from every province of British America, is no less strong and steady now than it was during the first five years subsequent to the cession of California to this Government. At that time the movement was spasmodic. Men came to clutch a fortune and then abandon the country. Now, it brings with it the element of permanency and the responsibility of citizenship. Immigration to the three States and six Territories west of the Rocky Mountains is now a permanent institution, having its weighty, powerful influence upon all the industrial interests and general prosperity of the American Union. In this ceaseless movement westward is embodied much of the youthful enterprise and manly vigor of the older States. There is a sublimity in this living stream of humanity which is pressing toward the setting sun, subduing the uncultivated valleys and hillsides, delving in the mines, building towns and cities, and laying the foundations of future States.

The present year will show a greater aggregate of immigration than for several years preceding. The disturbed condition of the South, the continued depreciation of the paper currency of the East, the improved facilities for travel, and, more than all, the rapid development of the agricultural resources of the Pacific Coast, are having their effect. It now begins to be understood that California has not only a most salubrious climate and an abundance of the precious metals, but in her vast extent of tillable lands are resources ample, accessible, positive, permanent. To the young man who has little capital save his own strong sinews, these considerations are no trivial incentive to emigration. With health, energy, and good habits, the rich soil and the mines of the Pacific slope present such inducements as nowhere exist in the Atlantic States, and many will avail themselves of them.

Sitting, as San Francisco does, the gateway between the East and the West, where the steamers and the clippers land the greater part of the emigrants to this coast, we often witness with deep interest the varied phases of character which these adventurers exhibit. Among them are few merely æsthetic travelers. On the contrary, most of them come with empty pockets to begin life in earnest. Finding the city crowded, the more discreet and enterprising tarry but a few days, and a brief month finds them scattered among the cañons of Idaho, the rugged mountains of Nevada, or the older mining districts east of the Sacramento basin; while now, more than ever, the majority seek a less venturesome home among the broad agricultural fields of California and Oregon. Our benisons go with them! May they exhibit that thrift, integrity, intelligence, and patriotism which shall gain them a wide influence, and make them the benefactors of the land of their adoption!

We cannot close without alluding to another topic closely allied to the one upon which we have written. Society on the Pacific coast has greatly changed since those earlier days, when domestic and social ties were well nigh unknown, and allurements beset the inexperienced on every side. The moral status of our people may safely challenge comparison with that of any other community equally cosmopolitan and recent in its origin. Yet a strange land always has its peculiar temptations. No person, except those who have tried the experiment, is aware how strong a guardianship a young man needs to place over himself when he seeks the perilous freedom of a distant land, released from the watchful eyes of neighborhoods and coteries, lightened of that wearisome burden — an immaculate name — and all unchecked by the hallowed influence of home. It may be well for those who are conscious of any radical weakness, any besetting sin, any unlawful propensity, which at home they may have succeeded in keeping under the lock and key of the strictest propriety — it may be well for such individuals to know that when they set foot on a distant and strange shore, the long imprisoned evil, scenting a wild license in the unaccustomed atmosphere, is apt to grow riotous in its iron cage. It rattles the rusty barriers with gigantic turbulence, and if there be an infirm joint anywhere in the framework, it breaks rudely forth, and revels with an energy the more intense from its long imprisonment. Many a man who was above reproach while surrounded with the manifold restraints which protect one from that treacherous and life-long enemy, his lower self, in the circle of his own home, has in the delirium of an unrestricted hour, proved weaker than the strong man of Israel, and, overpowered by the arch-enemy, has stumbled into the lowest pitfall of abasement. In the excitement of a new state of society, let even him who thinketh he is strong beware, lest in an evil hour he falleth.

ANNOTATIONS.

I.

OF EASY READING.

The popular taste of the age demands "easy reading." It wants clearness, point, and brevity in all literary compositions, whatever the subject. It believes in short sentences, and is also inclines to the belief that whatever it does not immediately understand must be obscurely expressed. It is but a short time since I saw a friend, by no means deficient in intelligence or practical talent, but on the contrary distinguished for both, lay down James Martinson's essay on the system of Compte, with the remark that the writer's style was "so obscure that he (the reader) could not make out his meaning." Here the "obscurity" was in the subject, there being no more perspicuous writer on such subjects than the author in question. Had my friend seen a shallow, *ad captandum* article an Comptism, occupying half a column in a newspaper, he would have fancied that he understood it perfectly, and also that he derived some knowledge from it.

Coleridge, whose prose works are by no means "easy reading," and who was addicted to long and involved sentences, thus ingeniously vindicates himself: "A writer whose meaning is everywhere comprehended as quickly as his sentences can be read, may indeed have produced an amusing composition — nay, by awakening and reënlivening our recollections, a useful one — but most assuredly he will not have *added* either to the stock of our knowledge, or to the vigor of our intellect. For how can we gather strength but by exercise? How can a truth, new to us, be made our own without examination and self-questioning? * * * * But whatever demands effort requires time. Ignorance seldom *vaults* into knowledge. It passes into it through an intermediate state of obscurity, even as night into day through the twilight."

Plato evidently entertained similar notions on this subject, when he assured his "excellent friend" of the great difficulty of making any comprehensive truth completely intelligible "without an example," and warned him against that common illusion under the influence of which "we may as in a dream seem to know all, and then, as it were, awaking, find that we know nothing."

II.

OF FREE INQUIRY.

It is a lamentable mistake into which many of the sincere friends of revealed religion have fallen from time to time, of opposing free inquiry of the boldest kind in all matters of belief. That species of high and serene confidence in the power of truth ultimately to indicate herself that Milton had, when he asked for her nothing more than a fair field wherein to encounter her adversaries, is generally wanting in those who would stifle free discussion. But, on the other hand, candor requires the admission that the restraints which have been imposed upon those who attacked the doctrines of the Church, have often been excused, and sometimes justified, by the intemperate and mischievous conduct of the assailants. In our day, certainly, no champion of belief will raise any objection to discussion or inquiry, provided it be conducted "with that seriousness which naturally accompanies the love of truth." No argument against Christianity conducted in this spirit, and which seems to be addressed to those "who may be presumed to be capable of weighing the arguments," would at this day provoke any desire for its suppression in the minds of intelligent Christians, though their impatience and disgust might well be excited by the coarse and blasphemous tirades of voluble and vulgar wranglers. It is the disputant who is manifestly unqualified for discussions of this sort, who is not actuated by a disinterested love of truth, and who appeals to the ignorance and prejudices of the illiterate for the purpose of unsettling belief — it is only this unpleasant style of "free inquirer" that enlightened believers at this day feel any desire to silence.

THE RIGHT POSITION.

Literary magazines and journals have not always the disposition, nor always the courage, to announce the true course to be pursued by them in respect to politics and religion. It is not expected that such periodicals will be partisan in support of either, for those which are avowedly political or religious will be prepared to maintain their interests, as this may be deemed advisable or necessary. Yet, in a land like ours, and when patronized by intelligent people, even that portion of the press devoted especially to literature should be distinct and positive in its exhibition of the principles upon which the State must build its prosperity, or the Church must expect to make advance. Growing out of these principles, also, there will be general duties which should be discussed as to both their nature and tendency, and facts of which the bearing should be clearly traced. These are all properly included in the literature of a country, when broadly and thoroughly examined; and this examination is more likely to be impartial and valuable, often, when made by one not committed to the party or sectarian interests that may be involved. It is with much pleasure, therefore, that we find the following sentiments in the last number of that excellent monthly, *Putnam's Magazine*. They should increase its influence.

"Politics and Religion. With regard to the former, we desire to state once for all, as a guide to our contributors and for the benefit of our readers, that we would, in every case, rise above the merely partisan warfare of the day. To carry on public affairs there must be parties; and parties, as a general rule, represent principles. But a party is always in danger of falling short of or exceeding its proper motives or conditions, which must in their turn be modified by varying necessities. So the field is open for a wide discussion of duties and obligations. In pursuance of these ideas, we shall endeavor to find out, by the efforts of various minds — choosing for our contributors writers of worth, ability, and station — what is most for the public good; and, in striving for this, we may safely let Party take care of itself. We shall first ask what is desirable to be done; what the party, whichever it may be, intends to do, may come afterward.

"With regard to Religion: here again we desire not to be misunderstood. Nothing derogatory to the claims of Christianity as a Divine Revelation, nothing justly offensive to the Christian world on the score of infidelity or immorality, will knowingly be suffered in these pages. We would not undermine the faith, or attack the cherished convictions, of any body of Christians. As regards Infidelity and Christianity, we are on the side of Christianity. We desire to make no unseemly professions on this subject; but we do desire to have it understood that we consider an implicit assured Christian Literature, in no paltry materialism, but in its acknowledged spiritual strength, the glory, as at this period of the world it is the necessity, of a great commonwealth. If this Magazine shall promote that end by that means, it will, in the judgment of its present conductors, gain its best and most honorable title to public support."

Sunday School Convention.—We are pleased that a call is published in our columns this week for a State Sunday School Convention. Similar conventions, held in the older States and in Canada, have been exceedingly interesting and profitable, and there is no reason why a new impetus may not be given to this department of Christian work on the Pacific coast, if those whose names are attached to this call will really commit themselves to the matter of making the Convention a success.

CONTRIBUTIONS.

Fellowship.

"And what concord hath Christ with Belial, or what part hath he believeth with an infidel?"

In The Occident of the 11th inst., under the head of "Religious Intelligence," there is recorded the dedication of a Unitarian church at Portland, Oregon; services by the new pastor, assisted by ministers of the Methodist, Presbyterian, and Baptist denominations.

To me it is passing strange that men holding to and believing in the great doctrines of our holy religion should be found actively engaged in the upbuilding of a system that is subversive of pure truth, and whose tendency (without design it may be) is to rob Christ of His glory, and ruin precious and immortal souls.

On what ground is such a course justifiable? It cannot be because of the same views of divine truth; of the doctrine of the Holy Trinity; of God manifest in the flesh; of the absolute need of regeneration; and of the plenary inspiration of the Scriptures.

Nor can it be really the communion of saints, who, impelled by supreme love to the Master are drawn towards each other, and perceiving the likeness — Christ formed in the soul, the hope of glory, are "filled with the fruits of righteousness which are by Jesus Christ, unto the glory and praise of God."

Nor can it be because of a desire to spread abroad the glorious gospel of the blessed God, which has for its object the exhibition of the glory and grace of the Lord Jesus, that He may be magnified; and the salvation of sinners by the Atonement — through sanctification of the Spirit and belief of the Truth.

Is it not plain that such agreements and compromises are in direct violation of the Scripture truth, putting light for darkness, and darkness for light — sweet for bitter, and bitter for sweet; disregarding the command, "Come out from among them and be ye separate;" breaking down all differences and proving a stumbling-block to the children of God?

And is it not to be feared that they often arise from a spirit called liberal that is carrying desolation and ruin with it — whereby there is a dallying with the world, a parleying with heresy, and a panting for popularity? "The friendship of the world is enmity with God."

Correspondence.

Correspondence from Japan.

Yokohama, January 10, 1868.

In reply to your kind New Year's greetings, very heartily do I send back our usual form of congratulation, "O-me-di-to!" Your wish that the new means of communication between the Golden City of the West and this land of the rising sun may be of mutual benefit is sincerely reciprocated. To you, however, the benefit must be only a material one; but to us, I hope it is the dawn of a higher civilization, of republican institutions, and of a pure self-sustaining Christianity.

Our New Year's, or January 1st, I spent very pleasantly, on my return from Yedo, whither I had gone in company with other Americans to a dinner given by our Minister, at the U. S. Legation, on the last night of the old year. He intended it as a Thanksgiving dinner, he having been absent at the port of Osaka at the time of the regular Thanksgiving. I am very glad to see some recognition made of the day of thanks in the East, and a very sumptuous and republican dinner this was, doing credit to the Minister's hospitality and patriotic principles.

Awakened early by the great gong and bell of the Temple adjoining his residence, I went out to see the first sun of 1868 rise upon Yedo. Besides the devotion of the priests in the great Temple, ringing bells and repeating their prayers, I witnessed several of the Legation guards offering their prayers to the sun. In the graveyard, up among the old and large trees in the temple grounds, I saw further evidences of the superstition of this people in the offerings of rice, etc., on the graves of recently deceased persons. When I reflected on the multitudes buried in the many graveyards of Yedo, and the multitudes more in that great city who would go to the grave before the Gospel could be made known to them, I felt how sad indeed is the condition of this people, and how great is the privilege to be permitted to be in the midst of them, and I hope, by the blessing of God, in some way to be of service to any of their number.

I found two of my former pupils among the guards, who were very glad to see me and proud to own me as their teacher.

In a small temple, adjoining the great temple, and going into decay, as they all seem to be doing, was a great dragon painted on the ceiling. Beneath this and facing an enclosure, was a woman praying. She made her offerings of cash and soon went out. Into the great temple, whose wide doors stood open, exposing its rows of pillars and great depth and length of floor, covered with mats, the morning sun shone, fully gilding with his beams the idols, the altar and the walls, with their shining ornaments and varied colors.

Those who came to worship worshipped outside, standing at the foot of the flight of steps, and cast their cash into the large treasure chest, placed also outside.

In taking a walk, accompanied with a guard, through a portion of the city, I came upon the Water God's Temple, which is very much resorted to by sailors and others. It is in a Daimio's, or native prince's grounds. I was not allowed to enter, but I could see hundreds, if not thousands, of offerings, in the shape of hair cut from people's heads who had been there to worship and made vows. I talked with my guard about the folly of idolatry and the number of their gods. We visited an idol-maker's, where I repeated the lesson. Strange to say, their minds are so accustomed to idolatry that they do not and cannot see the absurdity of it.

The ride down on the Tokaido, (or east sea road) on horseback, was very pleasant. This is a wide road, chiefly macadamized, with rows of houses on either side, forming almost a continuous village a good part of the way. We got back again into European civilization, after a brisk three hours' ride, in time to make our New Year's calls, and so closed New Year's day, '68, with me in Japan. B.

[The remainder of the letter, containing the description of a "Japanese New Year," will be given in the next Occident.—Ed.]

Letter from Nevada.

Virginia City, Nev., Feb. 12th, 1868.

For the last five or six days the weather has been delightful — bright sunshine during the day, with pretty hard freezing at night. This is gradually wearing away the snow, so that we have an occasional sight of mother earth again. December was marked by a succession of severe storms of rain and snow. During January the snow storms were frequent and the sleighing good. But February brings genial weather and a bright sun.

I think it was Dr. Johnson's (I don't mean the President's) idea that the weather has an essential effect upon the spirits of a person. This effect has been very marked upon the faces of those one met on the streets of Virginia for the past week. The cheerful salutation has taken the place of the indifferent nod, or the stiff, labored recognition. The pleasant change in the weather has produced a marked change in our Sabbath congregations. Last Sabbath morning our congregation was larger than we have had before since I have been here.

Our Sabbath School has been increasing in numbers and interest for the last few Sabbaths. I attribute this desirable result chiefly to the fact that for two successive Thursday evenings we devoted our church prayer-meetings to a familiar discussion of the condition of the Sabbath School, and the best means of making it more efficient for good. The desirableness of a frequent visitation (once a month, if possible) of the scholars at their own homes, by the teachers, was urgently recommended. In these familiar talks all present were invited to take part, and ladies and gentlemen joined in the discussion.

Upon the Sabbath morning following, I presented the claim of our Sabbath School upon the parents, teachers, and *every member of the congregation*, whether in the church or out of it. I trust these combined efforts have called out an increase of interest, which will have a permanent growth.

In the first number of The Occident there was a well written article on *spiritism*, or "Modern Demonology." The piece closed with a partial promise of something more on the same subject. I have been hoping that this promise would be fulfilled. As the result of the lectures by male and female and the *seances* by all the seers, we have in this place not a few who have been poisoned or confused by the teachings of spiritism.

In the absence of something better, allow me to call your attention to Dr. Holland's "*Seventh Letter to Salathiel Fogg Jones, Spiritualist*," in the volume, "Letters to the Joneses." T. E. T.

Sunday. Its Influence upon Government.

The Constitution of the United States, (Art. 1, Sec. 8,) in enumerating the powers of Congress, includes the following: "To establish a uniform rule of naturalization." The Congress of 1795 passed an act, permitting foreigners to become citizens after a residence of five years. The main provisions of that act remain to this day.

THE RIGHT OF PRE-EMPTION.

In addition to the general and ordinary rights of citizenship, the additional and extraordinary right to pre-empt the public land of the United States has been accorded to those of foreign birth, upon the same terms as to *native* citizens. The great liberality of that latter act will be better understood when we state that it does not require any given residence, as to time, to acquire that right, but the mere act on the part of the alien of making a declaration of his intention to become a citizen, entitles him to enter upon and acquire title to, 160 acres of land in any State or Territory of the United States.

HOMESTEAD RIGHT.

Nor is that all. The alien who has declared his intention to become a citizen of the United States can, equally with a citizen native born, and twenty-one years of age, acquire the right *gratuitously* to 160 acres of land. It will be perceived, therefore, that while the *native* must reside in the country twenty-one years before he can acquire any right to the public land, the alien, if twenty-one years old when he arrives in the country, can acquire the right and secure the title the *next day after his arrival.* In this regard, the alien is favored greatly beyond the native.

THE DUTY OF CITIZENS.

It is the imperative duty of every citizen to *obey* existing laws. It is equally his duty to sustain all lows, both by his efforts and example. The American citizen has an undoubted right to form his opinion on every subject connected with the character and action of the Government. In doing this, he must form his judgment *intelligently and conscientiously.* He must do it in subordination to the Constitution and laws of the country, and the sacred obligations they enjoin.

THE CITIZEN OF FOREIGN BIRTH.

All intelligent citizens of foreign birth know that ours is a government of the people. That the government was established on the basis of the virtue and intelligence of the people. That the virtue referred to, and upon which the Fathers of the Republic relied, was that virtue whose principles are derived from the *Sacred Scriptures.* They know, further, that the vast majority of our present native citizens, and many of foreign birth, and their children, place their principal reliance *now*, for the preservation and perpetuity of their institutions, upon the *moral and religious* influences derived from that venerated source. They *know* that the Sabbath day (that is, the first day of the week) has not only ever been observed as a holy day, but that the people of the United States have relied, and do now rely, upon the influences created and disseminated on that day as essential to the preservation of the Government and of liberty. Having been invited to accept citizenship upon terms more liberal and generous than the annals of any nation have ever exhibited, with a full knowledge of the character of the Government, and the moral and religious principles upon which it is based, is it *honest* in any citizen of foreign birth to assail those principles and labor to destroy their power?

OUR GERMAN FELLOW CITIZENS.

While we cheerfully accord to our German fellow

citizens a degree of industry, perseverance, thrift, and energy which peculiarly distinguish them as a class, and which is highly commendable, yet truth compels us to declare, that they constitute the *only class, either foreign or native*, which has *organized* its power, with the proclaimed purpose of *assailing* and *destroying* the practical influences of the principles to which we have referred.

THE PRETEXT FOR SUCH ACTION.

The leading German newspapers, and the various associations called "verains," justify this action upon the ground of *personal rights*. It is declared, substantially, that because in Germany, under a monarchy and despotism, the subjects are permitted to *amuse* themselves on the Sabbath day, with *music, dancing, parading, and lager beer drinking*, without hindrance or restraint, therefore they ought to be permitted the enjoyment of the same rights in a republic, and under a free government. Intelligent Germans *know* that rights and *duties* are *correlative terms*. While the Constitution and laws of our country confer upon citizens a vastly greater amount of liberty than is enjoyed by any other people, they likewise impose *duties*. Those rights and duties are equal. No distinction is made between native and foreign, nor is one class preferred over another. From the day the pilgrims landed at Plymouth and the emigrants disembarked at Jamestown, to the present time, the Sabbath has been recognized and observed as a Divine institution. The Colonies established it by law, and the National Government recognized it in the Constitution. Our laws do now, and have ever protected every community and every citizen in the enjoyment of *religious worship* on that day. It is now, and ever has been, established *by law* as a right not only, but as a *sacred religious right*. Such laws exist to-day in California. Will our German fellow citizens assert the right to disregard those laws, and thus violate the legal and long established rights of every citizen in this community? If so, let them tell us whence they derive their authority and sanction for such violation.

IS GERMANY AN EXAMPLE?

Is it insisted that we are to seek German precedents as a rule for our action as citizens of the United States? Germany is a monarchy. Are we to transplant that? In Germany the working classes are slaves to the Government. They are ignorant, poor, and degraded. It is for that very reason that millions have fled from the thraldom of those despotisms to this land of equal rights and glorious privileges. The action of those millions is a *terrible protest* against German government and policy.

DISTINCTION BETWEEN GERMANY AND THE UNITED STATES.

To Germany we are indebted for the glorious Reformation. The principles enunciated by Luther, Melancthon, Calvin, and other illustrious reformers, have almost wholly departed from Germany, but they have taken deep root in the United States. There is less real vital religion to-day in Germany than in any other Protestant or semi-Protestant country. Religious rights in Germany have no existence. Religious influences are neither felt nor respected beyond the small circle of the poor and laboring classes, who observe their form and recognize their character. Clergymen, however distinguished, are not received into the society of the noble (*by birth*) and the wealthy. The German Government and rulers merely *tolerate* religion. They do not encourage its duties by precept nor example, much less protect their subjects by law in the enjoyment of religious rights or duties on the Sabbath day. In the United States, religious principles constitute the *paramount obligation*, and religious rights receive the protection of the law.

Here, virtue and intelligence constitute both our power and our security. In Germany governmental despotism reigns supreme. Consequently, here we have liberty, comfort, and prosperity; there, poverty, oppression, and degradation prevail to a very great extent. Z.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, 25 cents. F. E. WEYGANT, Proprietor.

Drs. Griswold & Albertson,

HOMŒOPATHISTS, SURGEONS, AND ACCOUCHEURS.

Day and night at their Office and Rooms,

652 Market Street (corner of Kearny), San Francisco.

By close attention to business hope to merit a fair share of patronage. California and Eastern References given.

W. N. GRISWOLD, M. D. J. A. ALBERTSON, M. D.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

WARREN HOLT,

RECENT PUBLICATIONS.

HE FRIENDSHIPS OF WOMEN. By William Rounseville Alger. Boston: Roberts Brothers. San Francisco: Bancroft & Co.

We had formed a high opinion of this book from the numerous notices and reviews of it which have appeared, as well as from the reputation of the author. Perhaps our expectations were more than were warranted, but we do not find them fully sustained by the contents. The style is pleasing, but not always up to the line Mr. Alger is able to reach, and, although the preface and introduction insist that this is not the design, we cannot but feel that the general influence of the book is to depreciate love as we ordinarily see it and admire it in women, and to substitute for this a colder and less impassioned feeling. Every one must value friendship, who has any proper apprehension of the happiness possible in the relations of life. And the many instances recorded here show its peculiar beauty and charms in women; but the evil would be serious and most lamentable if it should be made the Mentor of love in such a sense as is proposed in this treatise, viz: that it be, "First, the guide of love; secondly, the ally of love; thirdly, the purified fulfillment and repose into which love subsides, or rises; fourthly, the comforting substitute for love." When love is a mere passion, it is liable to the excesses and evils with which it is charged; still, as it may be cherished and as abundant instances prove that it really exists, it cannot be guided, allied, made to subside, or accept anything else in its place, according to this programme; and domestic life and personal experience would have scenes of sadness that are even now too frequent, were the blessed and pure spirit that should *rule* when it may, obliged to yield its scepter to some less glowing and more calculating sovereign. It will probably always be true that friendship will have a province distinct from love, though no less important in itself, and no really valuable end will be gained when either assumes to be dictator for the other.

SUGGESTIVE COMMENTARY ON ST. LUKE. By W. H. Van Doren. New York: D. Appleton & Co. San Francisco: A. Roman & Co.

This is a compilation, for the most part, and if it is true, as has been said, that it requires as much talent to make good selections as to write good articles, the author may regard himself with some self-complacency. The range of books from which he has gathered the material is wide enough, and he has taken what renders his work valuable for the end he proposes, viz: that it may be a kind of compend for use in family worship, Sunday Schools, and familiar lectures. We do not like the manner in which the material is given, as we should were it less fragmentary and in detail, for while it is suggestive respecting the meaning of words and phrases, it fails to give the sense of a whole verse or passage as we like to receive it from a commentary. Teachers who have not access to many commentators, and others who seek information respecting persons, and places, and facts mentioned in Scripture, as well as the meaning of the language, will be much aided by these volumes. They make no pretension to great learning, but are accurate and valuable.

BIBLE TEACHINGS IN NATURE. By Rev. Hugh Macmillan. New York: D. Appleton & Co. San Francisco: H. H. Bancroft & Co.

So far as this book confirms and illustrates the harmony between the Bible and nature, it deserves commendation, for its style and execution are likely to increase its effect. But we lay it down with a kind of indefinite feeling that persons who read it will hardly obtain from it what the writer desires. He does not make prominent, as he should, the necessity for the Bible as a supplement to nature, as teaching what nature never could teach, but seems anxious only to show how much that has been given in the Word may really be found in the works of God. Sometimes he yields too much to fancy in his zeal to accomplish his end, and we are ready to ask for less rhetoric, that we may know the exact sum of what has only been repeated in revelation.

On the whole, however, the book has unusual interest, and with care upon the points suggested, it may be read with profit.

REFORMERS AND MARTYRS. By William Hodgson. Philadelphia: J. B. Lippincott & Co. San Francisco: H. H. Bancroft & Co.

This work has done good service for Christianity, and was needed that a vacancy in this department of ecclesiastical history for popular reading might be supplied. It omits any extended allusion to Luther and the other leaders of the Reformation proper, and speaks of others, less known, yet almost as important in their influence and testimony, who preceded and followed those great men. The design of the author is to show how the true spirit of evangelical religion was kept alive through all the centuries from the 9th to the 17th, and he has given much interest to proof he furnishes.

We are not likely to be too well informed respecting those heroic men and women to whom the world owes so much, and we gladly welcome this work to the place it deserves in the libraries of all classes.

We have received, with thanks:

Minutes of the Annual Conference of the African Methodist Episcopal Zion Church, in California. It shows that this branch of the Church is well established in this State.

The Children's Hour, for February.

The Presbyterian Monthly, for January.

The American Sabbath. An able sermon by Rev. Robert Patterson, D.D.

The Catholic World, for February, which, among other articles, has a review of the "Reign of Law," by the Duke of Argyll, that hardly shows the vigor of the writer reviewed, but is of interest as giving the Catholic idea of the subject.

The Great Register of the City and County of San Francisco.

EDUCATIONAL.

Prayer for Teachers and Pupils.

An incitement to earnestness in our prayers for the inmates of schools and colleges, may be derived from a view of the decisive influences for good which are often dispensed among them. The brightest name upon the page of Scottish history is that of John Knox; but it is very easy to believe that he was given to his land as a great reformer in answer to prayer for institutions of learning. We quote a paragraph from "McCrie's Life of Knox:" "John Mair, better known by his Latin name, Major, was Professor of Philosophy and Theology at Glasgow, when Knox attended the university. The minds of young men, and their future train of thinking, often receive an important direction from the master under whom they are educated, especially if his reputation be high. Major was at that time deemed an oracle in the sciences which he taught; and, as he was the preceptor of Knox, and of the celebrated scholar, Buchanan, it may be proper to advert to some of his opinions. He had received the greater part of his education in France, and acted for some time as a professor in the University of Paris, where he acquired a more liberal habit of thinking and expressing himself on certain subjects than was yet to be met with in his native country, and in other parts of Europe. * * He taught that a General Council was superior to the Pope, and might judge, rebuke, restrain, and even depose him from his dignity; denied the temporal supremacy of the Bishop of Rome, and his right to inaugurate or dethrone princes; maintained that ecclesiastical censures, and even papal excommunications, had no force, if pronounced on irrelevant or invalid grounds. He held that tithes were not of divine right, but merely of human appointment; censured the avarice, ambition, and secular pomp of the Court of Rome, and of the Episcopal order; was no warm friend of the regular clergy; and advised the reduction of monasteries and holidays. His opinions respecting civil governments were analagous to those which he held us to ecclesiastical polity. He taught that the authority of kings and princes was originally derived from the people; that the former are not superior to the latter, collectively considered; that if rulers become tyrannical, or employ their power for the destruction of their subjects, they may lawfully be controlled by them, and proving incorrigible, may be deposed by the community as the superior power; and that tyrants may be judicially proceeded against, even to capital punishment. The affinity between these sentiments and the political principles afterwards avowed by Knox, and defended by the classic pen of Buchanan, is too striking to require illustration. Some of them, indeed, had been taught by at least one Scottish author, who flourished before the time of Major, but it is most probable that the oral instructions and writings of their master first suggested to them the sentiments which they so readily adopted, and which were afterwards confirmed by mature reflection and more extensive reading; and that, consequently, the important changes which these contributed to accomplish should be traced, in a certain measure, to this distinguished professor. Nor, in such circumstances, could his ecclesiastical opinions fail to have a proportionate share of influence on their habits of thinking with respect to religion and the Church." C.

MISCELLANY.

A clergyman going to a miserly old lady to beg for a worthy object, found himself refused on the ground of poverty. Feigning to be much interested in her story, he expressed great surprise thereat, and said:

"I had not thought you in such want;" and then, taking out some money, he added: "Here is something that will do for the present; when I call again I will bring you more."

The old lady was so enraged that she gave him a good round sum to show that she did not mean she was a pauper.

"I say, boy, is there anything to shoot about here?" inquired a sportsman of a boy he met.

"Well," replied the boy, "nothin' just about here, but our schoolmaster is just over the hill there cutting birch rods; you might walk up and pop him over?"

Punch says: "Women are said to have stronger attachments than men." To this rule, however, there are exceptions. A man is often attached to an old hat; but did you ever know of a woman having an attachment for an old bonnet? Echo answers — "Never!"

AN old Scotch woman being asked her opinion of the organ in a church, the first time she had ever seen or heard one, replied:

"It is a pretty box of whistles, but oh! it's an awful way to spend the Sabbath."

A TEACHER said to a little girl at school: "If a naughty girl should hurt you, like a good girl you would forgive her, wouldn't you?"

"Yes, marm," she replied, "if I couldn't catch her."

THE last number of *Blackwood's Magazine*, in an article on novels, speaks of a class of popular romances whose heroines "pant for indiscriminate kisses and go mad after unattainable men."

Family Reading.

The Child of Earth.

In the following poem, Mrs. Norton has beautifully illustrated the tenacity with which poor Humanity clings to this shadowy existence.

Fainter her slow step falls from day to day:
Death's hand is heavy on her darkening brow!
Yet doth she fondly cling to earth, and say:
"I am content to die — but oh, not now!
Not while the blossoms of the joyous Spring
Make the warm air such luxury to breathe;
Not while the birds such lays of gladness sing,
Not while bright flowers around my footsteps wreathe.
Spare me, great God! — lift up my drooping brow:
I am content to die — but oh, not now!"

The spring hath ripened into summer time —
The season's viewless boundary is past;
The glorious sun hath reached his burning prime:
"Oh, must this glimpse of beauty be the last?
Let me not perish while o'er land and sea
With silent steps the Lord of light moves on;
Not while the murmur of the mountain bee
Greets my dull ear with music in its tone.
Pale sickness dims my eye and clouds my brow —
I am content to die! — but oh, not now!"

Summer is gone; and Autumn's soberer hues
Tint the ripe fruits and gild the waving corn;
The huntsman swift the flying game pursues,
Shouts the halloo, and winds his eager horn.
"Spare me awhile, to wander forth and gaze
On the broad meadows and the quiet stream;
To watch in silence while the evening rays
Slant through the fading trees with ruddy gleam:
Cooler the breezes play around my brow —
I am content to die! — but oh, not now!"

The bleak wind whistles: snow-showers far and near
Drift without echo to the whitening ground;
Autumn hath passed away, and cold and drear,
Winter stalks on, with frozen mantle bound:
Yet still that prayer ascends: "Oh! laughingly
My little brothers round the warm hearth crowd;
Our home-fire blazes broad, and bright, and high,
And the roof rings with voices light and loud:
Spare me awhile — raise up my drooping brow!
I am content to die! but oh! — NOT NOW!"

The Death of Louis XV.

The reign of Louis XV of France was that of an oriental monarch. His power was unlimited, and his court presented a scene of luxurious splendor such as never was witnessed in any Christian land. He was depraved and sensual, and had but little regard for his subjects, or sympathy with mankind. The Bastile frowned on France, and the nation lay enchained at the feet of the king. Who that saw this glittering monarch in the saloons of the palace of Versailles ever dreamed that, in the trying hour of death, he would be left utterly alone?

In the spring of 1774 he fell a victim to an infectious disease, contracted by his vices, that made him a spectacle terrible to behold. The sickness proved fatal. He was for a time deceived by court intrigue in respect to his danger, and his mind was filled with terror when he became conscious of his approaching end.

"I would fain die as a Christian, and not as an infidel," he gloomily said to one of his profligate companions, as he began to fear for his life. He caused his repentance for his past scandals to be publicly proclaimed; his brain was haunted by the sins of the past, and his remorse in view of eternity was extreme. His courtiers, seeing no hope of his recovery, deserted him, and his guilty and conscience-smitten paramour fled. One domestic only was left to attend him, and she awaited his commands in an outer room. And thus, with no hope to dissipate the clouds that hung over the future, and with no one to soothe his pillow, the unhappy monarch approached his dissolution.

It is the night of the 10th of May. He is dying. A lamp has been placed in the window of his chamber, and the domestic has been charged to extinguish the flame as soon as he shall expire. The courtiers flock together in a distant part of the palace, awaiting the signal of his demise. Are these the once smiling eyes that watched him in his revels, that now so eagerly watch for the light to be extinguished? Yes, those impatient watchers are the flatterers of old. So it is ever with the friendship won by the glitter of wealth and power.

The old clock of Versailles announces the slow-paced hours. Still the light glimmers and burns. It is midnight. The old clock slowly tolls the hour of twelve. The light is extinguished, and the light-hearted and excited courtiers hurry away to announce to Louis XVI that *he* is the king of France.

So perishes worldly pomp, and to such an humiliating end comes wickedness in high places. The humblest peasant that dies in the arms of Jesus is more favored than such a king.—*Independent.*

A True Wife.

She is not a true wife who sustains not her husband in the day of calamity; who is not, when the world's frown makes the heart chill with anguish, his guardian angel, growing brighter and more beautiful, as misfortunes crowd upon his path. Then is the time for the trial of her gentleness; then the time for testing whether the sweetness of her temper beams with a transient light or steady glow, as the morning star shines brightly under the clouds. Has she then smiles just as charming? Does she try by happy little inventions to lift from his sensitive spirit the burden of thought?

There are wives — nay, there are beings — who in dark hours begin repining and upbraiding, thus adding to outside anxiety the harrowing scenes of domestic life, as if all the blame in the world makes one's hair white or black, or changes the decree immutably gone forth. Such know that our darkness is heaven's light; our trials but steps in the golden ladder, by which, if we rightly ascend, we may at last gain eternal light, and bathe forever in its fulness and beauty.

"Is that all?" and the gentle face of the wife beamed with joy. Her husband had been on the verge of distraction — all his earthly possessions were gone, and he was afraid of the result of her knowledge, she had been so carefully reared and cared for all her life. But says Irving's beautiful story, "a friend advised him not to give sleep to his eyes until he had unfolded to her his hopeless case." That was the answer, with the smile of an angel — "Is that all? I feared by your sadness it was worse. Let these beautiful things be taken — all this splendor, let it go — I care not for it — I only care for my husband's love and confidence. You shall forget in my affection that you were ever in prosperity — only still love me, and I will aid you to bear these little reverses with cheerfulness."

Still love her? A man must reverence — aye, liken her to the very angels; for such a woman is a living revelation of Heaven.

Turning into a Butterfly.—After crawling about a while as a caterpillar, thinly covered over with coarse, stiff hairs, feeding on tender leaves, which are masticated by jaws, it feels an instinctive revolution approaching in its system, and makes careful preparations accordingly. Some quiet, sheltered, sunny place is selected, usually with a southerly aspect, where it spins a sort of silken basket, glued by its margins to the wall, the eaves, or the under side of a limb, in which it hides itself. This is an extraordinary piece of work when analyzed. How it is accomplished seems not to have been explained. The caterpillar then goes into a profound sleep, which lasts from late in autumn until the vernal sun revives vegetation. While thus in a profound slumber, the miniature legs, wings, proboscis, and other characteristic apparatus are developed.

During this process the incipient butterfly is fed by absorbing the blubber, or thick, fatty, outside covering of the caterpillar. By the time it is all exhausted but the bare, dry, exterior tissue, the new butterfly is perfectly elaborated. Respiration is never interrupted while the metamorphosis is going on. It continues to breathe through minute spiracula, or holes in its sides. Those in the sides of the caterpillar correspond precisely with those that have gradually opened in the sides of the butterfly. When perfectly grown, and each and all its members are complete, it straightens out its heretofore untried limbs, breaks open the dry hulk in which it is enclosed, and floats away on a voyage of pleasure among the flowers, to feed on the nectar they exhale.

Such is the process likened by poets to death and the resurrection. There is neither in this extraordinary transformation. It is a mystery of nature, however.

The Young Folks.

The Barefoot Boy.

Blessings on thee, little man,
Barefoot boy, with cheek of tan!
With thy upturned pantaloons,
And thy merry whistled tunes —
With thy red lip, redder still,
Kissed by strawberries on the hill —
With the sunshine on thy face,
Through thy torn brim's jaunty grace,
From my heart I give thee joy —
I was once a barefoot boy.

Oh! for schoolboy's painless play;
Sleep that wakes in laughing day;
Health that mocks the doctor's rules;
Knowledge never learned at schools —
Of the wild bee's morning chase;
Of the wild flower's time and place —
Flight of fowls, and habitude
Of the tenants of the wood;
How the tortoise bears his shell,
How the woodchuck digs his cell,
And the ground-mole sinks his well.
How the robin feeds his young,
How the oriole's nest is hung;
Where the whitish lilies blow;
Where the freshest berries grow;
Where the woodnut trails its vine;
Where the wood-grape clusters shine.
Of the black wasp's cunning way —
Mason of his walls of clay,
And the architectural plans
Of gray hornet artisans!
For eschewing books and tasks
Nature answers all he asks;
Hand in hand with her he walks;
Face to face with her he talks —
Part and parcel of her joy —
Blessings on the barefoot boy!

Cheerly then, my little man,
Live and laugh as boyhood can;
Though the flinty stones be hard,
Stubble-spread the new-mown sward,
Every morn shall lead thee through
Fresh baptism of the dew;
Every evening from thy feet
Shall the cool wind kiss the heat;
And too soon those feet shall hide
In the prison-cells of pride —
Lose the freedom of the sod —
Like a colt for woak be shod;
Made to tread the mills of toil;
Up and down the ceaseless moil —
Happy if thy track be found
Never on forbidden ground —
Happy if they sink not in
Quick and treacherous sands of sin.
Ah! that thou shouldst know my joy
Ere it passes, barefoot boy!

—Whittier.

The Boy's Resolve.

I would like to have ruddy cheeks, and bright eyes, and strong limbs. But they say that strong drink dims the eye, and whitens the cheek, and enfeebles the frame; therefore I will not drink at all.

I would like to have a clear mind, so that I may think on great things, and serve God and do good to others, and prepare to die. But they say that strong drink clouds the mind, and often destroys it; therefore I will not drink at all.

I would like to have a peaceful heart and a quiet conscience, so that I may be happy while I am here. But they say that strong drink fills many a heart with sorrow and misery, and implants in many a conscience a sting; therefore I will not drink at all.

I would like to have a happy home and a happy fireside, where I could rejoice with loving brothers, sisters, and parents. But they say that strong drink makes thousands of homes wretched; therefore I will not drink at all.

I would like to go to Heaven when I die, that I may dwell with Jesus in glory forever. But they say that strong drink keeps men from entering into Heaven, and casts them down to hell; therefore I will not drink at all.—*English Paper.*

Which Way are You Going?

A little girl named Sarah went home from church full of what she had seen and heard. Sitting at table with the family, she asked her father, who was a very wicked man, whether he ever prayed. He did not like the question, and in a very angry manner replied:

"Is it your mother or your aunt Sally that has put you up to that, my little girl?"

"No, father," said she; the preacher said all good people pray; and those who don't pray are not going to Heaven. Father, *do* you pray?

This was more than her father could stand, and in a rough way he said:

"Well, you, and your mother, and your aunt Sally may go *your* way, and I will go *mine*."

"Father," said the little creature, with sweet simplicity, "*which way are you going?*"

This question pierced his heart. It flashed upon him that he was in the way to death. He started from his chair, burst into tears, and prayed for mercy.

History of a Drinking Club.

Some years ago, in a large town in the west of Scotland, there existed a drinking club of upwards of twenty members, all of whom belonged to the middle classes of society. This club had a great influence in municipal affairs; several of its members were elected to fill posts in the town council. The drinking was carried on to a fearful extent in the tavern where they met. The members were often to be found at the club at all hours of night or day. Their drinking was often accompanied with such noisy mirth as to attract the attention of the passers-by.

Two of its members were sent to a lunatic asylum, one jumped from a window and killed himself; one fell into the water and was drowned; one was found dead in a public house; one died of *delirium tremens;* upward of ten became bankrupt; four died ere they had lived half their days.—*N. Y. Sun.*

AGRICULTURAL.

Evenings on a Farm.

Winter evenings among the farmers and rural population generally should be improved. In-doors this is emphatically done. The industrious and tidy housewife's and mother's work is never done. The good woman knits and sews, mends and makes, irons and darns, until weary, from fall evenings until summer comes, in order to keep her household clean and tidy.

How is it with husband and father, the boys and the help? Do they, as does mother and wife, employ their evenings in reading and study? Some do, but it is feared this is the exception and not the rule. Where and how do the greater portion spend their evenings? At some loafing-place, it is feared, such as a store, a postoffice, blacksmith's, tailor's, shoemaker's, or joiner's shop, tavern, or other like place of rendezvous. Now this is neither wise nor prudent.

"The season closing was one of toil and care," you say; "I now need rest." But consider a moment, and ask yourself whether idleness or loafing at such places is rest? Is it not dissipation, rather than recreation? So it seems; aye, so it is, and so will you find it to be ere long, but when, alas, it may prove too late to recover from the power of bad habits.

Will such allow a suggestion from one who has had experience in relation to what he is now writing about? There is hardly a successful farmer in the country who, when a boy, did not read good and useful books; and when he became a man, he still continued the habit, reading books and papers that treated of the business in which he was engaged; when teaching, reading all the best educational papers and books, attending teachers' conventions, etc., and, when farming, reading agricultural papers and books, attending farmers' clubs, agricultural shows, town, county, State, and United States fairs, etc. Thus he never had any taste for loafing where idlers meet, gossip, and talk scandal, to tell stories of more than exceptional character, drink, smoke, etc. This is essentially the experience of most who have acquired the habit of reading and study. Therefore, let those who have been in the habit of wasting their evenings, spend their evenings at home in reading, when they have not occasion to go abroad to attend lectures or meetings of farmers' clubs, or in visiting among their neighbors for social culture and improvement. Improve the evenings as they pass, and when spring comes they will be better fitted for their vocation than a year ago.—*Recorder.*

PACIFIC COAST ITEMS.

To-day—the anniversary of the birth of Washington—is not merely legally established as a national holiday, but is practically recognized as such by all classes of people. There will be a military parade and other public demonstrations in the city, but the majority of our citizens will pass the day quietly with their families. Washington is without a peer in the affections of the American people.

The "Photographic Landscape Rocks," on exhibition at the corner of Montgomery and California streets, are worthy of examination. The term "photographic," however, is a misnomer, as the delineation of trees, shrubs, and mountain scenery is the result of chemical rather than photographic action. They are the largest dendritic specimens we have ever seen, but there are finer ones in the cabinet of the Boys' High School.

The Legislature, having adjourned in time for the members to reach San Francisco by the steamer of last night, is to-day visiting the city of Oakland. The public grounds, including the site for the State Capital and the State Agricultural College, will be examined. Our neighbors across the Bay are dispensing their hospitalities with a regal munificence.

A bill making it grand larceny to steal live stock, and a resolution favoring the annexation of British Columbia to the United States, have passed. The Assembly committed the gross folly of defeating the Senate bill allowing Chinese to testify in criminal cases.

A bill has been introduced, providing for the erection of a Capitol at San Jose, free of expense to the State; but it is not probable that any act seriously looking to a removal of the Capital will pass the present session.

The celebrated Union Copper Mine at Copperopolis is now nearly inactive, only four men being employed in running the engines to keep the water out of the mine. This is quite a different state of affairs from one year ago, when the number of men employed averaged two hundred and fifty. The last news from the East, however, shows an improvement in the price of copper.

Rain, which was so munificently abundant about the time of the holidays, is again in demand among the upland farmers. The winds which succeeded the heavy storms, have dried the surface to a considerable depth, making the ploughing on most lands laborious. The past two days have remedied the deficiency.

Pajaro Valley, a section not surpassed by any other in California for fertility and beauty, is increasing every month in its population and resources. In twelve months it will be nearly or quite reached by a railway, and hundreds of families will seek a home upon its "broad acres."

At Watsonville, on Sunday evening, a large gathering of the citizens was held at Allen's Hall, at which resolutions were passed and signatures obtained against the repeal of the Sunday laws. The meeting was addressed by the Presbyterian, Methodist, and Baptist clergymen.

The price of house lots per foot is rapidly advancing at San Jose, and the *Patriot* says that the town is assuming the style and proportions of a city more rapidly than any place in the State outside of San Francisco.

In Nevada, especially in the Reese River region, many laborers are just now without employment. The deficiency of salt is a serious drawback about the Austin silver mills.

A concert, combining both merit and modesty, was given by the pupils of the Rincon School on Friday evening of last week. A large and appreciative audience was present.

The Silk Factory at San Jose will attempt to begin operations in May. Its success is problematical. It is easier to raise grapes than cocoons in California.

A lecture on the "Elective Franchise" was given by Mrs. Laura D. Gordon, at Platt's Hall, on Wednesday evening.

San Francisco has a large number of men idle about the streets, although the number is less than three weeks ago.

The Owyhee *Avalanche* says the business of Idaho demands telgraphic communication with the outside world.

The Nevada and Grass Valley papers are discussing the question of reducing miners' wages to $2 50 per day.

The Mechanics' Eight Hour League is to have a grand torchlight procession in this city to-night.

Fires in this city have occurred with strange frequency for two weeks past. Only one has been very destructive—that of the American Theatre, on Sansome Street.

TELEGRAPHIC SUMMARY.

Eastern.—Reconstruction goes on slowly at the South—and in the wrong direction....Thaddeus Stevens predicts ill of the failure to impeach the President, and charges the blame upon Grant....Gen. Sherman has been nominated Lieutenant-General by brevet by the President ...The Legislature of Ohio has instructed the Senators of that State to vote for the repeal of the reconstruction laws, and against Sherman's bill to admit Alabama....The Legislature of Missouri is considering a bill to cede ten miles square of land, south of St. Louis, for the location of a National Capital.... A memorial has been received in the United States Senate, from sundry Germans, asking for the abolition of the office of President....The public voice in the Atlantic States is demanding retrenchment at Washington. The New York *Sun* claims that the present Congress is the most prodigal that ever was at the Capital....The Massachusetts Legislature has repealed the prohibitory liquor law, and established a license spstem. Its friends claim that the latter is working admirably, and claim a diminution of drunkenness in Boston. ...The people of Louisville are making a high bid for the holding of the Democratic National Convention....Gen. Sherman declines to take charge of the Department at Washington, and it is reported that he may change positions with Gen. Halleck....Congress is busy in wrangling and spending the public funds....Gold ranges from 140 to 141.

Foreign.—There is a battle impending between the English troops and those of King Theodore, on the frontiers of Abyssinia....Admiral Bell and twelve Americans were drowned in the harbor of Osaka, Japan, on the 11th of January....Mexico having repudiated all her foreign debts, except those of the United States, the English are preparing to take possession of her ports....The Turkish Government is gradually losing ground in Crete....The Fenians are still full of activity and trouble.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, February 19.

Flour—Some of the city millers are selling Extra at $8, and Superfine at $7 for hf and qr sks. The general range, however, is given as follows:

Superfine, hf sks, ℔ 196 lbs.....$7 00@7 25
qr sks..... 7 25@7 50
Extra, hf sks..... 7 75@8 00
qr sks..... 8 00@8 25

Wheat—Sale of 2,000 sks choice milling, $2 70. The same price for the balance of the lot (2,000 sks) was refused.

Barley—Sale of 2,000 sks feed and brewing, $1 75@1 90 ℔ 100 lbs. At the close, 800 sks choice brewing, current rates.

Oats—Continue firm at $1 85@1 95 ℔ 100 lbs for small lots.

Potatoes—The range of the market is $1 15@1 50. Sales of 100 sks Russian River, $1 37½; 500 sks Pajaros, $1 37½ ℔ 100 lbs.

Corn—Sale of 120 sks Yellow, $2 25; quotable as to range at $2 25@2 37½c ℔ 100 lbs.

Corn Meal—California description, 3¼c.

Rye—Is still inactive at $1 75@2 ℔ 100 lbs as nominal quotations.

Buckwheat—Sells, in small lots, at $1 75@1 85 ℔ 100 lbs.

Beans—Sales of 400 sks small White, $4 50@4 55. We quote the range for the various descriptions as follows; Bayo 3⅝@4⅛c; Butter, 4¼@4⅜c; Pea, 4¼@4⅜c; small White, 4½@4⅝c; Pink, 2½@2¾c; and Red, 2⅛@2¼c ℔ lb.

Peas—Jobbing at 2@2½c ℔ lb.

Onions—Remain scarce; jobbing at 7c ℔ lb.

Bran—The mill price is $30 ℔ ton, with a good demand.

Middlings—We quote Fine at $50: feed descriptions and Shorts, $33@$34 ℔ ton, from the mill.

Oil Cake Meal—In fair demand at $30 ℔ ton from the mill.

Hay—Sales include 10 tons fair, $18; 30 tons choice, $25—full figure. We quote the range of the market at $18@$24 ℔ ton.

Dairy Products—Supplies are more liberal, and prices easier. Fresh roll Butter 30@35c, the latter an extreme price for choice dairies; Cheese, 18@20c for California make, and 21c for Eastern (English dairies). Eggs are plentiful and cheap—say 30@32½c ℔ doz.

Poultry—Live Turkeys are quoted at 15c ℔ lb; Hens, $5 50@$6 75; Roosters, $6 75@7; Ducks, $6@6 50 ℔ doz; Geese, $2 50 ℔ pair.

Provisions—Cured Meats are a trifle firmer. We quote California-smoked Bacon, 11@15c; Oregon do, 12½@13c; California Hams, 15½@15c. There has been considerable activity of late in Lard, particularly for California rendered, the price of which is now 13@14c, firm, some dealers asking 15c. Eastern Lard is also better—say 12½@13c ℔ lb.

Wool—The market is still quiet, at 12@16c ℔ lb for clean grades of fall and spring respectively.

Hides—Sales since the 12th inst. aggregate 427 California dry, usual selection, 14@14½c, and 407 Mexican, fair to good, 12½@13½c ℔ lb.

Tallow—An offer of 7¼c for fair Beef was refused. We quote the market quiet at 7¼@7½c ℔ lb for Beef and Mutton.

San Francisco Cattle Market.

Good to choice American Beef is firm at a slight advance. Spanish Beef scarce, and prices largely nominal. In Veal an important advance of 3@4c ℔ lb is reported. Mutton is a little easier to the buyer. Lamb is scarce and quotations nominal. Pork has advanced 1@1½c ℔ lb.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 10@13c ℔ lb.
Spanish, 1st quality, 9@10c.
do 2d do 8@9c.
do 3d do 7@8c.
Veal—10@15c ℔ lb.
Mutton—6@9c ℔ lb.
Lamb—9@10c ℔ lb.
Pork—Undressed, 6@7¾c; dressed, 9@10½c ℔ lb.

Current Topics.

The country has been more agitated during the past week than at any time since the assassination of President Lincoln. Notwithstanding the hostile relations of Congress and President Johnson, it was hoped that no open collision would be necessary, but that the general administration of government might continue until he shall be no longer in office. He has now made this impossible by an act which removed all difference of opinion among Republicans in Congress, and caused the indignant resolve to impeach him. When Mr. Stanton was first removed, the feelings of the people were divided, yet all knew that as the Senate was not in session, the President could appoint some one as Secretary *ad interim*. But after the Senate restored Mr. Stanton, the sentiment is general that he could not be removed again while the session continued, without its concurrence. Mr. Johnson, however, displaced him, and appointed Gen. Thomas as his successor, but the Secretary refused to leave the office, and neither branch of Congress nor the army will support the President in his action. Immediately a resolution of impeachment was introduced in the House of Representatives, and passed by a large majority. Great excitement must be the result, and each party will strive to make capital for itself while it prevails; yet all must be humiliated by this first instance of the trial of our Chief Magistrate for "high midsmeanor." Let us hope that the same Providence that has so often brought light out of darkness in our national history, will bring the country out of this crisis without serious loss.

The vote of the Legislature on the repeal of the Sunday law has both surprised and delighted the lovers of order and religion in the State. We almost feel that an apology is due the members who have so emphatically declared their conviction of the value of this sacred day, for the fear that they might permit it to be unprotected even by the present statutes. Certainly they have the warm congratulations and thanks of multitudes, to offset the murmurs that express the disappointment of those who hoped the Christianity of the State would be overridden. There is less demonstration of feeling from this class than might have been expected, and we may believe that further reflection, and the manifest regard for the good of all which has prompted the action of the Legislature, will incline them to accept it as not only inevitable, but wise. Many of those who desired the repeal of the law are Germans, and they are, for the most part, a thinking people. They will gradually understand that this country is different, in many particulars, from that which they left. They will see that evils would result from the prevalence here of many habits that are general in Germany, which are not there experienced. Moreover, in the whole of Continental Europe, there is a change in sentiment among the intelligent and observing respecting the Sabbath. Now that the question, so far as legislation is concerned, is settled for the present in this State, there is opportunity for the influence of argument, and facts, and thought, all of which will be wholesome.

The new interest felt in Lane Seminary by the churches in the western States is likely to render it one of the most important theological schools in the country. For years it has languished, while those who would no nothing for its increase of vigor have predicted its extinction, and not a few thought the eastern seminaries sufficient for all present demands. But observation and experience have convinced those living in the new States that in order to attain to the highest success, their ministers must be educated in the region where they are to labor. Hence, while other institutions were being established, this, that has accumulated much that has value, must not be permitted to perish. Two of the most able and successful pastors in the land have been taken from their pulpits and placed in the vacant Chairs of the Seminary. Stimulated by this movement, men of wealth have added largely to its endowment. The attention of the public is attracted to its facilities and prospects. Unusual numbers of students already seek its advantages, and the wisdom of the course pursued by the Trustees, though at first doubted, is abundantly confirmed. In years to come we confidently expect to find Lane Seminary equal to any in its contribution of talent and worth to the pulpits of our church.

The visit of the Legislature to Oakland last week is hardly to be considered so foolish as some of our papers represent it. Had it been for the local advantage of our neighbor city alone, we would be among the first to declare its folly, for the Legislature has more important business than the personal observation of the various towns and regions of the State, that it may be determined what bills should be passed for their profit. But already one of the prominent institutions of the State has been located in Oakland, respecting the condition of which mere reports would not furnish very satisfactory information. The offer of a very valuable and, it is believed, very eligible site for a State University, with many incidental advantages now in possession of the College of California, located in Oakland, has been made to the Legislature, upon certain conditions, and members could not judge of the value of this offer unless they could see for themselves. These were the chief reasons for the visit. The affairs of the city proper were only incidental. We have not learned how the gentlemen of the Legislature were impressed by their survey of what it is proposed to place in their hands, but if their judgment of the opportunity now to inaugurate a University worthy of the State accords with that of others who are acquainted with the facts, we shall hear of enthusiasm among them respecting one of the grandest enterprises ever proposed in California. It will be long before another like opportunity will occur, and even were there no advantage in the offer, every reason urges upon us the necessity to begin a University without delay. We cannot afford to have inadequate facilities for education, nor can we afford to wait.

Some of our statistical writers who are rather "fast," are estimating the population of this city at 140,000. San Francisco never was having a more substantial and healthy growth than at this time, but we think its resident population does not exceed 125,000. At that figure it exhibits a remarkable growth. When gold was discovered by Marshall in 1848, it contained a hundred small buildings and a mixed population of 480. By the census of 1860 it had 56,836. Admitting its present inhabitants to number 125,000, the rate per cent. of increase since the last census is 120 per cent. — a rate exceeding even the most rapidly growing cities of the Mississippi Valley. The present population is greater than that of New York City fifty years ago. They are now born who will live to see San Francisco one of the three great centers of the world's commerce, with its population of a million.

The winter, which, according to the calendar, closes with to-day, has been one of marked severity throughout the globe. Hunger and suffering have brooded over nearly every people of the Old World. In London it is estimated that 25,000, out of a working population of 600,000, are out of employment, and 75,000 are in distress. All over Great Britain and Ireland there is a largely increased number who are compelled to beg for relief. In France the destitution of the poor, especially in the cities, is severer than at any time within fifteen years. In French Algeria the Arabs are dying of famine by thousands. In Germany, tens of thousands are looking to migration to the Western Continent as the only hope from despair. From all over Europe and Asia, to far-away Finland and the remote shores of the Aral, comes the cry of want. Never was spring more longingly looked for from a winter of bitterer discontent. Even in the Atlantic cities, the number of the indigent has increased beyond precedent. The Pacific Coast is almost alone in the abundance and cheapness of the necessities of life.

Rev. J. B. Thomas and family, of Brooklyn, N. Y., arrived by the last steamer. Mr. T. becomes pastor of the First Baptist Church in this city.

Religious Intelligence.

PACIFIC COAST.

Postponement of the Convention.—Probably none will be surprised, and many will be pleased, when they are informed that the Convention which was to have been held on Wednesday last, has been postponed for one week. The violence of the storm on that day made it impossible for any large number to be present from either the country or city. Every arrangement is made for a very interesting meeting, and we hope that not only all those who designed to be here, but many others who were expecting to be absent, will attend on Wednesday evening, March 4th, at the Howard Presbyterian Church.

—

A special meeting of the Presbytery of Sierra Nevada will be held at the Howard Presbyterian Church, San Francisco, on Friday, March 13th, at 10 o'clock, A.M. A full attendance of members is requested.

C. C. Wallace,
Stated Clerk.

—

The Presbytery of Stockton will meet in Jackson, Amador County, on Friday, March 13th, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. Jas. S. McDonald, the retiring Moderator. Statistical reports from all the churches in the Presbytery will be expected. There will be preaching every evening of the session.

H. H. Dobbins, Stated Clerk.

—

Presbyterial Notice.—The Presbytery of California stands adjourned, to meet in the First Church, San Francisco, on Wednesday, March 11th, 1868, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James Eells, D.D., the retiring Moderator. The attention of ministers and churches is called to the instructions of the Presbytery, requiring brief narratives of the state of religion, together with statistical reports, to be sent to the Chairman of the Committee on Narratives, ten days before every spring meeting. Rev. F. Buel is the present Chairman of said Committee.

Feb. 11th, 1868. John G. Fackler,
Stated Clerk.

—

Election of Officers.—The Young Men's Christian Association of this city have elected the following officers for the unexpired term of 1868: President, George Barstow; Vice Presidents, Daniel C. Breed, W. F. Kellet, John Dunn, C. J. King, and Wm. McCubery; Recording Secretary, James F. Crossett; Corresponding Secretary, S. W. Backus; Treasurer, Walter N. Hawley; Librarian, Jas. Woodworth; Board of Managers, Thomas W. McColleam, H. H. Earle, Charles Spear, C. W. Kittredge, J. Q. Adams, E. A. Lawrence, J. L. Barker, E. R. Waterman, James McDaniel, R. G. Davison, Samuel Mosgrove, H. H. Morgan, Henry Maas, F. A. Hatch, John Daniels, J. A. Eaton, George M. Wood, Wm. Crosbie, H. G. Horner, James Palache, W. O. Andrews, James F. Stewart, and Freeman B. Lyle.

Howard Presbyterian Church.—The annual meeting of this church was held on the third Wednesday (19th) of February. The report of Session showed that thirty-one persons have been received by letter and twenty-seven by profession, making a total of fifty-eight. The present number of members is three hundred and seventy-six. The total membership of the Sabbath School is about four hundred, exclusive of mission schools, which number nearly three hundred additional pupils. Messrs. David N. Hawley and Milton H. Myrick were elected as Elders; Messrs. George T. Hawley and George S. Lovely were elected as Deacons; Mr. Samuel I. C. Swezey was elected Sunday School Superintendent.

The Rev. F. Buel proposes to deliver, at an early day, one or more lectures on the manuscripts, versions, and translators of the Bible. The history of some of the more important manuscripts of the Old and New Testaments is exceedingly interesting, and it is all important that Christian people should know the foundations on which the credibility of the Sacred Record rests in the genuineness and anthenticity of the original manuscripts.

Rev. Wilber McKaig, late pastor of the Third Presbyterian Church, Cincinnati, has accepted a call from the First Presbyterian Church, Marysville, and will be installed on the 17th of March.

The Spare Hour, the new religious journal recently started in this city, has an unusually neat exterior, is ably edited, and is one of the most readable of our exchanges.

Rev. Joseph Worcester, a scholarly young minister from Boston, has taken charge of the Swedenborgian congregation, which meets in a hall on Market Street.

Rev. J. P. Moore has resigned the pastorate at Benicia, to take charge of the City Mission, under the auspices of the Congregational churches.

The five Baptist churches of this city have a membership of seven hundred. Seven were added to the Union Square Church last week.

Rev. W. I. Nichols, of the Central Methodist Church, is holding a series of interesting evening meetings.

Bishop Kip administers the rite of confirmation at San Jose to-morrow.

EASTERN.

We are glad to learn that President Hitchcock, of Western Reserve College, is improving in health, by reason of his visit to Europe, though he is advised to remain for some months longer in the south of France.

Rev. J. B. Bittinger has declined the Professorship in Oberlin College, which was lately offered him. He prefers pastoral duty.

Congregational.—The whole number of Congregational churches reported on this side the sea is 3,947, of which 122 are in Canada, Nova Scotia, New Brunswick, and Jamaica. The whole number of ministers is 3,063, of whom ninety-two are out of the United States as aforesaid. The total of church members is 394,372. The number of Sabbath Schools is 320,520.

The Methodists of Philadelphia are about to inaugurate a system of "pastoral aid societies," composed of ladies of the churches. The work suggested is to visit the sick and needy, gather the children into the Sunday Schools, encourage attendance upon religious services, and give religious counsel wherever needed.

Rev. J. G. Butler, D.D., the esteemed pastor of Walnut Street Church, Philadelphia, has been compelled, by a partial failure of health, to resign this important charge. The congregation agreed to unite with Dr. Butler in requesting a dissolution from the Third Presbytery.

Bishop McIlvaine, of Ohio, now the senior and presiding Bishop of the Protestant Episcopal Church in the United States, is imbued with the simplicity of the beloved Bishop White, certainly, as regards ceremony in the public worship of the church.

The number of Methodist members of Canada is estimated at one hundred thousand. They are divided into Wesleyan, Episcopal, New Connection, Bible, and Primitive Christian branches; but, at present, have under consideration the project of union.

Rev. John Cotton Smith, of the Church of the Ascension, preached for Dr. Tyng a defiant sermon on "Liberal Principles in the Episcopal Church," while Dr. Tyng was away preaching at the opening of a Methodist church.

The Collegiate (Dutch) Church has chosen a new pastor (Rev. Dr. McNair), who is to devote himself especially to the service of the church in Fulton Street, New York City.

Rev. Dr. Cutting has resigned his professorship in the University of Rochester, N. Y., and enters at once upon his work as Secretary of the Baptist Educational Commission.

Rev. H. C. Potter, formerly pastor of St. John's Church, Troy, N. Y., has accepted the pastorship of Grace Church in New York, at a salary of $10,000 per annum.

Rev. Z. M. Humphrey, D.D., of the First Presbyterian Church, Chicago, has received and accepted a call to the Calvary Church, Philadelphia.

The Presbyterian church at Marlboro, Dutchess County, N. Y., one hundred years old, was burned on Sunday, 18th inst.

The Rev. B. F. Bittinger has been installed pastor of the Seventh Street Church, Washington City, D. C.

MISSIONARY INTELLIGENCE.

The Palestine Exploration Society have sent out a second expedition, from which most interesting results are already received. Besides surveying the whole of Philistia, and a large parts of the Jordan valley, and of Moab and Gilead, they have made excavations in Jerusalem which promise to throw much light on its ancient topography, and settle many vexed questions. Thus the courses of the three walls described by Josephus may be traced, and perhaps the exact site of the Holy Sepulchre and of the Temple may be decided. The huge stones in the foundation of the Temple are being laid bare at the depth of ninety feet. The "pinnacle of the Temple," where Christ was tempted, is proved to have an elevation of 136 feet; and the bridge between Zion and Moriah — the "ascent" by which Solomon went up to the house of the Lord — is proved to have been more than 156 feet high, and may well have excited, as it did, the wonder of the Queen of Sheba. Many acqueducts, cisterns, and passages in the rocks are found beneath the Temple area, and are expected to give valuable help towards the understanding of the services of the Temple. The visit of the Sultan to England helped to smooth the way for these researches.

Missions in India.—Some twenty-five Protestant Missionary Societies, nine of which are American, are now laboring in India, supporting 559 missionaries, and expending annually, $1,250,000. The India government (British) expends in *secular* education, more than three and a half millions of dollars yearly. In British India, with Burmah and Ceylon, there are now 190 native missionaries, 1,550 native churches, 50,000 communicants, and 100,000 boys and girls receiving Christian instruction. In southern India, a native Home Mission Society has sent out laborers, who have preached the gospel to 75,000 persons during the year; and in the Madura district, more than half the entire population have heard the glad tidings. During the great mutiny, the native Christians were involved in the general suffering, and some were massacred; but only six renounced their faith in Christ under temptation, and all these subsequently returned.

Christian Labors Thwarted.—Rev. J. L. Phillips of Orissa, India, describes the moral desola-

ion spreading among the Burmese and Karens, from the growing use of alcohol and opium, introduced by the English government. Some entire villages are ruined; honest, laborious workingmen have become idle vagabonds; and some churches are completely and hopelessly disorganized by this vice, as opium-eaters seldom reform. Fifty years ago, the native Burmese were remarkably free from intoxicating habits; now they say, "The English taught us to use arrak and opium." The English government realize from this traffic an immense revenue, sixteen times more than is expended for public education throughout the province.

France.—Emilien Frossard, pastor of the Reformed Church at Bagneres de Bigore, France, has published a summary account of Protestantism in that country. The following statistics are taken therefrom.

In 1804 we reckoned 205 ministers in the Reformed Churches; 225 Lutheran ministers; total, 430.

In 1857 we reckoned 601 ministers in the Reformed Churches, 269 Lutheran, 20 Union of the Evangelical Churches, 30 Independent, Baptist, and Wesleyan; total, 920.

Progress in China.—Hon. S. Wells Williams, writing from Peking to the American Board, says: "The present aspect of mission work in China encourages to constant work in every branch, and the truth seems to be leavening the mass of mind in ways and places that we know not, except as we see the results. * * * I thank God, after thirty-four years' observation, that no shade of doubt as to the triumphant result, or regret at having engaged in it, has ever arisen in my mind."

Results of Missions in India.—The direct results of Christian missions in India are of the most gratifying character. There are now in India some 50,000 communicants of all churches; there are congregations of 250,000 people, together with 200 native clergy. But, as an English writer on the spot has observed, there are other results of still greater value as to the future, in the general impression which has been made upon India as to the falsity and weakness of their old religions, and the truth, and power, and certain triumph of Christianity.

Twenty-five Protestant missionary societies labor in India. Of these three are in Scotland, eight in England, one in Ireland, four on the Continent of Europe, and nine in America. There are, besides these, seven societies for literature and education. These societies maintain upwards of 550 missionaries, and along with the Bible and tract societies, etc., expend annually about £250,000 ($1,350,000). The India Government expends in *secular* education upwards of £700,000 ($3,500,000) per annum.

Light in Dark Places.—Missionary Wilder, writing from Kolapoor, India, to the American Tract Society, says that the number of Hindoo readers is rapidly increasing, minds are being roused to thought and reflection. He circulated 4610 volumes of the publications of the Tract Society in 1866. He says: "This department of our work was never so full of interest and promise as at present. Our extensive preaching tours the past cool seasons have quite exhausted our supplies."

England.—The Protestants of England have been for some time greatly exercised over the establishment of a Papal educational institution at Oxford; but the Pope has vetoed the project. The reason given for prohibiting the establishment of the Oratory was that it was dangerous to bring Catholic young men into contact with Protestant institutions. Protestant England is afraid of Rome, and Rome is afraid of Protestant education.

Italy.—Italy still continues in a very troubled state, and the Roman question occupies the minds of the people. Although the French flag no longer floats on the Castle of St. Angelo, and the last imperial soldier has taken his leave of the Eternal City, yet the Italian kingdom seems further from obtaining Rome as its capital than ever.

Effects of the Rebellion in China.—A traveler in China, speaking of the awful carnage in the Tae-ping rebellion, states that a belt of land four hundred miles long and two hundred miles wide is literally without an inhabitant; and a district that once yielded 90,000 chests of tea annually is now a deserted waste.

In Italy, the American and Foreign Christian Union has strengthened its force of evangelists, colporteurs, and Bible-readers; and from many points they have sent up reports of inquiry for truth, and revivals of religion, frequently embarrassed by the violence of the priesthood, but not often overborne."

From China a Baptist missionary writes: "The spread of Truth in this region is remarkable. When we came here in 1860 there were only seven brethren and sisters to sit down with us at the Lord's table. Since then eighty-four have been received by baptism, and now two new churches have been organized, and two native pastors ordained for them."

In Japan, it is said, there are 20,000 Roman Catholics, descended from the Christian converts left there 200 years ago, at the time Japan was closed to foreign intercourse. They are scattered throughout the empire, and there are no new converts.

Dr. Crowther, colored Bishop of Sierra Leone, while on a visit up the Niger, was taken captive and a large ransom demanded. He was finally rescued by a party of Americans and English, but not without the loss of several lives.

Missionaries Sailed.—The Rev. Mr. Herron and his wife, formerly Mrs. Mary Pollock, of Yonkers, N. Y., sailed recently for India. A farewell meeting was held in the Westminster meeting-house in Yonkers.

Germany.—The Berlin city mission are trying tea-meetings as a means to reach the masses. Three hundred cabmen and their families are now under the care of two missionaries and two Bible-women.

Austria.—A number of persons belonging to the Christ-believers have been imprisoned for meeting for worship in private houses.

Several recent converts in Liberia are burning with the desire of going among the natives with the glory of the Cross.

Belgium.—There are fifteen Protestant churches in Belgium, made up mostly of converts from Romanism.

PERSONAL.

Rev. Newman Hall received a Christmas present of five hundred pounds from his congregation at Surrey Chapel, London, on his return from his visit to this country. In his reply of thanks he gave a long account of his American tour, and dwelt in glowing terms on the kindness he received here.

Rev. Dr. Bennett, rector of Christ Church, Guilford, Conn., has published in *Putnam's Magazine*, an interesting paper, which conclusively shows that the late Fitz Greene Halleck was not, as has been stated, a Romanist, but died strongly attached to the Protestant Episcopal Church.

George Peabody has made it a stipulation, that the Congregational house of worship which he has erected at Georgetown, Mass., at an expense of $100,000, shall never be used for "lectures, discussions of political subjects, or other matters inconsistent with the Gospel."

Victor Hugo, according to his custom, gave a Christmas festival to forty poor children in the Isle of Guernsey. The festival comprised a luncheon, presentation of garments, and distribution of gifts from a Christmas tree.

Rev. Henry Ward Beecher is diligently engaged in writing a *Life of Christ*, which is to be published by a firm in New York.

Mr. Ernest Renan has in press his *Life of St. Paul*, which will soon be issued.

Prof. Sanborn Tenny, Professor of Natural History at Vassar College, has accepted an invitation to occupy the same chair of instruction at Williams College.

John G. Whittier, the poet, is slowly recovering from a dangerous illness, at his home, Amesbury, Mass. He has been in feeble health for many years.

Rev. F. D. Huntington, D.D., rector of Emmanuel Church, Boston, has received from his parish the gift of a $10,000 policy on his life.

President McLean, of Princeton College, has become one of the regents of the Smithsonian Institute.

Good Work! One Price! Punctuality!

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

Gov. H. H. Haight, Rev. C. Wadsworth, D.D., Rev. Jas. Eells, D.D., Rev. H. M. Scudder, D.D., Rev. Thomas Frazer, A.M., Rev. F. Buell, A.M., Jas. B. Roberts, Esq., A. Campbell, Esq., A. J. Ralston, Esq.

Hon. H. P. Coon, M.D., H. H. Bancroft, Esq., J. D. Thornton, Esq., F. Henderson, Esq., R. B. Woodward, Esq., H. M. Newhall, Esq., N. G. Kittle, Esq., Erwin Davis, Esq.,

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.
☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.
The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.
For Terms and further particulars, address

INSANITY.

There are some general facts of great signtficance in their bearing on the various forms of mental derangement, included in the term insanity. It is a disease peculiarly prevalent in a state of high civilization. We are told that it is rare in Africa, and among the Indians of America. In China, it was almost unknown in the lower classes until the great rebellion, except in regions where opium was extensively used. Since the rebellion began it has greatly increased. In India, there are very few lunatics, and in the most despotic countries of Europe, the proportion is much less than those where the people are under the excitement of more thought and responsibility in life. In France, the proportion of insane is about 1 to 1,000 inhabitants; in England, 1 to 783; in Scotland, 1 to 563; in United States, 1 to 750; of late years, the ratio in this country has advanced, and in this State, the proportion of insane is believed to be greater than in the majority of the States in the Union.

The causes of insanity are not alone those which belong to the constitution, nor those developed by disease, or bodily accident. The records show that these contribute but a small part of the thousands in our asylums and retreats. More potent causes are found in general political or religious excitement, in serious disappointment, in intense thought and application to what taxes a certain portion of the faculties, in any form of physical or mental excess. Nor is that only insanity which so completely deranges the mind that confinement is necessary, and the powers are all without control. The marked eccentricities of some, the occasional strange conduct of others under the pressure of circumstances or excitement, the extreme desperation of others, resulting in murder or suicide, all indicate a loss of balance that verges towards lunacy. How far the unrestrained rule of depravity over the affections, and judgment, and life, may tend in the same direction, perhaps cannot be determined, yet it is possible that many a man at the final assize will be astonished to learn that God holds him to be guilty, first, because he has permitted a base heart to warp, and paralyze, and sear, and wither, until he is only the wreck of what he was.

These facts and statements have great interest for all whose lives are to passed amidst the ceaseless demands and commotions none can escape. The kinds of business, and the modes of doing business here occasion a fearful strain on the mind's frame work. The possibility of gaining a fortune in a week to one who is in the whirl of speculation, is enough to stagger any ordinary intellect. The resolution to gain a fortune in three or five years, and the adoption of the means necessary to execute this resolution, will be scarcely less ruinous. Our powers are adjusted for healthy action during a life-time, and when the work of a life-time is crowded into five years, they will not endure the burden without serious, often fatal effects. When a man, in a climate like ours, where nature suggests no time for rest by marked changes in the seasons, and the electricity of the air is a perpetual stimulus, not only allows himself no release from business, but even subjects his system to powerful stimulants, that he may do the more, is irregular in all his habits, has but little sleep, and will heed no warning or remonstrance, or actual danger, it is no marvel that his nerves become unstrung, that his brain reels occasionally, and that finally he has softening of the brain, or is in the asylum, or in his grave, worn out before his time. There will never be any business men in advanced life here, except in rare instances, until the manner of doing business is entirely changed. Nor will there be a less number of men with wrecked health, of sudden deaths, of suicides, and those who become insane.

The habits of society, morever, are unfavorable in their influence upon mental health. In many directions they impose heavy taxes on the nervous forces. The laws of nature are often set at naught, and the penalty is inevitable. Some form of excitement is sought in all social intercourse, so that the quiet circle for conversation, or the larger company for cheerful and profitable amusement, is no longer known. There must be something to satisfy the craving for stimulus, or society is a bore.

The same appears in the remarkable phases of religion which have so much influence among our people. Even the supernatural demonstrations which were sufficient at first to attract attention to the delusions which have such success now, do not satisfy any longer. There must be some new and more exciting exhibitions, and these are furnished, till one is led to wonder what can be devised after a time, monstrous enough to answer the wishes of those who have such views of religion.

Then, in addition, the recklessness of individuals in respect to their treatment of themselves, the increase of dissipation, the excess in eating, the chase after excitement, the refusal to rest, by which our people are distinguished, all help to answer the question — Why do we have so many insane persons in California? There is necessity for more general quiet. Men of business should not be in such haste, nor wear such anxious faces, nor have so many gray hairs while they are young. Social life should be enjoyed more and burdened less; should be refined and natural, not artificial and constrained. Religious sentiments and influences should be elevating, purifying, soothing, so far as possible holding the mind in proper balance and checking wild excess, not themselves the most disturbing, and destructive, and unsatisfactory of one's whole experience. And each individual should study himself — not with a view to know how heavily he can be taxed, but that he may know how to render himself the most happy, and useful, and perfect, for a life-time and in reference to body, mind, and soul. He should be aware that he is "fearfully and wonderfully made," and strive to obey the laws written on his nature and in the Word of God. A sense of responsibility for the trust he has in the possession of his powers should abide in every man, and inquiry, thought, care, should be constant lest he abuse that trust. Then insanity will diminish. It will no longer be a disease peculiarly prevalent among those who enjoy high civilization. On the contrary, those thus distinguished, while they are able to reach the most to be enjoyed by themselves, will do the most for others and for their Maker's glory.

"I had rather be a doorkeeper in the house of my God than to dwell in the tents of wickedness."—84th Psalm, 10th verse.

"Where God resorts,
I love it more to keep the door
Than dwell in courts."

—*Watts' Version.*

"And he is no proper judge of blessedness who hesitates a moment to prefer the condition of a penitent in the porch of that of a sinner on the throne."—*Horne's Commentary.*

I have set down the above as a proper introductory to some remarks on door-keeping suggested by my experience two Sabbaths since. I reached the entrance of the Rev. Mr. Hamilton's church in Oakland and found the doors closed, the opening exercises having already commenced. Several pillars of the church — an elder, a deacon, a Sabbath School Superintendent, two ministers of the Gospel (one of whom I was), fathers and mothers with their flocks, a goodly company, kept the door of God's house, while His people worshipped within. And we felt that it was better to be here than in the tents of wickedness. We had heard the sounds of profanity along the streets, and seen the devotees of Bacchus gathering around the saloons of the city, while some of our citizens, we supposed, were yet in their beds on this morning of the Lord's day.

Oh, yes! we felt it was better to be in the porch of the Lord's house, listening to the voice of praise, faint and indistinct as it was, coming to us through the closed doors, than to hear the loud-mouthed oath of the street, or the profane jest of the bar-room, or to be wasting these hours in drowsy slumbers. Yes, we had rather stand as door-keepers outside here than to have inside seats in some places.

But have we not strained the text somewhat? Would not a seat just inside the door be just as accordant with the sense of the passage as a stand outside? Better be near the door of God's house, waiting for an entrance, than to be altogether absent. But it were better still to have praised God by prompt attendance on His service; to have joined in the invocation for the blessing which we shall need on the Word; better to have joined in the song of praise than to have heard it faintly through closed doors; better to have gone in with the multitude than to have disturbed them by our entrance; better to have kept our appointment with God as we keep our business appointments, even if we have to rise five minutes earlier; better to have had a few moments for quiet meditation and preparation on our seats than rush thoughtlessly into God's presence; better not distract the minister's thoughts by coming after he has commenced the service; better not be so sensibly reminded of the foolish virgins who took up their lamentation when the doors were shut.

F. B.

CONTRIBUTIONS.

The Sabbath. Its Effect upon Government.

EMIGRATION. ITS ADVANTAGES.

By the census of 1860, there were in the United States 23,301,403 persons of native birth, and 4,136,175 persons of foreign birth. The latter were about one-sixth of the population. That these emigrants have contributed greatly to develop the resources of the country is conceded. That much wealth has been brought into the country directly by those persons, which has given greater effect to their subsequent efforts in developing its resources, is likewise conceded. Science, literature, and art have been greatly enriched, and their cultivation promoted, by the influences of the distinguished men who have voluntarily emigrated to this country, or have been compelled to flee from despotism. Liberal principles have been forcibly illustrated, ably expounded, and practically applied, by many distinguished patriots of foreign birth among us. That the physical development of our country has been promoted and its intellectual development aided by emigration, is undoubted.

ITS DISADVANTAGES.

It is intimated that ten per cent. of the emigrants are *paupers* and *criminals*, and five per cent. are

infirm. Three-fourths can neither read nor write the English language, and one-third can neither read nor write any language. A large majority have no definite conception of moral responsibility and obligation, and one-fourth are openly dissolute.

PROMOTION OF CRIME.

In the Police Department in the city of San Francisco, from July, 1866, to July, 1867, 9,896 arrests were made, of which more than two to one were of persons of foreign birth. On the first day of December, 1867, there were in our State Prison 692 convicts, of whom 449 were of foreign birth, and 243 of native birth — nearly two of foreign to one of native birth.

INSANE ASYLUM.

During the year ending October 7th, 1867, 313 insane persons were admitted, of whom 186 were of foreign and 127 of native birth. This is two-fifths native and three-fifths foreign.

EXPENSES.

The expenses of the Police Department of this city, for the year ending July 1st, 1867, were $118,-829 55. Of this amount the arrests, trials, etc., of foreigners cost $74,553 02, and the natives, $37,-276 53; expenses of foreigners in excess of natives, $37,276 53. The expense of maintaining State Prison convicts from December, 1865, to December, 1867, exclusive of earnings, was $148,057 33. Taking the proportion of those of foreign birth heretofore referred to, with the natives, and the support of the former cost $95,000 and the latter $53,000; foreigners in excess of natives, $42,000. The Insane Asylum, during the period referred to, cost for its support $130,057 48. Three-fifths of the inmates being of foreign birth, and two-fifths of native, will give to the former about $78,000 and the latter about $50,000; the expenses of foreign support, in excess of native, were $28,000. The additional expenses per annum to the State for the support of foreign convicts and insane, in excess of those of native birth, is about $80,000. The additional annual amount of expenditures of the city in the Police Department, in excess of the native, is about $38,000. We have here presented but two items of State expenditures and one of the city. The trial, conviction, and transportation of convicts to the State Prison will average, in each case, at least $200. The cost to the people of the State to secure the conviction and transportation of the 692 convicts in the State Prison was about $140,000. Taking the fact that there are two foreigners to one native as the basis of calculation, will give about $94,000 to the foreign, and about $47,000 to the native. The cost of those of foreign birth in excess of those of native birth about $47,000. The enormous character of this excess will more fully appear when it is considered that the native citizens in the State of California outnumber those of foreign birth about two and one-half to one.

THE PECUNIARY RESULT.

The three items relating to State expenditures and the one item of city expenditures present the aggregate of expenditures on account of criminals and insane of foreign birth, in excess of those of native birth, of about $155,000 per annum.

In all the departments of criminal jurisprudence, and in all the reformatory and benevolent operations and organizations, whether under the control of the Government or individuals, the expenses may be fairly set down as one for the native and two for those of foreign birth.

SABBATH DAY DRUNKARDS.

During the past three months the average arrests by the Police Department in this city, for drunkenness on the Sabbath day was twenty-seven. During the same period on other days, eleven. The relative proportion of arrests for other crimes was about the same. The proportion of those of foreign birth to those of native was about two to one.

ARRESTS IN THE CITY OF NEW YORK.

During thirteen Sundays in September, October, and November, 1866, there were 1,502 arrests made in the city of New York. During the same time, and in the same months in 1867, there were 701 arrests made. During the latter period the present excise law was in force. Not quite one-half the arrests were made during the latter period. Will it be said now that restraining laws produce no beneficial effect?

COMPARISON OF ADVANTAGES AND DISADVANTAGES.

We do not insist that all the foregoing facts and statistics are correct. Some, doubtless, are only proportionately so. Regarding them as substantially and in the main correct, we will present such deductions as to our mind are legitimate and just. All the unqualified gain we have made is in physical development. Our progress in that regard has been vastly accelerated by emigration. We have likewise been materially benefited by the literary and scientific knowledge disseminated among our people by men of scientific attainments who were of foreign birth. We admit that these are important elements in national progress. Considering, however, the character of our Government, and the source whence we derive our power, there are other and more important elements essential to real progress. These are

MORAL AND RELIGIOUS INFLUENCES.

The foregoing statistics establish the following facts indubitably, to wit:

1st. That emigration brings with it a vast mass of ignorance and crime.

2d. That the character and habits of the foreign element promote vice, and generate and disseminate crime.

3d. That these influences, if not arrested and overcome, will gradually but certainly destroy our institutions. The only means whereby we can arrest and overcome the terrible influences of vice and crime are by the dissemination of the great and pure principles of *morality* and *religion*. The German population have transported to their new home many of the institutions and all the habits to which they were attached in Germany. Consequently they are all bound together by their social organizations. So long as the action of these associations moves within their legitimate spheres, no objections can be urged against them. But when they are used to generate immoral and anti-Christian influences, and concentrate the whole German element in the country, with the avowed purpose of assailing and destroying temperance influences and Sabbath day worship, they are not only to be condemned, but denounced and destroyed. Their declarations and efforts for the purposes contemplated are a bold, reckless, and desperate proclamation of war against our American institutions, and against liberty itself. Their action is worse immeasurably than the subversion of the Roman Empire by the Goths and Vandals, and the conquest of the Britons by the Normans. In both those cases the conquests were the result of power exerted by proclaimed enemies. Foreigners are here by our invitation, We, as friends of humanity, invited them to come and enjoy the blessings our patriotism and valor had achieved. We have, with unparalleled generosity, divided our patrimony with them. The Germans, particularly, have evinced their gratitude by assailing with vindictive fury the very columns upon which rest the superstructure of liberty.

THE REMEDY.

To meet this more than vandal outrage we must organize against that power. The whole foreign element now in our country constitutes but one-sixth of its political power. Let us organize a native party, or a liberty party, and by its power so amend our fundamental law as to place the foreign element arriving in our country in the future upon a probation so extended as to remove any apprehensions of the results by which we are now threatened. Correspondence.

Correspondence from the Capital.

Sacramento, Feb. 25, 1868.

The members of the Legislature have just returned from an excursion to Oakland, whose hospitalities were extended to them. They combined the celebration of Washington's Birth-day with a visit to the site of the future University of California and other noble institutions that are destined to make Oakland a celebrated city of the Pacific Coast.

This visit, it is claimed on all hands, has nothing to do with the Capital question. Oakland aspires to become a literary rather than a political center. But not so with Mud Springs. That ambitious village has become a rival of San Jose, Colfax, and other cities that have an eye to the Capital when it shall again be placed upon wheels to seek a *permanent* location.

The friends of the Sabbath will be glad to hear of the favorable consideration the question of repealing the existing Sunday laws met with in the Assembly last week. The remonstrances that came pouring in from all parts of the State very clearly indicated the deep interest taken in the subject by the people. Too much credit cannot be given to the California Christian Sabbath Society for the energy and zeal manifested in combating the foes of the Sabbath. Their circulars have been sent to all parts of the State, to come here largely signed by almost all classes of our population.

Above all other portions of our country, there is need here of organized effort to sacredly guard our Sabbath. There is already a strong combination to reduce it to the low level of a continental holiday, which to America would be disastrous.

Let this State Society receive the aid and encouragement of the friends of the Sabbath, and the next Legislature will not have so many members as the present pledged to a repeal of all Sunday Laws.

The question of repeal came up on Thursday, the 20th.

A bill was introduced to repeal the law prohibiting noisy and barbarous amusements. The friends of this bill manifested no enthusiasm and brought forth no strong arguments to support their position. All who spoke were *pledged*, and that very fact was enough to weaken the strongest points they could make. The repeal found no champions, save one, outside of San Francisco, where the Germans pledged every man elected to the Legislature. One German from this city made a speech against the Sabbath and those who observe it. He, too, was pledged to this, and was the only other one who said anything.

Mr. Oliver, of San Joaquin County, made the principal speech in defense of the Sabbath and the right to legislate for its protection. He was particularly severe upon the men who came up manacled and could not do otherwise than vote against these laws. They writhed under his lashes.

The discussion was finally cut off by one of their number moving the previous question.

Then came the most interesting part of the whole proceeding — the vote ordering the bill engrossed. This the house refused to do by the unexpected and decisive vote of forty-five to twenty.

This shows that there is a strong party opposed to repeal.

The whole subject has been referred to a special committee of five, who are to report a bill that will cover the whole case. I will be disappointed if that committee will report a bill that will come up to what is demanded. But what has been said and done so far gives encouragement to believe that no milk-and-water measure will be entertained. The laws we now have will be retained, or something better substituted.

Another very important and necessary bill met with a worse fate in the house last week. It came from the Senate, where it passed by an almost unanimous vote. It was a bill allowing Chinese and Indians to testify in courts, where they themselves are the injured parties. Under the present law they cannot do this.

There are men who scarcely do naything else but rob and abuse Chinamen. This is particularly the case in some of the mining counties, where it is easy to make a raid on a mining camp and secure the earnings of the Chinese. But no matter if fifty Chinamen see one of their number murdered, you cannot convict the murderer on their testimony. Hence men rob and kill with impunity.

But there is no remedy for this evil except in the passage of such a bill. It will not do for legislators to continue to trample upon this or any class of God's creatures by urging the plea that you cannot believe them on oath; that they belong to a race of liars and thieves; that they have no business here, and so on, with pleas that prejudice or ignorance alone could suggest.

We must love and dare to do right if we expect to find favor with God, who alone can prosper and build us up. The question will be brought up again, and it is hoped with a better issue. Alpha.

Correspondence from Japan.

Yokohama, January 10, 1868.

Before giving you any account of the "Gan Jitsu," or Japanese New Year, I must say something of the preparation for it. On Sabbath night, two evenings ago, as I was going to our Monthly Concert of Prayer for Missions, I heard persons shouting in the house across the canal. The sound was so loud and earnest that at first I thought it a cry of fire.

On looking around I could see lanterns flitting through the temple grounds, and I then distinguished the cry to be "Euka uchi!" — "riches in the house and the devil out of it!" — and in order to drive him out, they not only cry thus vociferously, but suit their action to their words, and pelt every room in the house with beans. You may well question whether the spirit of all evil is driven out by such means, yet the Japanese would think it a great calamity not to have it done on the regular night for the ceremony every year. The temples seem to be no exception, and are more thoroughly pelted, if possible, than any other place, while the exorcists cry out at the tops of their voices, "f'kauch! f'kauch!"

This scattering of the beans precedes the last night of the old year. The last day is spent in ornamenting the fronts of their houses and arranging the rice cakes and other ornaments within. The night is spent very busily by the merchants and others, in settling their accounts for the year. The ornamentation of the houses consists of tall bamboos with their green leaves, or pine trees and boughs, arranged along the front. Sometimes pines and bamboos are clumped together, and a cross-piece of bamboo connects them above. Along this cross-piece a heavy twisted rope of rice straw is stretched, from which heavy branches of the same hang down like a fringe. This looks very well, as the ropes are tastefully braided, and the heavy drooping fringe is well made and neatly bound, as in small sheaves. The evergreens of course denote perpetuity; the bamboo elasticity of spirit under difficulties. They say the bamboo, though it bends under the snows of winter, speedily rights itself on the return of spring. The rice straw with its grain, the great staple of Japan, hanging in it, braided in two great strands into one rope, with numerous branches of the same material suspended from it, is a symbol of the family relation and its blessings.

In the centre of the cross-piece is what you might call a rosette. It consists of a stick of charcoal, a red lobster, an orange, a very lasting kind of lemon, some dried persimmons, fern leaves, other evergreen leaves and sea plants, all symbols of long life and perpetuity. Above these an open fan, with a red sun painted on it, is spread out, as a symbol of increased prosperity.

In the house, two pressed round cakes of beaten rice, looking like loaves of dough, the larger one beneath, with three smaller and lozenge-shaped ones above, represent the family, parents and children. All these are often placed on a tub of *sake*, or Japanese liquor — an indication, I suppose, of what they call a good time, after the year's accounts are settled up. Numberless little cakes are placed about in the house, many of them on the shelf where their household idols are kept, as offerings to them. In all the temples, also, great cakes are set before all the idols. These cakes in the houses are called "offerings," in what sense I have not yet learned.

One of the principal, in fact indispensable, articles used in ornamentation is Japanese paper, the name for which is the same as for God. They cut the paper in five slits, which are supposed to correspond to the five members of the body, and thus represent God. These papers are suspended along the front of their houses, and placed with all their offerings.

New Year's morning in Japan is a very quiet, and this year, a very beautiful one. The streets are all nicely swept the night before, and as the people have been up late, they remain in doors nearly all day. It is the only real Sabbath Japan enjoys. They call it their great Duntak, a corruption of the Dutch for Sunday. The officers of Government, nicely dressed in their visiting suits, pay their respects to all their superiors, and afterwards make visits of ceremony and friendship among their friends, They frequently merely file a card. I think the New York custom of making New Year's calls, owes its origin to Japan, having been transmitted from here to Holland, and so to the old Knickerbockers of Manhattan. The etiquette observed in the Tycoon's Court at New Year's time is very great. Relatives, or the royal families, make their visits on the first day—great Princes the second day, and so on for several days. New Year's really lasts a couple of weeks. In Yokohama, however, three or four days suffice, and some shop-keepers, like our Jewish friends on the Christian Sabbath in America, are to be seen having a door or shutter open here, and these indicate their willingness to do a little business. The amusements of New Year's seem to commence about midday. In these the children predominate. The boys in their best clothes fly their kites, of which they have a great variety. The girls dressed in bright colors, and their black shining hair put up in wondrous waterfalls, play in companies at battledoor and shuttlecocks, at which game they are very expert. The number of children in the streets is truly astonishing. They are very desirous of the notice of foreigners, and often desire us to take part with them.

One thing I saw greatly grieved me; it was the mount of worship paid at the Mias, or original Janese temple, on this day. A temple dedicated to Benten, a goddess said to have originated from the ea, and whose sacred emblem is a *snake*, was hronged with worshippers. The great gong, which as struck with a heavy rope hanging down over it, as kept ringing nearly all the time by the suppliants in succession. Japanese officers were among hose making their brief and formal prayer. Little hildren, old men, and maidens, all were crowded und their popular idol. A number of foreigners, adies and others, were looking on. As I passed mong the numerous shrines, I saw a civilian, not a riest, at least, he did not have his head shaved as ne, sitting on a mat in front of a goodly pile of the ice cakes, who seemed to be engaged in prayer, hile a little boy was running round and gathering p the Japanese pennies, that the worshippers threw for the treasure-box.

For the first time I saw a Chinaman here worhipping. He was inside the Mia, had a bundle of ghted incense sticks in his hand, and bowed himelf three times in front of the idol's shrine, and hen placed the sticks to be burned before the Godess.

At Kanagawa, we saw a couple of street performrs with drums and fifes, and one with a false face nd dragon's head, going through their exercises in ront of a Mia, and this performance is considered delight to the Gods.

We called at a Buddhist temple, beautifully sitated under the hills, whither we were attracted by he sound of the priest, repeating his prayers and elling them off by peals on his bell. We looked in t the door and saw only the old priest in his yelow robes, attended by a young priest, who read rayers in concert with him. They read with sorous voices, and what no one understands except hemselves—*a dead language of India.* Within he altar before the chief image, and in two side ltars and their shrines, were *candles burning.* Fit mblem this of all those who love darkness rather han light. Human invention in religion is ever inreasing the darkness, whilst professing to impart ght. "Professing themselves to be wise, they beame fools," applies to every species of idolatry, hether it be the worship of the image of Mary, or f Benten; that of Jesus, or of Shaka. The young riest, of a very pleasant face, gave us a bow and a mile in his prayers, and as we turned to go away ame to the door and bowed to us, without seeming o think it any interruption to the worship of his od. We felt thankful that at least he had a better eart than head, and hoped that truth and love will et win the day in this land of darkness. B.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesay, January 22d, 1868, in the new Academy building, recently rected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with he design of securing for the students a home of beauty and refineent.

Careful provision is made for thorough and extensive courses of tudy in English, Mathematics, Natural Science, and the Ancient nd Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection nd drill, together with vocal and light gymnastic exercises, under he instruction of a teacher. Every student is required to attend he military and gymnastic exercises, as a means of physical train ng.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, t Oakland.

WILLIAM JAMES, Newark, N. J. DAVID MEEKER, J. COBBLEDICK, San Francisco.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

RECENT PUBLICATIONS.

A JOURNEY IN BRAZIL. By Prof. and Mrs. Louis Agassiz. Boston: Ticknor & Fields. San Francisco: H. H. Bancroft & Co.

Since the return of the Naturalists under the direction of Prof. Agassiz, who sailed in 1865 for the purpose of working scientific explorations in Brazil, the public has been waiting for some account of the expedition. Remarkable facilities for success were furnished, in the ability of the tourists, in the liberality of the gentleman at whose expense they conducted it, and in the patronage and co-operation of the Emperor, so that we were prepared for such a description of its details as we have in this delightful book. The more material, and in some respects the more valuable, results are found in the splendid contributions made to the Museum of Natural Science in Cambridge. There are other works, and some of them are quite extended, which treat of the Brazilians, and give accurate accounts of the people and the empire, so far as we know, yet there was need of a book which should describe the peculiarities of the country from a scientific point of view. There were frequent inquiries for some such book, from the reading people of this Coast especially, and there could hardly be one more convenient in form, more attractive in style, more interesting and reliable in matter, than this. The facile and graceful pen of Mrs. Agassiz, and the pencil of the artist who accompained them, have greatly added to the mere information of the work, and no one can read it without the pleasure which is always an abundant reward, when those who journey so charmingly supply us with the means of accompanying them, even while we sit in our homes. There are not many travelers who know how to describe what they see, and there are but very few who really do this to much profit, though they may know how it should be done. When, therefore, we have the narrative of those who convince us that it is truthful, while it tempts us on from chapter to chapter by its variety and interest, we gladly place it among our valued books.

The object and success of this journey to Brazil suggest the hope that it may not be long before the Pacific coast shall attract Prof. Agassiz to its vast and wonderful fields of scientific research.

GOOD WORDS FOR 1867. Sold by A. Roman & Co.

Those who have, at any time, furnished this magazine to their families will not need to be told of its worth. If they have preserved the numbers and can have them bound, they will not hesitate to give the volumes a permanent place in their libraries. But there are many families of our people in which there is no such reading-matter, and some, perhaps, that have never heard of the "Good Words," edited by Rev. Dr. Macleod, and published in London, yet having a circulation in this country equal to that in England. To such we commend the opportunity to purchase in San Francisco the numbers of the year beautifully bound, for nearly the subscription price of the magazine. The contents are interesting to both children and adults, and the range of subjects affords inviting fields for instruction as well as pleasure.

The Workers.

A visitor from California once thanked Dr. O. W. Holmes for the instruction and pleasure she had received from his "Autocrat of the Breakfast Table."

"I am exceedingly glad," he replied, "when the echoes come back to me from such a distance; they not only cheer and exhilarate, but stimulate me to a keener sense of enjoyment in writing."

This observation was recalled to me as I looked over my letters and papers received by last steamer, and I thought of the "echoes" which we might return to those in distant lands, who have been instrumental in the spread of the Gospel; in bestowing educational advantages upon the ignorant; and in diffusing the beneficial influences of Christianity throughout the world. It is cheering to the missionary, bearing the "heat and burden of the day," apart from friends and kindred, and often in the midst of uncongenial surroundings, to see that his labors are appreciated by those from whom he went out. It is delightful to the teacher among the heathen to hear his efforts spoken of with commendation and interest by those who are prayerfully watching the progress of Christian enlightenment for the age.

And the physician, who gives so much of his sympathy to bodily anguish, needs the refreshment of kindly words and remembrances from friends he has left at the call of duty, to stimulate him in his career of usefulness. And so, perchance some thirsty heart, lighting upon these words from a private letter of the poet Whittier, may find encouragement and rejoice in the privilege of being one of God's workers. He says: "God has been good to me in that he has given me so many friends to love — so much beauty to see — so much *work to do* for humanity."

Beside this letter lies one coming from California Postoffice, Hamilton Co., Ohio. It is from one of the quiet workers — one who has devoted herself to what she terms in her letter "the glorious Sabbath School cause." Speaking of Rev. Newman Hall's Gospel labors, she writes: "Truly, it is a cause of special rejoicing when men of noble natures and strong powers of mind, espouse the glorious cause of Christ's kingdom in the earth, while we hail with thankfulness every medium, however humble, through which the glad tidings may be proclaimed and disseminated, whether it be through burning words of eloquence, stirring the heart of every hearer, or those whose voices of invitation and gentle persuasion are never heard except in by-ways and dark alleys, in dens of wretchedness and hovels of woe, the sound is the same and unmistakeable, and the love which invites all to come to Christ is from the same blessed fountain."

And here is another of the workers, for the time being obliged to suspend her special labors, who writes under the anguish of a heartrending separation from one tenderly beloved.

"I well know that God is Light, as well as Love, and that His sunbeams shine upon the darkness and chaos within, if in our faith we can only look up and behold the morning as well as the evening of the new creation in our own hearts. Whether the promise that all things shall work together for good to them that love God, is to be accomplished by sunshine or storm, we know not, but we know the promise is sure."

And here, again, is a little notice of the Grand Exhibition from the "Friend's Review," written by E. and S. Jones, who passed through Paris on their way to the East, where an extended missionary tour awaited them:

"After examining some of the chief objects of interest at the Exhibition, we went to the stand of the Bible Society, where we were greatly interested in the account some of the distributors gave of the work done during the time the Exhibition has been open. They have distributed, thus far, one million eight hundred thousand copies of the Scriptures. While we were at the stand, numbers of people came for the little gratuitous French, German, and Italian Gospels, and seemed much pleased to receive them. We also gave away many copies to soldiers and others, who received them gratefully. The gentlemen at the stand seemed much interested in our mission East, and supplied us with Arabic and Turkish copies, and portions of copies, for distribution there."

From a letter dated Mount Lebanon, Syria, Nov. 25th, 1867, we extract — and only wish there was space for the whole of it —

"We are not able yet to give a very clear statistical account of the many schools in Beyrout and Lebanon for the education of boys and girls, but there is indeed a work of widely extended influence going on through their agency. The American Missionaries have stations at Beyrout and in several towns in the mountains, and we are at present at a boarding-school for training Syrian girls for teachers, conducted by two young ladies from England, sent out by the 'Society for Promoting Female Education in the East.' The education given here, and the Christian influence exerted, are raising the women to a very different position from that which they formerly occupied, even among the nominal Christians in this country. The prejudice against their education was very high among all sects, and still exists to a large extent; but some are now, through the influence of these schools, awakening to the advantage of having their daughters educated. Everywhere there is a wide and interesting field of labor, but a great cry for more laborers to work in it, and for supplies to carry on the work, etc."

This cry from the workers, "Come up and *help* us," is addressed to us. Shall we stand aside and ignore our own capacity for labor, waiting the "convenient season," which may never come? We cannot all work in one direction, for there are "divers gifts." But each human soul has either the one or the many talents, and their growth depends upon their use. I once heard a celebrated divine discourse upon the "talent for giving" — and he taught the poorest of us how generous we might be, not alone "in supplies to carry on the work," but in influence, in example, in encouraging every effort to higher aims and nobler aspirations. With the spirit of Whittier, let us thank God that "He gives us work to do for humanity," and although the world still "lieth in wickedness," who that considers the workers and their results can doubt its redemption.

H. L. N.

EDUCATIONAL.

The Home Library.

The examples are very numerous in which the book in the home library has exercised an important influence upon the child's future tastes. Dr. James W. Alexander writes as follows: "The liking of which I am conscious, for the old fashioned English literature, is owing to the contents of a simple shelf in the house in which I spent my boyhood. That shelf contained the essays commonly known as the British Classics." An experience of a different character, but verifying the same truth, is related of Dr. J. C. Warren. Among the books which fell into his hands when a boy was a history of Rome, rendered doubly attractive by its plates of battles and sieges, "From this history he conceived a taste for war, which continued through life." The practical inference from such facts is obvious. One half of that inference relates to the gleaning from our

book-shelves of all volumes likely to produce evil. As we would not encourage suicide, we remove the 'Sorrows of Werter;" as we would not multiply house-breakers, we take away "Jack Sheppard;" and as we dread the forecastle, we dismiss "Two Years Before the Mast," and the "Pirates' Own Book." But the other half of our inference relates to the supplying of volumes of a beneficial character. Of these we will only mention three: one, 'Learn to say No," adapted to strengthen a young man's will; another, "The School Girl in France," suited to expose the proselytism of convent-schools; and the other, the venerable "Fox's Book of Martyrs," written to honor the memory of saints and expose the true spirit of her of the Seven Hills. C.

Praise.

The value of words of praise, judiciously granted to pupils and children, is often very great. This we learn from actual facts, constantly presenting themselves in history and in life. The following passage in point occurs in the "Table Talk of Rogers:" "Most people are ever on the watch to find fault with their children, and are afraid of praising them for fear of spoiling them. Now, I am sure that nothing has a better effect on children than *praise*. I had a proof of this in Moore's daughter. He used always to be saying to her, 'What a *good* little girl!' and she continued to grow more and more good." But we may learn the value of praise from the discouraging effect of censure. An illustration of this occurs in the life of Peter Van Schaack. His first tutor behaved to him, according to a sober report which he made in his later years, "as if he was a block-head." In consequence, he besought permission to abandon his books and enter the army. This plan was frustrated only by his parents' firm refusal, coupled with an accidental discovery of the fact that his tutor in his absence spoke of him more favorably. C.

Agents Wanted,

In our SUBSCRIPTION DEPARTMENT, to canvass for good subscription works. Good remuneration for good men. New works constantly received.

BANCROFT & COMPANY,
Subscription Department,
San Francisco.

Rowland, Bailey & Co.

516 and 518, Washington st.

WHOLESALE & RETAIL GROCERS,

A complete and select stock of Groceries and Provisions, to which attention is requested, both from City and Country.
Having been established for for over eighteen years, they offer their past course as a guaranty for the future.
ROWLAND, BAILEY & Co.,
Opposite old Washington Market.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Family Reading.

Abide with Me.

John xiv. 23.

Abide with me. Fast falls the eventide;
The darkness thickens; Lord, with me abide.
When other helpers fail, and comforts flee,
Help of the helpless, oh! abide with me.

Swift to its close ebbs out life's little day;
Earth's joys grow dim, its glories pass away,
Change and decay in all around I see:
O Thou, who changest not, abide with me!

Thou on my head in early youth didst smile,
And though rebellious and perverse meanwhile,
Thou hast not left me, oft as I left Thee;
On to the close, O Lord! abide with me!

I need Thy presence every passing hour —
What but Thy grace can foil the tempter's power?
Who like Thyself my guide and stay can be?
Through cloud and sunshine, oh! abide with me.

I fear no woe, with Thee at hand to bless;
Ills have no weight, and tears no bitterness;
Where is death's sting? where, Grave, thy victory?
I triumph still, if Thou abide with me!

Be Systematic.

It will add more to your convenience and comfort through life than you can now imagine. It saves time, saves temper, saves patience, and saves money. For a while it may be a little troublesome, but you will soon find that it is easier to do right than wrong; that it is easier to act by rule than without one.

Be systematic in everything; let it extend to the most minute trifles; it is not beneath you. Whitefield could not go to sleep at night if, after retiring, he remembered that his gloves and riding-whip were not in their usual place, where he could lay his hand on them in the dark, on any emergency; and such are the men who leave their mark for good on the world's history. It was by his systematic habits from youth to age that Noah Webster was enabled to leave the world his great dictionary. "Method was the presiding spirit of his life," says his biographer.

Systematic men are the only reliable men; they are the men who comply with their engagements. They are minute men. The man who has nothing to do is the man who does nothing. The man of system is soon known to do all he engages to do; to do it well and do it at the time promised; consequently he has his hands full. When I want any mechanical job done, I go to the man whom I always find busy, and I do not fail to find the man to do that job promptly and to the hour.

And more: teach your children to be systematic. Begin with your daughters at five years of age; give them a drawer or two for their clothing; make it a point to go to that drawer any hour of the day and night, and if each article is not properly arranged, give quiet and rational admonition; if arranged well, give affectionate praise and encouragement. Remember that children, as well as grown people, will do more to retain a name than to make one.

As soon as practicable, let your child have a room which shall be its own, and treat that room as you did the drawer. Thus you will plant and cultivate a habit of systematic action, which will bless that child while young, increase the blessings when the child becomes a parent, and extend its pleasurable influences to the close of life.

A single unsystematic person in a house is a curse to any family. A wife who has her whole establishment so arranged, from cellar to attic, that she knows on any emergency where to go for a required article, is a treasure to any man, (my experience, reader!) while one who never knows where anything is, and when it is by accident found, is sure to find it crumpled, soiled, or out of order, such a wife as the latter is unworthy of the name, and is a living reproach to the mother who bore her.—*Hall's Journal.*

Dickens wrote: "There is nothing — no nothing — beautiful and good, that dies and is forgotten. An infant, a prattling child, dying in its cradle, will live again in the better thoughts of those who loved it, and play its part, though its body be burned to ashes or drowned in the deepest sea. There is not an angel added to the blessed hosts of Heaven but does its blessed work on earth in those who loved it here. Dead! Oh, if the good deeds of human creatures could be traced to their source, how beautiful would even death appear; for how much charity, mercy, and purified affection would be seen to have their growth in dusty graves!"

There are truths so immense and glorious, that when we really credit them, though the heart should be opposed to them, they will still take hold of us in so many ways that we cannot escape from their impression; and the very attempt to do so will make us the more sensible of our trouble, as he would be who shut his eyes to rid himself of pain, or run to get out of the light of day. What then must be the impression of the power of faith, when the heart accords with its object?

THE YOUNG FOLKS.

A Song of Cheer.

The skies are blue above us,
The earth is green and glad;
And friends there be who love us;
Then why should we be sad?
Sweet flowers are freshly springing;
There's fragrance in the air;
Glad birds are gaily singing —
Then banish every care.

Oh, not in gloom and sorrow
Should speed the hours away,
But some new pleasure borrow
From every fleeting day.
The bright sun still is shining,
Though darkness doth it shroud;
And "there's a silver lining
To every sable cloud."

Out in the breezy meadows
The brook goes singing now —
Then why should gloomy shadows
Sit darkly on the brow?
A thousand tuneful voices
Are thrilling all the air.
If nature thus rejoices,
Then banish every care.

There are angel guards above us,
Who joy to make us glad;
And a Father who doth love us —
Then why should we be sad?
Oh ye in grief repining,
And ye with sorrow bowed,
"There is a silver lining
To every sable cloud."

— Mrs. Thompson.

Look to your Heart.

Joy, anger, love, disappointed ambition, remorse of conscience, pining away from a sense of guilt, the cares of a family, and all the refined feelings and sensibilities of our nature, arising from the advancement of civilization and improvement of society, exert a powerful influence on the heart, and render it susceptible of disease.

A very singular fact, illustrating the influence of grief and disappointment upon the heart, is told of Philip, King of Spain, who died suddenly on hearing of the defeat of his army. On opening his body, his heart was found literally burst.

The mental perturbation which raged to such an exciting extent during the French revolution produced the most deleterious influence upon the functions and structure of the heart.

The effect of excessive joy upon the heart is exactly the same. This is sufficiently proved by a well-known circumstance that occurred in Philadelphia with respect to the door-keeper of Congress. He was so much elated on hearing the news of the surrender of Cornwallis, that he fell down dead from a rupture of the heart.

Oxygen the Common Scavenger.

God has no idlers in His world. Each atom has its use. There is not an extra particle in the entire universe. So the oxygen collects every waste substance, picks up every straggler, and returns it to the common stock for use in nature's laboratory. In performing this task its mission is most important and necessary. It sweetens water, it keeps the avenues of the body open and unclogged, it preserves the air wholesome. Oxygen is, in a word, the universal scavenger of nature. No matter can hide away from its keen eye. Every dark cellar of the city, every recess of the body, every nook and cranny of creation, finds it waiting; and the instant an atom is exposed the oxygen pounces upon it. A leaf falls, and the oxygen immediately commences its destruction. A tiny twig, far out at the end of a limb, dies, and the oxygen immediately begins its removal. A pile of decaying vegetables, a heap of rubbish, the dead body of an animal, a fallen tree, even the houses we erect for our shelter, the very instant they are built, are all gnawed upon by what we call the "insatiate tooth of time." It is only the constant corrosion of this destructive agent — oxygen.—*Steele's Chemistry.*

With Nothing to Do.

What a strange anomaly in creation is a human being with nothing to do. The most insignificant object in nature becomes to him or her a source of envy; the birds sing in an ecstacy of joy; the tiny flower hidden from all eyes sends forth its fragrance of happiness; the mountain stream dashes along with a sparkle of pure delight. The object of their creation is accomplished, and their life gushes forth in harmonious work. Oh, plant! oh, stream! here in man and woman are powers we never dreamed of — faculties divine, eternal; a head to think, but nothing to concentrate the thoughts; a hand to do, but no work done; talents unexercised, capacities undeveloped; a human life thrown away — wasted as water poured forth in the desert. Oh, birds and flowers! ye are angels in such mockery of life as this!

AGRICULTURAL.

The Country.

How pleasant it is for dwellers in cities to get off sometimes into the country! In cities we live in the midst of perpetual activity and the jar of labor and trade; but in the country there is stillness and rest. Men work noisily in cities — God works silently in the fields.

The hammer of the builder and of the man who works in iron, rings out sharply on the air; wheels rattle in the streets; your ears are filled with many voices and a confusion of sounds. But in the country the corn comes up silently; fields grow ripe with abundant harvests; the trees blossom and bear fruit; vines hang out their purple clusters; the earth prepares food for the myriads who look to her for sustenance, and there is neither noise nor confusion.

The cattle in the fields have a look of contentment. They stand amid the sweet young grass and crop their food — they lie in shady places when the sun is hot — they drink at pure streams. But in cities they are shut up in narrow stalls.

It is good for every one to go at times into the country, and see and feel how different are the works of nature and the works of man.—*Ike Marvel.*

Planting Trees.

An old man was busily employed in planting and ingrafting an apple tree. Some one passing by rudely accosted him with the inquiry:

"Why do *you* plant trees, who cannot hope to eat the fruit of them?"

The old man raised himself up, and leaning on his spade, replied:

"Some one planted trees before I was born, and I have eaten the fruit; I now plant for others that the memorial of my gratitude may exist when I am gone."

It is a narrow, selfish feeling that confines our views within the circle of our own private interests. If man had been made to live for himself alone, we may justly conclude that every one had been placed by himself, and his bounds marked out, so that he might live alone. But since God has made us live in society, He designs that we should be helpful to each other.—*Ike Marvel.*

Bridge over the Bay.—"Sycamore" writes from Sacramento to the San Francisco *Times* saying:

"A great bridge, it is proposed, will be built by the Pacific Railroad Company, from Hunter's Point to the Alameda shore, if the Legislature grant the franchise; said bridge to be 120 feet wide, with a double railroad track, a doudle wagon track, and two broad paths for pedestrians. On each side of the bridge, booths are to be built for saloons, etc., the idea being to make it a grand promenade of resort. It is estimated that the work will cost $5,250,000. Engineers are now at work making the calculations to a nicety. This would make the grand terminus of the Pacific Railroad at South San Francisco. Mr. Tully, of Monterey, has given notice of a bill granting this franchise."

To prevent Cattle from Jumping Fences.—The following singular statement was made at a late meeting of the American Institute Farmer's Club at New York:

"To prevent steers from jumping fences, clip off the eyelashes of the under lids with a pair of scissors, and the ability or disposition to jump is as effectually destroyed as Samson's power was by the loss of his locks. The animal will not attempt a fence until the lashes are grown again. Of this we are informed by Samuel Thorne, the great breeder of Duchess county, who assured us that he had tested it upon a pair of breachy oxen. As it is of great value to him, he hopes it will be tried by others."

A place for Tools.—Farmers should take good care of their farming tools and implements, and not leave them out to get wet, and to the influence of a hot sun, to crack the wood. Wagons and ploughs will last a life-time if well housed; but when left out, exposed to all kinds of weather, a few years suffice to use them up. A tool-room is as important to a farmer as any building on his farm. A work-bench, with a vice at one end, is very important. Here a hundred things can be "fixed," too numerous to mention. Try it, farmers, and see how quickly you and your sons can learn on rainy days to put your tools in order, and also do many other things for the "women folks" that will save you hundreds of dollars in the end.

Already, says the Stockton *Independent*, the effects of the genial sunshine are perceptible in more than one respect. Both ploughing and seeding have been recommenced in the black lands, where, owing to the heavy rains of winter, all farming operations were for the time suspended. On sandy land, where the farmers get in their crops in advance of the winter rains, the prospect was never more encouraging than at present. In many localities the grain has attained a height sufficient to shade the ground and retain enough moisture to nourish it to maturity, even if we should not be favored with the usual April shower.

Remember that fifty acres actually worth one hundred dollars per acre, is worth more than one hundred acres at fifty dollars per acre; because one-half the work expended on the first will raise as much as the whole amount expended on one hundred acres. In the same way with stock—it is better to fatten five head of steers well, than ten only half one, because they will sell for more, and you will also save the interest on one half of the investment.

Apples keep best when cool and dry. Sudden changes of temperature induce the collection of moisture on the skin, which dissolves the delicate varnish with which the skin of the apple is covered, and it soon decays.

He, that will not permit his wealth to do any good to others while he is alive, prevents it from doing any good to himself after he is dead; and by egotism, which is suicidal, not only cuts himself off from the truest pleasure here, but from the highest happiness hereafter.

MISCELLANY.

A lady saw on the sidewalk a ragged, cold, and hungry little girl, gazing wistfully at some cakes in a shop window. She stopped, and taking the little one by the hand, led her into the store. She bought and gave her the cakes she wanted. She then took her to another place, where she procured her a shawl and other articles of comfort. The grateful little creature looked the benevolent lady full in the face and, with artless simplicity, said,

"Are you God's wife?"

There was no profaneness, but tender and solemn feeling in the heart of this child, who thought of God as the kindest of all beings.

In Alexander Hamilton's first political speech, occur these memorable words:

"The sacred rights of man are not to be rumaged for in old parchments or musty records; they are written as with a sunbeam in the whole volume of human nature, by the hand of Divinity itself, and can never be erased or obscured by mortal powers."

An editor wrote a leading article on the fair sex, in the course of which he said—

"Girls of seventeen or eighteen are found of beaux." When the paper was issued, he was rather shocked to discover that an unfortunate typographical error had made him say, "girls of seventeen or eighteen are fond of beans."

To inculcate contentment with our lot, the eminent John Newton left us this saying: "If two angels came down from Heaven to execute a divine command, and one was appointed to conduct an empire, and the other sweep a street in it, they would feel no inclination to change employments."

The following is a definition of a Virginia gentleman, given by a native of the "Mother of States:"

"Sir," said he, "a Virginia gentleman is a man whom you meet at the cross-roads, who sits on the top-rail of a fence, whittles a stick, and talks Constitution."

The bitterness of humility is a tonic to the spirit. To humiliate yourself is as necessary in this wicked world, as it is for travellers through African jungles to take, every now and then, a draught of quinine. —*Spurgeon.*

The man who makes his own fire, blacks his own boots, carries his own wood, hoes his own garden, pays his own debts, and lives without wine and tobacco, need ask no favor of him who rides in a coach and four.

It was an apt answer of a young lady who, being asked where was her native place, replied:

"I have none; I am the daughter of a Methodist minister."

In Germany, when a paper says anything witty, they kill the editor; and not one editor has been killed there in two hundred years.

When a man is tempted to do a tempting thing, he can find a hundred ingenious reasons for gratifying his liking.—*Thackeray.*

Chicago lawyers talk of making a discount on divorce fees where a large number of bills are wanted in one family.

Do well; but do not boast of it, for that will lessen the commendation you might otherwise have deserved.

God hears the heart, though without words; but he never hears words without the heart.

PACIFIC COAST ITEMS.

A CORRESPONDENT from Santa Clara County says, that, aside from the Spanish population, John Gilroy, who lives at the pleasant town which bears his name, is the oldest white resident of this State. A native of Scotland, he was landed at Monterey from an English vessel in 1814, because hopelessly sick with the scurvy. Mr. Gilroy is a hale old man of over seventy years, and says that over fifty years ago Monterey had a dozen and San Jose twenty adobe houses. The Mission buildings were the nearest houses to the present site of San Francisco.

WE understand that an effort is making in this city to aid in erecting a Presbyterian Church in Austin, Nevada. The cause is richly worthy of aid. Our business men, to say nothing of higher motives, have an interest in the growth and good morals of the Reese River region. Rev. Dr. Pinney, with the approbation of all our pastors, will present the claims of this church.

OAKLAND was the scene of Legislative exploration last Saturday. The day was "raw and gusty," but a majority of the law-makers buttoned up their overcoats and wended their way to the foot-hills, where they inspected the grounds set apart for the use of the Public Institutions. The after-piece, in the form of an excellent dinner, was an enjoyable affair.

THE Sweetwater mines, on the eastern slope of the Rocky Mountains, and twenty-five miles from the proposed line of the Pacific Railway, are just now the "land of promise" to all restless adventurers. One explorer writes to the Gold Hill *News* that they are the "biggest thing on record." Of course!

A MOVEMENT is in progress to establish in this city a hospital for the relief of women and children. Such hospitals are to be found in most of the older cities. The Trustees of the Association are Bishop Kip, Gov. Haight, Frank Pixley, M. S. Latham, and W. C. Ralston.

THE SPECTATOR, alluding to the fact that of the fifty-three deaths in this city the previous week, only sixteen were females, says: "The explanation may be found in the larger number of men in our city, and the reckless habits of a large portion of them.

THE Assembly on Tuesday, by a vote of 32 to 18, passed resolutions urging the President of the United States to be firm in the maintenance of his executive rights as Chief Magistrate, and pledging the support of the freemen of California.

REV. DR. THOMAS, pastor elect of the First Baptist Church of this city, will preach to his new charge to-morrow. We congratulate his people on securing so able and experienced a pastor.

THE *Christian Advocate* says: We have pleasure in recording the fact that the Catholic Archbishop signed the petition against the repeal of the Sunday law."

REV. GUSTAVUS HINES, a pioneer Methodist in Oregon, is getting out a work of 350 pages entitled "Oregon and its Institutions."

THE famous work of art known as "Powers' Statue of California," has been purchased by ex-Senator Latham of this city.

THE test vote in the Assembly on the abolition of capital punishment, was 27 aye to 43 nay.

THE rains of the past week have been timely, and give promise of an abundant grain crop in this State.

TELEGRAPHIC SUMMARY.

EASTERN.—The absorbing topic is the impeachment of President Johnson by the House on the charge of "high crimes and misdemeanors." The vote was strictly a party one—126 to 47. Thad. Stevens and Bingham, of Ohio, announced the impeachment to the Senate....The Democratic National Convention will be held at New York on the fourth of next July....The Indiana Republican State Convention favors paying the national debt in greenbacks....The Maryland Legislature is incensed at the rejection of Mr. Thomas, the Senator elect from that State....The excitement on the impeachment question is chiefly confined to the cities....The House Committee of seven to prepare articles of impeachment are Messrs. Boutwell of Massachusetts, Stevens of Pennsylvania, Bingham of Ohio, Wilson of Iowa, Logan of Illinois, Julian of Indiana, and Ward of New York.....There is a delay in the House in presenting articles of impeachment at Washington. The popular voice is not in favor of rash action....The President nominates Thomas Ewing Secretary of War, and in a message to the Senate claims constitutional proceedure....The Radicals of Missouri are for Grant as Presidential candidate.

FOREIGN.—There are signs of rebellion in Spain against the Queen, and in Portugal against the Ministry....Lord Derby has resigned his post as English Premier, and is succeeded by Mr. Disraeli.

WEEKLY MARKET REPORT.

Produce Market.

WEDNESDAY, February 26.

FLOUR—Beyond a little inquiry for Superfine for the Australian market, there is nothing doing in export.

We quote city mills:

Superfine, hf sks, ℔ 196 lbs.....$7 00@7 25
qr sks..... 7 25@7 50
Extra, hf sks..... 7 75@8 00
qr sks..... 8 00@8 25

WHEAT—The usual degree of firmness continues to pervade the market, it being generally conceded that the surplus yet to go forward is comparatively light. We quote good to choice shipping at $2 65@2 70, and bakers' extra at $2 75. At the close, 300 sks fair milling, $2 62½ ℔ 100 lbs.

BARLEY—Feed and brewing qualities are still quoted firm at $1 85@1 90. At the close, 300 sks choice, $1 92½; 2,000 sks good, $1 87½, buyer 30; 400 sks choice, $1 90 ℔ 100 lbs.

OATS—The recognized light stock enables holders to keep the price up to $1 80@1 90 ℔ 100 lbs.

POTATOES—Quotable at $1 40@1 55 ℔ 100 lbs, according to description.

CORN—Quiet at $2 25@2 40 ℔ 100 lbs for Yellow and White.

BEANS—We quote the extremes as follows: Bayo, 3⅝@4½c; Butter, 4@4¾c; Pea, 4¼@4¾c; small White, 4½@4¾c; Pink, 2¼@2¾c; Red, 2@2¼c. At the close, 200 sks Bayo, 3⅝c; 150 sks Pink, 2⅝c ℔ lb.

BRAN—In good demand at $30 ℔ ton, both from mill and store.

MIDDLINGS—Demand fair at $50 for fine and $38@34 for feed descriptions and Shorts.

OIL CAKE MEAL—Finds ready sale at $30 ℔ ton from the mill.

HAY—The weather interferes with transactions; quotable at $18@24 for fair to choice. At the close, 16 tons choice, to arrive, $25.

DAIRY PRODUCTS—Fresh roll Butter is a little scarce at 30@35c; California firkin in good demand at 35c; Cheese is coming in more freely, and begins to sell more readily at 18@20c for California, and 20@22½c ℔ lb for Eastern; Eggs appear to be firmer at 32@35c ℔ doz.

POULTRY—Live Turkeys are quoted at 15@16c ℔ lb; Hens and Roosters, $7@7 50; Ducks, $6@7 ℔ doz; Geese, $2 50@3 ℔ pair.

PROVISIONS—Cured Meats are well maintained, the quotations indicating an upward tendency. California-smoked Bacon sells at 15@16c; Oregon do, 12½@14c; California Hams, 15@15c; no Oregon Hams offering; California Lard, 15c, firm; Eastern, 12½@13c ℔ lb.

WOOL—Quotations are nominal at 12c for clean fall and 15c ℔ lb for clean spring.

HIDES—Very few coming in, and demand correspondingly light. Since last Wednesday, 300 California dry sold at 14@14½c ℔ lb for usual selection.

TALLOW—Supplies moderate and demand fair at 7¼@7½c ℔ lb for Beef and Mutton.

San Francisco Cattle Market.

Choice American Beef sold yesterday at 12½c, which is a fraction less than last week. The range for ordinary qualities is 8@10c. We omit the quotations for Spanish Beef, as this grade, we are assured, has almost if not entirely disappeared from the market. Veal and Mutton are both a little off from last week's quotations, the outside figure for the former showing a decline of 2½c, and the latter 1c. Spring Lamb sold yesterday at 10@15c; old Lamb is quoted the same as Mutton. Pork is nominally the same as last week.

We quote slaughterers' prices as follows:

BEEF—American, 1st quality, 10@13c ℔ lb.
do 2d do 8@10c ℔ lb.
VEAL—8@12c ℔ lb.
MUTTON—7@8c ℔ lb.
LAMB—Spring, 10@15c ℔ lb.
PORK—Undressed, 6@7½c; dressed, 9@10½c ℔ lb.

CURRENT TOPICS.

A meeting of those who are in sympathy with his Government was recently held in London, and from the accounts of it which have reached us, it must have had more than ordinary significance. John Bright made an address such as we might expect from that great lover of man and advocate of human rights, and his sentiments were repeatedly applauded. We have sometimes queried why Bright was assigned to England in the arrangement of Providence, when his spirit and character seem so eminently American, but such occasions as this, and the manner in which he makes his power felt upon the common people of his country, make us content that he be an Englishman. He can do more for the prevalence of American principles as the Great Commoner than he could were he one of our citizens, and there is no man in Great Britain more honored than he, wherever liberty is loved.

Rev. Newman Hall followed Mr. Bright in a speech distinguished for the independence and ability he has ever manifested, and his recent visit to the United States added both interest and power to his remarks. Especially is it worthy of note that he advocated the payment of the Alabama claims to this Government, and we are somewhat surprised at the statement that this portion of his speech was warmly applauded. All indications of this kind that the people of England are friends of the people in this country, though leaders and lords may endeavor to hold expression of this sentiment in check, should be hailed with joy. The time is coming when the will of the *people* will be supreme everywhere, and such men as John Bright and Newman Hall will be the princes and nobles of the race.

The accounts are appalling which come to us from Europe and the Eastern States respecting the danger of actual starvation among the poor. In England many thousands are unable to get work and are fed by charity, and not a few have been without such supply until the number of the starved to death has awakened general interest. On the Continent the condition of those dependent on their labor for support is not much better. In New York the authorities and associations of citizens are heavily taxed for the food and fuel that may keep alive those who are out of employment. In the South there is a host that none attempt to number of whites and blacks, for whom there seems to be no alternative but starvation before they can gather any products on which to live. These facts contrast strangely with the state of things on the Pacific coast; yet it may be doubted whether, in our abundance, we have done what may be justly demanded of us for the multitudes who perish with hunger. Of the millions of sacks of wheat shipped from this port a portion that would have saved the lives of hundreds would have been scarcely missed — certainly would have made none of us poor. We are not too far away from our brethren in trouble to be free from responsibility. Nor, were the opportunity to help them properly presented, would our people fail to respond. The same men who loaded the treasuries of the Sanitary and Christian Commissions, and who answered the appeal of famine so nobly a year ago, are here yet, and their hearts are as large as ever. May not some means be provided by which they can again be brought to the rescue of the starving?

A National Association has been formed, the object of which is to obtain such a change in the Constitution that God shall be recognized in that instrument. The documents issued by the Association are very interesting, and the arguments are such as appeal with great force to every moral and Christian man. It is proposed that petitions, including the changes that are necessary, be signed in all parts of the country, and that these be sent to our representatives in Congress. That a Christian nation should have failed to acknowledge God as the source of all authority and power in civil government in its fundamental charter is unaccountable. That this omission has been continued for so many years is quite as strange, and may account for many of the "righteous judgments" under which we have passed. Surely, no further delay should subject us to His wrath, who has always made national acknowledgment of Himself a condition of His abiding favor. There is nothing sectarian or political in the movement of which we are speaking, and it invites, and should receive, the sympathy, and prayers, and co-operation of all friends of God and man in the country.

The bill which limits the sale of intoxicating liquors, and makes Supervisors responsible for the character of those who sell them, is very warmly opposed in the Legislature. Yet there are arguments of much weight in favor of a license law, not because it is the best law in respect to liquor-selling, but because it is better than none. So long as there must be such traffic, let it pay a heavy tax; let it be restricted as far as possible within the bounds of decency; let the town officers have some responsibility as to its control, and by all proper means curtail its ruinous effects among the people. There are interests and classes of men that will resist any attempts to check what selfishness favors, whatever evils may result. These interests and men are largely represented in the Legislature, and opposition from them must be encountered, not only when temperance would gain some support there, but when any public advantage is sought. Still it may be hoped that enough men who have the general welfare at heart will be found in this case, as in the case of the Sunday law, to overbalance the opposers. If we can have no more — and, in the present state of public sentiment, it is likely that more would be a damage to the cause rather than a benefit — let us have Mr. Shaw's bill and test its value.

Dr. A. P. Peabody, the ablest of the Cambridge professors, and the most evangelical of the Unitarian ministers, agrees with Ralph Waldo Emerson that the want of a deeper religious spirit in our age is belittling our literature. He says, in a recent address at Amherst College: "Our own age is singularly barren in any work of literature, save those of history, which will have enduring permanence. There is very little of creative thought or of vigorous fancy, and the cause of the lack is found in the state of religious feeling."

The law respecting capital punishment is not to be changed. We had little fear that it would be when the Legislature voted to postpone action upon it until they might be able to get a more general expression of sentiment from the people respecting it. An attempt was made in the Assembly to substitute solitary confinement for life for the death penalty, but this was hopeless. Then the bill was amended to read "imprisonment at hard labor for life." But this also, was rejected by the very emphatic vote of 43 to 27. There seemed to be no necessity that California should repeat the experiment that has been made so often where it would be attended with less risk than among a population like ours, and the Legislature is wise in resolving not to repeat it. We may reach a stage of advance where capital punishment may be abolished, but it is probable that will be when there will be none disposed to commit murder.

Old residents of California abound in anecdotes of persons of cultivation coming down to very humble occupations on their arrival here. But such cases continue, and make their varied appeals to our sensibilities. Where they are forced and reluctant, they excite amusement; where they are prompt and conscientious, they are worthy of admiration. One young man, whom we know, came out here fresh from the war, and bearing on his shoulders the well-won straps of a captain. Unwilling to be idle, five days after his landing found him mounted on a milk wagon. Here he had a chance to show his quality, and that quality soon won him a better situation. All men admire such examples as these, and young persons do well to lay them to heart. In fact, the abhorrence of debt, and a readiness to labor in an honest calling, are qualities which serve somewhat to redeem even characters otherwise very defective. For instance, Count Gurowski was little better, socially,

than an Ishmaelite; but, rather than run in debt, or live upon others, on one occasion he hired out as a gardener. In sight of Cambridge, where lived few men of profounder erudition than himself, and where he had lectured on Roman Law, he took up a spade and "played the Irishman," as he called it, rather than make his landlord his creditor, or his friends his patrons.

Religious Intelligence.

PACIFIC COAST.

Union Convention.

This Convention met on Wednesday evening at the Howard Presbyterian Church in this city. Its purpose was the ratification of the action of the Philadelphia General Convention, held last November.

Hon. H. P. Coon was appointed Chairman, and Mr. Cyrus Palmer Secretary. Prayer was offered by Rev. Frederick Buel.

Rev. Albert Williams, the pioneer Presbyterian clergyman on this coast, first addressed the meeting. A few days since he was interested by a curiosity at the rooms of the "Society of Pioneers," a manzanita stick, which, dividing into two distinct branches, had, after growing a few feet, again united in one firm, compact trunk. It was emblematic of that union which ought, and he believed would soon be effected between the branches of the Presbyterian Church in this country, He could remember when they were one — had seen them disunited — and now rejoiced that the time had come when a spontaneous feeling was pervading all hearts in favor of uniting again in one harmonious body.

Rev. Dr. Eells said it was peculiarly fitting that the pioneer preacher of the Presbyterian faith in California should be the first to give utterance to his views on this occasion. No longer ago than last May the leaders in both the Old and New School Assemblies said they saw no possibility of union. But when the Philadelphia Convention came together, Rev. Dr. Hodge, Dr. Spear, and the most doubting of either party, were amazed at the feeling of unanimity which pervaded the minds of all present. All seemed to desire, not merely an organic, but a *living* union, not held together by iron bands, but by genuine sympathy. As the travel had prevented a general attendance, he trusted an adjourned meeting would be held, when the cause could have the aid and inspiration of a crowded house.

Rev. Dr. Scudder said that on this coast there had always been a harmonious feeling between the two branches — he knew of but one Presbyterian in the State, a layman, who opposed the union movement. We do not need to argue the question here. There are none unbelieving among us — but we do need to show our sympathy with the movement in the East, and give them encouragement by our earnest co-operation. He would reserve further remarks to the next meeting.

Rev. Mr. Buel felt a profound interest in the object of this meeting. He gave a history of the causes of past divisions, and believed that the causes of disaffection having passed away, it was folly to perpetuate their mischievous results. We are taught to exercise faith, hope, and charity. In past ecclesiastical proceedings, faith had ruled alone. The time had now come when hope and charity should also have their perfect work.

Rev. Dr. Pinney, of Austin, said it might seem as if he was speaking in his own defense. In Nevada he and his people had already consummated the union proposed at Philadelphia. He spoke of the early divisions of the Church as having arisen from the peculiar difficulties of the times. Let the dead past bury its dead. The great West, soon to rule ecclesiastically, as well as politically, demand union. Let us have one great evangelical union.

Hon. George Barstow said that in the past the branches of the church had often been belligerent and discordant. Christian organizations had been antagonistic when Christians as individuals could fully harmonize. He rejoiced in the present movement as one of the heart rather than of the head, having its foundation in the spirit of love. It was an earnest of the day — a sign of the coming time when all Christian bodies shall co-operate and act as one.

After singing, Rev. Dr. Eells offered a resolution expressing the views of the meeting in regard to the consummation of the proposed union, which on his motion, was laid on the table for consideration at the adjourned meeting.

On motion of Rev. Dr. Scudder, it was decided that when the Convention adjourns, it shall be to meet at the Howard Church, on Sunday evening, March 15th.

Rev. James Eells, Rev. J. H. McMonagle, Hon. George Barstow, and Mr. Cyrus Palmer were appointed a Committee of Arrangements for the occasion.

—

Sunday School Convention.—The friends of Sunday Schools in Santa Clara and the adjacent counties will hold a Convention in San Jose, on Thursday and Friday, April 2d and 3d, for the purpose of consulting how to awaken more zeal in this important branch of Christian usefulness. Sunday School workers and speakers from abroad will be present. Those in attendance will have free entertainment while in town.

The Convention will meet at the Methodist church. The exercises will consist of reports, discussions, addresses, and an interchange of views upon the various "Systems of Working." Judge Sawyer, Dr. Thomas, Dr. Eells, and Rev. Mr. Lathrop, of this city, are expected to be present.

—

A special meeting of the Presbytery of Sierra Nevada will be held at the Howard Presbyterian Church, San Francisco, on Wednesday, March 18th, at 10 o'clock, A.M., instead of Friday, March 13th, as previously announced. A full attendance of members is requested. C. C. Wallace,
Stated Clerk.

—

The Presbytery of Stockton will meet in Jackson, Amador County, on Friday, March 13th, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. Jas. S. McDonald, the retiring Moderator. Statistical reports from all the churches in the Presbytery will be expected. There will be preaching every evening of the session.
H. H. Dobbins, Stated Clerk.

—

Presbyterial Notice.—The Presbytery of California stands adjourned, to meet in the First Church, San Francisco, on Wednesday, March 11th, 1868, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James Eells, D.D., the retiring Moderator. The attention of ministers and churches is called to the instructions of the Presbytery, requiring brief narratives of the state of religion, together with statistical reports, to be sent to the Chairman of the Committee on Narratives, ten days before every spring meeting. Rev. F. Buel is the present Chairman of said Committee.
Feb. 11th, 1868. John G. Fackler,
Stated Clerk.

—

Marysville, March 3d, 1868.

Eds. Occident:—

Rev. W. McKaig, D.D., late pastor of the Third Presbyterian Church of Cincinnati, has accepted a call from the First Presbyterian Church in this city, and will be installed as its pastor at an early day.

Rev. W. W. Macomber has ministered to us as stated supply for three years past, most zealously and faithfully, and under the blessing of God, we who were a "feeble folk," have now a strong and earnest church. Mr. Macomber has, during his stay among us, endeared himself to our community, and particularly to all Christian people, who will sincerely regret his departure, while his church, who have a warm affection for him, are sad to lose one so near to them, and will ever pray that God will always smile upon him and his estimable wife, and that he may be spared to a long life of usefulness in the Vineyard of the Lord. He would have been called to the pastorate, but his health and that of his family imperiously demanded that he should leave us. He has co-operated with us in our endeavors to provide for the future of our church, and rejoices with us that the Lord has been so good to us in sending as his successor one of the ablest ministers in our church.

Dr. McKaig preached for us last Sabbath morning and evening to a large and attentive congregation, and made a marked impression upon his hearers. *

—

Primary Meeting.—In accordance with a previous call, a meeting was held in the First Congregational Church on Tuesday evening, Feb. 25th, to consult in regard to the propriety of holding a State Sabbath School Convention. The meeting was organized by the appointment of Dr. Geo. Hewston as Chairman, and A. Pratt, Secretary.

Prayer was offered by Rev. H. A. Sawtelle. A resolution was then offered "That a State Sabbath School Convention be held during the coming summer, the time and place to be hereafter determined on."

The sentiment of the meeting was that such a convention would be of great service to the Sabbath School cause, and have a beneficial influence on all the churches. The resolution was unanimously adopted.

The following committee was chosen to make all necessary arrangements, and decide upon the time and place for holding said Convention: L. B. Benchley, Col. Babbitt, S. I. C. Swezey, W. H. Coddington, D. C. Breed, W. G. Badger, L. L. Alexander, J. Palache, W. B. Holcombe, J. Schreiber, S. B. Stoddard, Dr. Luckey, C. H. Afflerbach, J. Kirkpatrick.

—

The Willamette Presbytery of the Cumberland Presbyterian Church met pursuant to adjournment, at Eugene City, Oregon, October, 26th, 1867. The following synopsis from the various reports, will show what has been done in the Presbytery during the past six months. Number of sermons preached, 103; number received into the Church, 41; number of professions of religion, 21; adult baptisms, 8; infant baptisms, 7; whole number of communicants, 195; money received for missionary purposes and other ministerial labors, $283.

Portland Presbyterian Church.—Rev. Aaron L. Linsley, of Salem, Westchester County, N.

., has been invited to become pastor of this church, nd is expected to arrive by the 1st of May. Portnd is now, in population and importance, the third ty on this coast. We hope Mr. Linsley will be ble to enter upon his duties at the time named. He could hardly ask for a wider field for labor.

Presbyterian Church, Alameda.—The new hurch edifice at Alameda will be opened and dedicated on Sunday morning, March 8th. Services by he pastor, Rev. F. L. Nash, assisted by Rev. Messrs. rier, Wells, and McClure.

EASTERN.

Ministers—A Deficit and a Surplus.—In he six theological seminaries at Bangor, Andover, lartford, New Haven, Oberlin, and Chicago, there re in attendance, this year, but 261 students. Where shall ministers be found for the multitude f pulpits that will be clamoring for them before ven all of these students have graduated? Churchs are springing up in hundreds of towns across the Mississippi, and the wave will push on with the Pafic Railroad up to and over the Rocky Mountains. he church universal does not yet do "the Lord's usiness" as wisely as its own, or it would see that here were more ministers to step into these new pportunities, and fewer hamlets where three or four astors daily elbow each other in the attempt to dide among several laborers the work that might etter be done by one.—*Advance.*

A new New School Presbyterian church has een organized in Chicago, called the Twenty-first treet Presbyterian Church. This new enterprise the fruit of the labors of Rev. G. W. Mackie, and hrough his efforts an amount has been secured nearly fficient to erect a fine structure, which will be comenced the coming season. It will be located in a rowing part of the city, and the efforts that have een made are deserving of success.

The Week of Prayer has been followed by such revival in Cornwall, Vt., as that vicinity has not nown for many years. The preaching of Dr. Mafill, who has lately returned to this pastorate after n absence of twenty years, following up the minisrations of Pres. Kitchel, has been very effective. Evening meetings are held, many are being conerted, and the fire is kindling in adjoining towns.

Death in the Ministry.—We regret to announce the death of the Rev. John Gray, D.D., for a ong series of years the pastor of the First Presbyerian Church, Easton, Pennsylvania. Dr. Gray ied at his home in Easton on the afternoon of Sabath, 12th ult., in his sixty-ninth year.

A revival which commenced at Monument Street Church, Baltimore, Md., three months ago, ontinues with much interest. Nearly three hundred and fifty souls have been converted to God. Every department of the station feels its power.

Rev. J. L. Jenkins, now of the Congregational hurch at Amherst, Mass., has had a unanimous call rom the First Congregational Society at Cincinnati, with double the salary he has had at Amherst, but e remains at the latter place.

William Wolcott Ellsworth, ex-Governor f Connecticut, one of the purest and best of our ublic men, died in Hartford on the 15th ult., in the 7th year of his age. He was the third son of Oliver Ellsworth.

Plymouth Church, of Indianapolis, has given unanimous call to Rev. Edward P. Ingersoll, of Sandusky, Ohio, to become their pastor; his response has not yet been received.

The new endowment of Oberlin College has reached $70,000, and it is hoped — with considerable good reason — that it will amount to $100,000 by spring.

The Plymouth Church and Society of Milwaukee have extended a hearty and unanimous call to Rev. J. L. Dudley, of Middletown, Conn.

A Noble Collection.—The collection in behalf of the Board of Foreign Missions, taken in the church at Fifth Avenue and Nineteenth Street, New York, on Sabbath, the 5th of January, amounted to $15,000.

Among the thirty thousand people in the four south-east counties of Kansas, there are but three ministers — one a Congregationalist (Rev. T. H. Canfield), one a Methodist, and one of the United Brethren.

Sixty-six Congregational churches in Illinois are now partially or entirely supporting the A. M. A. among the freedmen, and receiving monthly reports from them of their work.

FOREIGN.

Baptist Churches Abroad.—Rev. Dr. Warren, Secretary of the American Baptist Missionary Union says:

"There are in Germany more than seventy Baptist churches, with a membership of 12,000; and in Sweden 183 churches, with 7,000 members. A church has just been completed in Stockholm at an expense of $40,000.

Dr. Hamilton.—At a recent meeting of the London Presbytery of the English Church, it was resolved that the Presbyterian church in course of erection at Camberwell, London, should be named after Dr. Hamilton, as a deserved tribute to his memory. A similar mark of esteem is contemplated at Birkenhead.

The English Bible Society, in sixty years, has distributed some 53,000,000 copies of the Scriptures. An ingenious person has calculated that at the foregoing rate it will be 1140 years before every member of the human race will have received a Bible, and that it will cost £120,000,000.

BANCROFT & COMPANY,
San Francisco, Cal.

BANCROFT & COMPANY, San Francisco, Cal., are the exclusive Publishers, for the Pacific Coast, of

Putnam's Magazine,

FIRST NUMBER, JANUARY, 1868.

This publication will be similar in character and general appearance to the former series of *Putnam's Monthly*, which ranked, during its existence, as the ablest periodical in America.

High-toned papers on matters of national interest, popular science, and industrial pursuits; and sound information and instruction on important topics, will be specially cultivated.

In the lighter articles, healthy entertainment and pure amusement for the family circle, will be carefully chosen from the ample resources presented by a large circle of contributors.

TERMS OF SUBSCRIPTION.—Four dollars per annum, in gold coin, payable in advance. Postage prepaid by the Publishers. Direct all communications to

BANCROFT & COMPANY,
San Francisco, Cal.,
Publishers for the Pacific Coast.

Oakland College School.

The next term of this Institution will commence on Wednesday, the 15th of January, inst.

Erwin Davis, Esq.,

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

FIDELITY THE TEST OF WORTH.

The great object of probation, as to the discipline of the individual, is the development of character. What is wanting in us is the principle of integrity, the established and reliable purpose and habit of self-renunciation and loyalty to God. Hence, by all the means of grace and providence which He employs, God seeks to cultivate within us the spirit we have lost. This has no respect to external circumstances. It is a necessity in each individual, without reference to others. The process is independent — in some particulars, *new* — in every one, and the result is *fidelity* to his Master that can be trusted, whatever may be his position or his accidents. The important inquiry is — not, how much money have you? but, what are you doing with what you have? Not, how lofty is your station? but, what are you doing in it? Not, how brilliant are your faculties? but, how are you using them? Sidney Smith says truly, "Of all mistakes, the greatest is to live, and think life of no consequence;" and this is as true of one man as of another. Indeed, life consists of the solemn *trusts* bestowed on us, and he lives most who, by their faithful execution, renders himself most like his Lord. Each has a path assigned him, along which none can walk but he — where at every step his fidelity is tested and strengthened, and where he walks in God's sight, stripped of everything that may hide his simple character from other men.

This design of life can be attained as really in the use of little as of much. Let it be remembered that the object sought is the pure intention, the hearty surrender of the will, and it will be evident that it matters little what means are taken by which it may be secured. Often, the real spirit is more readily discovered in the presence of trifling duties, or trials, or interests, than when those that are more important press upon us. We may be excited by the grandeur of a sacrifice, when the *spirit* of sacrifice has no place in us. We may be dazzled by the splendor of a deed to which we are urged, when no *desire* moves us other than that prompted by mere selfishness. So that, really, it is only that fidelity which reaches little things that can display a true and constant love to God. In this view there are no trifles, for every *trust* has solemn interests attached, and it may be that what *men* will never know, and will bring us no reward of honor or esteem, will bear with most weight on our eternal welfare.

There are some persons who seem to have no other mission in the world than to *express themselves*, if we may speak thus, as being the illustration of what is good, and beautiful, and true. They would not shrink from active duty, nor hesitate to stand in any place that God should give them; nor refuse to serve as almoners of larger trusts in influence or money. Yet they have a more difficult and, in some respects, a more exalted office. It is to exercise in patience, and self-denial, and retirement, the spirit of religion — to shine out upon those within their range with the blessed rays of resignation and fidelity, having, as men regard it, a less practical mission in life than some others, yet making their life a power, by love, and devotion, and prayer. From such persons we learn that piety in every state has power to transform and bless; we learn that we may be illustrious with the radiance of the motive which governs us, even more than by the reflection of the thing which we achieve. We learn that a humble spirit of obedience, which finds content in being "faithful in that which is least"— in the best use of the single talent — may be as beautiful and as successful as the same spirit seen in loftier stations, with ten talents to employ. Character, rather than achievement, is what we should seek, in what we suffer, and in what we do, and while, for the sake of the good which may thus be borne to others, we should rejoice in the privilege of extended toil and contributions, if this be granted; as respects our own culture, and work, and worth, in our Master's service, the faithful use of what we have makes us all *equal*.

Is there one who has neglected his trust, who is conscious, not that he comes short in duty of what God requires, but that he has not tried, with a devoted spirit, to obey His will? Let him know that whatever his station, he has to do with Him who allows no excuse for positive disobedience, and he must account for all he *might have done*, as well as for all he *does*. Is there one, in any station who can truly say, despite all felt unworthiness and imperfection, that he has tried to do his duty? Let him take courage, and strive more earnestly in time to come, for his Lord sees his struggles, and will help him, and reward him, and crown him at the end.

Fidelity is success, and he attains nobility that takes high rank in Heaven who enters into God's plan at any point, and with faith and purpose, does what he can.

APPRECIATION OF FARMING.

California has need of a larger population. It has now nearly half a million. A State of such vast size and fertility could readily support ten times that number. It is evident, however, that we have already enough of "professional men," unless it be of good teachers and preachers. There are lawyers and doctors in every section of the State who either are or ought to be, seeking an occupation in which they would be more useful to themselves and to others. There is also a surfeit of clerks, salesmen, and bookkeepers. Hundreds of idlers are about San Francisco, vainly looking for something to do. For every vacancy in shop or counting-room there is a host of applicants.

Meanwhile, farming on this coast offers positive and encouraging inducements to new comers. A large increase of laborers upon the soil, so far from trenching upon, would rather enhance the advantages of those who are already residents. The land near the larger towns bears a high price, but in the more remote valleys it can be bought at a price which the approach of the railway will in a few years quadruple.

Besides, the agriculturist in this State is not compelled to keep up a continual warfare with the elements, and with a rocky, unyielding soil. Hence, already, agriculture begins to hold among our people a relatively high rank. Farmers are beginning to be proud of their calling, and to be inspired by a feeling which ought to be prevalent. As a people, we need to give more careful attention to the cultivation of the soil. No occupation is more honorable. Heartily do we agree with him who said that whoever could make two ears of corn, or two blades of grass, grow where one grew before, deserves better of mankind than the whole race of politicians.

Agriculture is undeniably the strength and courage, the bone and brain, the glory and defense of a nation. Without it, territory, fertility, government, laws, science, art, armaments, and arsenals, are as useless as the phantasies of a dream. It is the sure source of a nation's wealth, the nursery of its manhood, and the inexorable condition of its longevity. Search where you will, you will find no position more free from gnawing care, more positively enjoyable, more in accordance with the laws of our nature, than that of the enterprising, intelligent, and therefore successful farmer.

Visiting the neat and charming cottages among our more cultivated farmers, one is also impressed with the importance of rendering home pleasant and attractive — attractive in its simpler beauty, in its moral influence, in its culture of manly worth and womanly virtue. Some one has said that the three most beautiful words in our language are mother, home, and Heaven. They naturally go together, either of them implying the other two. The great error in Plato's Republic is the subversion of the *family*. Sunder the ties which unite mankind in family groups, and the incentive to labor is gone. The inducements which impel men to the drudgery of life lie in the fact that they have given "hostages to fortune," that they can in reality or in prospect enjoy the fruits of their own industry around some cheerful, domestic hearthstone. Lord Byron appreciated, if he never experienced the reward of daily toil, as well as the incentive to it, when he says:

> "'Tis sweet to hear the watch-dog's honest bark
> Bay deep-mouthed welcome as we draw near home.
> 'Tis sweet to know there is an eye will mark
> Our coming, and look brighter when we come."

CHRIST THE LIFE OF MEN.

There is a constant necessity in Christian experience to come back on first principles, and preserve accurate conceptions of fundamental truth. As every road in the ancient Roman Empire would lead the traveler, however distant he might be, into the midst of the Forum, so every line of religious thought should guide the devout mind ultimately back to Christ. The tendency in religion, as elsewhere, at the present time, is to underrate these cardinal doctrines of inspiration, substituting new conceptions in their stead, as Saul's daughter laid the image in the bed of her imperiled lord. Against all such attempts the true Church must protest, especially when the keen axe would strike at the Cross and try to repudiate His name who suffered thereon. The very corner-stone is then assailed, "and if the foundations be destroyed, what can the righteous do?"

Jesus Christ, as a Divine and Omnipotent Savior, is the hope of the world, the life of men, and no hand can be uplifted against Him without striking a blow at the Christian's dearest treasure.

It is strange that all professing Christians should not apprehend this truth; so many there are who dare to tamper with error, as if it were an innocent pastime, Samson-like, laying the locks of their safety in the lap of the crafty foe. It need not be wondered at if they come forth shorn of their strength, if not sightless forever. There can be no wisdom in tampering with eternal truth; you cannot modify, you cannot improve what God has ordained. It is an ordinance established forever that Christ shall be the Light of the world, the Life of men, and in that sublime arrangement the humble Christian does and will rejoice.

TRUE AND TIMELY.

It is good to read, in that excellent paper *The Nation*, such sentiments as are thus expressed:

"We are suffering just now from political corruption — a corruption which is eating its way into nearly every State Legislature, and which, unhap-

ily, is also reaching the courts; we are suffering rom drunkenness; from crimes of violence; from rowing indifference to law; from wide-spread conempt for training and study; from a clumsy, corupt, inefficient civil service, whose agents, instead f serving the country, defile and disgrace it through heir dishonesty and incapacity. We have before s the tremendous problem of reconciling to each ther the white and black races at the South — of educing the whites to civilized subjection to the law, nd of teaching the blacks to use the law temperately and intelligently for their comfort and security, d not for vengeance or proscription. We have to ake head against the great tide of barbarism which ur vast frontier is ever rolling back on us, and at he same time to raise up to the American level the ast horde of immigrants which are every year deposited on our shores without any other preparation or their new life than discontent with their old one. We have, too, to strengthen the national conscience o resist the assaults of the crop of demagogues whom every political struggle brings to the surface, who seem to seek the national dishonor with almost atanic eagerness, and to find their highest happiness n persuading the community to do things which no ndividual would like to confess to his son that he ad a share in. To ask us to pay large sums of money for new patches of territory and new naval tations under these circumstances, under pretense f assuring the national future, is very like the remedy which old topers prescribe for the headache following a debauch. If the national future be in peril t all, it is not for want of territory, but from excess f it — not because we have not soil enough, but ecause we are unable to cover what we have with aw, order, religion, and education."

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

ROWLAND, BAILEY & Co.,
Opposite old Washington Market.

Correspondence.

Correspondence from Ohio.

Cleveland, February 3d, 1868.

If, as the physiologists say, a man is made over and renewed in substance every seven years, you are an altered man since you left Cleveland. Not much of the original vetebrate is left by this time. Still if you were to walk up Superior Street to-morrow, the probability is that you would be recognized. But whether you would recognize the city, at least in some parts of it, is more doubtful. It used to be a tolerably clean city. Now it is overhung continually by a cloud like that which darkens Pittsburg.

Iron and coal are becoming the ruling forces. They meet here at the minimum of freightage — the one from Lake Superior, and the other from the non-sulphurous coal-beds of the Mahoning Valley. The coal there mined makes a fine quality of iron, without the necessity of being first transformed into coke, like the coal of Pittsburg. There seems to be no limit to the progress of the heavy manufactures now gathering at this point. Eight large rolling-mills have reared their smoke-stacks close around us within a few years. The glare of furnaces flashes on the clouds at night as they hang low in the rainy season. Costly works for the manufacture of steel by the Bassamer process are being constructed — the second works of the kind in this country.

The fine public buildings which have been so freely erected of late are already growing dingy with the soot which settles everywhere. To have clean hands, to say nothing of a pure heart, a man must live well out of town henceforth.

Another large manufacturing interest which has contributed greatly to the recent prosperity of Cleveland, is causing us just now to drink the waters of affliction. The slopes and dells of the river valley, which you remember for their picturesque beauty, are now ravaged and overrun by the forlornest and most reckless-looking shanties, where coal oil is refined. The refuse of this process, called "acid sludge," a mixture of sulphuric acid and crude petroleum, and I know not what other complex nastiness, finds its way to the river and lake, and in winter, when outlying ice alters the current, into the inlet pipe of our Water Works. Drop five drops of kerosene oil into every glass of water you drink, and twenty into the wash-bowl where you wash your editorial face, and you will be qualified to sympathize with your old parishioners and friends. Vigorous measures will be taken during the coming summer to prevent the recurrence of this flavor.

You will pardon my enlarging thus much on these local items, for among your readers along the Pacific shore are some who once knew these regions, and will be glad to know how we stay-at-home people fare.

This city numbers 80,000 inhabitants, one-half, at least, foreign; one-third probably, German. A large number of German emigrants are settling down all along the lake shore, attracted, no doubt, by the fine capacity of the soil and climate for fruit-raising, and especially for grape culture. Whole townships are beginning to be denationalized: the Americans moving westward and their places being filled by Prussians, Bavarians, Bohemians, and natives of Holland. The Norwegians and Swedes all go beyond us, to the colder air of Wisconsin.

There is a serious enfeeblement of the religious institutions planted with so much toil by the first settlers of Northern Ohio. Churches flourishing twenty years ago are now hardly able to maintain their ordinances. One neat stone church, nine miles from Cleveland, in whose building, I believe, you were personally interested, is likely, as things now are, to stand ere long the mere shell of an extinct worship. I have often wished of late that I could, by some word of magic, lift it into the air, and drop it gently down a thousand miles westward, in some of those houseless parishes for whom Bro. Ellinwood pleads so well. Here, certainly, and perhaps in some other wide districts of the older and middle States, the religious energy of the country is becoming rapidly centralized in cities. That quiet, pure Christian life which once existed in the country towns is disappearing. There is no country life such as our fathers knew. The influences which go forth from the cities and large towns penetrate everywhere, leave everywhere a taint and spoil the Christian simplicity of the people, even while they diffuse an ardor and an intelligence not known in past days.

Our Presbyterian churches (N. S.) in this region are waiting willingly, yet not anxiously, for the consummation of reunion. We have held no Conventions hereabouts, because we are so much of one sort that we could hardly convene anybody but ourselves. The original terms of union proposed by the Joint Committee of the Assemblies suit us, and in my own judgment, and that of many in these parts, are not improved by the amendment offered by the Philadelphia Convention. We have enjoyed the courtship, and are not averse to the marriage. But we do not want a mere marriage of "*convenance*," as the French say. Too much stipulation will kill young love. A true reunion must be based as much on trust as on contracts.

We are rejoicing in the revivification of Lane Seminary, and have high hopes from the accession of Dr. Nelson and Dr. Morris to the Faculty. It may seem at first a serious loss to take two such men out of the pulpit and the pastorate, in the very freshness of their power. But there is no one thing which has been more evidently needed for years in our best seminaries than the presence of more men as leading teachers who come to their office laden with the experience of a successful ministry. I would not depreciate scholarship, but young men who are learning to preach need to be taught by scholars who are not scholastic. They want to feel the contagion of leaders who have been at the front and gone through a full campaign. With such teachers a young man can get the true learning of the school, and he gains also that life-like view of his profession which the old ministerial teaching of New England gave in the parsonage of Bellamy or Emmons. A good many young preachers of our day had to spend five years at the start in unlearning theories and finding out facts. We cannot spare time, at the West at least, for this readjustment.

Where is the West? At last accounts it was, for us, at Cheyenne, where Gen. Casement, a Cleveland man, was laying railway track by platoons at the double-quick, two miles a day. He will be at the business again with the first good thaw, and if you of the other slope are as smart, we will meet you, maybe, at the summit before we are much older, and talk over the old times and the new. G.

Our Letter from the Capital.

Sacramento, March 3d, 1868.

The Legislature has now entered upon the last month of of its session. Much remains to be done before its crowded files will be cleared. As usual, the steam will be crowded on at the last, and many bills passed without due consideration.

The Assembly last week refused to pass the bill abolishing capital punishment. Those who believe in the Divine warrant for such punishment, will be gratified that human life is yet to have the protection of God's own solemn enactment.

The general sentiment of the people is in favor of the continuance of this necessary restraint upon the wicked and lawless. Such a law is a terror to evil-doers. Its necessity has been amply demonstrated, and of itself refutes the charge that "it is a relic of barbarism."

The subject of prison reform is exciting much interest among our legislators. The demand for it is urgent. The California Prison Commission is doing a noble work in its behalf. Their worthy Secretary, Mr. James Woodworth, has been earnest and persistent in his efforts in behalf of the prisoners. One thing that he and his co-laborers advocate as of vital importance is a separation of the younger and better class in our State Prison from the old and hardened criminals, who contaminate all who are compelled to associate with them constantly. Many of these have been sent back again and again. They are a curse to society while outside the walls of the prison, and they are an injury to those of their associates who have committed their first offense, and of whose reform strong hopes may, as a general rule, be entertained. Some classification of prisoners according to age and circumstances would certainly be advantageous.

A bill has been introduced in the House and passed to engrossment providing for the employment of a regular Chaplain in the State Prison. It will no doubt pass both houses and become a law. Such an officer, if fitted for the position and consecrated to the work, can do a great deal for the reformation of the prisoners. They need the Gospel of Him who came "to bind up the broken-hearted, to proclaim liberty to the captives, and the opening of the prison to them that are bound."

The world needs this Gospel to deliver it from the necessity of maintaining such institutions at all. Nothing else can remove these monuments of crime from among us. Alpha.

CONTRIBUTIONS.

How Shall the Sermon be Made More Interesting?

You may think this rather a strange and unmeaning question; and yet, for many reasons, we believe it to be not only important, but to the point, at the present day. If you will not consider it a bit of unholy arrogance, or presumption, in your rustic clerical correspondent to make the statement, he will say that one of the finest compliments ever bestowed upon his poor preaching capacity was conferred by an intelligent Christian lady, living not many miles from the Bay of San Francisco, when she said, "Indeed, I always recollect *your* text."

The tone of conversation at the time clearly indicated that what she intended was, that the sermon was so attached to the text that she could not well help recollecting the words used by the minister on the occasion.

Now, if you will excuse this little piece of autobiography, let us proceed to look for a moment at this subject. The question is, How shall the sermon be made more interesting? And the first matter that we suggest in reply is, that the preacher pay more attention to his text.

While the dullness of preaching has had many causes, this one has been prominent: the sermon has not been the outgrowth of the text. Its jejuneness, its dryness, all its soporific tendencies, have been mainly owing to this fact. In years gone by, we met preachers who illustrated and established our position. But it is with grief that we now often meet with clergymen who have talents of a certain order, and might be useful in the ministry, if they would employ the grace of study by which to learn the particular thought to be developed from a given portion of Divine truth, yet whose whole ministry, for lack of this, becomes dry, tedious, and unedifying. These men flourish at given periods and places, but their reign is usually very brief. By their flights of fancy, and a vain show of learning, they please their auditors for a time, and you often hear their praises sounded by ignorant, thoughtless people. But their weakness soon manifests itself, their popularity soon reaches zero, and the ill-health of themselves, or their wives, or some other flimsy excuse, transfers them to another field of operations.

Now, there is no need for saying that the sermon ought to be as interesting and as valuable as the lecture, or the political oration, or the random utterances of infidel declaimers. And shall any minister of God, solemnly ordained to the work of expounding the sacred Scriptures, endowed with a literary and theological training to fit him for this very thing; shall any such teacher say that the sermon cannot be placed on a par with, or even above, all other human productions, seeing that the salvation of men's souls and the glory of God are bound up in it; seeing that the great Jehovah himself is the minister's supporter, and an eternal weight of glory his reward?

Many of the readers of your valuable paper will recollect that the greatest and best sermons of the truly great divines, Robert Hall, Dr. Chalmers, and the inimitable Addison Alexander, and his honored father, are peculiarly interesting and attractive, because of the fact that they spring from their respective texts. Even the Astronomical Discourses of Dr. Chalmers, so full of scientific truths, and that had the effect of closing the doors of commercial houses in the city of Glasgow at the hour of noon on week days, so that business men might have opportunity to hear them, furnish another example, showing that while these sermons were perfectly enrapturing on account of their great thoughts and eloquent delivery, they have additional charm from the fact that they are the outflowing inspiration of the splendid texts, so beautifully illustrated by the minister of Jesus. I am obliged to confess that I have often had my feelings outraged, my understanding stultified, and my whole religious manhood placed in the dust, while listening to some man calling himself an ambassador of Christ, an expounder of the lively oracles, pronouncing something which he was pleased to call a sermon, of about twenty minutes in length, on the great doctrines of the resurrection and the judgment, taking for his text some words from Daniel or St. John, to which he paid no more attention after they were first announced.

Such sermonizers soon become prosy. They change their texts, but not their subjects. Their language appears tame and common-place. They have only a few favorite topics, and they soon run down in the estimation of intelligent people, till we hear such comments as this:

"Oh, he always preaches the same thing. He is so prosy. There is such a want of anything interesting, that we may as well stay at home."

Now the prescription that we would offer, in view of all that has been said, is, that while the minister must do various other things, there is one very important thing that he must make matter of special thought: he must develop his text. This is equivalent to saying that he must frequent his study, and there, in a prayerful spirit, open his Bible, and, with the aid of Greek and Hebrew lexicons, critical commentaries, and other valuable helps, examine the passages and compare Scripture with Scripture, so that when a sermon is produced it will embody the thought of some particular portion of the Word. Then he will arrest the attention of the hearers and increase the power of the pulpit. M. A.

Bloomfield, Feb. 17th, 1868.

For Young Men.

"What do these church-going, Psalm-singing, Bible-reading, Sabbath-keeping, anti-swearing, old-fashioned folks mean? Religion is well enough for women and worn-out old men; but not content with these, parsons get up sermons for young men, and Sabbath Schools and Bible Classes, all with opened doors stand to entice young men among them. The Young Men's Christian Association, too, is doing its work, to draw young men into membership with it, and with some church. I vow they would find it hard to gammon me with such weak sentimentalism." This is the language of many a young man — it was once mine. I believed in a God of nature; but that He would come as Jesus Christ into this world, taking upon Himself the nature and physical weakness of man, and that he could or would redeem this world, and that by shedding of His blood there is a remission of my sins, simply by believing on Him, seemed perfect nonsense. But with all my bravado, there was a time, when crossing the broad Atlantic, that God's voice made itself heard in great danger. Out of the depths I called for deliverance.

You may not be in actual danger, but are there not moments in the still watches of the night when the question comes with irresistible force, "Am I prepared to die?" when thoughts of your home, the peace and security your mother possesses in the fact that her Redeemer liveth — your father's holy life, actuated by those Bible teachings, you would despise if God's mercy did not restrain you — have peculiar interest? Without any attempt to reason the matter, or about the doctrines you must believe, go to the Savior, ask for knowledge for your ignorance, cleansing for your sinfulness, peace of mind for your restlessness. Sincerely try to do this, for if the subject is of such importance as to give you any uneasiness, is it not of enough importance to make you examine it? If your dear mother has been led and kept by the Bible; if your father, with his good common sense, has believed in it, surely it will do their son no harm to examine its teachings and see if they are able to make you wise unto salvation? That in searching the Scripture the Lord may bless you is the sincere prayer of a fellow young man.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Sermon,

BY REV. JAMES EELS, D.D.

Matthew xxvi: 41.

"Watch and pray, that ye enter not into temptation."

Whatever may be believed respecting the origin of the Bible, there can be no doubt that it exhibits a remarkable knowledge of human nature, and the best means of cultivating or restraining it, as may be needed. Its precepts, its illustrations, its practical truths, may be studied with profit by all, and when one pursues any course in opposition to these, he is certain to convince others of his folly, even though he may flatter himself that they are mistaken. I need give no other instance than is presented by the text I have read. The voice of reason and experience confirms that of Scripture, that since we cannot know beforehand, it is wise to *watch;* and since we cannot direct or protect ourselves, it is wise to *pray;* and since it is always more difficult to extricate ourselves after we are in the meshes of trouble than to turn aside from its perceived beginning, it is wise both to *watch and pray*, that we enter not into temptation.

I wish to lead your meditations on this theme today, as furnishing us some lessons we do well to consider.

First. Let us inquire respecting what we are in danger of being tempted. Of course there are general temptations to which we are all exposed, arising from our common depravity, or the state of things in which we find ourselves. There is not the need of special care in regard to these, for the experience and example of others perpetually instruct us respecting them. It is rather concerning those which are peculiar to ourselves, and therefore most likely to affect us through our inattention or their unwonted power, that we are counseled to be on our guard. Among these may be mentioned—

1st. Those forms of evil which are called *besetting sins.*

Were a man whose farm is exposed to the ravages of the smaller animals — the foxes taking his fowls, the squirrels destroying his grain, the rabbits killing his young trees and shrubbery — you would expect him to devise some means to prevent the evil. Suppose, now, when visiting him, you find him intently occupied in protecting his place from the incursions of wolves, and bears, and lions. You go out with him and survey his defenses, and as you see an elaborate and formidable trap at one point, he remarks that none of these savage beasts can ever escape, if they are caught in it. As you pass across fields absolutely laid waste by the attacks of animals with which the ravines and hills abound, he takes you to another point where he has built very expensive protection against his imaginary enemies, and you ask him whether he has ever been injured by such beasts. He says,

"No; but I mean to be prepared, so that they can not do me harm, if they should come."

You would advise such a farmer to expend his labor and care where they would be of more service, and guard against evils that were really upon him. When lions and bears come, he would be wise to fortify against them.

A dealer in a certain species of merchandise suffers loss every day, through his ignorance and neglect of the details of his business and the conditions of success in it. His rivals overreach him; the market changes to his disadvantage, and at all points he shows himself deficient. Yet you find him carefully studying the particulars of speculation in gold, declaring that he will not be made the prey of those who are making so many victims in this traffic, and investigating the best modes of transacting business in other departments, resolved that should he ever be engaged in them, he will be ready for their experiences. The folly of such a merchant is apparent, and you advise him to let gold and general trade remain outside the range of his special study, until he has occasion for accurate knowledge respecting them, and for the present give his thought to his *own suffering affairs.*

Now, there are not a few who are like these men in their conduct respecting *temptation to sin* — building elaborate protection where there is no prospect that it will be needed; informing themselves fully concerning the means of success in directions they will probably never be called upon to take, but actually overrun and well-nigh ruined by evils to which they have given little thought, hardly deeming themselves in any danger from these sources.

One, for example, has an irritable disposition. Troubles, whose name is legion, throng upon himself, upon his family, upon his associates in business, upon his friends in social life, on account of it. His piety is disfigured by it. His usefulness is curtailed by it. All who know him lament its power. But, instead of watching against it and making this infirmity a subject of special and habitual prayer to God, and throwing up ramparts in every direction from which he is likely to feel its assaults, he is solicitous in regard to every *other form* of sin. He is resolved that he will not be dishonest, will not be profane, will not be a drunkard, will not be guilty of any of the gross sins he sees in others, but to which he has no particular tendency.

Another is avaricious, but erects watchtowers and forts, looking everywhere, except along the line by which his most powerful enemy will move upon his character and influence.

Another, by constitution, or habit, or both, is in danger of neglecting some departments of Christian duty, so that his religion will be without symmetry, and his life will be almost a blank; but he is interested in anything more than in attempts to reform in these particulars, and temptation thus approaching him has nothing to hinder its direct access.

There is a marvelous blindness in us all, touching that which it is most important for *us* to see. There is zeal expended upon resolutions, plans, efforts, which no pressing necessity demands. And an observer of men must often ask himself the question, "Why are all so anxious to avoid what hardly threatens them, and so generally indifferent concerning what a little attention would reveal to be a present peril?"

Many answers might be given, all suggested by the consciousness of our total depravity, which affects both our vision and our will; but *the fact* principally interests us now. This gives emphasis to our Savior's words of wisdom, "Watch and pray." If you are so likely to de deceived, or to be indifferent, rouse yourself; turn your eyes, with the most thorough scrutiny, on all sides. If presumptuous sins rush upon you, full-armed and violent, be ready for them and resist their attacks. If little sins steal in, and by insidious influence, seek to undermine your happiness and character, let no fear of what you call greater evils prevent you from observing these and checking them, and driving them away. Nothing is more necessary than the honest, prayerful study of ourselves. No knowledge is more important than that of our own weak points and easily besetting sins. No duty is more imperative than to guard these points with ceaseless vigilance, and watch, lest by these sins we are overcome and destroyed. We should sweep the horizon with our glasses of observation, but we should most narrowly scan every movement where experience shows our chief danger to be, and each one must learn this for himself.

Secondly. We are likely to be tempted by those forms of sin which offer us *reward*, in our judgment, if we will yield to them.

We have various estimates as to what is reward for evil doing. Some can be bribed much more easily than others. But every one should take heed when he is approached with any proposition to depart, in the least, from his conviction of duty, that he may obtain some recompense. Could you look into those secret court-rooms, where conscience has summoned those it declares to be culprits, and where experience is a tormentor, rather than a defender, and where fear adds to the sentence the judge pronounces, those court-rooms with which each one is more or less familiar, you would find the scenes enacted in that one to which you are summoned, are only repeated in all. There are Esaus everywhere, weeping over their folly in parting with a real good for a mess of pottage which was offered them when they were hungry, and the smoking food was too tempting to be put aside. And the testimony is abounding that evil has been multiplied a thousandfold through the power of some promise that it would bring joy, or power, or money to him whom it has thus seduced. There are a few who make an abiding contract to sell themselves, body and soul, to the devil, for so much. The large proportion of temptations, however, only propose to purchase the example, or the influence, or the effort, of those tempted, *for a time*, leaving them the opportunity to gain the rewards of goodness, after what they offer shall have been enjoyed. The forms and guises are countless under which, with some such bribe, we are met by our wily foe. He does not wish that young man to lose his character and position, but it does seem too bad that he should not enjoy the advantages that a temporary venture in sin will not fail to furnish him. He does not desire that man of business to make shipwreck of a standing gained by integrity and toil; but when fortunes can be made in a day, it is a pity that he should feel himself so much trammeled that he will not make the attempt. He does not propose that the Christian shall become a spiritual paralytic, or bowed down with the burdens of conscience, or shrouded in darkness because God no longer smiles on him, going to his grave wretched, useless, and hopeless; yet there surely can be no good reason why he should not turn aside, here and there, to the arbors of indolence and pleasure he has erected on his own grounds, and indulge in habits of which he stops not to consider the results, because they gratify him. These arbors are not to be his dwelling-places. These habits may all be dropped by-and-by.—Alas! what a host of victims has Satan gathered after him by such sophistry as this! And how amazing that through its transparency we do not see the real form and visage of the fiend who seeks our ruin! Be afraid of everything not openly and clearly good, which comes to you with *gifts.* Watch every attempt of the adversary to blind your eyes, and sear your conscience, and pervert your judgment, by the offer of a blessing, if you will walk along a path which God has cursed! That offer should rouse you to the keener vigilance, and the smiles of him who makes it should excite the resolution that you will never trust him for an instant.

Thirdly. There is danger that we reach a *state of mind* which has no remedy — *opposed to good* and to *duty.* This state is not one into which we fall by some sudden lapse. It is gradually approached by stifling conscience, by resisting God's Spirit, by refusing to accept what God offers, by habitually yielding to the tempter, until the mind and the heart are in a posture of indifference, or of hostility, which forbids all hope of change. It is possible for Satan to tempt us, by degrees, into a habit of rebellion against God's authority; into a habit of rejecting the evidence of inspiration; into the habit of stifling moral influences, until this shall seem to be the normal condition or attitude of the soul. It is possible for us to be so insensibly led on from light into darkness that we shall prefer the darkness, and pity those who do not dwell in its shades. Oh! my brethren, I tremble when I think of this effect of temptation, that is so fearfully apparent in every Christian congregation. There is nothing supernatural or strange in that state which we describe as "Gospel-hardened." There is nothing marvelous in that which we call the sin against the Holy Ghost. It is his sin whom the devil has induced to postpone attention to religious things, and reject religious conviction, and resist the Spirit of God, until interest in these things is no longer possible, and faith and repentance are far in the rear of that point to which he has drifted, on the Dead Sea of apathy and unconcern.

Why, my dear fellow-sinner, has it never occurred to you that Satan would rather have you apathetic than blasphemous? That he has gained more when he has brought upon you this deep sleep than were he to make you a violent and offensive opposer of good? Have you never thought that the agency which is doing more to hinder the power of God's grace, and the prevalence of God's Kingdom, than any other is that of the opiates by which souls are made insensible to all the motives that come from Heaven, and hell, and the Cross of Jesus, and the the pleading Spirit, who is the last to give us up?

that a soul can become thus insensible, and that the evil taxes all his arts to render it so, should cause the words to ring in our ears every moment, "*Watch and pray*," for recklessness will be ruin.

Having thus noticed some of the dangers to which we may be exposed, we may proceed in the

Second Place—To observe, that the chief peril is in respect to the *beginning* of evil. The emphatic word in this sentence is "*enter*" — "that ye *enter not* into temptation" and we all know that there is the highest wisdom in directing attention to the point from which sin takes its rise. The cumulative power of evil, once admitted, may well appal any thoughtful mind. If we would prevent a struggle with the giant, we must strangle the infant Hercules in his cradle. On this point I feel that much might be said which ought to be heeded everywhere, but especially may it be urged where temptation makes its most powerful attacks. I am speaking to those who do business in the midst of the most exciting scenes and under the influence of the most successful devices of the tempter that can be found on earth. There is no city in which the temperament of the people, and the usages in business, and the facilities available, conspire to test a man's integrity and bribe him into, at least, the beginning of evil, as is true in San Francisco. Hence, here should beacons be erected, with care that they stand at the very *entrance* to the paths of temptation.

To one outside, and looking on as you rush over them, it seems possible that you have not guarded the ways of danger along which you daily pass. You have not branded positive sin, and obliged men, especially young men, to feel that theft is theft, and crime is crime, as should be true in such a place as this. There has been a disposition to speak of the grossest business vices as mistakes, or errors — to call wickedness by light names — to apologise for such acts as ought to forfeit any man's position and character. Our boys and young men see this. Their standard of morality is formed by such influences; their habits accord with it when they begin life, and with so little preparation to resist, and struggle, and stand, are they thrown into this mighty maelstrom of temptation and sin that we call Business. There is no one thing more needed than effectual guards at the *entrance* of temptation. Call vice and crime by their right names when you talk with your children. Insist, as does the Bible, that none but fools make a mock of sin. Rebuke its trivial forms at your homes, and not wink at them. Provide all possible restraining, and cultivating, and attractive moral influences for your young men. Gather darkness over these gilded gateways into the paths of evil, and you will do much to check the throng that is pressing into them.

Then, besides this, every man *for himself* should accept the counsel, "Watch and pray, that ye enter not into temptation." That clerk who takes his employer's money for the first time, has no idea of continuing to do this. That defaulter for thousands had no thought, at the beginning, that he would take more than he could replace at any time. It was because they thus thought and resolved that the temptation had any power upon them. Had it come in naked shape, as a temptation to *steal*, they would have rejected it. There is no safety after you have begun to go down the inclined plane, under all the momentum of motion.

Over all open doors to sin write for yourself, if others will not write it for you — and let the letters be so large that you shall never fail to see them, however blinded by excitement and the wiles of the Tempter — "This is the way to ruin, and its approach is danger!"

There should also be special care respecting the entrance to evil ways, because the *associations* we form in business, or in social intercourse, often multiply and strengthen the temptations to enter them. Did you read the account, recently, of the fall from the Matterhorn, in the Alps, of four men who were on its height? There were six in all — some of them guides, some of them travelers. They were about to pass a very narrow and dangerous curve on the verge of the mountain. There was ice on the rocks. There were points which pushed out almost to the edge of the precipice. Some of the men were afraid, and they decided to tie themselves together with a long rope, so that if one fell the others might save him, and thus began the passage. At the most difficult point one slipped and went over, but the others could not hold him, and the three next to him, by the fatal rope were drawn after him, and fell four thousand feet! The remaining two were saved, because they had opportunity to cling to a projecting rock, and the rope broke!

Oh! what multitudes of men are threading the passes of life, and winding along its precipices, thus bound together by associations that increase the peril of a large part of them! How many become the victims, every year, of such alliances! How few in the moment of danger, when temptation is the strongest, and their companions go over, are saved by the breaking of the ties, so that they are left where they may yet be saved! My friends, if you find yourselves associated with men whose habits, or character, or relations, increase your danger, cut the bands which hold you together. Let nothing multiply the temptations you must encounter. Let nothing throw you under Satan's power. Stand far off from evil, and hail as a friend any one who can aid you in escaping its perils. He who does not enter into temptation will not feel its curse.

But I must hasten to remark,

Thirdly. That the way of *escape*, whether it be by avoiding the beginning of evil, or by recovery from its power after we have begun to feel it, is *two-fold*, viz: by *forecast* and *prayer to God*. Forecast includes a proper judgment of ourselves, a proper comprehension of circumstances, and a just perception of the relation of cause and effect, all of which will render us vigilant and wise.

A man is in the last degree foolish, in such a world as this, who shuts his eyes and throws himself upon the tide of chance. His shipwreck is almost certain. If he has the strongest material in his vessel — has the ballast of established principle — is supplied with the chart and compass of common sense and the Bible — and then, with glass in hand, and barometer near, is on the lookout for storms, he will find the voyage by no means free from danger. If he resolves to merely float, he will go down. Every voice of wisdom, of experience, of observation, of inspiration, cries, "*Watch!*" Not for a time — not with a little interest, but "*watch all the time*, and as intently now as ever!" Profit by the lessons taught by these wrecks that are floating so thick around you. Heed the probabilities, when any temptation comes upon you. Let even possibilities make you wary and alert.

But even then the Tempter will be too wily for you, and, with all your forecast, you may become his prey! There is need of help from God. There is wisdom in faith, and he whose closet bears upon his life, as a constraining, aiding influence, is alone prepared for its full measure of evil and its full demand of toil. The man of prayer, who prays in his home, prays in his place of business, prays on the street, feels that he can call his Savior to his help anywhere, is the only man who wears an armor the devil cannot penetrate.

Dear brethren; business men; young men; all, who know you live in troublous times, and must walk along difficult passes, and that Satan will meet you where you are the *weakest*, and can resist the least, make *prayer* a means of constant support and rescue. Do not banish God from your hearts when you go where you must be tempted. Do not expect Christ to be found only when you come to your homes, or your churches, but to be told, as you leave, "*Now* I am going out to business!" Oh! as the season of renewed care, and excitement, and thronging duties, and multiplied temptations, comes on again, and you step into the whirl and feel the danger — danger to character — danger to piety — danger to usefulness — listen to the solemn voice of warning and affectionate concern — the voice of Him who knows our infirmities and the Tempter's arts — "Watch and pray, that ye enter not into temptation."

THOMAS J. MYER & CO.'S

Extra Baltimore Fresh Cove Oys ers

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equa to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Family Reading.

Why Weepest Thou.

"I would not have you to be ignorant, brethren, concerning them which are asleep, that ye sorrow not even as others which have no hope."—1 Thess. iv. 31.

Why weepest thou?
Thy beauteous one is resting.
Trouble no more assails her fond heart now,
No more that frail bark life's rude wave is breasting,
Why weepest thou?

Wouldst thou recall her,
From her calm deep joy,
To what might here in future years befall her?
Sweet songs of rapturous praise her powers employ,
Wouldst thou recall her?

Grief's bitter tears,
Have all been kissed away
From her dear face whom memory reveres;
Why down thine own pale cheeks then should there stray
Grief's bitter tears?

Are you not one,
Though severed for awhile?
Hast thou no joy that she her race has run,
And has received her Master's gracious smile?
Are you not one?

To meet again,
With rapturous emotion,
Twin-severed streams flow towards the distant main;
And 'tis the one prayer of your soul's devotion,
To meet again.

And ye shall meet,
Ye faithful loving hearted,
Who bowed together at the Savour's feet;
One faith, one hope, ye had who now are parted;
And ye shall meet.

To part no more,
O glorious reality,
Of faith and hope when life's few years are o'er!
Your spirit clothed with immortality,
To part no more!

My Mother's Voice.

A friend told me, some time ago, a beautiful story about kind words. A good lady living in one of our large cities was passing a drinking saloon just as the keeper was thrusting a young man out into the street. He was very young and very pale, but his haggard face and wild eyes told that he was very far gone in the road to ruin, as, with oaths, he threatened to be revenged on the man who had so ill used him. This poor young man was so blinded with passion that he did not see the lady, who stood very near to him, until she laid her hand upon his arm, and spoke in her gentle voice, asking what was the matter.

At the first kind word the young man started as though a heavy blow had struck him, and turned quickly round, paler than before, and trembling from head to foot. He surveyed the lady a moment, and then, with a sigh of relief, he said,

"I thought it was my mother's voice, it sounded so strangely like it. But her voice has been hushed in death for many years."

"You had a mother, then," said the lady, "and she loved you?"

Bursting into tears, he sobbed out,

"Oh, yes, I had an angel mother, and she loved her boy! But since she died all the world has been against me, and I am lost — lost to good society, lost to decency, lost forever!"

"No, not lost forever, forever; for God is merciful, and his pitying love can reach the chief of sinners," said the lady, in her low, sweet voice; and the timely words swept the hidden chords of feeling which had long been untouched, awakening a host of tender emotions, which had been buried very deep beneath the rubbish of sin and crime. More gentle words the lady spoke, and when she passed on, the young man followed her. He marked the house which she entered, and wrote the name which was on the door-plate in his little memorandum-book. Then he walked slowly away, with a deep, earnest look on his white face, and deeper and more earnest feelings in his heart.

Years glided by, and the gentle lady had quite forgotten the incident we have related, when one day a stranger sent up his card and desired to speak with her. Wondering who it could be, she went down to the parlor, where she found a noble-looking, well dressed man, who rose deferentially to meet her. Holding out his hand, he said:

"Pardon me, madam, for this intrusion; but I have come many miles to thank you for the great service you rendered me a few years ago."

The lady was puzzled, and asked for an explanation, as she did not remember ever having seen the young man before.

"I have changed so much that you have quite forgotten me," said he; "but though I only saw your face once, I am sure I should have recognized it anywhere. And your voice, too, it is so like my mother's."

These last words brought to her recollection the poor young man she had spoken to in front of the drinking saloon so long before, and she mingled her tears with those which were falling slowly over the young man's cheeks. After the first gush of emotion had subsided, he sat down, and told how those few gentle words had been instrumental in saving him and making him what he was.

"The earnest expression of 'No, not lost forever,' followed me wherever I went, and it always seemed that it was the voice of my mother speaking to me from the tomb. I repented of my many transgressions, and resolved to live a new life; and by the mercy and grace of God, I have been enabled to resist temptation and keep my good resolutions."

"I never dreamed there was such power in kind words before," said the lady. "After this I shall take more pains to speak them to all the sad and suffering ones I meet.—*Mother's Treasury.*

Beginning the World.—Many an unwise parent labors hard and lives sparingly in life, for the purpose of leaving enough to give his children a start in the world, as it is called. Setting a young man afloat with the money left him by his relatives, is like tying bladders under the arms of one who cannot swim; ten chances to one he will lose his bladders and go to the bottom. Teach him to swim and he will never need the bladders. Give your child a sound education, and you have done enough for him. See to it that his morals are pure and his mind cultivated, and his whole nature made subservient to the laws which govern men, and you have given him what will be of more value than the wealth of the Indies.

To be thrown upon one's resources is to be cast into the very lap of fortune, for our faculties then undergo a development, and display an energy, of of which they were previously unsusceptible.—*Dr. Arnold.*

God has written on the flower that sweetens the air — on the breeze that rocks the flowers upon the stem — upon the rain-drop that refreshes the sprig of moss that lifts its head in the desert — upon its deep chambers; upon every penciled sheet that sleeps in the caverns of the deep, no less than upon the mighty sun that warms and cheers millions of creatures which live in its light — upon all His works He has written — "None liveth for himself."

How the universal heart of man blesses flowers! They are wreathed around the cradle, the marriage altar, and the tomb. The Persians, in the far East, delight in their perfume, and write their loves in nosegays, while the Indian child of the great West claps his hands with glee as he gathers the abundant blossoms — the illumined Scriptures of the prairies.

Thurlow Weed promises to write a book of political reminiscences after the next Presidential election, with the assistance of some two thousand letters which have been preserved and indexed by his daughter. These letters are from all the leading Whig statesmen and Republican politicians of the last thirty or forty years.

Horace Greeley is named by the Kansas *Chronicle* as the best man for the next President. The editor says: "A million of American citizens are to-day ready and anxious to join the party that will inscribe on its banner: Universal Amnesty, Impartial Suffrage, and Horace Greeley for President in 1868."

Millard Fillmore is reported to be writing a history of his Presidential administration. It is understood, and this delay gives probability to the belief, that he will speak very freely of the men and events of the Fugitive Slave Law period.

Wendell Phillips pithily observes: "The Republican party has abolished the slave: the difficulty is they have not abolished the master."

The Young Folks.

A Lesson From the Rain Drops.

by mrs. jas. neall.

A little boy watched the rain-drops fall
As they splashed against the garden wall;
He grumbled and pouted, and thought it hard
A shower should come and go just then —
He meant to fly his kite in the yard,
He said, with his cousin Ben,
But now, instead, he would have to stay
And mope in the house the livelong day.

So he hung about near the window-seat,
Just as cross as cross could be;
But after awhile he went to sleep,
And a wonderful dream had he.
And when he awoke again, I ween,
A pleasanter boy could not be seen.

He dreamed that he owned a large old farm —
Had horses and cows to feed;
That he'd planted some oats, to store in his barn,
And sprinkled some clover seed;
And he thought he was growing to be quite old,
Was tall and manly, and stout and bold.

And he dreamed he waited and watched in vain
For his oats to ripen fast;
His corn, he weeded again and again,
In hopes it would grow at last;
While his clover drooped its empty head,
And his barley was withered and almost dead.

When sadly he turned to his old farm door,
And he sighed as he said, "ah! me,
I wish it would rain, and I wish it would pour —
But never a cloud do I see.
The thirsty ground is so hard and dry,
The grain I have planted, must surely die.

But he seemed to hear something that whispered low,
"I hope it won't shower to night;
I only care for *myself*, you know,
And I mean to fly my kite."
Then he changed to a little boy again
And awoke, while still it was pattering rain.

He looked around, and then springing up,
He opened again the door:
Each flower hung up its tiny cup,
And the earth, tho' drinking the rain-drops up,
Still seemed to be asking for more.
He was very glad he had slept and dreamed,
For it taught him how selfish he must have seemed

To think alone of his trifling play,
When the earth was so thirsty and dry,
And, because he must stay in the house all day,
To wish for a cloudless sky.
He was happy now, nor forgot again
The lesson taught by the falling rain.

Two Tears.

Tell me, you bright eyes, shining over this page, do you ever overflow with tears? Does your little heart ever get so full that it runs over, drop by drop, out of your eyes? If we could look at the pages of your atlas or copy-book, couldn't we put our fingers on a blister, and tell you it was a mark of a tear?

Perhaps you have a bachelor uncle, who says, "Shame! don't cry like a baby — be a *man!*" But when a boy's heart is so hard that the tears are all dried up, we are sorry for him.

There are aunties, and cousins, who get "nervous" when the children cry; but you ask your mother if she don't believe in tears.

Why, childhood without tears would not be childhood, any more than April could be April without showers; and then, how could we have the rainbows and the May blossoms?

We do believe in tears, *sometimes;* and so did the Divine Master, who once lived here and wept Himself. If you find all that is about tears in a very old Book, you will think they are precious; and then they are so pretty! The next time you begin to have a real cry, just catch one drop on the back of your hand, and take it to the window. If you hold it right you will see blue sky, and perhaps a rainbow in it; though perhaps it would be best to try to cry only when the sun shines. If you live opposite to somebody you may see a house in it. To be sure, it will only be a reflection; but if you read and reflect a little, you will find it is not the first time a house has come out of a tear. Nor are you the first person who has examined such a shining drop.

Long ago, in England, a tear rolled down a lady's cheek; a gentleman caught it and examined it. He was just studying chemistry, and loved to make experiments, but nothing before had interested him so much as that tear. He looked at it in every way — he examined it with different glasses; and from that tear he commenced a whole life of study, devoted to chemistry and other sciences.

Nearly forty years ago he died in Italy, and left half a million of dollars, saying in his will, it was to be given to the United States of America, to found an institution for the increase and diffusion of knowledge amongst men.

When you go to Washington you must see the splendid brown-stone building, called "The Smithsonian Institute," with its library, and art gallery, and museum. In a glass case you will see Mr. Smithson's ink-stand, his cane, some articles of silver, some of his chemical vessels, and some very tiny and curious ones in which he examined a lady's tear.

To be sure, it is said he intended to give his fortune to a nephew, his only relation; but he added, in case his nephew should die, to send the gift to the United States. In a few years his nephew did die, or you would not be reading this story now.

But don't you think it proves, all the more, that the dear Father in Heaven, who sees every tear that falls, meant that precious drop to become a river of blessing, rolling its waves of knowledge over our dear country?

Sixty-five years ago, one cold, bleak Monday, a good man was walking in the street of a town in Wales. He met a little rosy-cheeked girl, trudging through the snow in great wooden shoes. He stopped, and said:

"My bonnie lassie, dinna ye ken the text yester morn at the kirk?"

The little face dropped far back in the large, worsted hood she wore, and a tear started from her eye. He was surprised at her sorrow, and spoke kindly to her, and then she said, sobbing:

"The snow was sae bad, sir, I could na go to look."

He inquired more about it, and found that she usually went, on Sunday, seven miles over the hills and the heather, to look at a Bible, and learn the text of his sermon.

He went on, but the child's sorrow went with him, too. Day and night he thought of that tear. Not as Mr. Smithson did — of the drop itself — but of the cause. He resolved that Wales must have more Bibles than one for every seven miles; but he was a poor man, and what could he do? Early one morning he concluded to go to London for help. So, on his pony, he started on his long journey. There he told the story of the little girl's tear, and a society was formed to send the Bible, not to Wales only, but to the whole world. Great buildings were soon erected, where the precious Book was printed, and then sent abroad by thousands.

But a few years after that and the influence of the little tear, that the British Bible Society came out of, reached over the broad Atlantic, and the American Bible Society was formed. Since then these two Bible Houses have sent abroad over *eighty millions* of Bibles and Testaments. Not even an angel could tell the blessedness they have spread, like the glorious sunshine from Heaven, over every hill and valley on the earth.

Now, don't you think the little Welsh girl had a pretty good cry?—*Little Corporal.*

AGRICULTURAL.

The Influence of Forests.

The influence of forests on the climate of a country is now an admitted fact. It is so universally believed in France that the people have petitioned government to engage in the work of planting trees all over the country, in the hope of reclaiming from barrenness the land which has become almost a desert by the lack of rain. It is thought that the Emperor will accede to the request and add another to the list of public improvements during his reign. The almost undisputed fact upon which this action is based, is one of the most remarkable admonitions of nature against too great density of population, showing as it does, that the effect of an excess of what is called "improvement" is to render the country less habitable for even a smaller number.—*Boston Advertiser.*

A NEW grass is springing up in the Southern States. It appears to be a dwarf clover, is very thick-set, covering the earth with a beautiful carpet of green. It is much relished by cattle, and is a complete exterminator of Bermuda, joint, sedge, and other grasses. In Middle Georgia it is very abundant, and is attracting much attention.

IN the Niagara River there is an island of one hundred and twenty acres, where peaches never fail. On both sides the water, flowing rapidly, never freezes, so the trees are not killed with intense cold. A few years since this small tract was purchased for $5 an acre. Last year the crop of peaches alone sold for $7,000.

TWO hours' reading of a good newspaper is as profitable as six hours' work out of twelve. The farmer and the produce-dealer equally should understand the markets. Sometimes to know a thing is the same as to earn $100.

Family Recipes.

A gallon of strong ley put in a barrel of hard water will make it as soft as rain water.

Wash your tea-trays with cold suds, polish with a little flour, and rub with a dry cloth.

IF your flat-irons are rough, rub them with fine salt, and it will make them smooth.

Frozen potatoes make more starch than fresh ones; they also make nice cake.

Oat straw is the best for filling beds. It should be changed once a year.

A bit of glue dissolved in skimmed milk and water will restore crape.

A hot shovel held over varnished furniture will take out white spots.

If you are buying carpets for durability, choose small figures.

Save your suds for garden plants, or garden yards where sandy.

Half a cranberry on a corn will soon kill it.

THE California Powder Works manufactured, during the year 1867, 152,199 kegs, or 3,804,975 pounds of blasting powder; 7,269½ kegs and cans, or 181,737½ pounds cannon, musket, and sporting powder. They give constant employment to one hundred and thirty hands.

PACIFIC COAST ITEMS.

So far as trade in merchandise is to be considered, it is now a time of depression in this city. Sales are unusually small. Capital, however, is more than ever plenty, and the "business fever" of the hour is a rush into real estate investments. To men of small means, Homestead Associations are still attractive, and we hope with good reason. Yet, to a judicious on-looker, it is clearly evident that real estate in unimproved localities, outside lots, both in city and towns adjacent, are selling at fabulous prices—rates that will require many years time to make at all productive, or to return any interest upon the investment.

Our dairy product in this State is beginning to magnify itself in importance by increased supplies from the farming districts. We are anxious that before 1870, there shall be a total and final stop to the importation of butter and cheese from the Atlantic States. The present use of rancid Eastern butter on our tables, is a disgrace to California. A farmer in Sonoma, Santa Clara, and other adjacent counties, can produce butter cheaper than it can be done in New York and New England. Butter, though lower here than formerly, is selling at profitable rates. Dairymen may be assured of remunerative prices for ten years to come.

The *Commercial Herald*, of this city, thinks that in ten years Boston will be inferior to this city, and after noticing the efforts of that city to enlarge its trade, pertinent inquires: "Are the merchants of this city determined to continue paying from six to seven millions of dollars yearly in the way of freight money to British and Eastern ships? Are our communications with the large and fertile valleys of the State to be always conducted over corduroy roads, and by great, lumbering wagons? Are we to persevere in sending copper ore to Boston and Swansea, and purchasing it again, at double prices, in the shape of sheathing metal, brass and copper castings?"

Orleans Bar, the shire town of Klamath County, can be reached only by a mule trail. There is not a mile of wagon road within two days ride of it, It lies between two high mountains—one five and the other seven thousand feet high. The white population of the county is less than 1,200. Ten years ago it was 2,000. The climate in Summer is very warm in the deep valleys. The Klamath Indians are large and well formed, but sullen and war-like, at times giving the isolated miners much trouble.

A correspondent from Santa Cruz, says: Owing to the manufactures in this vicinity—the paper mill, powder mill and tanneries—we have a larger per centage of New Englanders than any county in the State. Out among the hills, there is one neighborhood of Vermonters with their families. In manners and peculiarities, they are Vermonters still—they guess, whittle, break colts, sing in the choir, pay their debts, and believe in the New York *Tribune*.

The past ten days have been much of the time rainy and disagreeable. Before the storm came the dust began to fly upon the streets, and farmers were anxiously looking for rain. Their wishes have been fully gratified. So long-continued a rain at the beginning of spring is rarely known. We have promising accounts from the interior of the prospects of the crops.

The Internal Revenue collected in this city and San Mateo County, in February, was $326,542 13. Whisky, tobacco, cigars, incomes, and sugar were the leading sources of Revenue. The amounts stand thus: Spirits, $139,670; tobacco, $45,448; incomes, $27,606; cigars, $12,272; sugar, $12,091; lager, $7,569.

The good people on the other side of the Bay, begin to talk about mahing this city a suburb to Oakland at a date not very remote. Corner lots for warehouses are being selected, and our ambitious neighbors are keenly alive to the value of their location and natural capacities.

The *Alta* thinks the floods of the past winter have deposited mud and sand in the bed of the Sacramento to the thickness of from one to two feet. If this be so, navigation in the latter part of the dry season will be more difficult than ever.

Gen. Rosseau, who is passing a few days in this city, has written a letter to Mr. Sumner, complimenting the remarkable accuracy of his speech in the Senate in regard to the climate and resources of Alaska.

The Democratic State Convention for this State is to be held in San Francisco, April 29th, to nominate National Convention Delegates and Presidential Electors. The National Convention meets on the 4th of July.

The mining stock market has been dull and depressed the past week—all the companies having depreciated more or less, and some of them twenty to twenty-five per cent. This tendency of the market is entirely independent of the real condition of the mines themselves.

The roads in Sacramento Valley, especially the upper portion of it, are again well nigh impassable. The Chico *Courant* says the stages have found it impossible to make regular trips of late. However, we shall see no more heavy rains for eight months, probably.

The farmers of the adjacent counties are availing themselves of the fine weather of the past two days to plough farther up the hill summits than ever before. Some wheat fields will have a high altitude this year.

The "Union" State Convention, for the purpose of choosing a delegation to the National Republican Convention, to be held at Chicago next May, will be held in Sacramento on the last day of this month.

TELEGRAPHIC SUMMARY.

The Impeachment.—Mr. Boutwell from the select committee of the House, has reported ten articles of impeachment, charging President Johnson with "high crimes and misdemeanors" for attempting to remove E. M. Stanton from the office of Secretary of War. He also reserves the right to prefer other charges, if grounds shall be discovered therefor....The Senate have agreed on the rules for conducting the trial....Mr. Sumner's resolution that the Senate should hold no intercourse with the President till the end of the trial, was defeated....Messrs. Stevens and Butler failed to introduce new "counts" in the indictment on Tuesday.... The trial will not begin till next week, and it will be some weeks before any conclusions will be arrived at.

Eastern.—The Republicans expect to carry New Hampshire by 3,000 majority in a vote of 75,000 on next Tuesday. ....Congress is reported to be about to abolish the office of Adjutant-General to retaliate on Gen. Thomas....Montgomery Blair is the prospective Senator from Maryland....Chicago is annoyed by incendiary fires and heavy snows.... There is a growing probability that Senator Wade will be the Republican nominee for Vice President.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, March 4, 1868.

Flour—Sale of 300 bbls Oregon Extra, ex Ajax, private; quotable at $7 50. At the close, 500 bbls City Mills Superfine, in qr sks, for export, $7.

We quote city brands:

Superfine, hf sks, ₱ 196 lbs	$7 00@7 25
qr sks	7 25@7 50
Extra, hf sks	7 75@8 00
qr sks	8 00@8 25

Wheat—Sale of 800 sks Santa Clara, to a miller, $2 70 ₱ 100 lbs. At the close, 2,000 sks fair milling, p. t.

Barley—Market firm at $1 90@2 ₱ 100 lbs, the latter an extreme figure. At the close, 2,500 sks choice, for distilling, $2 ₱ 100 lbs.

Oats—Prices continue firm at $1 90@2 15 ₱ 100 lbs as extremes for small lots.

Potatoes—The market is rather dull and quotations nominal; best descriptions are held at $1 50@1 62½. At the close, 100 sks Humboldt, (wet) $1 55; 600 sks choice do, in new bags, $1 62½ ₱ 100 lbs.

Corn—Small sales at $2 25@2 35 ₱ 100 lbs.

Rye—Nominally quoted at $1 75@2 ₱ 100 lbs.

Buckwheat—Last sales were at $1 75@1 85 ₱ 100 lbs.

Onions—None in first hands; Oregon descriptions jobbing at 7c ₱ lb.

Beans—We give the medium quotations as follows: Bayo, 3½@4½c; Butter, 4@4½c; Pea, 4½@4¾c; small White, 4½@4¾c; Pink, 2¼@2¾c; Red, 2¼@2½c ₱ lb.

Bran—Moves off freely at $30 ₱ ton.

Middlings—Fine, $50; feed descriptions and Shorts, $38@34 ₱ ton.

Oil Cake Meal—The mill price is $30 ₱ ton.

Hay—No sales to report; quotable at $18@24 ₱ ton for fair to strictly choice.

Dairy Products—Owing to the long continued unfavorable weather, supplies of all kind are light. There is no fresh roll or choice California firkin Butter at present in first hands; however, we give the quotations at 35@40c for fresh roll and 35c for firkin, with the remark that they are entirely nominal; Cheese, 18@20c for California, and 21c ₱ lb for Eastern; Eggs, 35c ₱ doz.

Poultry—The eame cause which has produced a scarcity of other deseriptions of produce, has also limited supplies in this department. Live Turkeys are to-day quoted at 18@20c ₱ lb. Hens and Roosters, $8 50@$9, and Ducks, $7 ₱ doz; Geese, $2 50@$3 ₱ pair.

Provisions—Prices of all kinds are well maintained. California smoked-Bacon commands, 15½@16c; Oregon do, 13@14c; California Hams, 15½@16½c; no Oregon offering; California Lard, 15@15½c; Eastern, 13@13½c ₱ lb.

Wool—The season of the year is unfavorable to activity, and quotations are therefore nominal, say 12@16c ₱ lb for clean grades of fall and spring respectively.

Hides—Sales since last Wednesday (not before reported) embrace 512 California dry, usual selection, 14@14½c, and 200 Mexican do, 13c.

Tallow—We note a fair demand at 7¼@7½c ₱ lb for Beef and Mutton.

San Francisco Cattle Market.

The inclement weather of the past week has interfered very materially with slaughtering, and prices in consequence show a marked advance. The rise, however, promises to be only temporary, and will probably vanish upon the return of pleasant weather.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 12@15c ₱ lb.
do 2d do 11@12½c ₱ lb.
Veal—10@12½c ₱ lb.
Mutton—In fair demand, 8@10c ₱ lb.
Lamb—No Spring offering; last sales 10@15c ₱ lb.
Pork—Undressed, 6@8½c; dressed, 10½@12c ₱ lb.

CURRENT TOPICS.

One of the signs of the times is the change in any of our colleges, by which something different om the regular ancient curriculum of study may be mitted in a liberal education. The establishment scientific courses, with diplomas; the introduction thin what has long been considered the almost cred range of scholastic learning, of those thor-ghly practical subjects which relate to the busi-ss of life, even when whole courses are not marked t; the absolute demands of the great undeveloped d partially traversed fields of wealth and enter-ise abounding in a country not yet comprehended y its most enthusiastic residents — all furnish proof at education must be, for the most part, a relative rm. Yale, Harvard, The Cornell University, The niversity of Michigan, Rutgers College, and other stitutions, have adapted their line of study to the anifest necessities of the time, and they are the ore successful and attain a higher grade of schol-rship because of the change. There is enough of e classics, and pure mathematics, and literature, to sure culture and refined taste and thorough disci-line; then, to these is added far more than our thers knew of what will make men good farmers nd miners, and engineers, and navigators, and pre-ared for intelligent action anywhere. This is the ducation for Californians. If we have a Univer-ty, we need one that will give us men completely uipped for the work that everywhere invites those ho can win it; men willing to experiment, and ex-lore, but whose experiments shall not be failures, nd whose explorations shall be discoveries. We ave the fields and the harvests; we want the Uni-ersity and the men.

Some of our young friends may have before them e career of the painter. To such we would offer ne exhortation: Cultivate a taste for home subjects. o not think it necessary to go to the ends of the arth for themes. How has it been with the great rtists of the past? Did Phidias go to Egypt for emes, or Raphael to Persia? Why, then, should mericans leave their country, or Protestants their eligion, or moderns their literature? And how is it ith the great artists of the present? Rosa Bon-eur and Landseer are not painting griffins and chimeras dire," but domestic animals. One of the masterpieces of Church is not the falls of Schaffhausen, but of Niagara; and Bierstadt presents us, not with Mont Blanc or the Pilgrimage to the Kaba, but with Mount Hood and "Crossing the Plains." In truth, those artists who choose home subjects are not only more useful, but also more wise, in so doing. They are more useful, since their pieces serve, not merely to cultivate taste, but to develop patriotism and the sentiments of religion. And they are more wise, since their works take a double hold of the minds of spectators; a hold due to their beauty, and a hold due to their touching the chord of home love, national pride, or religious zeal.

Both for the sake of economy in the use of funds given for Christian objects, and because Christianity itself gains when the agencies that promote it are allies, not rivals, all will rejoice that the two Tract Societies, located in New York and Boston, have agreed upon terms of union. The Boston society is to be strictly a publishing establishment, and that in New York will undertake to do all the general work heretofore attempted by both. In the administration of no other charitable funds has there seemed to be such an unnecessary waste as in our Publication Societies and Boards, and it is difficult to give a satisfactory reason why several stereotyped editions of the same books should be found in a store, when the only apparent reason is that they may bear the *imprimator* of these several institutions. This union of the Tract Societies, after the scenes of opposition, and the bitter feelings, of the past twelve years, may be accepted as a good omen in respect to the more complete control of the right spirit in the churches; and the sight will be cheering and suggestive, when those men who have stood wide apart and thought and said hard things of each other, shall again be found on the same platform, with hands joined and hearts in sympathy. It is not probable that the meetings which preceded the division can ever be repeated in this country. We may hope that the causes which separated men who had long worked in harmony will never again exist. On every side the demand of Providence is, that Christians unite when union is possible, that they may be strong, and that religion may be honored by their spirit and power.

The Board of Excise of New York, in their report lately rendered for thirteen months ending December, 1867, publish some figures and facts that have general interest. From licenses and fines during that time more than $2,600,000 have been collected and applied to the decrease of taxation; and the cost of collection was less than three per cent. The number of places in New York and Brooklyn where liquor has been retailed were diminished 2,415, and more than 10,000 persons who had been employed in them were released for some more worthy business. There has been much less disorder prevalent on public days and Sundays, and the credits of the poor in banks for savings are largely increased. Other facts might be quoted from the report that ought to be carefully studied. but these are sufficient to convince good citizens of the value to all interests of such a law. We commend them especially to those who make laws for our new State and growing cities.

Free trade in literature does not appear to be popular with all authors and publishers of England and our country. A meeting was recently held of leading men engaged in publication, at which the subject was pretty freely discussed, and a committee was appointed to prepare the outlines of an international copy-right law, and endeavor to have it enacted. There is no good reason why one who uses his brain in the creation of a book should not be protected in the enjoyment of any proper advantage from its sale, as well as one who uses his brain in the creation of a telegraph or a reaper. Nor do we believe that a copy-right law would make good reading any less accessible to the people. It might shut off some trash that now floats everywhere, and that would be a blessing of which one can hardly estimate the extent.

Mr. James Lennox, of New York proposes to found in that city a Hospital for Presbyterians who may need the advantages of such an institution. He is moved to this offer by the conviction that, so far as possible, the Church should provide for the necessities of her own poor, and as he is a member of the Presbyterian Church, he is desirous to give the sums of money he can devote to this department of benevolence for the relief of those allied to him by their faith. He has given a lot for the Hospital, and will give $100,000 to establish it, when trustees shall be apppointed. This is rather novel among Protestant denominations, but the arguments in favor of such charity are not few, nor would sectarianism be increased if there were like noble men in every branch of the Church.

Archbishop Alemany has issued his Pastoral Letter, the spirit of which is worthy of commendation. Of course a Catholic prelate could hardly publish a document of this kind that would be free from sentiments to which Protestants must object, but it is always pleasant to find a spirit manifested that we can honor. The Archbishop's remarks respecting the Sabbath, and the value of spiritual worship, are worthy to be read by all; and the quotations from Christians and Infidels with which he fortifies his position are rare and to the point.

The national monument in honor of President Lincoln, to be erected over his remains in Springfield, Ill., may be reared sooner than many have predicted. The estimated cost is $200,000, and about $66,000 remain to be contributed. Active measures are employed now to obtain this sum, and there can be little doubt that the monument, said to be as beautiful in its design as it is worthy in its purpose, will ere long stand on the ground selected by Mr. Lincoln for his resting-place.

Religious Intelligence.

PACIFIC COAST.

A special meeting of the Presbytery of Sierra Nevada will be held at the Howard Presbyterian Church, San Francisco, on Wednesday, March 18th, at 10 o'clock, A.M., instead of Friday, March 13th, as previously announced. A full attendance of members is requested. C. C. Wallace,
Stated Clerk.

Oakland United Christian Union.

The annual meeting of the Oakland Union Committee for united Christian effort was held in the Congregational church last Sabbath evening. The attendance was very large, as there was no service in the other churches connected with this movement. The whole service was of the deepest interest to all. Addresses were made by Rev. Messrs. Walker, Hamilton, Martin, and Beckwith.

The object aimed at by this effort is to reach all classes in the city by direct personal interviews and by the distribution of tracts and religious books. The city is divided into districts, one of these being assigned to some particular church. The work assigned to these churches was done with increased thoroughness. Over 2,000 families were visited. One church reported twenty-two laborers in the field apportioned for it. Forty-seven children not connected with any Sunday School were persuaded to attend.

The report made by Rev. Prof. Kellogg gives great encouragement to continne this labor. It brings into active service the large elements in our churches by which the Gospel is brought in contact with those whom a clergyman is not able to reach. It is said that the great success of Spurgeon in London is due as much to the labors of the six hundred lay members of his church who each Sabbath hold an afternoon service somewhere in the city, as to his power as a preacher. Is there not something in this which our churches should understand? We have an increasing mass on our shores who are never reached by any of the ordinary methods which our churches now employ. W.

Rev. Dr. Thomas has now passed one Sabbath with his new charge in the First Baptist Church of this city, and seems to be well pleased with his position; while his parishioners agree in believing him to be the man they need. There is always some risk in transferring a man of even marked ability to the Pacific coast, for success at the East is not a pledge of success here. Still we have no doubt that Dr. Thomas will be soon recognized as an able and useful man among us, perhaps adding to the reputation he had gained in Brooklyn. We shall be most happy here to unite with him in labors for the public good, as we found him a very pleasant colaborer in his late home.

We hope it will not be forgotten that the Presbyterian Convention — the first session of which, on Wednesday evening of last week, was very interesting — was adjourned till to-morrow evening, in Dr. Scudder's church. Preparation has been made for an excellent meeting, and we hope to see a large number present from the city and country.

We are glad to learn that more than usual interest prevails in the Central Church of this city. Meetings were held during the whole of last week, and a number of persons are believed to have been converted.

The religious interest in Stockton seems to have little abatement. It is of that healthy and satisfactory type which commands the attention of all serious persons, and many are being affected by it who would be unmoved by a more exciting work of grace.

Lecture on Biblical Manuscripts.—Rev. Frederick Buel has prepared several lectures showing, from the condition and history of the ancient manuscripts of the Old and New Testaments, and from a consideration of the earlier versions, that we have now the Word of God in its integrity, as it was received and recorded by holy men of God, who spake as they were moved by the Holy Ghost, and by the Apostles of our Lord.

We hope these lectures will be fully attended for their intrinsic value. The author has given the subject a thorough examination, and the funds raised are devoted to a noble cause. The first lecture will probably be delivered at Calvary Church on Thursday night of next week.

We are pained to learn that Rev. Dr. Robinson, of the First Presbyterian Church of Brooklyn, N. Y., has become disabled so far that he is obliged to cease labor for a time, at least. He is to leave for the East with his wife, also in poor health, on the 1st of April, and will be absent a year. We shall hope soon to hear that one so dear to many, and so useful in his place, has become fully restored to health.

The Congregationalists of San Francisco and vicinity, have raised over $1,000 to aid in erecting a church at Los Angeles. A Protestant Church is greatly needed at that town. Rev. Mr. Parker, an efficient and earnest preacher is now laboring there.

Rev. M. J. Savage, lately of this State, has been installed pastor of the Congregational Church, Framingham, Mass.

Rev. Dr. Scott.—We noticed in the *Daily Independent Dispatch*, the following item of intelligence in regard to Dr. Scott:

We learn with great pleasure, that there is an effort on the part of the friends of this eminent gentleman to organize a new church and procure his recall to San Francisco. We know of no one who could be the instrument of more good in the pulpit of San Francisco at this time than Dr. Scott. No man loves piety and goodness more for their own sake, no one has made larger personal sacrifices for their promotion, no one deserves more consideration from all conservative men who take interest in the cause of religion and truth in all things. Dr. Scott is really a great man; he is one of the most learned and eloquent divines in America. He is the Chalmers of this country. We are not a Calvinist and do not agree with many of the dogmas of that sect, but have always found the sermons of Dr. Scott's a rich intellectual banquet.

EASTERN.

The Christian Convention.

Under this title a large Convention of ministers and laymen from the various Eastern States was held in Boston last month. All the leading evangelical denominations were represented. Among the practical questions under discussion were the following:

"How can the personal and social study of God's Word be made more universal?"

"How can the Sunday School exercises be so modified as to secure greater co-operation and more general interest on the part of pastor, church, and congregation?"

"Why do so many churches fail to reach the poor?"

"How can the influence of Christian homes be increased?"

We copy the closing proceedings from the Boston *Journal:*

"EVENING SESSION.

"The Convention reassembled at half-past seven. There was a very large attendance, greater than at any previous session.

"The proceedings were opened with a hymn, after which Mr. Francis W. Smith, of the Committee of Arrangements, which had been appointed at the Convention of a year ago, made a report of their doings since that time. He said that during the year forty-one Christian Conventions had been held in Massachusetts, and by their influence conventions of a like character had been held in other portions of the country. Great good had been accomplished by them, and it was hoped that more would be held during the current year.

"A hymn was then sung and prayer was offered by Rev. Dr. Nicholson.

"At its close, the Chair introduced Rev. Dr. John Cotton Smith, of New York, to the Convention, saying that he would deliver an address on 'Christian unity.'

"Dr. Smith said that the nature of a union among believers in Christ was a most important subject for Christians to consider, and one of the most incalculable interest to the Church of Christ in times to come. At the present time the Church of Christ was divided into a number of sects, which unhappily were contending with one another too often, instead of presenting a united front against the common foe. This picture was one of the saddest import in reference to the future prospects of the cause in all parts of the country. This rivalry among the different denominations of the Church of Christ tended to deteriorate the ministry: first, because it prevented the different congregations, made small by division, from properly supporting their ministers; and second, because this lack of a proper support prevented the promising and talented young men in the country from entering the ministry. There were no such ministers now as in the old Puritan times, when Jonathan Edwards and others flourished. This deterioration of the ministry of Christ led to a want of respect for the Gospel among the communities, and in country towns the congregations were usually very small, unless drawn out by some sensation. These dissensions among the churches of Christ lessened the effects of missionary efforts among the heathen. Intelligent heathen drew the conclusion from witnessing the differences between Christians on points of doctrine that there was no good reason for believing anything presented to them. This insurmountable difficulty in the way of conversion had led the different missionary societies to agree among one another not to send their apostles to the same grounds, but each to take a separate field, thus presenting the first spectacle of a unity of purpose among Christian churches. The great problem comes up of how is it possible to bring about such a union as would subserve the great purpose of evangelizing the world. It could be done by all Christians remembering that they all believed in Christ as the great Head of the Church, and the Savior of all, and thus sinking all minor differences. A common ministry should be established, by which the visible unity of the Church of Christ could be recognized by all. He believed it was a providence of God that the Church of Christ had not been heretofore united, since each sect had kept in view some great truth, which might otherwise have sunk out of sight. He paid a glowing tribute to each evangelical denomination for its special efforts in the cause of religion. In the coming Church of Christ he favored a union of liturgical and extemporaneous worship, and closed with an earnest appeal to his hearers to forward such a blessed state of affairs as a united church."

Western Presbyterian Intelligence.—A correspondent in Indiana sends the following items of intelligence, showing the modes, varying with the different circumstances, by which the reunion movement is becoming particularly successful:

"The reunion movement in Indiana daily gains strength, and may be regarded as practically already accomplished. Not a few churches are already united, or as nearly so as their present organic relations to the two General Assemblies will permit.

"At *Brazil*, in Clay County, the two feeble churches united two yenrs ago, and the committees of the two Presbyteries to which they belonged cast lots to

termine what should be the ecclesiastical connec-
on of the united church. In consequence it became
ew School, and on the first Sabbath in February,
e Rev. Henry S. Little, late of Terre Haute, took
arge of it.

Carpentersville and Bainbridge have each a
urch; the first is Old School and the second New
hool, but each is too feeble to support a minister.
hey are only three miles apart on the New Albany
ailroad, and in pleasant villages, which need con-
nt pastoral work. Last spring, in full harmony
th the reunion tendencies of this region, the Rev.
r. Mitchell, of the Old School Presbytery of
awfordsville, was invited to take the charge of
se two churches. The arrangement seems not
rely happy, but a productive one, for both church-
are now enjoying revival influences, and sixty-
o have been added on a profession of their faith.

Thornton is a thriving town on the Indianapolis
ilroad, and in the midst of a fine country. For-
rly the Rev. Franklin Putnam, of Ohio, was pas-
of the New School church, and died here. Its
t stated supply was the Rev. Mr. Logan. The
l School church has also maintained its existence,
l both have been sufficiently prospered to build
od church edifices. Still it was the common con-
tion that there was only room for one church, and
t the united materials would constitute a vigorous
ty, in place of a feeble duality. Last fall, when
two Old School Synods, by a large majority, and
New School Synods unanimously approved the
nion movement, these two churches at Thornton
eed to employ the Rev. Mr. Paterson as their
t stated supply. One Sabbath the united con-
gations fill one church, and the next Sabbath the
er. The result has proved the measure wise, for
re too there are revival influences. Already sev-
l profess conversion, and the solemnity is con-
tly increasing."—*N. Y. Observer.*

REMARKABLE COMMUNION SEASONS.—The *Lu-
an Observer* says:

On the Sabbath following the Week of Prayer,
Christians resident in the town of Findlay, Ohio,
ll denominations, comprising Lutherans, Presby-
ans, Methodists, Congregationalists, and United
thren, assembled, in the Presbyterian church of
place, filling it to its utmost capacity, and to-
ner they celebrated the Lord's Supper. The pas-
of the several evangelical churches all partici-
ed in the exercises, and the scene is described as
of wonderful interest.

The evangelical churches of Springfield, Ohio,
ed in the celebration of the Lord's Supper on
bath afternoon, January 12th, closing the Week
Prayer. It was a delightful and solemn occa-
. Bishop Morris, of the M. E. church, Dr.
tt of the Methodist (Protestant) church, Dr.
sher of the Lutheran church, and others, partici-
ed in the services.—*N. Y. Observer.*

GOVERNOR ANDREW, of Massachusetts, in 1865,
te the following letter, in which he expressed
only his own feelings, but those of thousands of
most intelligent and thoughtful men in the coun-
:

I never have been, am not, and expect never to
affiliated or connected with, or a member of, any
et society whatever. Without intending to re-
t or comment upon the views and action of oth-
I have never been able to satisfy myself of the
ediency of the existence of any secret societies
free republic."

THE Presbyterians in New York are attempting
raise $20,000 to erect a church in Rio Janeiro,
Capital of Brazil. A Presbyterian church has
n organized there, with seventy members. They
t in a room which seats over two hundred, yet
accommodations are too limited for the number
assemble for worship, and it is believed that a
pel seating eight hundred would soon be filled
h earnest listeners and workers. The Congre-
onalists have also projected a church at Rio.

THE Presbytery of Rappahannock, in the South-
Presbyterian Church, at a late meeting resolved:
That, in the judgment of this Presbytery, any
erence in ecclesiastical privileges founded on race
olor is repugnant to the sacred Scriptures, and
that the doors of this Presbytery are equally open
to all classes for ordination to the office of the Gos-
pel ministry according to the forms and usages of
our Church."

A CHAPLAIN in Arkansas says that a man buying
furs was conversing with a woman, at whose house
he called, and asked her if there were any Presby-
terians around there. She said she "guessed not;
her husband hadn't killed any since they had lived
there."

REUNION.—A convention of the churches of the
various Presbyterian orders was attended in Dayton,
Ohio, on Tuesday, Feb. 25th. A similar convention
was attended on the 26th at Centralia, Ill. Both
meetings were in the interests of organic church
union.

THE Greenwich Street Presbyterian Church,
Philadelphia, was recently organized, and consists of
twenty-eight members. Rev. W. Hutton, ordained
some months since by the Fourth Presbytery, Phil-
adelphia, as an evangelist, is the pastor of this
church.

REV. NATHAN L. LORD, M. D., of the Madura
Mission of the American Board, died in New York
on the 24th of January. Dr. Lord was connected
with the Mission in Ceylon from 1852, for about six
years.

REV. THOMAS H. SKINNER, JR., D.D., pastor
of the Reformed church at Stapleton, Staten Island,
N. Y., has received a unanimous call to the First
Presbyterian Church of Fort Wayne, Indiana.

REV. WILLIAM GUTHRIE BARNES, of Islip, has
received a unanimous call to the First Presbyterian
Church in Sag Harbor, L. I., at a salary of $1,500
and parsonage.

REV. J. C. DUTCHER, late of the Market Street
Dutch Reformed Church of New York, took charge
of the Congregational church at Somers, Ct., in No-
vember.

REV. D. OWEN DAVIS, pastor of the Presbyte-
rian church at Paris, Ky., has received a unanimous
call to the pastorate of the church at Clarksville,
Tenn.

REV. WM. THOMSON, pastor of the Presbyterian
church of Tamaqua, Pa., has accepted a unanimous
call to the pastorate of the church at Duncannon,
Pa.

REV. J. A. SPURGEON has resigned his ministry
at Cornwall-road Chapel, Notting Hill, to become
co-pastor with his brother at the Tabernacle.

REV. BENJAMIN L. AGNEW was installed pas-
tor of the Westminster Church, Philadelphia, on
Sabbath evening, Jan. 19th.

REV. S. J. M. EATON, of Franklin, Penn., is
engaged in collecting materials for a history of the
Presbytery of Erie.

REV. A. J. SAGE has commenced his work as
pastor of the Fourth Church, late Dr. Jefferey's,
Philadelphia.

REV. WM. A. FERGUSON was installed pastor of
the First Presbyterian Church of Dubuque, Iowa,
Jan. 23d.

REV. WM. M. CLAYBAUGH has resigned the
charge of the Third United Presbyterian Church,
Boston.

REV. HENRY NEILL has received a call from the
First Presbyterian Church, Wilmington, Del.

FOREIGN.

PROGRESS IN SPAIN.—It is not often that we
have an opportunity to report good news from Spain,
since the Government in almost all its measures has
been illiberal and oppressive. But a bill has been
laid before the Cortes which makes the instruction of
children obligatory all over Spain, and provides that
every village having a population of five hundred
must have a schoolmaster.

City College.

AMUSEMENTS.

The time was when a Christian would have been suspected of lamentably defective piety, who should advocate anything the object of which is mere amusement. The statement that one had been known to dance, even in the parlor of home; that one had rolled ninepins, though for exercise; that one had played billiards, though by advice of a physician, would have excited a predjudice against his Christian character, that could be removed only by the most exemplary living in other respects, and the most positive assurance that his motives were pure. But when one was guilty of any of these lapses from the proper path, without opportunity for either of these excuses, he was condemned, if not suspended from the fellowship of the good.

We are inclined to believe that religion has lost nothing by the change in the views of those who profess it upon points of this nature. But whether there has been loss or gain, that there has been a marked change must be manifest to all; and we must accept it and endeavor to prevent any evils possible from its influence, or seek to reform public opinion back to its former limits.

Some of the most able and useful clergymen of England and America, have lately published articles, and sermons, and books, with the purpose to show first, the necessity for amusements, and then the forms and restrictions within which they should be enjoyed. We quote the following extract from that most excellent divine and writer, Dr. Norman Macleod, the editor of "Good Words," as a specimen of the sentiments very generally held:

"Men will have amusement and excitement as certain as the ocean will have its spring tides, and the world its summer flowers and summer songs. How can this inborn appetite best be fed? Shall it be treated as a crime, and handed over to Satan; or shall it be made to minister to man's happiness according to God's will? Shall it be pent up until it gathers strength enough to burst all the barriers of law and decency, and rush forth in annual floods of wild and unbridled passions; or shall society recognize it, perceive how full of goodness and benevolence it is, and adopt such wise plans as will run it off in gentle rills, week by week, or even day by day, to freshen and irrigate the earth, and make our fields more green and beautiful?

Whoever adjusts this demand to the other and higher demands of man's nature, will confer an inestimable boon on society. All classes require their amusements to be reformed, not reduced; spread out, not concentrated; directed, not annihilated; in a word, to be taken out of the kingdom of Satan, and brought into the well-ordered and beautifully-balanced kingdom of Christ on earth. The tendency of all extremes is to toss men over into their opposites. When the swing is the highest on one side, look out for broken heads, and falls on the other. One cause of the tendency to pervert the Sabbath from a holy day to a holiday, is the incessant toil, barren of hours of rest, and of all amusement and gentle excitement during the week."

These views are but the expressions of what multitudes feel, and there can be no doubt that those who lead and modify the conduct of Christians by their teaching and example, should make the questions thus rendered practical, the subjects for careful and serious thought. We would not be of the number who strive to force the conviction upon young and old, that the Devil and his votaries have a right to all the pleasures that naturally belong to life, as most men understand that word. We are under no obligation to believe or teach that this world is nothing but a "vale of tears," and that those only pass through it as they should, who go with "there heads bowed down like a bulrush." There are hosts of sensible, conscientious, excellent people, who would not believe this, though we aver it, and they would prove by their wiser doctrines and career that it is not true. The limits closely suggested by the word of God, and a well-instructed conscience being always observed, we should strive to throw as many attractions around our religion as possible, and to make religion add to the charms of other things, when this is possible; and he who does this in the best manner, most perfectly obeys the exhortation that every one "seek to please his neighbor for his good to edification."

ANNOTATIONS.

III.

OF DISPUTATIONS.

Is there not a class of subjects in regard to which it may be said that mere argument never produces conviction? Certainly there is a class on which the majority of men should not permit themselves to dispute. If you are more clever than I, you may puzzle me, even though I am in the right, and you in the wrong. But it does not follow because I have no more to say for myself that I am convinced, or that I *ought to be* convinced. Most men, and all women, hold opinions or have convictions which they cannot defend in a syllogism. And it is well that this is so. Who would like to see a simple-minded man or a good woman ready to surrender a cherished belief at the summons of every voluble logic-chopper?

As Sir Thomas Browne says, in his "Religio Medici:" "Every man is not a proper champion for truth, nor fit to take up the gauntlet in the cause of verity," quaintly adding: "Many from the ignorance of these maxims, and an inconsiderate zeal for truth, have too rashly charged the troops of error, and remain as trophies unto the enemies of truth. A man may be in as just possession of truth as of a city, and yet be forced to surrender; 'tis therefore, far better to enjoy her with peace, than to hazard her on a battle. If, therefore, there rise any doubt in any way, I do forget them, or, at least, defer them, till my better settled judgment, and more manly reason be able to resolve them."

IV.

OF A COMMON INJUSTICE.

Nothing is more common than to see not only individuals, but society, or public opinion, setting up an unreasonable standard of excellence for certain classes of persons, and then pronouncing judgment upon the class or the individual with reference to that standard. The censor evidently has only to set his standard high enough, in order to be enabled to condemn and disparage whomsoever he pleases, since all human goodness will come short. when measured by a standard beyond the reach of humanity. When men, who themselves make no pretentions to religion or morality, who have no law to which they earnestly strive to conform, sneer at the short comings of those who are struggling painfully toward an ideal too lofty ever to be attained, the *argumentum ad hominem*, though classed by logicians among the "fallacies," seems to me the best reply. Our Lord used it more than once in replying to cavillers, as in his vindication of healing on the Sabbath, by referring to the practice of the objectors themselves: "What man shall there be among you, that shall have one sheep, and if it shall fall into a pit on the Sabbath day, will he not lay hold on it, and lift it out?" There are cases, doubtless, where a man is justified in judging others by a critical standard which he repudiates for himself; but the very common case of the man of the world, who acknowledges no law but that of inclination or convenience, wallowing complacently in his slough of self-indulgence, while he rails at the infirmities of those whose whole lives, however imperfect, are at least, pervaded by the idea of duty, and full of sacrifice and self-denial, is not among them.

V.

OF MAKING MONEY.

There are few sillier forms of sentimentality than that which is exhibited in a real or affected undervaluing of wealth. Its power for good in the hands of the good is scarcely to be estimated. Without it, one often finds himself crippled in efforts to aid a noble cause or to combat a bad one. The thriftless or the indolent who affect to despise wealth, are generally envious as well as insincere. Those who really despise it cannot, as it seems to me, be gifted with robust sense, nor be free from morbidness. Ruskin presents the matter forcibly and characteristically, though perhaps not without some exaggeration of expression, when he says: "There will always be a number of men who would fain set themselves to the accumulation of wealth as the sole object of their lives. Necessarily that class of men is an uneducated class, inferior in intellect, and more or less cowardly. It is physically impossible for a well educated, intellectual, or brave man, to make money the chief object of his thoughts; as impossible as it is for him to make his dinner the principal object of them. All healthy people like their dinners, but their dinner is not the main object of their lives. So all healthily-minded people like making money — ought to like it, and to enjoy the sensation of making it. But the main object of life is not money." In illustration, he adds: "Doctors like their fees, no doubt — ought to like them; yet if they are brave and well educated, . . . they, on the whole, desire to cure the sick; and would rather cure their patient and lose their fee, than kill him and get it. And so with all other brave and rightly trained men; their work is first, their fee second — very important always, but still *second*."

This, no doubt, is the general rule, though there have been exceptional cases of men both brave and able, with whom money seemed the paramount consideration. So far as the ability to make money in any regular and useful business is concerned, it is in the majority of cases an indication of general ability and implies the presence of some good and valuable elements of character in its possessor. Even the miser's vice is but an exaggerated virtue, and it may be fairly argued that the self-denial that is associated with his avarice, elevates him in the scale of moral being above the spendthrift and the prodigal.

THE RIGHTEOUS SCARCELY SAVED.

No righteous man ever lived who did not deeply feel this truth: The wicked say, "These professors of religion are no better than they should be." The professor responds, "Even so. I often wonder how God can save so great a sinner as I feel myself to be. It is only when I turn my thoughts from myself to my Savior, and realize that he came to save *sinners*, that I have any hope."

The righteous have always been "scarcely saved." Suppose out of many who are similarly situated only one should escape from impending danger; who would not say that one came near being lost. Think

Noah and his family. They were exposed to the ne temptations and trials which destroyed the rest the race, and it was a marvel that they were ved. In like manner, every one of those redeemed m this wicked world will say at last, "I am a mi-le of grace."

Lot was a righteous man, as we are told by Peter. t he went to Sodom to get rich, and so wedded to world did he become, that the very angels had to hold of him and his family, and take them out ost by force, or they would have burned with the t of its wicked inhabitants. His wife turned back d perished, after the angels had led her forth from city, and Lot himself was so corrupt, that we rdly recognize any evidence of piety in his con-ct. We only have the secret of his being saved, d that the Lord delivered him. Surely, he was no ter than he should be—he was "scarcely saved." Call to mind another Old Testament example, the n after God's own heart. O what an imperfect n David was! His soul delighted with adultery, hands stained with blood—tell me, is he not a lost n? But Nathan, God's minister, is sent to re-ach him, and by his words the erring man's heart roken. Now, when he thinks of his course, lis-to what he says: "Wash me thoroughly from ne iniquity, and cleanse me from my sin. Deliv-me from blood-guiltiness, O God, thou God of salvation." We feel that David will be saved, a penitent sinner, though so very guilty; yet sure-he was *almost* lost—"scarcely saved." If he had ntinued in his course of sin, without repentance d forgiveness, what hope could there be for him? If now, we turn to the New Testament for a single tance, we may look at Peter. He had been three rs in constant intercourse with Jesus — had seen miracles; was with him on the Mount of Trans-uration, awe-struck, and bewildered by the glory that wonderful scene; but a little time before, he s with him in that sweetest and most tender of all mmunions in the supper-room; he had gone with rist to the garden, and listened to some part of t prayer of agony, and had declared that though men should foresake him, he was ready to fight him, or die with him. Yet, how little did he ow himself! In the very presence of the Savior repeatedly denied that he knew him, and finally h cursing and oaths! Do you not believe Peter a lost man? Surely, he is *almost* lost. But some-ng led him to look towards Jesus, and oh! what a k, in answer, fell upon him from his Master!—a k full of sorrow, pity, rebuke, and injured love! broke his heart, and Peter never denied his Lord, swore again. Yet he who came so near being t, was of the very chief of the Apostles. Suppose had remained to the end of life, a swearing, wick-man; would there have been any hope for him? f the righteous scarcely be saved, where shall the godly and sinners appear?" O, impenitent man, not try to feed your soul on the sins of God's ple. There is abundant supply of the food, but, s! it will only starve your soul. S.

Wilcox's Shaft Couplings, Pole, Shaft and Yoke Tips, Malleable Iron Castings for Vehicles, all kinds.

SANDER'S NEW YORK BEST HALF PATENT AXLES, CONCORD AXLES, SIDE SPRINGS, Etc.

Having the advantage of a long experience in this line of business, and abundant facilities, we are well prepared to fill any orders with which we may be favored, upon the best terms, and with the same care, promptness, and attention as heretofore.

ORDERS FROM THE COUNTRY SOLICITED.

If from persons unknown to us, they should be accompanied with the cash or city reference.
Merchants and others bringing orders to us, will be met with liberal terms.
Persons ordering goods will please be particular in describing what they want, so as to prevent mistakes.
☞ Catalogue and Price Lists sent on application.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

☞ For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from Cincinnati.

Lane Theological Seminary,
Walnut Hills, Ohio, Feb. 1st, 1868.

With your urgent letter in my hands, and your portrait speaking to me from its place of honor in my pleasant library, and with the memory of nearly twenty years of dear association with you, lingering in my heart, how can I refrain from sending some familiar and affectionate response for the pages of The Occident.

Is it not a singular illustration of the administrative and distributive sway of Him whom we serve, that from our common field of labor by the quiet lakes of Western New York He has carried me away to this school of the prophets, to unfold the history and the polity of His Church in ages past; and has borne you to those more distant Pacific shores, to *make* church history and to give polity and form to that church for ages to come! I congratulate you that yours is the more conspicuous and effective, as well as onerous office, as it ought to be, since you were the one chosen to fill it; and I count it a privilege if, from the seclusion of the study, I may contribute some small proportion to the great enterprise you have now undertaken.

There are brethren on the Pacific slope, both in the ministry and in other avocations, who will be glad to know of the measures in progress for the reconstruction of *Lane*. With the anticipated advent of Dr. Nelson, of St. Louis in April, the Faculty of the Institution will be complete; though it is in contemplation to provide additional instruction in Greek and Hebrew, and the supplementary courses of lectures, at an early day.

The resources of the Seminary have recently been considerably increased in several ways. Among these it is not out of place to mention a legacy of $15,000 from a Christian friend in Columbus, just deceased. Such a degree of interest and of confidence has now been awakened, and such a deep sense of need is felt by western men who love our denomination, that the Institution is sure — as we think, both of adequate pecuniary assistance, and of sympathetic and hopeful support in other directions.

You are familiar with Dr. Nelson, who is to take the place once filled by Dr. Beecher, and, in later later years, by our beloved Dr. Allen, whose increasing infirmities have compelled him, while in the very height of his usefulness, to resign his position here. How suitable the selection of their successor is you, who are acquainted with his clear, and calm, and comprehensive mind, his firm administrative genius, his genial and noble feeling, his Christian worth, can readily decide.

Of Dr. Smith, who first came to this Institution from the Presidency of Marietta College, and has recently returned to it from his successful pastorate in Buffalo, or of his younger colleague in the work of instruction, Prof. Evans, I may not venture to speak in such terms as were befitting the case. Suffice it to say, that we are to have a strong, earnest, laborious, hopeful Faculty — deeply convinced of the necessity for such an institution in this western valley, and determined, by the grace of God, to make Lane more than ever a blessing to our whole land and to the world.

About four hundred men have studied here for the ministry, of whom nearly all have entered on the work. One hundred and seventy-five of these are now in the ministry of the N. S. Presbyterian Church, scattered chiefly through the Western and Northwestern States. Some of these have migrated as far westward as Kansas, Nebraska, and Nevada; several are holding up the banner of Christ on Pagan shores, and two at least are in your own California. And if this institution, manned and endowed as it is to be, and standing on this hill as a perpetual call to the ministry, shall, during the next quarter of a century, send forth as many more into these ever-widening fields of labor, endowed for their blessed work, and animated by the spirit of those who have preceded them, who, save the Master Himself, will be able to estimate the influence thus exerted, the good thus accomplished in His name!

I am impressed with the importance of a due distribution of our theological seminaries, in contrast with the policy of concentration at central points, like Princeton or New York. You will know how effective an agency our beloved Auburn has been in calling young men into the ministry, and in filling the churches of Central and Western New York with cultivated and earnest pastors. It is quite safe to say that a considerable proportion of these would never have entered the sacred office had not the Institution by its very nearness and presence brought the question of duty directly home to them. If they had been acted upon only by such influences as could have been exerted by seminaries remote and unfamiliar, and had been compelled to seek the requisite preparation at a distance, many of them would have entered some secular calling.

Of course the policy of distribution has its limits and its dangers; but if in this western valley we can appeal to young men more directly and personally than any institution situated beyond the Alleghanies, and can the more readily furnish them the requisite preparation, and open for them the way to usefulness in the ministry — supplying thus a want such as no other seminary can as happily meet — I shall feel that we are accomplishing a work worthy of our utmost efforts, our completest consecration.

The question of union, so prominently in the the minds of all Presbyterians on the Pacific slope, and under discussion everywhere, is eliciting special interest in this quarter. I believe that the O. S. brethren of this region, and of the West generally, are remarkably free from those suspicions and distrusts which too plainly have seriously affected some portions of the O. S. body. A spirit of mutual respect — that kind of respect which blossoms naturally into confidence, and bears fruit in fraternal love and fellowship — exists on both sides in this locality, and should the two denominations, in their Assemblies agree on the terms of union as already prescribed, or on any kindred terms, we of the Central West, in both schools, shall be found ready to acquiesce — ready to become one, and to work together under the common banner, for the common good.

With sincerest desires for the prosperity of The Occident, and of the great interests it represents, I remain yours, most truly, E. D. M.

Letter from Mariposa.

Caledonia Ranch,
Mariposa Co., March 1st 1868.

Our County, as the readers of the Occident are aware, is situated in that section of the State, known as the "Southern Mines." Inside of its boundaries is a "Big Tree Grove," the Yosemite Valley and Falls, and other valleys and falls of less prominence. Mariposa, the county seat, is a town of six hundred to seven hundred inhabitants, situated near the head of Mariposa Creek. Located between two abrupt hills, its position is in no way inviting. There are two houses of worship—Methodist and Romanist. The past year, instead of a stationed preacher for the town, we have only one for the whole county, and there has been no Protestant services in the town since last fall. With sadness, we have noted a decline of religious interest. There is no Sunday School in town, and only one in the county. Though the Methodists are the more numerous, there are a goodly number of Presbyterians in the county. The scattered flock greatly needs a Shepherd. Our prayer is, that the Master will send us one fitted for his work.

The winter has been exceedingly severe with us. There have been very few pleasant days since the first of December. Mining operations have been abandoned, and nearly all our adult working population have been for four months without any occupation. The farming interests seem to have a fair prospect for the coming season. The crops are nearly in. The range about the foot-hills has kept live stock in a fair condition. We trust a genial spring and favorable summer are to come, repairing the ravages of a harsh winter.

P. R. H.

Winter in Alaska.

Sitka, A. T., Feb. 11, 1868.

MATTERS ABOUT TOWN.

Current events at Sitka since New Year's have not been startling. We still have heavy snow falls upon the mountains, and a flight of four inches on Main Street ten days ago gave the opportunity of a sleigh ride — the first which ever occurred at Sitka. While but little has fallen in the town, on the lofty heights but a few miles distant there lies a vast depth, not alone of the perennial drifts, but of this winter's snow-crop. Sometimes the accumulation is so great on the heights above that a huge mass of dry snow tumbles down the precipitous side of the mountain, filling the gorge below to the depth of several hundred feet. One of these occurred in sight of town last Sunday — noiseless, but filling the air with a dense mist of snow-flakes.

Usually these slides do not occur till May, when the snow becomes saturated with water. Their weight is often immense, and their movement is not a rolling agglomeration, accumulating as it descends, after the manner of the avalanches among the Alps — but is downward in a direct line. Pathways of these slides are visible all through this region. Sometimes acres of land, with huge bowlders are detached, and in their rapid descent sweep everything before them. Immense trees are snapped off like reeds, and a clear pathway is made down through the dense forest, traces of which will be visible for centuries.

TRADE AND BUSINESS.

During the Winter, the Indians have picked up many a stray half dollar, by the sale of wild meat, fish and furs. But the silver does not long adhere to the palms of their hands. The army sutler from San Francisco, arrived here three weeks ago with a full stock. He opened at once with a tempting display of woolen pants and shirts, calicoes, knives, and trinkets. By the gift of some trifling bauble after each purchase, he has monopolized for the time, the trade with our dusky citizens.

There has been much inconvenience the present winter from the want of dry wood for fuel. The Indians could in part have supplied us by bringing it in canoes from the opposite side of the bay; but they, in their outset, told Gen. Davis they would not do

hat kind of work for money or goods. It was a degrading service, for which nothing but whisky and ammunition could compensate. These, of course he could not furnish; though he believes that small amounts of ammunition, and limited rations of liquor, might have been supplied to mutual advantage. As it is, the military have been compelled to use green wood; and the Indians have the trouble of a long trip to meet the Hudson Bay Company smugglers, who will supply them with powder and whiskey *ad libitum*, provided the Indians have the furs or specie to buy with.

There are about a dozen miners passing the winter here, whiling away the time by occasionally "chroning" for the post. They will migrate to the Stikeen River the first of May. The best field, however, opens for those skilled in the fur trade. Several traders here are already doing well, and the field for operations will be indefinitely expanded in the spring — reaching to Behring Straits and the Arctic shores.

MOVEMENTS OF THE MILITARY.

As a military commander here, Gen. J. C. Davis is considered above the average. Unlike Gen. Rosseau, who is verbose, showy, and plausible, he is taciturn and austere, but frank, straightforward, and honest. When a boy, he volunteered a private for the Mexican war in 1846, entering the famous Jim Lane regiment from Indiana. The ability and aptitude he exhibited gave him, on the return of peace, a commission of Second Lieutenant in the regular army. He was with Maj. Anderson during the terrible bombardment of Fort Sumter in the spring of 1861. But his highest reputation as a military officer was won while in command of a division under Gen. Sherman, during the most brilliant achievement of the late war — the march through Georgia.

Gen. Davis thinks that four additional companies of infantry could be advantageously employed in the Territory. Posts are to be established in the spring at the mouth of the Stikeen River and at Fort St. Nicolas, on the east shore of Cook's Inlet. At Kodiak no force is needed, as its population of 1800 is among the most peaceable in the Union.

GEYSERS AND GLACIERS.

Last Monday I joined an excursion for Glenboko Lake, fifteen miles distant. By aid of oar, as well as sail, we landed at two o'clock. The surface of the lake is eighteen feet above high tide. A ledge of compact slate, one hundred yards wide prevents it from sinking to the ocean level. It lies between two steep, bristling ranges — having a length of twenty miles and a width of one. The average depth is three hundred feet. At the fall, where its waters empty into the bay, is a noted salmon fishing depot, occupied for forty years by the Russian Fur Company. Last summer they sold their interest, including the store-houses, to the American Commercial Company at San Francisco, for $15,000. The new owners are preparing to greatly enlarge the present business.

Sleeping at night on the plank floor of a storehouse, I arose early to witness the glories of the coming day. In this high latitude twilight is twice as long as at San Francisco. Nothing is more enjoyable here than, under a clear starlight to watch the coming dawn. This morning not a cloud marked the horizon. First appeared the faint gray haze, then the dull streak, then the bright flush and crimson lining, till at length the full disc of the orb which brings life and light arose above the sharp crest of the mountain.

Early after breakfast we pulled our oars seven miles, amid a dense archipelago of islets, to a beautiful cove, at the head of which, seventy yards above the beach, arose the thick vapors from the "Geysers," or hot springs. Here the Russian Fur Company built two spacious log houses, with baths for hospital purposes, sending hither intractable rheumatic and cutaneous cases, which were usually cured, or at least mitigated. There is one large and three small springs. My thermometer was 41° in the air. Thrusting it into the spouting current of the larger, the mercury went up to 183°. The rocks and brushwood show a coating of sulphur, salt, and a trace of iron. The adjacent summits bear the marks of recent as well as powerful volcanic action. Several have well defined craters, and display on their sides the deep radiating gorges of the lava's track.

MOUNTAINS AND GLACIERS.

In a Territory from nine-tenths of the surface of which perpetual snow is always seen, it will readily be inferred by the readers of THE OCCIDENT, that glaciers are numerous, and of great extent. When entering Sitka harbor last September, one was distinctly visible to the northeast, hanging on the mountain-side like a glove with its wide-spread fingers grasping downwards.

All along the Alaska sea-coast, from the mouth of the Stikeen, many hundred miles north and west, is the *habitat* of the glacier. The first one upon which I laid my hand, was while on an exploring expedition with Prof. Davidson of the *Lincoln*, last October. It was at the mouth of the Chilcaht. It had a base of six miles, and ran up to the snowy summit of a bluff 1800 feet high. The ice reaches down to the base—the belt of land separating it from the water, being less than two hundred yards wide. The ice has the blue alpine color, and a number of streams issue from its base. It exhibits in its texture every variety of contortion.

Coasting northward, a hundred miles, we came in sight of Mt. St. Elias — the hightest known summit of Alaska. It is surrounded by an atmosphere too cold for the production of glacial phenomena. The white, loose snow, even in August, covers it with an everlasting mantle down to its very base. Its height is unknown, and its summit will never be trod by human foot.

But on the coast, directly opposite Mt. St. Elias, is an overhanging ice-field, having a width of thirty miles, and bathing its crystal base in the tide waters of the Pacific. The mariners who have coasted along its base, say, that in the clear sunshine of summer, its gleaming surface and rich prismatic coloring exhibit a magnificence which awes into silence, every intelligent beholder. On a winter day it wears that "dreary grandeur" peculiar to the scenery of high latitudes.

Among the four hundred Americans who came here nearly five months ago, only two deaths have occurred. Both were soldiers, who died of lung fever. Dr. Hoff, the army surgeon, is no admirer of this climate, but regards it as very healthy, except for persons of pulmonary tendencies.

Sitka will never be anything above a military and small commercial post. The mining region lies to the east. The fishing region lies six hundred miles to the west. Farming, if ever carried on in the Territory, will be equally remote — in the region of Cook's Inlet.

The Army Chaplain has organized a Sunday School among the Protestants. A priest from Victoria is establishing a Catholic church. The Greek Church maintains its usual services. ORIENT.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Current Literature.

RECENT PUBLICATIONS.

ECCE ECCLESIA. New York: Biclock & Co. San Francisco: H. H. Bancroft & Co.

At the present rate of publication, there will soon be a library of "Ecce" books, though they will be very unlike in value. This volume purports to be an effort to prove the essential unity of the church in all ages, but is really an attempt to show that all ecclesiastical historians have given us nothing reliable. The author seems possessed with the purpose of the iconoclasts, but gives us very little that is satisfactory to take the place of what he would destroy. The rhetoric and arrangement furnish evidence that the book was written in too much haste to be accepted at once, according to its claims. We believe in the essential unity of the church in all ages, but this author does not confirm our belief.

GOLDEN TRUTHS. Boston: Lea & Shepard. San Francisco: A. Roman & Co.

This is one of the most pleasing books of its kind we have seen in years. Its unknown editor has shown excellent judgment and exquisite taste in the selections, both of prose and verse, and the publishers have given us the pearls in as beautiful setting as they deserve. The object of the book is, that "these words fitly spoken may strengthen the inner life in the soul." It can hardly be that the object shall fail to be attained, for it will certainly be read, and none can read it without profit.

WOMAN'S WRONGS. By Gail Hamilton. Boston: Tichnor & Fields. San Francisco: H. H. Bancroft & Co.

Gail Hamilton furnishes further proof of what was long ago found to be true — that when an author has an ambition to make many books, the first are generally the best of the series. Her reputation has not been increased by her more recent works, but that gained by those first published must be borrowed by these to render them worthy of her name. This last book seems to have been provoked into existence by Rev. Dr. Todd, of Pittsfield, who had expressed some sentiments respecting women and their proper relations and duties, which the author could not permit to go unrebuked. But the manifest haste in which the book was written, and the severity of its style, subtract from the force of the arguments by which she undertakes to support what she declares to be the rights of her sex. To the most of these arguments we have no serious objection. There can be no reason why the wrongs now imposed upon women by our laws should not be redressed, and we would be glad were they allowed even to vote upon all questions in which their interests are specially involved. The right of general suffrage would hardly be desired even by Gail Hamilton, were this much granted; and if it were desired, there is opportunity for dignified and calm debate upon the subject. This book will be read, of course, and it has some merit, but the author is able to write a much better one, and we hope she will do it.

THE WRITINGS OF SIR THOMAS BROWNE. Boston: Tickner & Fields. San Francisco: H. H. Bancroft & Co.

Books that both interest us and lead us to think are very valuable, and this is one of that class. At first glance it seems too fragmentary, and the topics discussed are not stated in a form that arrests attention; but when one has given time to the substance of the book, there is abundant return for study. There are many recent books, and a fair proportion of them will repay the reader; but it is not unwise, from time to time, to turn back to those of a little more distant date, and when they are sought, Sir Thomas Browne will by no means be neglected by those who love really good literature.

California Authors.—The *Round Table*, in a review of "Recent Works of Poetry," says: "Mr. Edward R. Sill, in 'The Hermitage,' has given us a poem of unusual and hopeful merit. It is thoughtful, earnest, and felicitous in the choice of words." Of Mr. Stoddard, the *Round Table* is less eulogistic, but considers the little poem entitled "In the Desert," a "gem of life-like and graphic beauty."

We have received, with thanks:

The Biblical Repertory, for the quarter beginning January, 1868. The articles in this Review are always valuable. We are specially pleased to find in this number the reprint of Prof. H. B. Smith's article on "Presbyterian Reunion."

Putnam's Magazine for March, which is equal to its predecessors. We commend the article on "Science and Religion" as worthy of careful reading.

The Pacific Medical and Surgical Journal for March. Those who are able to judge, regard this as fully sustaining the reputation of previous numbers. The worth of the Journal is indicated by the frequent quotations from it by eastern medical periodicals.

LITERARY ITEMS.

A biography of Dr. Nott, late President of Union College, Schenectady, N. Y., is in course of preparation by his grandson, a son of Benjamin Nott, of Bethlehem, N. Y.

Prof. Stowe's "Origin and History of the Books of the Bible," published by the Hartford Publishing Company, has met with a sale of 25,000 within six months.

The Rock is the name of a new paper in London, established to look after the three R's — Rationalism, Ritualism, and Romanism.

Prof. Seeley, of London, the author of "Ecce Homo," is lecturing in England on Milton's Political Opinions.

EDUCATIONAL.

Justice to Teachers.

Pope used to say that at the schools of Twyford and Hyde Park corner, he actually lost part of what his previous master (Taverner) had taught him. Dr. Johnson manifests a most pleasing spirit of careful justice when, in his life of the poet, he comes to report this statement. Unawed by the positiveness of the poet, and not careless of the reputation even of humble teachers, he takes pains to examine the matter. The result is that he finds that those same teachers carried their scholar through no less than a fourth part of the Metamorphoses of Ovid. Upon the discovery, the just and careful historian says: "If he kept the same proportion in his other exercises, it cannot be thought that his loss was great." One cannot but admire such a disposition to render impartial justice. It is a noble soul that can remember the interest of the absent and the humble, and stop and weigh the denunciations of the determined and the great. In fact, such a spirit inspires so much confidence in a writer that we are prepared to follow him afterwards almost implicitly. Thus we cannot but feel that the Doctor is right in his suspicion of the ability of another teacher, of whom he speaks further on: "How Mr. Deane could spend, with a boy who had translated so much of Ovid, some months over a small part of Tully's Offices, it is now vain to inquire." C.

Kindness to Animals.

A lady of San Francisco, in writing from Europe, describes Venice as the city of "quiet streets of water, with no carriage wheels and no beating of poor horses." From a similar point of view, the pleasant author of "European Mosaic" expresses himself in connection with the subject of the Italian lakes. Arresting his glowing description of these objects of beauty, he gives vent to deep indignation at the cruel treatment to cattle in their neighborhood. He describes the poor creatures as living in perpetual torture: galled by their yokes, wickedly goaded, and subjected to everything but death in the process of shoeing. And he adds the general statement that Italy is painfully distinguished for the indignities which are everywhere practiced upon dumb creatures. Side by side with the feeling of aversion which such accounts excite, is the feeling of admiration for these travelers, who, in the midst of personal gratification, had hearts to feel the woes of dumb animals. But such tenderness of heart may be a thing of cultivation. It was so in the case of the poet Rogers. He says: "I was taught by my mother, from my earliest infancy, to be tenderly kind towards the meanest living thing; and, however people may laugh, I sometimes very carefully put a stray gnat or a wasp out at the window." C.

CONTRIBUTIONS.

Ancient Egyptians and their Dead.

It is a singular fact in the history of the ancient Egyptians that they took such extraordinary pains in providing for the body when dead. Their sepulchres were of massive proportions. They were ornamented with everything they could think of which would please the eye or gratify the taste. Whatever art or wealth could do was lavished in such profusion that the walls and ceilings of these buildings in which the dead were placed were covered with paintings and chiseled representations of the most exquisite grace and beauty, which exhibited not only those scenes of daily life in which the person had lived, but those also which it was supposed might transpire and would minister to his gratification. In the tomb was placed furniture of the costliest materials, most elaborately wrought and polished — stands for flowers, vases for perfumes, altars for the reception of offerings, statues of horses and chariots, and all the insignia of the office which the deceased had held. Thither were carried also weekly offerings of wine, cake, fruit, flowers, herbs, etc.

The body after embalmment, which would preserve it an incredible number of years, was placed in a case, covered with a hyeroglyphic record of the chief incidents in the life of the deceased. In his hand was a roll of papyrus, which was a record of the good deeds he had done to his fellow men and for the honor of the gods. Thus prepared, it was borne to the tomb, to construct which had been the chief labor of life. It was placed in an alabaster sarcophagus, and in such a position that the eye could rest upon the most of the memorials engraved upon the walls and ceiling.

Sometimes these embalmed bodies were kept for months and years in the houses of their friends. There they occupied the same seats and couches that they had when living. At every feast they were

resent, and libations and offerings were made to them.

The reason of this superior regard of the old Egyptians for their dead, is supposed by those who are the best informed, to have been in some way connected with their doctrine of a future life. But what their idea of that state was, we as yet, do not sufficently know. There is an inscription in one of the rolls of papyrus which was found on the person of a mummy, which seems to indicate that it was their belief that the soul which had animated the body while living would not quit that body till it was completely destroyed. So long as those changes which follow dissolution could be averted, the soul remained as consciously active as it had been in life. If this were so, it would explain in a measure the strange facts we have stated.

They took more pains with their tombs than they did with their dwellings, because one was a temporary home, and the other their everlasting habitation. For this reason the tomb was made to wear always a cheerful and inviting aspect. They tried to make "life" in it as nearly as possible only a continuation of the life on the earth, in which the same sources of gratification would be opened, and the same objects of pursuit would be followed.

How different from all this is that Gospel in which we believe, with its grand doctrines of another life for the body and for the soul! W.

John Vine Hall.

The American Tract Society, has published an abridged edition of the life of John Vine Hall, in the hope it may obtain wide circulation in this country. As David went forth to meet the Philistine Giant with smooth stones, and with so simple an instrument smote him to his death, so we know of no means better calculated to assist in the arrest of the first evil of intemperance, than this unpretending volume. We think if our pastors and elders could have copies of this book to place in the hands of those around them who are ensnared by the destroyer, they might yet be delivered and saved. The volume is a frank and simple memoir of the author's early intemperate habits—of his numerous falls, even after he became a professed disciple of Christ—the patient and kind efforts which were put forth for his rescue, and how at length he became a total abstinent, and was upheld by Divine Grace, so that his life afterwards was eminently useful in labors for the reformation and salvation of others. There is a charm about the whole narrative which holds the reader to the close, and whoever reads must derive benefit from the humble spiritual experiences there recorded.

We recently placed a copy in the hands of a brother-beloved whose lamentable failing was that during a residence of fifteen years in this country he had become an almost hopeless inebriate. He had signed the pledge within a few months previous, but had fallen again. He read this book and was intensely moved, so that on his bended knees he besought God for that grace which rescued John Vine Hall.

A life which had been well nigh sacrificed to this vice is now reclaimed, and this restored brother has become one of the most humble and acceptable members of the church where he resides.

How many precious lives are blasted by this fearful evil, and how many sheep of the fold wander in the dark mountains of sin from this cause! We commend this volume as one of great excellence in laboring with any who have fallen into this fearful snare. The following prescription, which the author himself used and has recommended to others to assist in overcoming habits of drunkenness, is worthy to have wide publication. He states that he obtained it from an eminent physician, and made use of it for seven months, at the end of which time he had lost all desire for strong drink. It is as follows: "Sulphate of iron, five grains; magnesia, ten grains; peppermint water, eleven drachms; spirit of nutmeg, one drachm." This preparation acts as a tonic and stimulant, and so partially supplies the place of the accustomed liquor and prevents that absolute physical and moral prostration that follows a sudden breaking off from the use of stimulating drinks.

Our own conviction from reading the work, as well as the results already witnessed from the circulation we have given it, leads us to make this extended notice. We would have this new, smooth stone from the brook taken by many hands and hurled at the middle of the forehead of this huge monster which is desolating our communities and churches. C. C. W.

Family Reading.

The City of Gold.

I love to read of the city,—
The beautiful city of gold!
And my heart is sick, and mine eyes are dim,
The glory to behold
Of the new and holy Jerusalem—
The beautiful city of gold!

How fair and pure she shineth,
As a bride arrayed for her love;
Neither sun nor moon is needed
To lighten her from above—
For the glory of God doth lighten her,
And the Lamb is the Light thereof!

Oh, fair and wonderful city—
City of gold and light!
Already thy shining portals
Gleam on my spirit's sight,
In the dark and solemn night-time,
In the solemn and stilly night.

For my Love, who in Paradise waiteth,
Comes to me in thought-visions rare;
I catch but the wave of her garments,
The shine of her beauteous hair,
But she leaves me a glimpse of the glory
That I pant with her to share.

Let the way be long and weary,
And dark with terrors untold,
I will count it all joy and gladness,
If it lead me at last to behold
The city of light and glory—
The beautiful city of gold!

—Mrs. C. Rogers.

Together.

Afar from thee! the night is come,
But slumbers from my pillows flee;
I cannot rest so far from home,
And my heart's home is, love, with thee.
I kneel before the throne of prayer,
And then I know that thou art nigh;
For God, who seeth everywhere,
Bends on us both his watchful eye.

Together, in his loved embrace,
No distance can our hearts divide,
Forgotten quite the mediate space,
I kneel thy kneeling form beside;
My tranquil frame then sinks to sleep,
But soars the spirit far and free;
O welcome be night's slumbers deep,
For then, dear loved! I am with thee.

Coming to California.

A correspondent of the St. Louis *Republican* writes thus from California, in answer to the question, "Who ought to come to California?"

"Farmers — especially western farmers, who know how it goes to settle a new country — farmers who have boys and girls to help carry on business — to all such the country holds out the surest prospect of prosperity. All mechanics of the useful kind, and all laborers, men and women, can command good wages and are sure of constant employment. Men and women of some refinement, who wish to uncivilize themselves, who want to get away from the sound of church bells, away from suppers at the "Tobacco Warehouse," and from sewing societies, and the like, for the benefit of parsons in country villages; who want to sleep in wet blankets, to travel over deserts, to ford rivers, to shoot antelopes and chase buffaloes; to climb mountains and learn to eat bacon and beans with a relish; let all such come to California by way of the plains; and if they can dig in the mines, quarry stone, make brick, cook, wash, bake, iron, chop, run a saw-mill, a dray, or a hand-cart, they are on the sure road to affluence.

"There is another class of persons to whom the journey overland, and the country, hold out strong inducements. It is to nice persons, troubled with gout, dyspepsia, spleen, ennui, laziness, or who have acquired a love of romance by too much novel reading — to persons dissatisfied with everybody and everything — eternal grumblers, who feel that they ought to have been consulted when the world was made — to all such it is recommended that they travel to California overland with ox-teams — and take the first steamer back to the States. It is a certain cure.

A Short and Pithy Sermon.

"Owe no man anything."

Keep out of debt. Avoid it as you would war, pestilence, or famine. Hate it with a perfect hatred. Abhor it with an entire and absolute abhorrence. Dig potatoes, break stones, peddle tin-ware, do anything that is honest and useful, rather than run in debt. As you value comfort, quiet, independence, keep out of debt. As you value good digestion, a healthy appetite, a placid temper, a smooth pillow, pleasant dreams and happy wakings, keep out of debt. Debt is the hardest of all taskmasters, the most cruel of all oppressors. It is a millstone about the neck. It is an incubus on the heart. It spreads a cloud over the firmament of man's being. It eclipses the sun, it blots out the stars, it dims and defaces the beautiful sky. It breaks up the harmony of nature, and turns to dissonance all the voices of its melody. It furrows the forehead with premature wrinkles; it plucks the eye of its light; it drags all nobleness and kindness out of the port and bearing of man. It takes the soul out of his laugh, and all stateliness and freedom from his walk. Come not under its accursed dominion.

About Loafers.

The loafer bears the same relation to the genuine man that the shadow does to the substance, and thus there are loafers of all grades and hovering about the borders of all avocations. There is the Celtic loafer at the sunny street corner, loitering stolidly at his own expense, or that of Biddy, but quite willing to loiter at the expense of anybody else who shall be so misguided as to hire him. There is the military loafer, who remains in camp till there is some prospect of active service, and then suddenly falls ill, or discovers that he is too young, or too old, or otherwise unfit for military duty. There is the loafer of the rural district, who likes to drive team and trade cattle, and go to mill, and is sure to be present at all the town-meetings and auction sales, bidding for goods which he cannot buy, and voting heavy taxes on property which he never owns. Then there are loafers in the dry goods line, on each side of the counter, with no positive wish either to buy or sell, but with a patient waiting for lunch and dinner time.

Moral Light in the Family.

Show us a family of intelligent boys and girls, and we will show you a family where newspapers and periodicals are plenty. Nobody who has been without these private tutors can know their educating powers for good or evil. Have you ever thought of the innumerable topics of discussion which they suggest at the breakfast table; the important public measures with which, thus early, our children become acquainted; great philanthropic questions of the day, to which unconsciously their attention is awakened, and the general spirit of intelligence which is evoked by these quiet visitors? Anything that makes home pleasant, cheerful, and chatty, thins the haunts of vice, and the thousand and one avenues of temptation, should certainly be regarded, when we consider its influence on the minds of the young, as a great moral and social light.—*Emerson.*

"When a stranger meets me with want of respect," said a poor philosopher, "I comfort myself with the reflection that it is not myself which he slights, but my old shabby coat and hat, which, to say the truth, have no particular claim for admiration. So, if my coat and hat choose to fret about it, let them; but it is nothing to me."

The Young Folks.

The Worsted Stocking.

A TRUE STORY.

"Father will have done the great chimney to-night, won't he, mother?" said little Tom Howard, as he stood waiting for his father's breakfast, which he carried to him at his work every morning.

"He said he hoped all the scaffolding would be down to-night," answered his mother, "and that'll be a fine sight; for I never like the ending of those great chimneys—it's so risky—thy father's to be the last up."

"Eh, then, but I'll go and see him, and help 'em to give a shout afore he comes down," said Tom.

"And then," continued his mother, "if all goes right, we are to have a frolic to-morrow, and go into the country, and take our dinners, and spend all the day amongst the woods."

"Hurrah!" cried Tom, as he ran of to his father's place of work, with a can of milk in one hand, and some bread in the other—His mother stood at the door watching him as he went whistling down the street, and then she thought of the dear father he was going to, and the dangerous work he was engaged in, and then her heart sought its sure refuge, and she prayed to God to protect her treasures.

Tom, with light heart pursued his way to his father, and leaving him his breakfast, went to his own work, which was at some distance. In the evening, on his way home, he went round to see how his father was getting on. James Howard, the father, and a number of other workmen, had been building one of those lofty chimneys which in our great manufacturing towns almost supply the place of other architectural beauty. This chimney was one of the highest and most tapering that had ever been erected, and as Tom, shading his eyes from the slanting rays of the setting sun, looked up to the top in search of his father, his heart almost sunk within him. The scaffolding was almost all down; the men at the bottom were removing the last beams and poles. Tom's father stood alone on the top. He looked all around to see that everything was right, and then waiving his hat in the air, the men below answered him with a long, loud, hearty cheer, little Tom shouting as heartily as any of them. As their voices died away, however, they heard a very different sound—a cry of alarm and horror from above! "The rope! the rope!" The men looked round, and coiled upon the ground lay the rope, which, before the scaffolding was removed, should have been fastened to the top of the chimney, for Tom's father to come down by! The scaffolding had been taken down, without their remembering to take the rope up. There was a dead silence. They all knew that it was impossible to throw the rope up high enough or skillfully enough to reach the top of the chimney; or if it could, it would hardly have been safe. They stood in silent dismay, unable to give any help, or think of any means of safety.

And Tom's father! He walked round and round the circle, the dizzy height seeming every moment to grow more fearful, and the solid earth further and further from him. In the sudden panic he lost his presence of mind, and his senses almost failed him. He shut his eyes. He felt as if the next moment he must be dashed to pieces on the ground below.

The day had passed as swiftly and pleasantly as usual with Tom's mother at home. She was always busily employed for her husband and children, in some way or other, and to-day she had been harder at work than usual, getting ready for the holiday tomorrow. She had just finished all her preparations, and her thoughts were silently thanking God for her happy home, and for all the blessings of life, when Tom ran in. His face was as white as ashes, and he could hardly get his words out.

"Mother! Mother! he cannot get down!"

"Who, lad, thy father?" asked his mother.

"They've forgotten to leave him the rope," answered Tom, still scarcely able to speak.

His mother started up, horror-struck, and stood for a moment as if paralyzed; then pressing her hands over her face, as if to shut out the terrible picture, and breathing a prayer to God for help, she rushed out of the house.

On reaching the place where her husband was at work, a crowd had collected around the foot of the chimney, and stood there quite helpless, gazing up with faces full of sorrow.

"He says he'll throw himself down," exclaimed they, as Mrs. Howard came up. "He's going to throw himself down."

"Thee munna do that, lad!" cried the wife, with a clear, hopeful voice; "thee munna do that. Wait a bit. Tak' off thy stocking, lad, and unravel it, and let down the thread with a bit of mortar. Dost hear that, Jem?"

The man made a sign of assent, for it seemed as he could not speak; and taking off his stocking, unravelled the worsted thread, row after row. The people stood round in breathless silence and suspense, wondering what Tom's mother could be thinking of, and why she sent him in such haste for the carpenter's ball of twine.

"Let down one end with a bit of mortar, and keep fast hold of the other," cried she to her husband. The little thread came waving down the tall chimney, blown hither and thither by the wind; but at last it reached the outstretched hands that were waiting for it. Tom held the ball of string while his mother tied one end of it to the worsted thread. "Now, pull it up slowly," cried she to her husband, and she gradually unwound the string as the worsted drew it gently up. It stopped — the string had reached her husband.

"Now, hold the string fast, and pull it gently up," cried she, and the twine grew heavy and hard to pull, for Tom and his mother had fastened the thick rope to it.

They watched it gradually and slowly uncoiling from the ground, as the string was drawn higher. There was but one coil left. It had reached the top.

"Thank God! thank God!" exclaimed the wife. She hid her face in her hands in silent prayer, and trembling, rejoiced. The rope was up. The iron to which it should be fastened was there all right; but would her husband be able to make use of them? Would not the terror of the past hour have so unnerved him as to prevent him from taking the necessary measures for his safety? She did not know the strength that her voice, so strong and steadfast, had filled him with — as if the little thread had carried him the hope of life once more; had conveyed to him some portion of that faith in God which nothing ever destroyed or shook in her true heart. She did not know that, as he waited there, the words came over him, "Why art thou cast down, O my soul? and why art thou disquieted within me? Hope thou in me? Hope thou in God."

She lifted up her heart to God for hope and strength. She could do nothing more for her husband, and her heart turned to God and rested on Him as on a rock.

There was a great shout. "He's safe, mother, he's safe!" cried little Tom.

"Thou hast saved me, Mary," said her husband, holding her in his arms. "But what ails thee? Thou seem'st more sorry than glad."

But Mary could not speak, and if the strong arm of her husband had not held her up, she would have fallen to the ground — the sudden joy, after such great fear, had overcome her.

"Tom," said his father, "let thy mother lean on my shoulder and we will take her home."

And in their happy home they poured forth their thanks to God for His great goodness; and their happy life together felt dearer and holier for the peril it had been in, and for the nearness that the danger had brought them unto God. And the holiday next day, was it not indeed a thanksgiving day? —*English S. S. Magazine.*

Love for Parents.—Many years ago there was a dreadful eruption of Mount Ætna, which obliged the inhabitants of the surrounding country to run in every direction for safety.

Amid the hurry and confusion of this scene, every one carrying away what he thought most precious, two sons, in the midst of their anxiety for the preservation of their money and goods, recollected their father and mother, who being both very old, were not able to save themselves by flight.

"Where," said the generous youths, "shall we find more precious treasure than our parents?"

This said, one took his father on his shoulder, and the other took his mother, and so made their way through the surrounding smoke and flames.

They were rewarded by the respect and affection of their neighbors, by the thankfulness and the tears of their parents, and by their own subsequent prosperity and happiness.

Professor Amos Dean, of the Albany (N. Y.) Law School, died in that city, Sunday evening, Jan. 25th. He was born in Barnard, Vt., in 1803.

AGRICULTURAL.

Size of Farms.—Some interesting facts may be gathered from the report of the Agricultural Bureau, with reference to the comparative area of farm lands and waste lands in the different States of the Union. For example, the Southern States exhibit an area of nearly three hundred million acres of wild or waste lands, two hundred million acres of farm lands unimproved, and only about seventy million acres nominally improved, more than half of which is not in actual cultivation. The extreme West shows about the same ratio of improved and unimproved agricultural territory.

The greatest area of wild land is found in Texas, which has no less than one hundred and twenty-six million acres of this unprofitable territory.

The largest farms are found in California, where the average size of eighteen thousand farms is six hundred and sixty-six acres.

Massachusetts, with thirty-eight thousand farms, averages only ninety-four acres to a farm.

The largest number of farms is found in New York, which has 196,000, averaging one hundred and six acres, and the next largest in Ohio, which numbers 179,000, averaging one hundred and fourteen acres. Nevada, as yet, has only ninety-one farms, which average six hundred and seventeen acres.

The Industrial School continues to be a topic of newspaper discussion. The government of such an institution is a most difficult task. Extremes of character are to be found among the pupils — the timid and shrinking, who tremble at a harsh word, and the morose and brutal, on whom all "moral suasion" is wasted, and whose stolid perverseness will recognize nothing else than a vigorous blow. It is very easy to theorize about governing vicious lads by mild persuasions, but to practically and permanently reform them by gentle influences is quite a different affair. We believe that there are times when physical force, judiciously exerted, has a saving efficiency. We know nothing of the management of the Industrial School, but we doubt not that a wider separation of the more vicious from the well disposed would promote the well being of the institution. The able Committee of Investigation who have been appointed will no doubt enlighten the community in regard to the management of the School.

A correspondent from Yolo County says the condition of the people of that county is widely different from that of three years ago — the spring of 1865. Then the live stock which had survived the winter was of trifling value, there was no surplus of grain, hay, or any kind of produce, and no money. Now, cattle and horses are in good condition, and have a satisfactory value, land has doubled in price, and most of the farmers are not without cash.

A table has been published by order of the Assembly, containing an estimate of the population, exclusive of Chinese and Indians, of each county in the State. San Francisco is reckoned at 125,000; Santa Clara, 30,000; Sonoma, 25,280; Sacramento, 23,000; Solano, 15,850; Alameda, 15,430. Total white population of the State, 493,972. This is probably about 25,000 above the actual population.

The Albany (Oregon) *Democrat* says the severe winter weather of the first three weeks of February caused great loss to the large raisers of sheep in that section. One owner at Brownsville lost one thousand head of sheep, and another, living near Sand Ridge, lost five hundred and fifty. They appeared well till the crust formed on the snow; this prevented them from digging down to the grass.

The Legislature seems disposed to pass a law creating a State Insurance Commissioner, and establishing regulations for the protection of the public against unsafe institutions. The Senate refused to concur with the Assembly providing for the publication of public documents in Spanish. An appropriation for the building of the Deaf, Dumb, and Blind Asylum at Oakland passed the Assembly.

In accordance with a resolve of the Assembly, at the first of the session, a table has been prepared showing the indebtedness of each county and city in California. The aggregate of county debts is $9,757,538. City and town debts amount to $507,556. The total State debt is $5,126,500. California is not so badly involved as a majority of the old States.

The Address of the "Mechanics' State Council of California" to the working men of the Atlantic States, advising great caution before coming to this State, is having a wide circulation in the Eastern papers. Some of the suggestions are undeniably judicious, but it underrates, and therefore misrepresents, the condition of our working mechanics.

Both lines of steamers for the East continue to have fair quotas of passengers, while those arriving are full, but not crowded. The fare for first cabin ranges from $50 to $80; second cabin, $40 to $60; steerage, $30 to $40. Many who have not visited "the old home" since coming to this coast, will do so the present season.

Gov. Haight last week returned to the Senate the Resolutions which were passed by that body on the subject of impeachment. He states to them clearly and forcibly the reasons why he could not misrepresent the sentiment of California in regard to impeachment by sending the resolutions officially to Washington.

A citizen of Santa Barbara tells us that the gigantic grape vine, which nearly half a century ago was planted three miles east of that town, now shades in summer 12,000 feet of ground, and last year bore five and a half tons of grapes. The trunk is over a foot in diameter.

The Yreka *Union* says that many thousand bushels of apples and potatoes have been lost the past winter, by being frozen, in Northern California. The winters are usually very mild, and few make any preparation against severe weather.

British Columbia contains about 280,000 square miles, or 179,200,000 acres, of which, up to October, 1866, only about 60,000 acres were settled by white men. The colony is more than three times the size of the United Kingdom.

The real estate sales in this city for February amount to $2,669,875. The mortgages given in the same time amount to $892,012, and the released to $607,320.

The enterprising citizens of Oakland are about to erect a public library building costing $20,000, a lot costing $3,500 having been donated for the purpose.

Healdsburg, one of the thrifty, as well as beautifully located towns of this coast, applies to the Legislature for an act of incorporation, and will get it.

Large land sales are now an every-day affair in this city and the adjacent districts. The prices are what old fogies would call "enormous."

The Grass Valley *National* says: "We have never known a more general complaint of dull times, not only in Grass Valley, but in all the mining section of the State, than at the present time."

The Nanaimo Coal Company has bought some ships, and says it will sell coal next summer to us cheaper than anybody else.

The present winter is pronounced by the Portland *Oregonian* to be the coldest known for —— well — ever so long.

The good people of Victoria are massing forces, and rubbing their muskets for fear of a Fenian raid. No danger.

TELEGRAPHIC SUMMARY.

Eastern.—On Thursday of last week the U. S. Senate organized itself into a Court of Impeachment. Chief Justice Chase presided and administered the oath to the Senators. The President is to be summoned to appear before the Senate on the 13th (yesterday). The time will probably be extended....George R. Vickers was elected U. S. Senator from Maryland and has taken his seat....Gen. Hancock has tendered his resignation on account of disagreement with Grant....Jefferson Davis is at New Orleans....Thaddeus Stevens is rapidly failing in strength....Jeremiah Black, Attorney-General Stanberry, and Benjamin R. Curtis will appear as counsel for the President....Judge Underwood has released the bondsmen of Jeff. Davis from further liability....The election in New Hampshire stands thus: Republican vote, 34,804; Democratic vote, 31,756. Full returns will give 3,000 Republican majority....A Washington despatch says, on authority of Mr. Seward, that the Alabama claims will be amicably settled....*On dit*, that Secretary Seward has bought part of the island of Borneo. This may be meant as a joke, but the Secretary is "huge" in the matter of buying foreign territory....President Johnson sent word to one of the Radical Senators that it would be fitting to try Jeff Davis first before arraigning him....There is another fuss about counterfeit U. S. Bonds, in which Gen. Logan and Gen. Spinner are mixed up.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, March 11, 1868.

Flour—Best brands of Oregon Extra are selling at $7 50 @7 75 for small lots. At the close, 850 bbls Oregon Extra, in qr sks, private.

We quote city brands:

Superfine, hf sks, ₱ 196 lbs	$7 00@7 25
qr sks	7 25@7 50
Extra, hf sks	7 75@8 00
qr sks	8 00@8 25

Wheat—200 sks inferior, $2 57½; 1,200 sks ordinary Coast, $2 50; 1,000 sks fair milling, to arrive, $2 65. We quote fair to extra choice at $2 60@2 75. At the close, 2,000 sks good shipping, $2 62½; 2,000 sks Santa Clara, $2 70 ₱ 100 lbs.

Barley—Sales of 2,000 choice feed, $2 05; 2,000 sks do, $2 05, buyer 30. We quote the range of the market at $2@ $2 07½ ₱ 100 lbs.

Oats—200 sks very choice, $2 32½; the general range is $2 05@2 25 ₱ 100 lbs.

Potatoes—1,000 sks Humboldt, from wharf, $1 35@1 40; 200 sks Bodega, $1 37½. Good to choice descriptions of the various kinds are jobbing from store at $1 35@1 60 ₱ 100 lbs as extremes.

Bran—The mill price is steady at $30 ₱ ton.

Corn—We quote Yellow at $2 25@2 37½, the latter an outside figure for choice; Red, $2 20 ₱ 100 lbs.

Onions—Oregon descriptions jobbing at 7c ₱ lb.

Beans—White descriptions are scarce and high, while colored are plentiful and dull. We give the wholesale prices as follows, with the remark that the outside figures refer to choice in clean bags: Bayo, 3¾@4c; Butter, 4@4½c; Pea, 4¾@6c; small White, 4½@5c; Pink, 2½@2¾c; Red, 2⅞@2½c ₱ lb.

Rye—Still nominal at $1 75@2 ₱ 100 lbs.

Middlings—Fine, $50; feed descriptions $40@35 ₱ ton.

Oil Cake Meal—Steady at $30 ₱ ton from the mill.

Hay—No change in quotations, the range being $18@24 ₱ ton for fair to choice.

Buckwheat—Sold a few days ago at $1 75; quotable at $1 75@2 ₱ 100 lbs.

Dairy Products—Choice fresh roll Butter can now be had at 35c; other descriptions, 27½@32½c; choice California firkin, 35@27½c, chiefly at the inside figure. Cheese is temporarily scarce at 17@19c for California, the medium quotation being 18c; last sales of Eastern were at 22@22½c ₱ lb. The supply of Eggs is unusually abundant, selling at 22½@ 25c ₱ doz.

Poultry—Live Turkeys are quoted at 17@19c; dressed do, 20@21c ₱ lb. Hens, $7@7 50; Roosters, $6 50@$7; Ducks, $6@7 ₱ doz; Geese, $2 50@$3 ₱ pair.

Provisions—Cured meats are in fair demand at a further slight improvement in quotations. California-smoked Bacon commands. 16½@17c; Oregon do, 14@15c; California Hams, 16@17c; no Oregon offering; California Lard, 15@15½c; Eastern, 13½@14½c ₱ lb.

Wool—Stock in first hands about 125,000 lbs; no transactions; last sales spring clip, 16@17c ₱ lb for clean grades.

Hides—Receipts continue light. Sales since last Wednesday aggregate 400 California dry, 14@14½c ₱ lb for usual selection.

Tallow—Demand moderate and prices steady at 7¼@7½c ₱ lb for fair to choice Beef and Mutton.

San Francisco Cattle Market.

As intimated last week, prices are again easier to the buyer. Beef ranges from 7 to 13c as extremes, though there is but little selling above 12½c. Veal has also declined about 2c; occasionally extra choice commands 12½c. Spring Lambs are coming in more freely.

We quote slaughterers' prices as follows:

Beef—American, 1st quality,	11@13c ₱ lb.
do 2d do	8@11c ₱ lb.
Veal—Medium to good,	8@10c ₱ lb.
Mutton—In fair demand,	8@10c ₱ lb.
Lamb—Supply fair at	10@11c ₱ lb.
Pork—Undressed, 6@6½c; dressed,	10½@12c ₱ lb.

CURRENT TOPICS.

Rev. S. H. Tyng, Jr., has been found guilty of ving violated the rules of the Church by the Ec- esiastical Council before which he was tried, and as to receive a public reprimand on last Sabbath. his is only what was anticipated by all who are ware of the facts, and is probably entirely satisfac- ry to Mr. Tyng and to the Low Church party of hich he is a representative. The end is not yet. deed, this is but the beginning, and the chief fear those who have desired to have the constitution- ty of the Low Church sentiments tested by the ghest authorities, was that the other party would t submit to such an issue. Holding, as they do, at they are the followers of the fathers, and that e High Church views they oppose are an innova- n, they are anxious for an opportunity to prove is. They have provoked censure; they have urted formal trial; they rejoice now that they can peal from a decision which these views make ne- ssary; and the result of the discussion and of ju- ial action, and division of feeling among Episco- lians, will be greatly in favor of the evangelical rty. For such a result all real Christians may be ankful, while they are sad because of the bitter irit that is already manifested by the dominant rt of the Church. These are hardly the days en a censure passed upon a Christian minister cause he is willing to believe that another minis- may have a commission from the Lord, though be received through different hands from those hich bestowed his own, will be very popular with mass of those who love the Master more than y love the Church. The dogma that the assump- n that one is in covenant with God gives him a ht to turn others over to God's "uncovenanted rcies," who believe that he errs, is not likely to received with much enthusiasm when seen in its ual fruits. The Episcopal Church has never been seriously threatened by its opponents as it is by public reprimand inflicted upon one of its cler- men last Sabbath; and those who look on find it ficult to comprehend the folly that has such an hibition.

The representatives of the American Missionary sociation seem to have awakened great interest the Freedmen by their visit to Scotland. Sev- eral of the most prominent clergymen and laymen, among them Dr. Guthrie, made addresses at a large meeting in Edinburg, and they were very emphatic, not only in their expressions of sympathy for the Freedmen, but also of kind feeling towards our country. Dr. Guthrie said: "Let us deal with America fairly and kindly, and without suspicion, and I believe it will be found that America is mor- ally, as it is physically and materially, great. By such gifts you will do more than Lord Stanley can do by his protocols and dispatches, and all other political manœuvres, to bind together the countries that, acting in unison, could fight God's battles for liberty and light against a whole world in arms. I know no nobler, if any such noble, object that the press, the platforms, the pulpits, and I will add, the prayers of this country, can aim at than to bind us and these States in indissoluble bonds together." The influence of meetings like this and the one held about the same time in London, which we noticed last week, has been felt in the high places of Gov- ernment — will be felt in many ways on both sides of the Atlantic — and such means are among the most effective in weaving those "bonds" which mul- titudes desire may become stronger and stronger.

The advance in the price of cotton in England has greatly encouraged and stimulated the planters of the South. They had found it impossihle to raise it at any profit, and were turning attention to other crops, or were gloomily disposed to raise nothing. Many of the owners of large estates may find it difficult now to obtain help sufficient to put in such fields of cotton as they once cultivated. But the small farmers, men who do their own work, for the most part, and have divided up the immense plantations of former days, will at once take advantage of the stimulus and produce an aggregate crop that will bring a vast revenue to the country, and great relief to themselves. Nothing could have been more op- portune than this stimulus just at this time. It will allay irritation; it will help to bring prosperity to States that have known only a series of disasters for years; and it will have influence in removing evils that are formidable and seemed likely to in- crease.

It is refreshing to notice the positive terms with which the respectable press of the East denounces the indecent pictorial and other papers that have lately outraged the public taste and insulted the pub- lic morals. Step by step these publications have made advance in the way of infamy, gathering from the lower classes of society the patronage that was withdrawn by those who would not tolerate them, until they have become shameless. Superintendents of thoroughfares forbade their sale upon their boats and cars; proprietors of hotels banished them from the news-stands in their recesses, and the leading journals exclaimed against the swarming locusts that were destroying the refinement and delicacy of the young, as though moved by a common impulse. It is to be hoped that loss of support thus occasioned may effect what remonstrance and appeal have failed to do, and a change may be wrought to the extent that decency, at least, may be found to be essential to permanent favor with the people.

Nothing is more worthy of a Christian people than wise provision for the comfort of the poor and dependent. We are rejoiced that the citizens of San Francisco, moved by the interest of several benevo- lent ladies, are about to establish in the city a hospi- tal for the relief of sick women and children who have not the means to provide for themselves. There appears to be some difference of opinion respecting the manner in which such an institution should be managed, and some feeling in reference to individu- als whose names have been connected with the move- ment, but the hospital will be furnished — perhaps more than one — and many a poor sufferer will bless God for its ministry of good. Another organization, scarcely less worthy in its object, is also contem- plated, by which working women may be supplied with employment and guaranteed a reasonable price for their labor. The facts are most sad which make known the pittance which hard work often brings to the support of the widows and their little ones in a great city, and this, not because it does not earn more, but because advantage is taken of the necessi- ties of those who must take what they can get. The union of a few warm-hearted and judicious ladies for the aid of their sisters in this direction may greatly add to the comfort of many a little group.

We have been much interested in reading the inaugural addresses of two professors in the new Lincoln University. This interest has arisen not merely from the sentiments expressed, and the able manner in which they are arranged, but also, and quite as much, because of the fact that there is such a University, and that men of acknowledged stand- ing and ability are willing to be connected with it. The institution is especially for the instruction of colored men, and it is so far endowed, and its course of study is so liberal, and its Faculty is composed of such accomplished scholars that no doubt remains of its permanence and success. The time is not long past when the existence of such a University would have been predicted only by those whom most persons would have called visionary, or fanatical. Now it is accepted as a thing of course, and none appear to be sorry or alarmed.

The treatment of sailors when in port is exciting more than usual interest, both among philanthropists and law-makers. The outrages practiced by many who keep sailors' boarding-houses have reacted upon the men who perpetrated them, and it is possible some measure of justice may be done those who have so often and so sadly suffered at their hands. In this State a Marine Board is proposed, that may have control of this whole matter, and there is ground for hope that either by this agency or some other, the evils of which there is such just complaint may be removed.

Religious Intelligence.

PACIFIC COAST.

Presbyterian Union Convention.

This Convention, having adjourned on the 4th inst., reassembled on Sunday evening at the Howard Church on Mission Street. There was a full house. Hon. H. P. Coon, the Chairman of the Convention, called the house to order. The platform was occupied by the clergymen and elders present. Prayer was offered by Rev. Mr. McMonagle, and several appropriate pieces were sung by the choir. The proceedings of the previous Convention were read by Rev. Charles Russell Clarke.

The preamble and resolutions offered at the previous meeting were now taken up for consideration. They are as follows:

Believing that the direction of the great Head of the Church may be traced in the whole movement towards the organic union of all Presbyterian bodies in this country, and rejoicing in the spirit which has been specially prevalent since the memorable National Convention held in Philadelphia, we gladly accept these as indications that we may soon witness the consummation, which we pray may not be delayed. We feel that union on the basis proposed by the National Convention would be followed by the blessing of God in every part of our land, but it would greatly strengthen our churches on the Pacific coast and accomplish for us what, from the beginning, we have earnestly desired. Therefore,

Resolved, That we cordially adopt the basis of union proposed by the late Convention in Philadelphia.

Judge Coon addressed the Convention, giving a history of the origin and progress of the union movement of the past year. Both the Old and New School leaders had at first no confidence in its success. The Philadelphia *Presbyterian*, a leading Old School organ, had in its columns a long standing list of Presbyteries whose action was adverse, and a brief list of those favorable. When the Convention met at Philadelphia, many attended to oppose the object for which it had been called. But on assembling a profound, mysterious influence pervaded the whole assembly, before which prejudices of long standing, tenacity of purpose, and obstinacy of opinion, melted away like snow. Rev. Dr. Hodge, that stern, pugnacious old logician, was transformed into a loving school boy, and led the van in enthusiastic support of Presbyterian unity. Subsequent conventions have all been pervaded by a kindred spirit. At Rochester, two veteran clergymen, who for twenty-five years had ignored each other from their adjacent pulpits, agreed on the spot to exchange. The New School authorities had declared that they had assented to the Confession of Faith as it is, and the Princeton *Review* says that nothing more can be required by the Old School brethren. The Church press speaks with a united voice. The movement is elemental and fundamental — let it be consummated.

Rev. Dr. Scudder said that we have met to ratify the doings of the Philadelphia Convention. Let us look at them in detail. That body convened under auspicious circumstances. It met in the city of "brotherly love;" in it Presbyterians of all sorts, sizes, and shades were represented — leaving at home their personal grievances and petty strifes. The Spirit of God brooded not over a chaotic, confused mass, but a harmonious body of Christian brethren. Rev. Dr. Hodge, exploring among the dusky archives of Princeton, had hunted up the old bugle of discord, but when he reached Philadelphia, he found the key-note changed. It had become a trumpet of no uncertain sound, summoning the Presbyterian hosts to a harmonious union. In its presiding officer the Convention was fortunate. The face of George H. Stuart was a living sermon — a homily in behalf of charity and Christian sympathy. Its entire proceedings were worthy of emulation. Let us here, on the far-off Pacific shores, where strength is so much needed, kindle the beacon-lights from hill to hill, as our fathers were wont to do in Scotland. At this late day, who does not feel that there is carnality in division — a divine spirituality in unity? Let us combine every element of strength and influence that we may hasten the coming of that glad day when the song of the Christian laborer shall be heard proclaiming a full and glorious harvest.

Rev. C. C. Wallace, of Placerville, said that he regarded the recent harmonious movements of the several branches of the Presbyterian Church in the Atlantic States as exceedingly significant and important. Fraternal strife had been allayed, old passions subdued, former prejudices forgotten. It seemed as if the spirit of the day of Transfiguration had returned, and the followers of Christ were inspired with a deeper feeling of responsibility. There was need of an awakening. Protestantism is surrounded by hosts of foes — Popery as of old, Infidelity in new and specious drapery, crime under new phases and aspects, and corruption in the high places of the earth. Isolated as he had been in his labors among the mountains, probably he had been led to feel the need of harmonious, united effort more than his brethren on the coast. Practically, he knew no difference between the Old and New School organizations. With the latter he had been united in New York; with the former in New Jersey. He trusted that in both form and spirit they were henceforth to be one.

Rev. Dr. Eells read from a letter received from Rev. James S. Wylie, of San Jose, who, unable to be present, heartily endorsed the purpose of the Convention. Dr. Eells said there was a remarkable peculiarity in all these preliminary gatherings. Old men had conducted the movement — men like Drs. Spring, Hodge, Fisher, and Hall had taken the initial steps — the young men had stood back. It was fitting that men of gray hairs should now lead this movement. One of them had truly said: "We who participated in the division must hasten the work if we would see the union consummated." The object of church organization is not to build a treasury-house of creeds — a depot of ritualistic forms — but to establish an agency to send the Gospel to every creature — to evangelize and redeem a fallen world. Were the proposed uniting of the several branches of our Church to be a mere mechanical coming together, a milk-and-water adhesion, he should oppose it. What we desire is a living union. God forbid the mockery of an artificial one. Presbyterianism has a great work before it. With seven thousand ministers, and more than seven thousand churches, what can not such a Christian organization achieve in the future?

Hon. George Barstow said that in the great reforms of the past a master-spirit had arisen to lead the movement — a giant mind adapted to the crisis, who could inspire the multitude to follow in his footsteps. Such were Luther, Calvin, Fenelon. But the movement of Christian unity now in progress has its origin with the masses, and the leaders only followed, sometimes with lagging steps. Often denominational relations were dependent on outward circumstances, association or personal friendship. Between the leading evangelical denominations there were to-day no essential points of difference. Mr. B. cited the recent conventions of associated Christian denominations in Boston, Baltimore, Chicago, and other Atlantic cities as evidence of a growing spirit of evangelical harmony, co-operation and unity. It was by these combined influences that the citadels of wrong and crime were to be successfully assailed. In God's own time they will be overcome, not by the aid of Presbyterians alone, but all truly Christian denominations.

The resolution was again read and adopted without a dissenting vote. After singing, and the benediction by Rev. Mr. Buel, the audience retired. But for the lateness of the hour, several other speakers would have been called upon to address the Convention.

—

Presbyterial Notice.—The Presbytery of San Jose will meet in the Presbyterian Church in Oakland on Tuesday, April 7th, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James S. Wylie, Moderator. Narratives of the state of religion and statistics of the churches will be given.

George Pierson, Stated Clerk.

—

The Presbytery of Sierra Nevada have appointed the Rev. C. C. Wallace minister, and E. B. Conklin, elder, as Commissioners to the next General Assembly.

—

Rev. Wilber McKaig, D.D., was installed pastor of the First Presbyterian Church at Marysville on Wednesday, the 11th inst. The exercises were as follows: Invocation by Rev. S. P. Webber, Santa Clara; Prayer, Rev. W. W. Macomber; Sermon, Rev. C. C. Wallace; Charge to the Pastor, Rev. S. S. Harmon of Oakland; Charge to the People, Rev. W. W. Macomber; Prayer, by Rev. J. R. Hammond of Placerville.

The Young Men's Christian Association.—At the monthly meeting of this Association on Monday evening last, a statement was made by the Chairman of the Building Committee, which showed that a loan had been effected, work had been resumed, contracts for building were signed, and at no distant day the corner-stone would be laid with appropriate ceremonies. A Committee of Arrangements was appointed for that object. It is expected that the new building will be ready for occupancy by the first of August next. God speed the noble enterprise.

Lectures on Biblical Manuscripts.—The first lecture of the course will be delivered at Calvary Church, on Thursday evening, 26th inst., commencing at 7½ o'clock. Tickets for the course, admitting a gentleman and lady, one dollar. For sale at the book-stores and at the door. Subjects of the lecture: The Fact of Inspiration; History and Appearance of some of the more important Hebrew Manuscripts; Proof, through them, of the integrity and incorruptedness of the present text of the Bible.

Rev. J. R. Hammond, of Solano, has accepted an invitation to supply the Presbyterian church of Placerville for six months. Rev. C. C. Wallace, the previous pastor, left for New York on the steamer of Thursday. He has been a faithful pastor on this coast, and leaves many friends where he has labored.

Rev. W. W. Macomber, a talented and successful young clergyman, and late pastor of the First Presbyterian Church at Marysville, left on Thursday's steamer for the East. He takes the trip for the recovery of his health.

"Monumental Pride.—Under this caption, a correspondent of the *California Christian Advocate*, in severe but just language, condemns the growing custom of erecting costly and imposing churches in which showy ornaments are the leading consideration. The "Metropolitan Memorial Church," now being erected at Washington, D. C., is cited as an illustration, in which "pews are to be built and set apart for the President and his Cabinet, the Judges of our courts, the Generals of our army, and other *distinguished persons;* seats for different *States* and prominent *cities.*" The writer adds:

"We have read nothing in the history of American Methodism so mortifying and painful as this advertisement to the world of our folly; nothing that so completely exposes us to the shafts of ridicule, or betrays a sinful aping of worldly greatness. Truly, it would seem that churches, no more than individuals, can bear prosperity. Rome has fallen by the weight of her own grandeur. The Established Church of England is divided and diminished by adopting her mummeries; and the Wesleyans have waned, and lost their strong hold upon the public mind of Great Britain by their concessions to the Establishment; and her American daughter, though she knows all this, with her mistake before her, is adopting the same policy, and must eventually share the same fate."

EASTERN.

Rev. Newman Hall says of American preachers that he is of opinion that their sermons are too precise, too elaborate, too argumentative, too essay-like, too much like books, too little like earnest talk, and too often read with strict adherence to the prepared manuscript, and thus, if reported *verbatim*, they would be read as finished treatises, but, as heard, frequently unimpressive, and consequently, it may be believed, in many instances, unfruitful in any marked good results.

Rev. Dr. Caswell has been elected with great unanimity to the office of President of Brown University, left vacant by the death of President Wayland. Dr. Caswell was professor of natural philosophy in that institution from 1828 till his retirement in 1864, and is regarded with the highest affection and respect by all his pupils, who now constitute the great majority of the graduates.

Prof. John De Witt, D.D., of the Theological Seminary of the Reformed Church, is engaged in the preparation of a Hebrew Lexicon, founded on the latest and best philological authorities. It is designed to be not larger than the small pocket lexicon of Fuerst and Leopold, published some years ago in Germany.

The venerable and excellent Bishop McIlvaine, of Ohio, is announced as the successor of the late Bishop Hopkins, of Vermont, as the Presiding Bishop of the Protestant Episcopal churches in this country. The office is always filled by only the oldest Bishop in the Episcopal church in this country.

Presbyterian.—Revival intelligence reaches us from sixty-two Presbyterian churches. In fifty of these the number of converts is one thousand three hundred and thirty-five, more than one-half of whom —eight hundred and sixty-one—are now members of the church.

A revival is in progress among the congregation of the Puritan Congregational church, Brooklyn, of which Rev. Charles Hall Everest is pastor. Between thirty and forty conversions have taken place, and the majority of the new converts are heads of families.

Rev. Henrick Johnson, D.D., will enter upon the duties of the pastorate of the First Church in Philadelphia in May, and Rev. Dr. Humphrey, of Chicago, will about the first of April, occupy the important pulpit of Calvary Church.

Rev. Edward H. Camp was ordained and installed as pastor of the Second Presbyterian church, Lexington, Ky., on Sabbath morning, January 26th. Rev. Stephen Yerkes, D.D., of Danville Theological Seminary, preached the sermon.

Bishop Coxe, of Western New York, has issued an earnest pastoral address to women, remonstrating against the tawdry fashions, the costly vulgarity, and the wicked extravagance of the times. He intreats women to begin a reformation.

Father Taylor, the well-known and faithful preacher among the sea-faring men of Boston, has formally resigned his position as Pastor of the Seaman's Bethel, and his assistant, Mr. Noyes, is to be his successor.

Mr. Edward Judson, youngest son of the late Adoniram Judson, D.D., has accepted the Professorship of the Latin and Modern Languages in Madison University. Mr. Judson is a graduate of Brown University.

The Episcopal Church of the United States, numbers 34 dioceses, 44 bishops, 2,416 priests and deacons, 2,303 parishes, 161,234 members, 151,819 Sunday school scholars; contributions over $3,000,000.

At the meeting of Utica Presbytery, N. S., Rev. Dr. Brown, President of Hamilton College, was received as a member from the White River Association of New Hampshire and Vermont.

Rev. W. Jackson, late of Chicago, has been called to take the pastoral charge of the Fourth U. P. Church, (late Rev. D. M. Gordon's) in Pittsburg, Va. He has accepted the same.

New York City.—The close of the seventh year of Dr. Booth's pastorate the Sabbath before last, was signalized by an accession of a score of members to the Mercer St. Church.

Mr. C. H. S. Williams, of Poughkeepsie, N. Y., was ordained as pastor of the Congregational church, Concord, January 15th. Sermon by Rev. J. L. Corning, of Poughkeepsie.

The venerable Dr. King, who has spent a considerable portion of his life in Greece, but who has been in this country for some time past, has lately returned again to Athens.

Rev. Edward Taylor, formerly of Brooklyn, N. Y., and recently returned from the East, has just been happily settled over the Congregational church of Binghamton.

The Center church, Hartford, have engaged Rev. Mr. Thompson, son of Prof. Thompson, of the Theological Seminary, as Assistant to Mr. Gould, pastor.

Rev. Dr. Kirk, of Boston, is now delivering his course of lectures on revivals before the senior class at Andover. There are about twelve lectures in all.

The Rev. David R. Frazer was duly installed as the pastor of the First Presbyterian church of the city of Hudson, on Wednesday evening, Feb. 5th.

Rev. John Tatlock, lately Professor in Williams College, has been admitted to the bar, and commenced the practice of law in Williamstown.

A call was presented from the First Church, Monmouth, addressed to R. B. Ewing, of Xenia, Ohio, which was forwarded to his Presbytery.

The Presbyterian church of Lancaster, O., has given a unanimous call to Mr. S. H. Snodgrass, of the Alleghany Theological Seminary.

Rev. A. H. Sloat was installed pastor of the church at Cranford, N. J., Rev. Dr. Wilson, of Newark, preaching the sermon.

Rev. Dr. Riddle, formerly of Jersey City, has accepted a call to the Presbyterian church of Martinsburg, Va.

FOREIGN.

Japan.—The way is opening here for the spread of Christianity, though serious difficulties must be met and overcome Dr. Hepburn, Presbyterian Missionary, has compiled a Japanese dictionary, and is now engaged in translating the Scriptures into that language. He proposes to do for Japan what Dr. Morrison did for China. The Jesuits are active here, and are aided by the French Government in their work. The Protestant mission here should be largely reinforced, and that at once.

City College.

CITY DEPARTMENT OF UNIVERSITY COLLEGE,

Corner of Stockton and Geary Streets,

SAN FRANCISCO.

TRUSTEES:

T. H. SELBY, ESQ., President of the Board.

Gov. H. H. Haight, Rev. C. Wadsworth, D.D., Rev. Jas. Eells, D.D., Rev. H. M. Scudder, D.D., Rev. Thomas Frazer, A.M., Rev. F. Buell, A.M., Jas. B. Roberts, Esq., A. Campbell, Esq., A. J. Ralston, Esq., Hon. H. P. Coon, M.D., H. H. Bancroft, Esq., J. D. Thornton, Esq., F. Henderson, Esq., R. B. Woodward, Esq., H. M. Newhall, Esq., N. G. Kittle, Esq., Erwin Davis, Esq.,

The Departments of Instruction are as follows, viz:

CHEMICAL LABORATORY AND SCHOOL OF PRACTICAL CHEMISTRY AND ASSAYING.

Thomas Price, M.D., Professor of Chemistry; assisted by W. B. Johnston and A. C. Gunter, in the Laboratory.

COLLEGE.

Rev. P. V. Veeder, A.M., Acting President, and Professor of Mental and Moral Philosophy.
Rev. Thomas Kirkland, A.M., Professor of Ancient Languages.
T. A. Robinson, Professor of Mathematics.
G. C. Arnold, Ph.D., Professor of Physics and Modern Languages.
A. Conlon, Professor of French and Drawing.

THE COLLEGE SCHOOL.

SENIOR ENGLISH AND CLASSICAL DEPARTMENT.

Rev. Thomas Kirkland, A.M., Master, with three Assistants.

JUNIOR ENGLISH AND CLASSICAL DEPARTMENT.

L. W. Reed, Master, with three Assistants.

PRIMARY DEPARTMENT.

Miss M. G. Clark and Miss. L. Wells.

☞ Book-keeping carefully taught in the Junior and Senior Departments.

☞ Instruction in French, Spanish, German, and Drawing, given in all departments of the School.

The Chemical Laboratory, on Stockton Street, has been fitted up with costly furnaces and the best appliances for the practical study of Chemistry, in all its branches. Courses of Lectures on Chemistry, Metallurgy, and Mining are given by Prof. Price, during the first four months of the year. The Institution is provided with ample Buildings, valuable Philosophical and Chemical Apparatus, spacious Play-grounds, and an open-air Gymnasium.

For Terms and further particulars, address

THE CONVENTION.

There was hardly a necessity for a meeting of Presbyterians in California that they might compare views on the subject of union, and endeavor to frame a basis on which all could stand together. There is general agreement, and all we desire is, that the barriers may be removed by which we are separated, and we shall unite by natural affinity. Still, all who were present must feel that there was real advantage from such a Convention as was held in Dr. Scudder's church last Sabbath evening. The *expression* of love is often useful as well as beautiful, even when it is known that love exists though there be no expression. A child is better as well as happier, because of his mother's terms of endearment and warm kiss, notwithstanding he might assume that she loves him were these omitted. And a mother, a wife, any one, is made lighter in heart, stronger of purpose, more earnest in life, by the proofs of affection and respect that perhaps would not be really doubted were these proofs never exhibited.

It was inspiriting and delightful to listen to the words of those whom we knew to be in favor of the organic union of the several branches of our dear and noble church; and the fraternal feeling thus quickened and increased, the interest in our Zion thus displayed, the manifest presence of our Great Head, would have abundantly repaid all who were convened, had there been no other results of the meeting.

Indeed, the chief reason why Presbyterians here have been so harmonious in their sentiments, and purposes, and spirit, from the beginning, is, because they have been in the habit of conferring together, holding joint sessions of ecclesiastical bodies, and making common cause of whatever could be promoted more effectively by associated action. There has been no opportunity for jealously or rivalry. There has been no opportunity for misunderstanding or suspicion. We have known each other well. We have felt our hearts beat in unison, as by taking hands we have been drawn close together. We have been engaged in joint-work, and not been afraid that one might gain some advantage from it which the other would lose, for what was gained at all, was felt to be gain for the whole.

Hence, we are ready for the formal and organic union that shall only confirm what already exists among us. We shall hail it as a special blessing to ourselves, since it will relieve us of the necessity of recognizing in our machinery and work, the several bodies with which we are connected, and it will give us a moral position that would add largely to our influence and usefulness at once. Why should there be two Presbyteries, each including no more than four churches, extending geographically over the same limits, and suffering in every way from weakness and impossibility of co-operation, when they might be united and immediately acquire three or four times the power for good which either had alone? This is a serious evil which none can appreciate till they have been in a new country, and known the affliction of being removed fifty or a hundred miles from the nearest co-Presbyter; because the brother who might be a co-Presbyter, and who is stationed within hailing distance, is not called by exactly the same name with themselves. There is emphasis in the fact that the representatives of the Church from the West are so generally in favor of union; and while it can work no evil in the older portions of the country, it will increase the vigor and success of Presbyterians in the new States beyond compute.

It is pleasing to observe how the various Conventions that have been held since that memorable one in Philadelphia have had the same effect which has been apparent with us in California. It seems that the brethren only needed to meet together, that they might *flow together*. There has been little discussion of doctrines, to ascertain whether all could agree. Little has been said about questions that once were occasions of strife. Hardly an allusion has been made to the old issues, but by common consent it has been assumed that Presbyterians *can be one;* and prayer, and thanksgiving, and congratulation, and expressions of fraternal regard, and plans for associated work have occupied the time, till all hearts were aglow, and those present found themselves fused, welded, one, before they were aware of the Divine influence which had been accomplishing the union. May it not be so in the General Assemblies that are to take action in form upon the questions involved? It would be a grand and glorious sight if the representatives of the whole Church, to meet in May at different places, were to be so "filled with the spirit" that nothing shall be in the way of complete organic union — little debate, little delay, but much love, and prayer, and eagerness for God's glory being manifest in them all. How soon would the consummation be effected! And as the telegraph should bear the action of each body to the others, would those unseen wires that connect heart with heart quiver with the glad news that should cause joy and rejoicing in all our borders. We, on the Pacific, hope and pray that this may be true.

THE UNIVERSITY BILL.

Private correspondence gives us more full accounts of the feeling in the Legislature respecting the University Bill than the telegraph has reported. There has been peculiar favor manifested by all classes of representatives towards the general proposition for a University; yet it was hardly to be hoped that any bill could be introduced the details of which would not find more or less opposition. It was especially gratifying therefore, to all those who have interested themselves in the matter, that no material changes were proposed after the bill had been thoroughly prepared in the Committee, and by unanimous vote and without debate it was passed in the Assembly, and sent to the Senate. There can be little doubt that the Senate will be equally enthusiastic in the passage of a law which we cannot but regard as one of the most important and wise and worthy of the State which the Legislature has power to enact. The College of California had offered to bestow a noble gift upon the State as a stimulus to such action, and the acceptance of this gift will be a pledge that a seasonable appropriation from the public treasury will be granted, so that the University may be actually in progress without much delay. We congratulate our citizens that they have the prospect of so broad and well established an institution for the education of their sons, and to aid in the development of our resources. We congratulate the members of the Legislature that it has been their privilege to lay the foundations of so powerful a bulwark of the future prosperity of the State. And we trust the unanimity with which it has been inaugurated, all political and party influences having been put aside — the worth to every interest of the measure itself being considered — will be an example to be followed while the University shall stand, in its management and control. Upon this high level of regard for the public good all our educational institutions should be placed by common consent, and the people should watch with jealous eyes lest any sectional, or factional, or selfish interests ever assume to dictate in respect to what ought to be sacred to the elevation and advantage of all classes of our population. If this shall be true of the University, no pen can represent its value as it shall be planted in the midst of the opening glories of the future that is to exceed even the most sanguine expectations of those who believe we should do all in our power to prepare for it.

"Mark Twain" and the Holy Land.

This writer has furnished letters descriptive of the Holy Land for several newspapers in the United States, and among them the *Alta* of this city. Many of those published in this latter paper have exhibited a diabolical pleasure in ridiculing the various sacred or holy places which he described. Not satisfied with this more than barbarian assault upon places and events so regarded by Moslem, Jew, and Christian, he seeks to destroy the character of distinguished travelers and writers who have described these places and events. He says of Dr. Prime and other noted travelers:

"I have read all the books on Palestine, nearly, that have been printed, and the authors all wept. When Mr. Prime was here, before he wrote his curious "Tent Life in the Holy Land," he wept, and his party all wept, and the dragoman wept, and so did the muleteers, and even a Latin priest, and a Jew that came straggling along. It would have been just as cheap to believe that the camels and the asses wept also, and fully as likely, and he might as well have added them to the water company likewise. Prime got such a start then that he never could shut himself off, and he went through Palestine and irrigated it from one end to the other. No man was ever so easily affected or so badly. Whenever he found a holy place that was well authenticated he cried; whenever he found one that was not well authenticated, he wept anyhow, and took the chances. Whenever he couldn't find any holy place at all, he just cried "for a flyer," as the worldly say. No man ever enjoyed a funeral as Prime did his sentimental journey through the Holy Land. How his horse ever kept his health, being exposed to these periodical showers all the time, is a wonder. I never will believe anybody again that says he cried over Jerusalem; the book-makers have created within me a bitter animosity against these boastful Jerusalem-weepers, and also a lack of faith in them. If ever a party were peculiarly liable to tears, under such circumstances, it is our pilgrims. They are the very boys to go into sentimental convulsions at the merest shadow of a provocation. Yet they wept not over Jerusalem.

"Just after noon we entered these narrow, crooked streets, by the ancient and the famed Damascus Gate, and now for several hours I have been trying to comprehed that I am actually in the illustrious old city where Solomon dwelt and Jesus was crucified, and have not succeeded. And never shall; I know that well enough."

Mr. Dixon, a recent traveler and brilliant writer, thus describes Jerusalem: "Taking it in mass, and in detail, yon group on the Temple hill the mosques of Omar and El Absa, the domes, the terraces, the colonnades, the kiosks and fountains, it is perhaps the very noblest specimen of building art in Asia. The Saracenic cupola of the Mosque of Omar may be said to defy comparison, even with the proud domes of St. Sophia, St. Peter, and St. Paul. In like manner, the whole city of Jerusalem, though it cannot be called beautiful, like Florence, Genoa, Bordeaux, and Edinburgh, is full of hint and con-

st — sparkling with epigrams in stone. Twenty
h minarets lift you in imagination to the Nile.
e Rotunda carries you to Constantinople and
me; the immediate model of the Church of the
ly Sepulchre being St. Sophia, as the model of
t Vasilica was the Pantheon. Who shall appraise
corridors of El Absa, the tower of the Serai,
span of the Golden Gate? A convent here, a
agogue there, add elements to the picture, anom-
es to the scene. A thousand low, round cupolas,
rowed from Byzantine art, break the level sky
s into beauty, and in some degree atone for the
of a second material and for the absence of a
ghter tint."

The above description has no reference whatever the *sacred* associations connected with Jerusalem d its surroundings. It presents only the impres-ns created upon the mind of the traveler by the nains of the beauties of the high art exhibited in various edifices still existing in that wonderful y.

Rev. I. L. Porter, who was British Consul at mascus for many years, describes Jerusalem m the Mount of Olives, thus: "At our feet, ng the base of Olivet, was the Kedron, a deep d narrow glen, coming down from an undulating teau on the right, and disappearing round the ulder of the hill on the left, its banks terraced d dotted here and there with little groves and sin- olive trees. Directly opposite us was Mount riah, its bare sides rising precipitately from the tom of the Kedron to a height of some two hund- feet. On its summit is a rectangular platform ut thirty acres in extent, and taking up fully one f of the eastern side of the city. It is unique. ere is nothing like it in the world. Its history, , is wonderful. It has been a Holy Place for re than thirty centuries. Its Cyclopean walls re founded by Solomon. Upon it stood the Tem-, in whose shrine the glory of the Lord so often peared, and in whose courts the Son of God so en taught. It is still to the Moslem 'El-Haram sherif,' 'the noble sanctuary,' and next to Mecca, most venerated sanctuary in the world."

Dr. Prime, in his description of the Holy Land d the sacred places, which he so graphically and utifully describes, is sustained by all *respectable* d credible writers who have visited that land, cov-d all over with evidences of wonderful achieve-nt and Providential Power.

"Mark Twain," like other writers of the same nus, has imagined himself a great man, because is reputed to be a witty writer; or, in other rds, has the ability to amuse his readers. This is faculty of not a very high order. Many mounte-nks and clowns possess it in a larger degree than Mark Twain." In their case it may be legiti-tely exercised. They are paid for that purpose. t a writer who is employed by a respectable wspaper, of large circulation and influence, to des-be the places and incidents of his travels, who nstantly labors to caricature the sacred scenes in Holy Land, and ridicule the labors of distin-ished and learned men, who have, with wonderful reement, described those scenes and incidents, ke violates his duty as a faithful chronicler, insults good taste of the community, and sins most evously against well authenticated history. Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from New York.

SNOW AND SLEIGHING—ARISTOCRACY ON A GALA DAY—HOTELS—GROWTH OF THE CITY—THE NEW YORK PRESS—SUNDAY SCHOOL INSTITUTES.

New York City, Feb. 25, 1868.

The anniversary of Washington's Birthday occurred last Saturday. Business was entirely suspended, and there was a grand sleighing festival. Upper Broadway, Fifth Avenue, and Central Park were alive with gay parties upon runners, and presented a spectacle rivalling in beauty and variety the brightest gala-day in Paris. The solid sleigh-box of the substantial mechanic, abundantly supplied with blankets; the modest cutter, evidently got up for the occasion; the commodious family sleigh, with the bright faces of children peeping out from the midst of furry coverings; the fancy "turn-out," whose fast-trotting horse, with extended neck and sweeping gait, flying along at almost railway speed, distances all competitors; the more dignified annd pretentious establishment, with liveried servants — all these mingling together in the fashionable part of the city — afforded no inadequate representation of society, in its happier phases, in the great American metropolis.

THE ARISTOCRACY ON A HOLIDAY.

At four o'clock the scene was varied by the presence of the teams of the millionaires — not the Hones, Minturns, De Forests, and Costars of old Knickerbocker time, but the solid men of to-day. The most famous horses in the world, driven by men whose names as successful business men are still more famous, move slowly along the fashionable thoroughfare. Showy outfits are of no account with them. But the long, lank, slab-sided animals that would disgrace a well-to-do farmer's barn-yard, they are the favorites. Usually they walk their teams till they reach the gates of the Central Park. Bonner of the *Ledger* comes along, a short, thick-set, middle-aged man, with red hair and a red face, muffled up to his nose, in a sleigh drawn by "Peerless," a huge creature, yellow, white-footed and white-faced, walking as if distressed at every step — the last horse in the line that would be picked out for speed. Behind him is Vanderbilt, tall as a Mohawk warrior, and as erect, with flowing gray hair and sturdy shoulders, driving with his mate, "Post Boy," a slender, pony-like animal, but equal to anything on the road except Bonner's celebrated team. He is followed by James Harper, whose sparkling bays have given him as much as he wanted to do in many a drive. Stewart alone seems to remember the turmoil of financial life, amid the exhilaration of the drive. After entering the Park the scene is exciting and well-nigh perilous. Everyone for himself, flying, dashing, cutting across, and coming in opposite directions. Bankers, clerks, merchants, draymen, doctors, and lawyers, all go pell-mell till they draw up and tie at McCoomb's. Such an array of fast teams is to be found nowhere else on the continent.

THE HOTELS OF NEW YORK.

No one visits New York without noticing its leading hotels. They are an important feature of the city. Nearly all of the larger class are located on Broadway, or in its immediate vicinity. The oldest of the colossal hotels is the Astor, built by that millionaire twenty-six years ago. Notwithstanding the powerful rivalry of its up-town competitors, the Astor holds its rank as a first-class hotel, and rarely has a spare room. Situated in the midst of the down-town business, twice its present rent has been offered to allow it to be converted into offices. There was a rumor that this would be done. But the proprietor remembers that his father used to say that he wished it might remain a hotel, and on New Year's he renewed the lease to the Stetsons for five years. It will probably remain a public house during the life of William B. Astor.

The St. Nicholas is the more spacious hotel of the city, having cost $1,000,000, and being able to accommodate a thousand guests. Farther up, and on the opposite side of Broadway, is the Metropolitan, kept by the Messrs. Leland. It is nearly as large as the St. Nicholas, and has the reputation of being its superior in its management. Its patrons are a more select class of the traveling public.

But since its completion in 1860, the Fifth Avenue has been regarded, in its appointments, as the most finished of the New York hotels. It is kept by Col. Paran Stevens, is three miles above the Astor, and is located opposite the palatial residences on Madison Square. The city abounds with every variety and grade of public houses. French's and Lovejoy's, opposite the City Hall Park, are the favorite resort of the returned California miners, and are conducted in somewhat the same style as Woodward's "What Cheer." I should fail to express my belief did I not add that in both structure and management, the leading hotels of San Francisco are fully the equals of the best public houses of New York.

GROWTH OF THIS CITY.

Let any one who has been absent from the city six to ten years, take a "swing around the circle" of the upper part of the town, and he will be astonished at its growth. In 1820 New York had a population of 123,000 — a little less than the present population of San Francisco. Including the suburbs of Brooklyn and Jersey City, to-day it has more than ten times that number. Let the youthful reader imagine San Francisco to contain ten buildings for every one it now has, and he will have an approximate idea of the size of New York. Forty years ago it ranked along with the third rate cities of Europe. To-day it is surpassed by London and Paris only. Before the close of the present century it will be the commercial center, not of the Western Continent alone, but of the world.

There has been very little change within six years in the relative status of the leading city journals. The *Tribune* maintains its rank as wielding a greater influence on public opinion than any other paper. In its country circulation it equals all the other political papers combined. The *Herald* has the largest city circulation, and far the best advertising income. It maintains its old Protean reputation, and is as enterprising, audacious, and unscrupulous as ever. For the past six months its prestige has been on the wane. Whether this decline will continue is a problem. The *Times* has ability, a large circulation, but a limited influence. The *Evening Post* is, in some important features, the best newspaper in New York. Always consistent and earnest, its editorials exhibit a clearness and force of argument not surpassed by any other journal. The *World*, *Express*, and *News* are the organs of the Democratic party. The first named has a rural circulation next to that of the *Tribune*, and a very able corps of correspondents. The *Express* is a racy, readable sheet, with a circulation confined to Manhattan Island. The *News* is the organ of the Woods, Morrissey, and Gideon J. Tucker. Of the religious papers I must defer an account until another time.

SUNDAY SCHOOL INSTITUTES.

These, for some months past, have grown into frequency in all the Eastern States, but more especially in New York City and Boston. They consist of conventions of Sunday School teachers, who are addressed and instructed by persons previously selected for this purpose. As Musical Institutes are conducted by a professor, and Teachers' Institutes by adepts in teaching, so we have among our eminent Sunday School men several who make it a business to attend conventions, make addresses, give practical lectures, and exhibit model classes to illustrate to teachers how they ought to instruct. Much of this is interesting and profitable. There is, however, a liability to abuse. At some of these Institutes, among the managers are those who have hobbies — specialties, which in their estimation are all important — so much so as to exclude everything else from consideration. Such persons are apt to believe that all persons ought to think and act just as they do. Teachers, however, cannot be run in a Procrustean mould. To succeed, each must, to a certain extent, act himself, and this the best Sunday School managers well understand.

But I must close. As I look out of my window the snow drifts along the street, and long, tapering icicles hang from the eaves. Citizens of the Pacific Coast! rejoice that your homes have fallen in pleasant, and not ice-bound places. Kearsarge.

Letter from Nevada.

Virginia City, March 7, 1868.

Eds. Occident:—

While I am writing, the snow is falling rapidly, and we may be obliged to take to sleighs and snow-shoes again. I hear that five feet of snow have fallen upon the Sierras during the recent storm. I had hoped that we should not have any more snow this season, but those who hold high places in the world must expect to be taxed for the privilege.

During the last few days there has been a considerable talk in business circles about the construction of a branch railroad to connect Virginia, Carson, and Washoe with the Great Pacific Road. The Pacific Road will pass within about twenty miles of this place, at the nearest point. The route of the proposed branch is intended to leave the overland road at some point on the Truckee, run south through the valley of Washoe to Carson City, then turn and wind its way to Virginia. This plan would make this city forty miles, by rail, from the Pacific Road, while a direct route, which has already been surveyed, would shorten the distance nearly half. It will be in time to note the advantages of this road when its construction becomes a fixed fact. A lighter grade and substantial aid from the people of Washoe and Carson are strong arguments in favor of the longer route.

A few weeks since the Rev. Dr. Pinney, from Austin, passed through this place on his way to San Francisco. His chief object in visiting California at this time, is to solicit funds to aid in building a Presbyterian church in Austin. I sincerely hope he will receive substantial encouragement from the churches of our order on the coast. Three years ago I labored for the little church at Austin, for three or four months. I then learned the character and situation of that little flock. I have felt, ever since, a strong desire that they should have a house of worship, so that they might have a *place* as well as a *name*.

There are some especial reasons why this struggling church shall be encouraged in their efforts to build. They were in advance of all other religious efforts in their town. They greatly need a suitable place of worship, and the very existence of the church organization, may depend upon their success in this first effort. While they are ready and willing to do even more than they are able, they are not adequate to the task of building without aid. They only ask for the smallest amount from others. Knowing as I do how faithfully this little band has held together, under the most discouraging circumstances, and how worthy they are of that aid which their pastor is now seeking, I most urgently solicit my ministerial and lay brethren to lend a helping hand. "The Lord loveth the cheerful giver."

Yours, truly, T. E. T.

Letter from San Jose.

SAN JOSE, March 16, 1868.

Taking it for granted your readers will not object to hear, occasionally, from some of the interior towns, I write you from this city.

San Jose is situated in the midst of the Santa Clara Valley, one of the most productive and beautiful in the State. So far as regards material prosperity, our town is making steady progress, and the prospects are that the future will eclipse the past in these respects. The churches are holding their own and experience the beneficial effects resulting from the growth and prosperity of the city.

The Roman Catholic Church, which has a large membership in this region, has been enjoying the services of Father Bouchard recently. His preaching attracts large crowds and appears greatly to revive the interest of the Catholics themselves, whatever effect it may have on those without.

The Young Men's Christian Association of San Jose celebrated its first anniversary last Sabbath evening. From the President's report we glean the following items. The Association has a membership at present of 181 persons. The library contains 935 volumes, collected during the year. There have been on an average 1,000 visitors at the Reading Room of the Association monthly. The total expenditures for the year amount to $3,000, which is nearly, if not entirely, met by the income of the Association, and through the generosity of its friends. Three Mission Sabbath Schools are maintained by its members, and a daily noon prayer-meeting has been held in their rooms for the past four months. These varied religious influences, originated and sustained by the Christian young men of this city, are among the most promising and gratifying facts connected with our religious history. There is a necessity for similar institutions in all our towns. They supply an important want, and under God's blessing, may accomplish untold good. J. S. W.

Pacific Medical and Surgical Journal.

NEW SERIES. PUBLISHED MONTHLY.

The editorial management is in the hands of Dr. Henry Gibbons, a veteran in his profession, formerly Professor of Theory and Practice in the Philadelphia College of Medicine, afterwards President of the California State Medical Society, and now Professor of Materia Medica and Therapeutics in Toland Medical College, and Dr. Henry Gibbons, Jr., whose extensive experience in a large hospital in Washington, during the war, has familiarized him with modern surgery, and qualified him to take charge of this department. Besides, we have secured the assistance, as collaborators, of a corps of eminent physicians, representing the body of the profession on this coast.

TERMS.—$5.00 a year, or $3.00 for six months, payable in advance, in gold coin. Postage pre-paid by the Publishers.

PUBLISHED BY BANCROFT & COMPANY,
San Francisco, Cal.

One copy of the PACIFIC MEDICAL AND SURGICAL JOURNAL and one copy of THE OCCIDENT (subscription price $4.00) will be forwarded one year, to one address, for $8.00.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

CURRENT LITERATURE.

RECENT PUBLICATIONS.

PRAYERS OF THE AGES. Compiled by Caroline S. Whitmarsh. Boston: Ticknor & Fields. San Francisco: H. H. Bancroft & Co.

This book is valuable as a literary and religious curiosity, had it no other merit; for it contains specimens of every kind of prayer respecting almost every subject that has ever had expression. Heathen, Mohammedan, Roman Catholic, Protestant, ancient, modern, all varieties of style and utterance, have illustration in the petitions, and in the devotional sentiments interspersed. The knowledge thus communicated in regard to the ideas of those who by their fellows have been called *the good*, concerning religion and man's relation to God, is not without its value. It is suggestive, and both positively and negatively instructive; so that while few of us would employ any of these prayers as the vehicle of our devotion, the study of them will give us broader views and a more devotional spirit than we might otherwise cherish. In truth, this is the chief advantage of any prayers that have been composed by others, and, when they are read for this purpose, books like the one of which we are speaking have real worth. We have been much interested in the collection, and can commend it, not for use in supplication, but for careful reading in seasons of supplication, as well as at other times.

THE SEXTON'S TALE, AND OTHER POEMS. By Theodore Tilton. New York: Sheldon & Co. San Francisco: H. H. Bancroft & Co.

Mr. Tilton has been variously and vigorously criticised, both as a writer of prose and verse, yet he does not faint under strictures, nor become inflated with praise. This little volume of poems does not establish him among the great poets of the race, but it is a pleasing demonstration that he has real talent for this species of literature. We hope and presume it has so far convinced the author of this that he will be stimulated to write another in due time, which may more fully display his genius and heart. It is not easy to see how any favoring influence in aid of the Muse can come from the heavy cares and relentless demands of an editor's life, but Mr. Tilton does not furnish, by any means, the only instance in proof that it does.

ITALIAN JOURNEYS. By W. D. Horsells. New York: Hurd & Houghton. San Francisco: H. H. Bancroft & Co.

Here we have a fine illustration of attractive style in writing travels. The author takes us along with him, and as we go over the wonderful land which he has chosen for our Journeys, he describes, and explains and paints, with a wealth of information, and a versatility of skill, and a glow of rhetoric, that make us his ever delighted companions. Italy is full of interest, whether it be visited by one who seeks the enchantment of its climate and scenery, or by one who would revel in the wonders of its specimens of art, or by one who would study its relics of a history that has made its soil most famous; and the author seeks to gratify and satisfy all these in the book before us. It is praise enough that he has not failed in his purpose. All who were charmed by his "Venetian Life" will eagerly receive this, and to those who have read neither, we commend them both.

KING RENE'S DAUGHTER. By Herrick Hertz. Translated by Theodore Martin. New York: Leypoldt & Holt. San Francisco: H. H. Bancroft & Co.

It has long been occasion for wonder that American publishers have not issued more of the standard and excellent poetry of Europe for readers in this country. We have philosophy and fiction and general literature reproduced here in considerable amount, but very little poetry has been translated. Of course, few of our intelligent people are aware almost all our school classics. In the Eneid, we have such portions as the friendly "Games upon the Island of Sicily;" and in the Iliad, such as "The Parting of Hector and Andromache." In the latter, also, we have a description of the Shield of Achilles, and in the former of that of Eneas. The scenes on the second shield better suit their place, as they are more warlike; those on the first are more improving to the imagination and the heart. as they are more peaceful. In fine, a teacher may be as inhumane to the brains and hearts of his pupils, by carrying them from cover to cover of a text-book, as the countryman was to his stomach who tried to go through the whole bill of fare. C.

Science and Religion.

Our true part, is to be as little concerned for the safety of religion as we have reason to be. The future outbreaks of discovery are not likely to bring us a single peril more. And since we have ample space left us as ever, for all most supernatural gifts — revelations, prayers, annointings, discernings, and even miracles — and no possible discovery can rob us of these liberties of the spirit, or more than help us to maintain them systematically, as having found their intelligible unity with science itself, what shall we do but pledge our right hand to it and to all its explorations? We are to say, Go on, gentlemen, for there is a much larger field to be possessed. As yet you have but scratched the world's surface in what you call your sciences. Go deep; for the deeper you go, and the more unsparing your search, the better it will be for us. Wrench every subtlest and most secret thing from nature's bosom, and let us have it. We shall appropriate every true thing you bring us, and thank God for it. Only bring us no conceit, as if nature were the all, and science the all-expounder. What you call nature is but a very small affair, compared with God's high spirit-empire, and the vast immortal quantities, and powers, and passions, and truths, that build the eternal system it composes. Do not imagine that you are in a commission large enough to include and give you jurisdiction of things supernatural, when your only jurisdiction is of the shell. Be not in haste to put your sentence on the faiths of religion. The nursery sparrow that boasts "I killed Cock Robin," could as well be sure of transfixing mountains with his "bow and arrow," as you of doing death upon religion, if you would, by your sciences. It is a very great thing to undertake — the extirpation of those eternal faiths, and facts, and ideas, by which God implants himself in the everlasting perceptions of minds. Whether you know it or not, here is a good deal more of rock than there is in all your underworlds of geology. It is older also than your most primitive formations, and will stay firm under you some ages longer.—*Putnam's Magazine.*

EDUCATIONAL.

Classical Study.

King Arthur obtained his sword Excalibur by drawing it, with Herculean strength, from a stone. In like manner, even from so hopeless a source as the poor annotations upon an obscure volume, one may sometimes, by proper vigilance, obtain something of value. Take an example. "I shall never forget the feeling I experienced, on entering my name as a student at college, to find that the class for Latin was entitled a *humanity* class; the name appropriated to this branch of learning at most colleges. The professor was called a Professor of Humanity; but all I read while at that class was of *wars — bella, horrida bella.*" (Pierpont's Notes on Epps' *Horae Phrenologicæ.*) The evil here mentioned is widespread. Our beginners in the classics are too generally only "rocked in a buckler, and fed from a blade." The effect is either to weary them with monotony, or to beget a fondness for military reading

Acquired Nearsight.

It is reported that a German physician has discovered that seventeen per cent. of children are somewhat near-sighted, and the most of them become so after entering school. He attributes this result to the defective lighting and desk arrangements of school-rooms. Whatever the estimates and explanations here reported may be worth, it is quite certain that those who study much, whether young or old, run a risk of acquiring near-sight, or myopia. Standard medical authorities not only recognize this fact, but propose means of preventing the evil. (Todd's *Cyclopedia of Anatomy and Physiology* — "Vision.") They suggest that school books be printed in bold type; that scholars be not allowed to hold their faces too near their books; that persons in the act of perusing books shall often lift their eyes to remote objects; and that scholars be encouraged to observe and describe things at a distance. Following up these last two hints, several recommendations may be made. One is, that the school room be ornamented here and there with mottoes, towards which pupils be encouraged occasionally to lift their eyes. Another, this: that classes in geography be required to name places which may be pointed out on maps in some distant corner of the room. Still another is, that classes in astronomy be required to seek out constellations in the heavenly vault itself, and not merely on the chart. C.

A Pleasant School Exercise.

The young ladies of the Pacific Female College delighted a large number of their friends last Fridap evening by an informal exhibition of their attainments, which was very much to their credit. None who were present were disposed to be critical, yet had there been one determined to find fault unless every part should be performed to his satisfaction, he would have found little opportunity for the execution of his purpose. The lirerary portion of the entertainment was varied, and evinced more than usual culture and ability; but we would specially commend the *music.* No doubt better music has been rendered, and far more display has offended the good taste of those who have attended such exhibitions in schools, as young misses have tried to transform themselves into "Prima Donnas" and opera singers, but rarely have such singers contributed so much to the real enjoyment of their auditors as did those who took part in these exercises. This was true, chiefly, because they sang such music as we desire to hear in our parlors and homes, and sang it with expression and well. We do not wish our daughters to be instructed in music that they

y learn to scream, or be prepared to perform on stage, but that they may learn to sing and play instruments, at home and for the friends whom y may thus please, as well as for their own enment. It is pleasant to see that this is underod by the teachers in the Female College. We e they will often repeat these informal public ercises.

The Popular Edition of Dickens.

Extra Baltimore Fresh Cove Oysters,

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equal to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

FAMILY READING.

Twenty Years Ago.

I've wandered to the village, Tom; I've sat beneath the tree
Upon the school-house play-ground, which sheltered you and me;
But none were left to greet me, Tom, and few were left to know,
That played with us upon the green, some twenty years ago.

The grass is just as green, Tom; bare-footed boys at play
Were sporting just as we did then, with spirits just as gay;
But the "Master" sleeps upon the hill, which, coated o'er with snow,
Afforded us a sliding-place, just twenty years ago.

The old school house is altered now; the benches are replaced
By new ones, very like the same our pen knives had defaced;
But the same old bricks are in the wall, the bell swings to and fro,
Its music just the same, dear Tom, 'twas twenty years ago.

The boys were playing some old game beneath the same old tree —
I have forgot the name just now — you've played the same with me
On that same spot; 'twas played with knives by throwing so-and so;
The loser had a task to do — there, twenty years ago.

The river's running just as still; the willows on its sides
Are larger than they were, Tom; the stream appears less wide —
But the grape-vine swing is ruined now, where once we played the beau,
And swung our sweet-hearts — pretty girls — just twenty years ago.

The spring that bubbled 'neath the hill, close by the spreading beech,
Is very low — 'twas so high that we could almost reach;
And, kneeling down to get a drink, dear Tom, I started so
To see how sadly I had changed, since twenty years ago.

Near by the spring, upon an elm, you know I cut your name,
Your sweet-heart's just beneath, Tom, and you did mine the same.
Some heartless wretch has peeled the bark, 'twas dying, sure but slow,
Just as the one, whose name you cut, died twenty years ago.

My lids have long been dry, Tom, but tears came to my eyes;
I thought of her I loved so well — those early broken ties.
I visited the old church-yard, and took some flowers to strew
Upon the graves of those we loved, some twenty years ago.

Some are in the church-yard laid; some sleep beneath the sea;
But few are left of our old class, excepting you and me;
And when our time shall come, Tom, and we are called to go,
I hope they'll lay us where we played, just twenty years ago.

— *Frederick.*

All's Well.

The clouds which rise with thunder slake
Our thirsty souls with rain;
The blow most dreaded falls to break
From off our limbs a chain;
Our very sins and follies make
The love of God more plain;
As through the shadow lens of even,
The eye looks farthest into Heaven —
On gleams of star and depths of blue
The glaring sunshine never knew. J. G. W.

Book-Keeping.

THE RICH MAN IN SPITE OF HIMSELF!

In old times it was the custom of merchants in the city of New York to keep their accounts in pounds, shillings, and pence currency. About fifty years ago, a frugal, industrious Scotch merchant, well known to the then small mercantile community of that city, had by dint of fortunate commercial adventure and economy, been enabled to save something like four thousand pounds; a considerable sum of money at that period, and one which secured to its possessor an enviable degree of independence. His place of business and residence were, as was customary at that time, under the same roof.

He had a clerk in his employment whose reputation as an accountant inspired the utmost confidence of his master, whose frugal habits he emulated with the true spirit and feeling of a genuine Caledonian. It was usual for the accountant to make an annual balance-sheet, for the inspection of his master, in order that he might see what had been the profits of his business within the past year. On this occasion the balance-sheet showed to the credit of the business six thousand pounds, which somewhat astonished the incredulous merchant.

"It canna' be," said he; "ye had better count up agen. I dinna think I ha' had sae profitable a beesness as this represents."

The clerk, with his usual patience, re-examined the statement, and declared that it was "a' right," and that he was willing to wager his salary upon its correctness.

The somewhat puzzled merchant scratched his head with surprise, and commenced adding up both sides of the account for himself. It proved right.

"I did na' think," said he, "that I was worth over four thousand pounds; but ye ha' made me a much richer man. Weel, weel, I may ha' been mair successful than I had tho't, and I'll nae quarrel wi' mysel' for being worth sax thousand instead."

At early candle-light the store was regularly closed by the faithful accountant; and as soon as he had gone, the sorely-perplexed and incredulous merchant commenced the painful task of going over and examining all the accounts for himself. Night after night did he labor in his solitary counting-house alone, to look for the error; but every examination confirmed the correctness of the clerk, until the old Scotchman began to believe it possible that he was really worth "sax thousand poonds."

Stimulated by this addition to his wealth, he soon felt a desire to improve the condition of his household; and with that view, made purchases of new furniture, carpets, and other elegancies, consistent with the position of a man possessing the large fortune of six thousand pounds. Painters and carpenters were set to work to tear down and build up, and in a short time the gloomy-looking residence in Stone Street was renovated to such a degree as to excite the curiosity and envy of all his neighbors.

The doubts of the old man, however, would still obtrude themselves upon his mind, and he determined *once more* to make a thorough examination of his accounts. On a dark and stormy night he commenced his labors, with the patient investigating spirit of a man determined to probe the matter to the very bottom.

It was past the hour of midnight, yet he had not been able to detect a single error; but still he went on. His heart beat high with hope, for he had nearly reached the end of his labor. A quick suspicion seized his mind as to one *item* in the account. *Eureka!* He had found it. With the frenzy of a madman he drew his broad-brimmed hat over his eyes, and rushed into the street. The rain and storm were nothing to him. He hurried to the residence of his clerk in Wall Street, reached the door, and seized the handle of the huge knocker, with which he rapped until the neighborhood was aroused with the loud alarm. The unfortunate clerk poked his night-cap out of an upper window and demanded,

"Wha 's there?"

"It's me, you scoondrel!" said the frenzied merchant; "*ye've added up the year of our Laird among the poonds!*"

Such was the fact. The addition of the year of our Lord among the items had swelled the fortune of the merchant near two thousand pounds beyond its actual amount.—*Knickerbocker.*

Table Tipping.

A gentleman walking out yesterday afternoon, accompanied by a couple of dogs, on nearing a cabin, of which it happened the front and back doors were open and three men sitting eating their evening meal, a cat was spied in the middle of the road, and the dogs put off in full chase. Pussy ran into the cabin, and the dogs following at full speed, ran against the legs of the table, keeling it over, and spilling the edibles and crockery on the floor, much to the astonishment of the occupants, who had not observed the entrance of the dogs, and no doubt gave color to the idea of a visit from some of the table-tipping mischievous spirits who have been cutting up such didos at Stockton recently.

Pussy made out of the back door, and the last seen of the dogs they were heading for Auburn street, pussy having doubled on them in the meantime and secured a safe retreat.—*Grass Valley Union.*

A HINT.—A goodly number of the ox-drivers in the region round about Grass Valley may take a sea-onable hint from the good deacon, who was naturally a high-tempered man, and had been used to beat his oxen over their heads, as all his neighbors did. It was observed that when he became a Christian his cattle became remarkably docile. A friend inquired into the secret.

"Why," said the deacon, "formerly, when my oxen were a little contrary, I flew into a passion and beat them unmercifully. This made the matter worse. Now, when they do not behave well, I go behind the load, sit down, and sing Old Hundred: I don't know how it is, but the psalm-tune has a surprising effect upon my oxen.—*Grass Valley Union.*

THE YOUNG FOLKS.

The Door that is Always Open.

A friend of the chaplain had been speaking to the children, and at the close of the services, a young man, much affected, came to him and said,

"I will tell you an incident that you can relate when you talk to children. There was a pious mother in New Hampshire — a widow, with an only son. The mother's heart was bound up in this boy. Everything she could do to make him happy was done; and, above all, she sought to keep him from bad company and to lead him to Jesus, that he might become His disciple. The boy had a loving heart, and God had given him one of the best of mothers, but he unfortunately found bad associates, and gave himself up to their bad counsels, to the great grief of his suffering mother.

"Finally the lad was induced to run away. He directed his course to the sea-coast, and shipped on a vessel for a long voyage. From this he changed to another, so that it was full three years before he returned to his native land. During this time, as it often happens, the 'prodigal' boy came to himself. He remembered the prayers of the devout old mother in New Hampshire. He sought and obtained a Bible, to read over again the Scriptures which she had so often read to him. With a broken heart he asked the forgiveness of his Heavenly Father, and determined to take the first opportunity to return to the home of his mother, and relieve the anxiety that he knew must be crushing her heart. Perhaps she had died under the terrible blow which his conduct had inflicted upon her. How this terrible thought quickened his conviction of his sins and his penitence before God!

"Immediately upon reaching port and securing his discharge, he started for his New Hampshire home. It was late in the evening when he reached his native village. With what a hurried step and a beating heart he turned his course to his mother's cottage! He could see no light from the windows as he approached the house. What tumultuous thoughts filled his heart! Was she still alive? Would her worn face, if living, show the consequences of his misconduct? How would she receive him?

"He thought she had probably retired for the night, if still at home. He would go round to the outer door, he said to himself, and see if it was open but would not make a noise to disturb her if she had gone to her rest. The door opened silently under his hand. He passed on to the door of the sitting room, and, trying carefully the latch, it answered at once to his touch. The movement was so quiet that the only occupant of the room remained undisturbed. There sat his mother by the fireside, with the Bible closed in her lap. She had evidently just risen from her knees. The tender, tearful face told sooner and surer than words for whom that evening prayer had been offered.

"Stepping quietly across the room, the boy (or rather the young man, for three years and rough exercise had made a great change in his appearance) kneeled down and buried his face in his mother's lap. He could only say, 'Mother, forgive me!'

He felt the touch of her trembling hand upon his head, and the silent dropping of her tears. She pressed him to her heart, and kneeling by his side

nanked God that a mother's prayers had been answered.

"After recovering a little from the mingled joy nd sorrow of the hour, the boy, turning to his mother, said to her:

"'Did you know that your door was unlocked?'

"'Oh, yes!' was the answer.

"'Don't you think it a risk to have your door unocked so late in the evening, as you are so far from ie village?'

"'That door,' said the mother, 'has not been locked or three years. Since my boy left me I have never hut the bolt. I have continued praying for him, nd expecting his return. I have left the door open o, if he came in the night, as I thought he might, e would know that I was waiting for him.'

"The broken-hearted, but doubly-forgiven son — orgiven of God and of his injured mother — could nly respond with tears to this touching evidence of ie unquenchable power of a mother's love. He had rievously sinned, but the door of forgiveness and ffection had never been closed. Even in the first itter hour of disappointment and wounded love, the oor had been unfastened and had remained unbarred ay and night, until the prodigal's return."

Thus, dear young readers, *He* waits for us who once ied for us. We wander far from Him. We grieve ie Holy Spirit. But the door is open! The Savor's heart is never barred. Like the mother, He ot only offers daily prayers in our behalf, but "*ever veth* to intercede for us." We shall find, when we ome with trembling hearts and weeping eyes, that Ie is *waiting* for us.

"All Heaven is waiting to resound,
The dead's alive, the lost is found."

—*Zion's Herald.*

AGRICULTURAL.

Unfermented Manure.—Many excellent farmrs have an idea that manure, to be most efficient in aising crops, should be well rotted, but this is a mistake. Manure loses a very heavy per centage of its eal value by decomposition. Fresh, dripping maure, hauled directly from the stable on the land and loughed under, is worth nearly double that which as decomposed to a saponaceous consistency. When is convenient for farmers to haul their manure on orn ground from the stable as fast as it is made, it aves handling it twice, and forwards the work in usy spring time. No fears need be entertained that he atmosphere will carry off the strength of the maure if left on the surface. The only danger to be pprehended by this method will be in the case of he ground being frozen and covered with snow and ce when the manure is applied; if upon sloping and, the virtue of the manure might wash away; ut on level land there is no exception to this plan f operation during the entire fall and winter season. —*Germantown Telegraph.*

A correspoedent of the *New England Homestead* says vermin may be driven from hen houses y the following plan:

1st. Give the hen house a thorough whitewashing, ests, boxes, roosts, and everything about the premes.

2d. Sprinkle sulphur in the nest boxes three or our times during the year.

3d. Keep the floor constantly covered with sand r gravel, and clean out at least once a month.

4th. Rub lard under the wings of the hens.

When raising calves for cows, the greatest care s necessary when they have their first calf, as everyhing depends on the habits they then acquire. Alo, about the time they are going dry, for the longer ney can be kept in milk then, the longer they will ive milk thereafter. They should be milked perectly clean at every milking, and if in the winter me, a few turnips or potatoes should be given in ddition to their other food, to increase the flow of ilk.

The custom duties paid at this port amount to ver $7,000,000 annually. This is a large sum in iew of the population of the Pacific coast.

S. P. Maybebry writes to the *Maine Farmer*: "A few years since we used to cultivate amongst our apple trees, but took a lesson from nature. Now we know that forest trees drop their leaves, which serve both to protect the roots and loosen the soil. This we imitate by mulching with straw and meadow hay, which we find preferable to cultivating the soil, as it is less work and better secures the object in view."

A gentleman in Geneva, N. Y., informs the *Country Gentleman* that he has kept his currant bushes entirely free from the currant worm, and his quinces of the borer, by the use of coal ashes. The ground under the currant bushes was covered in the spring to the depth of five inches, and a mound was made about the stems of the quinces.

The roots of perennial flowers should be protected during the winter by a mulch of light manure or dead leaves. Nature affords protection to the roots of trees, shrubs, and plants by the fallen leaves. It is a great mistake to remove them for the purpose of making a place look neat.

Old animals of every kind are unprofitable, and should be got rid of before they become so deteriorated in value as to be difficult to sell even at a very reduced price.

PACIFIC COAST ITEMS.

The rainy season, which continued till the middle of this month, has given way to clear, bright days, and a dry, bracing atmosphere. The change has had a marked influence on business here, and a still more perceptible effect in the country. While the unprecedented rains have injured the grain crop in low ground localities, all the upland fields promise finely. There is now a very strong probability that the harvest in California in 1868 will exceed that of any previous year.

Telegrams from the East announce a large arrival at New York City of laborers bound for California. When they reach here, there is only one safe course for such — to seek at once the farming region. San Francisco and the larger towns are already over-crowded. If they can not hire out satisfactorily, they can pre-empt a quarter-section, and, by making a gradual improvement, convert it into a good homestead.

The miners at the New Almaden Quicksilver mines, who have hitherto worked on the contract system, the lowest bidders getting each specific job, have struck for the adoption of a different system, and fixed rates of wages, not subject to competition. Of one thousand workmen about seven hundred have withdrawn. It is said the Company will employ new hands if the strike continues.

It is now pretty well understood that Governor Haight has laid down a rule by which he will veto all bills granting franchises to private companies to build roads, referring them to the general law on corporations. Of this rule the people of Mendocino and Humboldt complain, saying that it compels them to abandon the building of the road from Ukiah to Eel River Valley.

A correspondent from Watsonville says that the elements have assumed a vernal aspect, and the people are rejoicing in the enjoyment of passable roads. Farmers are busy, mechanics are putting an edge to their tools, clergymen are feeling relieved by increased audiences, and teachers encouraged by a more constant attendance.

California pears and grapes have been sent to New York the past winter, via Panama, which arrived in good condition and sold at very high prices. It is not improbable that considerable quantities of the pear may hereafter be shipped to the eastern market, although the finer varieties are the most likely to be injured.

The *Commercial Herald* says: "The general monetary ease that still pervades the mercantile, mechanical, and other industrial classes, coupled with the vast sums of treasure on deposit in our banks and savings institutions, are evidences of real prosperity that can be seen and felt, and are indeed encouraging to all."

St. Patrick's Day celebration in this city on Tuesday surpassed that of any previous anniversary in numbers and general interest. It demonstrated that our Irish citizens are a "power" in this city, and that in military, social, and benevolent organizations, they are behind no other nationality.

The business men of this State and city are at this time deeply engrossed in the consideration of the various railway projects. They well may be, for the railway system of this coast will have a vast influence in determining its degree of prosperity.

The Mendocino *Herald* says there are heavy deposits of snow on the mountains, but in Ukiah Valley grass and the early gardens are growing rapidly, and the peach and apricot are showing their blossoms.

The *Alta*, commenting on the mortuary report for this city last week, thinks that no other of like size can make so favorable an announcement — only thirty-nine deaths in a population of 125,000.

Oakland has two sprightly and readable papers — one for disseminating the *Daily News*, and the other a literary *Echo* of her leading educational institution.

The exhibition of the primary scholars at Lincoln Hall on Friday night of last week was worthy of a more appreciative and less noisy audience.

The concert of the Young Men's Christian Association at the Howard Church on Tuesday night, was warmly commended by the audience.

Hon. H. H. Hartley, one of the early and able lawyers of this State, died at Sacramento last week.

The *Colorado* for Panama had, on Wednesday, 280 cabin and 90 steerage passengers.

Improvements were never going more rapidly in this city than at this time.

It is understood the Legislature will close its session in two weeks from to-day.

TELEGRAPHIC SUMMARY.

Eastern.—The Pennsylvania Republicans propose Grant and Curtin, and Massachusetts Grant and Henry Wilson, for the Presidential race....There has been a violent storm in Illinois and Iowa....Corrected returns from New Hampshire make the Republican majority 2,530 — a loss of 616 from last year.... Gen. Hancock is still in command at New Orleans....All parties now agree that the Alabama Constitution was fully and fairly voted down by the people.... Alaska has been made a separate Military Division, and placed under the command of Gen. Jeff. C. Davis.

Congressional.—The Senate, on Friday of last week, organized as a Court of Impeachment. The President did not appear, but Messrs. Stanbery, Curtis, and Nelson appeared as his counsel. The Senate fixed upon the 23d inst. as the day for him to make answer to the charge, and April 6th the day on which the House Managers are to reply....J. Ross Browne has been confirmed Minister to China....The Impeachment Managers say they are confident of success. ....The House Committee on Foreign Relations are reported to be hostile to paying for Alaska. They will back down from their position — the sooner the better....Thaddeus Stevens is feeble, but is in his seat....The House have rejected the bill for the admission of Alabama under the proposed Constitution.

Foreign.—It is reported in London that the question of the Alabama claims will probably be referred to Prussia for arbitration....Bishop Clark, of Rhode Island, reports that a vast majority of the laboring class in France heartily support the Emperor — especially in the farming districts....The Fenians are making exertions to disaffect the British troops in Ireland....The cholera is raging in Buenos Ayres.

WEEKLY MARKET REPORT.

Produce Market.

Wednesday, March 18, 1868.

Flour—The Panama steamer this morning carried 250 bbls in transit to New York. Market quiet at the following rates for city brands:

Superfine, hf sks, ₱ 196 lbs	$7 00@7 25
qr sks	7 25@7 50
Extra, hf sks	7 75@8 00
qr sks	8 00@8 25

Wheat—Sales include 425 sks ordinary, $2 62½; 1,800 sks good milling, $2 65; 825 choice $2 70 ₱ 100 lbs, which is now the outside figure.

Barley—Sales of 204 sks good feed, $2. The market is still nominal at $1 95@2 05, ₱ 100 lbs.

Oats—Sales of 204 sks light, $2 10; 200 sks choice, $2 32½ ₱ 100 lbs.

Potatoes—Sale of 140 sks Petaluma, $1 12½. We quote the range for best descriptions of all kinds at $1 30@1 50 ₱ 100 lbs.

Bran—The mill price is steady at $30 ₱ ton.

Corn—Is quotable at $2 25@2 35 for Yellow and $2 20 ₱ 100 lbs for Red.

Rye—Sale of 250 sks good at $2 ₱ 100 lbs.

Buckwheat—No demand; price nominal at $1 75@2 ₱ 100 lbs.

Onions—Jobbing sales of Oregon at 7c ₱ lb.

Beans—Wholesale rates are as follows: Bayo, 3¾@4c for new, and 3c for old; Butter, 4@4½c; Pea, 4¾@6c, weak at outside figure; small White, 4½@5c; Pink, 2½@2¾c; Red, 2½@2½c ₱ lb.

Middlings—Fine, $50; feed descriptions $40@35 ₱ ton.

Hay—Small sales within the range of $18@25 ₱ ton.

Dairy Products—Fresh roll Butter is a little easier, say 30@32½c; California firkin, 35c for ranch-packed and 32½c for store-packed. New California, Cheese is coming in more freely, and now sells at 17@19c, with 20c asked for selected dairies; a small invoice is held at 22c ₱ lb; no Eastern in first hands, though an invoice is expected by the next steamer; Eggs are in good supply at 27½@30c ₱ doz.

Poultry—Dealers are slightly at variance as to quotations. We give the medium rates as follows: Live Turkeys 14@16c; dressed do, 17@19c ₱ lb. Hens and Roosters, $7 25@8; Spring Chickens scarce, $5 50@6; Ducks, $6 50 @$7 50 ₱ doz; Geese, $$@$3 50 ₱ pair. At the close there is some demand in anticipation of Easter.

Provisions—Cured meats remain steady. California-smoked Bacon is quoted at 15@17c; Oregon do, 13@14½c; California Hams, 16@17c; no Oregon in first hands; California Lard, 14½@15½c; Eastern, 13@13½c ₱ lb.

Wool—The market is still inactive and prices altogether nominal. The first invoice of new spring clip came to hand last week, about a week earlier than last year.

Hides—Sales since last Wednesday aggregate 400 California dry, at 14@14½c ₱ lb, the latter a full figure for choice selection.

Tallow—Demand moderate and prices steady. The stock in the interior is reported to be large. We quote fair to choice Beef and Mutton at 7¼@7½c ₱ lb.

San Francisco Cattle Market.

There is but little change to note in quotations. Veal and Lamb are a trifle firmer.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 11@13c ₱ lb.
do 2d do 8@11c ₱ lb.
Veal—Medium to good, 9@12c ₱ lb.
Mutton—In fair demand, 8@10c ₱ lb.
Lamb—Spring rather scarce at 11@12¼c ₱ lb.
Pork—Undressed, 6@7½c; dressed, 10½@12c ₱ lb.

CURRENT TOPICS.

There has never been a time in this country when the necessity for economy was more apparent than it is now. The immense debt, and important, yet enormous appropriations of the Government for railroads, for education, for various permanent funds; and the still unsettled condition of the country, causing the national expenses to be much larger than they might be in other circumstances, all press upon Congress this necessity, as few in that body seem to appprehend it. The demands of State institutions not yet endowed, and of interests not yet cared for at all by the Legislature, and of a wise provision for what we should anticipate if we judge of the future by the past, are imperative upon those who have our State Treasury in charge, making a waste of money, or its careless expenditure, a serious evil. The embarrassments of business in many parts of the land, the want of work resulting from these, and the wide-spread and increasing suffering occasioned thereby, urging upon the poor that, if possible, more of them save money, even by privation, for a time, that they may purchase land, rather than that so many of them be dependent on day labor, are arguments in favor of economy which all of us should heed. Of course this should not be extreme, nor should it be so rigid that valuable interests must be neglected, because their protection and nurture will cost money; but recklessness, want of regard for public resources, present or prospective, indifference to the consequences of extravagaace in any direction, should be frowned upon, and prudence should be esteemed a praiseworthy quality, whether manifested in legislation or in the management of private affairs. There are too many noble ways of using money, at this time, and in this country, to permit the waste of it to be without censure. Let us not have it hoarded. Let us not have it thrown away.

From various indications, we fear that the Sunday question is yet to be agitated again in the Legislature. In the haste of the last few days of the session, under the pressure of the pledges given by many that they would favor a repeal of the law, some serious changes may be forced through the Assembly, notwithstanding the vote already taken makes known the real sentiment of the members, but for their pledges. We hope, however, that the Senate will take the responsibility of deciding the question according to the sense of the multitude who will feel that they have been trifled with if in such a manner so important a law is repealed or made worthless. But, even should both houses so vote, we have hope that the Governor would refuse to sanction such legislation; though for his sake and their own, his friends in the Legislature should relieve him from the necessity of action in the matter. At a time when we are having an influx of several thousand emigrants a month from every part of the world, this State cannot afford to diminish any existing defences of order and good morals among the population. This is not the time for experiments in this direction. We must offer inducements to those who desire such rights and privileges as they enjoy in the older States to come here, as well as to those who care for nothing moral or religious. Let us not proclaim, at a juncture when every interest of our State calls for a large increase of stable, reliable, worthy citizens, that little or no regard is to be manifested here for those things which this class of people value. The present Sunday law is not rigid or oppressive, if we are to have any. May the day be far distant when it shall be enacted here, as it was in France, that God was not wise when He wrote the fourth commandment — or if He was, the world has outgrown the necessity to obey it.

The movement for the establishment in San Francisco of the "Women's Co-operative Union" seems to meet with much favor, and if its purpose is what has been announced, it deserves the hearty support of our citizens. The fact that women who depend on their daily labor for the bread their families must eat are often obliged by their necessity to accept much less than they earn, should excite the sympathy of all. This Union proposes to serve as a kind of protection and relief society on behalf of these women, and offers 3,000 shares of stock, at $10 each, payable in monthly installments of $2 50 — the shares to be taken by those who may pay for them by work, or by others who may donate the privilege thus obtained to those who may be unable to buy. Between 200 and 300 women have already united with the Association, and a large and enthusiastic meeting was held in Union Hall last Monday evening, which will have effect to add largely to the number. This is not an experiment. Similar associations have been formed in eastern cities, which have afforded great aid to the poor, not only giving facilities to those who would never beg, but diminishing the number of beggars by affording them inducements to work. The office of the Society is at No. 39 Second Street, where all needed information may be obtained.

The vote in the House of Representatives to postpone action on the appropriation for the purchase of Alaska is not in accordance with the will of the people. It looks like an expression of purpose to fail in complying with the terms of the treaty with Russia, without actually refusing to ratify them. The treaty stipulates that the purchase shall be completed within ten months from its date, and that period will expire in April. Surely, Congress can hardly be willing to provoke the ill-will of a Power that has been more friendly to us than any other, and may perhaps be of more importance to us than any other in the complications that can scarcely be avoided. It is not now a question of wisdom in the matter of purchase, but of good faith in respect to our compacts. We may not agree with our officers in the policy which has such an illustration; but whether we do or not, the point of debate has been passed, and the policy now to be consulted is that of honesty, and the purpose to maintain national honor. We trust the House will not refuse to make the appropriation in time.

The elements seem to have conspired during the past season to make all parts of our country uncomfortable to a degree that has hardly been paralleled in half a century. Wind-storms, and rain-storms, and snow-storms, have prevailed over the continent, and their effects have been disastrous upon life and property. After it was supposed that the severity of the season had passed, since the time for milder weather had come, we are surprised by reports from the East of the most furious and extended storm of the year, the snows being so deep that even in Philadelphia the streets were impassable. On our coast, also, the rain near the sea, and the snow in the mountains, have completely set at naught the predictions of old residents that we should have no more long storms. There are divers opinions respecting the probable effect of such a winter upon the crops of the year, and, as is often true, there are not a few who think they could manage affairs in nature more wisely than God does, while they lament that the evils they anticipate are so formidable. To such persons we commend the general fact that severe winters over a wide extent of territory have preceded the remarkable prevalence of health and agricultural prosperity. Were we more in the habit of taking counsel from facts, and less from our fears and fancies, we should be wiser and better. It is not unlikely that the blessings of the summer may be in the ratio of the cold and storms by which the country has been visited.

There has been some difference of opinion as to the interpretation of the bill recently introduced into the Cortez of Spain respecting general education, but there seems to be no good reason to doubt that the law is likely to be passed. It makes the education of children, within certain ages, obligatory upon parents and guardians, and provides a teacher for every five hundred people in the Kingdom. The effect of such a law will be to transform Spain; and even should it be that the schools are to be under the superintendence of Catholic priests, they will be incomparably in advance of the state of things that has prevailed for a long course of years. Every degree of general education is a positive gain, and it is a question worth discussing in our country whether all children should not be compelled to attend school for a certain number of years.

Religious Intelligence.

PACIFIC COAST.

Presbyterial Notice.—The Presbytery of San Jose will meet in the Presbyterian Church in Oakland on Tuesday, April 7th, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James S. Wylie, Moderator. Narratives of the state of religion and statistics of the churches will be given.

George Pierson, Stated Clerk.

—

The Presbytery of California, at its last meeting, appointed Rev. S. T. Wells and Elder E. J. Crane as Commissioners to the General Assembly, and Rev. F. Buel and Elder H. P. Coon as alternates. The Presbytery had a pleasant session, and the reports from the churches gave evidence of encouraging progress, though there was a smaller number of revivals reported than last year. The most important item of advance is that announced by Calvary Church in this city, of which we have already given account, in their promising mission on Howard Street. The Fair held by the ladies, whose hospitality the Presbytery was invited to share, and which they seemed to fully appreciate, was eminently successful, and we are glad to learn that the building will be completed without debt. The Presbytery has not been changed since its last session by death or addition.

—

Rev. John Dickson.

The death of this young Scotch clergyman has occasioned more sadness among those who knew of the circumstances than is usual when a stranger dies among us. He arrived in California last December, manifestly under the power of that fearful disease, consumption; having been advised to leave Scotland and try the effect of a change of climate. It was soon evident that San Francisco would not be favorable for him, and he went to the milder air of Los Angeles; but soon after his arrival there an obstinate diarrhœa attacked him, by which he was so much reduced that he hastened back. His strength failed so rapidly, however, that he was unable to survive the voyage, and died on the ship a few hours before she reached this port. Mr. Dickson was a young man of unusual promise and culture, and all who became acquainted with him during his short residence among us were charmed with his spirit. He was a native of Lanark, Scotland, a graduate of Edinburg University, and an associate minister with Rev. Dr. Menzies, of Ayrshire, where he preached nearly a year before he was obliged by his ill health to resign. His funeral was largely attended on Monday, the 23d, and the exercises were made specially interesting by Rev. Mr. Hamilton, Rev. Mr. Walsworth, and Rev. Dr. Eells, who were present. Sympathy was particularly expressed for the family of the deceased — all still living in Scotland, except the one brother who was a mourner beside the coffin.

Sutter Creek.—At the last communion season, (March 15th) five persons were added by profession of their faith in Christ, to the Presbyterian church of Sutter Creek, four of whom received the sacrament of baptism. There have also been a number of additions to the Methodist church recently. Meetings have been held almost every evening for more than two weeks, and are still kept up with marked interest. On the evening of March 11th a surprise visit was made to the house of Rev. H. H. Dobbins, acting pastor of the Presbyterian church, by many citizens of Sutter Creek, who left liberal supplies for his family, being the second generous donation given during the past winter.

—

Resources and Relations of China.

To the Pacific States, China presents peculiar relations, which, in despite of temporary prejudices and the narrow-sighted policy of some of our people, are destined to become annually more interesting and important. She is our neighbor on the west, as Europe is to the Atlantic States on the east. In the progress of navigation and commerce, doubtless California is to become the great thoroughfare of Eastern trade. Hence, the resources of this most populous nation on the face of the earth, and the mental, moral, and religious status of her people are to us a matter of no trivial importance.

China proper contains an area of one and a half millions of square miles, lying between the twenty-first and forty-first degrees of north latitude, and extending over about twenty degrees of longitude. The country, in extreme length from north to south, is about twelve hundred geographical miles, and a little less than this in its extent from east to west. No country in the world, of the same magnitude, can be considered on the whole as more favored in climate. Like most countries situated on the eastern side of a great continent, it presents excesses of temperature, both of heat and cold, at opposite seasons of the year. The temperature is lower than in corresponding latitudes on the Atlantic coast. Even at Canton, the southern extremity of the empire, in latitude 21° north, much below the latitude of New Orleans, the mercury seldom rises to 100°, and during the nights of January it often falls below the freezing point. There is, however, considerable similarity between the climate of China Proper and that of the Eastern States in corresponding latitudes, and we learn from missionaries that the products of Northern China and Tartary have a striking resemblance to those of the Atlantic coast of North America.

Notwithstanding exceptional localities on the southern seacoast, the climate must generally be characterized as very salubrious — a circumstance, no doubt, arising in great measure from the extensive system of cultivation and drainage which is prevalent in the country.

On this vast area we find a correspondingly immense population. Much labor, and that, too, for many years, has been devoted to a solution of the problem of Chinese population, and the result has been decidedly in favor of the popular opinion of its vastness. Formerly the question was one of speculation, when the learned of Europe and America would sit in their own apartments and reason largely on the possibility and probability of the Chinese territory containing an immense population, and decide according to their several hypotheses and partialities. Now, however, we have more than probability to guide us. We have the evidence of men who have long resided in the country, and a number of estimates taken by the natives themselves, and published by order of the emperor.

To show what dependence can be placed on the Chinese reports, we may observe that the census of the whole empire is taken annually by imperial authority. This is done with the view of enabling the ruling power to ascertain the state of the country. This census is published in a work by the authority of the emperor, and occurs under the item of revenue; and as this work has been issued at different periods, it affords an excellent criterion by which to judge of the population through successive years. "In China," says Mr. Maclay, "the people themselves furnish the data for the census returns of the government; and as the government avails itself of these in conscriptions for military service and in demanding subsidies to replenish its exhausted exchequer, there is everything to induce the Chinese to understate rather than overstate the amount of their population,"

The population of China, according to the latest and most reliable information on this subject, amounts to *four hundred millions*. It is difficult to form an adequate conception of such a mass of human beings. Comparing it with the populations of other portions of the earth's surface, we find that it exceeds the combined population of Europe, Africa, and the entire continent of America. It constitutes, in fact, more than one-third of the human race.

Says the Rev. M. S. Culbertson, while writing on this topic:

"The mind cannot grasp the real import of so vast a number. *Four hundred millions!* What does it mean? Count it. Night and day, without rest, or food, or sleep, you continue the weary work: yet eleven days have passed before you have counted the first million, and more than as many years before the end of the tedious task can be reached."

Mr. Maclay, the missionary, says:

"*Four hundred thousand!* Who are they? Our brethren; bone of our bone, flesh of our flesh. *What are they?* Heathen, athwart whose gloomy night of error no ray of light ever shines; bowing down to senseless images, the workmanship of their own hands. Men, created by God; fallen, helpless; victims, morally, of a foul and relentless malady; sinking into woe unutterable; *immortals*, objects of the Divine compassion, subjects of Christ's mediation, into the mysteries of whose redemption angels desire to look, and for whose eternal salvation all heavenly intelligences are moved with a profound and ceaseless solicitude."

Dr. Medhurst says:

"One-third of the human race, and one-half of the heathen world, held by one tie and bound by one spell, one million of whom are every month dropping into eternity untaught, and, as far as we know, unsaved. How distressing to think that this nation has been for ages in its present demoralized condition, with no light beaming upon the people but that derived from atheism and polytheism, with now and then an obscure ray from a questionable form of Christianity. To see the demon of darkness reigning in one soul is painful; but to see him rampant over a whole nation, and that nation constituting a third of the human race, is beyond measure distressing, and might well induce us to exclaim: 'Oh, that my head were waters, and mine eyes a fountain of tears, that I might weep day and night for the slain of the daughter of my people.'"

The relations of China to the civilized world have greatly changed within the present century. For centuries she was a land *incog.* Early travelers visited her only to return deceived and hoodwinked, to publish to the world the most wild and extravagant stories of the boundless wealth, lavish magnificence, and wonderful civilization of the Chinese. She was a land of dreams — a fairy land — where enthusiastic travelers found every wonderful thing their imagination had conceived. Foreign governments, on successive occasions, were outwitted by her ingenious and unscrupulous diplomatists, and China was still, until within the past fifty years, a land unknown, pursuing an exclusive policy, and living in isolation from the rest of the world. But all this is changed. She has been visited by travelers and missionaries who have remained long enough to become accurately acquainted with her institutions and resources; and the indomitable perseverance of modern commerce, and the unanswerable arguments of

foreign navies, have forced open her long-closed ports, and now China is open to the commerce and intercourse of the world. Says Mr. Maclay, in his "Life among the Chinese," page 352:

"The days of China's omnipotence are numbered. No dash of the vermilion pencil can now confine 'outside barbarians' to their frigid latitudes in the 'Northwestern ocean,' and withhold from them the luxuries and 'civilizing influences' of the 'Middle Kingdom.' No more flaming dispatches will be forwarded to Pekin by bombastic governors or vaporing generals, delighting the imperial heart with poetical descriptions of the 'blowing up of foreign ships,' 'the annihilation of foreign armies,' 'driving foreigners into the sea,' 'foreigners humbly supplicating the imperial clemency,' and similar forms of speech. China is no longer isolated; no longer the *Ultima Thule* of nations. The religion, civilization, and commerce of modern times have all passed the 'Pillars of Hercules;' and henceforth, in the broad East also, are to develop their vast resources. It matters little who may now, or hereafter, fill the throne of China; the programme of his foreign policy is marked out for him by a power whose influence he cannot eliminate, whose utterances he may not disregard. During the past twenty years the influence of western governments has steadily and rapidly increased in China. It requires no prophetic vision to foresee the changes which the introduction of this element will soon produce in the affairs of this vast empire."

China is a country of vast resources, and capable of assuming the most important relations towards the other nations of the earth. Our people, more than any other, have it in their power to give tone to the spirit of progress among that vast multitude. It becomes us not to allow so great and rare an opportunity to pass unheeded and unimproved.

Benicia.—The *Churchman* says; "At the recent visit of the Bishop to Benicia, arrangements were made with the Associate Mission, of which the Rev. Dr. Breck is Dean, to become incorporated as a literary institution, with the power of conferring degrees. Besides the Dean, there are now four clergy connected with it, and others will join it from the East. The three departments will be the Theological, the College, and the Preparatory School. The name selected was the Missionary College of St. Augustine. The whole institution will now be organized with its twelve clerical and lay Trustees. There are now ten theological students connected with it, to none of whom any charge is made for board or instruction. The College must, therefore, look to its friends to sustain the expense."

Oak Grove, Stanislaus County.—A letter to the *Christian Advocate*, from this place, says that an encouraging revival has followed the quarterly meeting of January 25th. Much good has been done.

Clayton.—The Congregational church at this place, says *The Pacific*, has experienced a revival. Eight new members were received on Sunday, March 8th.

Santa Cruz.—The Methodist and Congregational churches of Santa Cruz have been holding union meetings every day during the past week.

Sacramento.—The union meetings in Sacramento are still kept up.

EASTERN.

A Pastoral Letter.—The Brooklyn *Union* has the following:

The Episcopal Bishop, Arthur Cleveland Coxe, has just issued a pastoral letter against the fashions and frivolities of American women. It may possibly concern some of the ladies of Brooklyn:

"When I see the tawdry fashions, the costly vulgarity, and the wicked extravagance of the times, I feel sure that thousands of American women are strangers to the first law of refinement — simplicity in manners and attire. When I see that thousands of American women read the most shameful romances and the most degrading newspapers, frequent the vilest dramatic entertainments, and join in dances too shocking to be named among Christians, I feel that Christian matrons are becoming too few, and that civilized heathenism is returning to the fields we have wrested from the Indians. When I read daily of the most ungodly divorces, and of crimes against social purity, and against human life itself, I feel that too many of our countrywomen are without God in the world, and that radical reforms are necessary in the systems of education on which the young women of America are dependent for their training. When I see thousands of households in which young girls are reared for a life of pleasure, without reference to duty, I cannot wonder at these results, nor at the misery in which they involve families and communities. Sow the wind and reap the whirlwind. As a Christian Bishop, therefore, I make my appeal to you, Christian women, and I ask you to begin the reformation, by faithfully bearing your testimony against all that tends to the degradation of your sex, and the more so when such crime is not only winked at, but receives countenance in circles which ought to be exemplary.

Sympathize with the godless and profane. Pity them and pray earnestly, from the heart, for them. They are, alas, not far from any of us. Now is the time to help them by words of loving counsel and faithful warning. For every day, nay every hour, it is becoming too late for some of these godless ones. As they live, so are they cut down, so do they pass on to the tribunal of the Great Judge! Do what you can in most earnest kindness for all who are within your reach. Sympathize with the poor drunkard, who has so manifestly hell within and hell before him. God has warned him, but he refuses to hear; and so God writes on his face and features in characters dismally legible, the fact that he is a drunkard. Pray for him and with him; and if need be, deny yourself for his sake.

Fortieth Street Presbyterian Church.—This church, connected with the Old School Presbytery of New York, is enjoying a great degree of prosperity. On a recent Sunday fifteen persons were received into its communion, all but two on profession of faith. During the last thirteen months, (since the installation of the present pastor, Rev. J. E. Annan,) fifty-six persons have yeen added to the church, thirty-eight of whom were received on profession, and one-third of these were heads of families, and about the same proportion were baptized on their admission. The church, at the commencement of the last year, numbered only ninety-four.

THE PERILS OF SPIRITISM.

It is a very remarkable fact that a large proportion of those who believe that the alleged 'phenomena" of spiritism indicate intelligence, and are not to be referred either to jugglery, or to the working of some occult principle akin to animal magnetism as their cause, do not hesitate to maintain that they are produced by *evil intelligences* who are actuated by malignity, and who take pleasure in beguiling men into error, tempting them to suicide, or driving them to insanity. Numbers of men and women who were at one time enthusiastic "investigators," have after attending seances, and running after mediums for years, been led to this conclusion from discovering that not the slightest reliance could be placed on the statements alleged to come from the spirits, that they continually contradicted one another, that nothing good or useful can be learned from them, but that, on the other hand, the attempt to hold intercourse with them invariably exerted an unhappy influence upon the life and character of those who gave themselves up to the pursuit.

Books and pamphlets have been written by reformed spiritists, declaring in stronger terms than we care to use, the evils resulting from the system. The Rev. Mr. Harris, formerly a zealous believer, and of such high standing in the table-tipping communion that he was at one time regarded as a worthy rival of the "great Revelator," Andrew Jackson Davis, declares that "Spiritualists of America are not only as a body pantheists, rejecting alike the idea of the Scriptures as a Divine revelation, and the existence of a God, but they are gross sensualists, and utterly immoral in their conduct in all the relations of life." Of the "literature" he says, and we think that no man of sound mind and cultivated intellect can hesitate for a moment to endorse him on *this* point: "The Spiritualist literature of America is, with one or two exceptions in a thousand cases, Pantheistic, feeble, driveling, nay, almost idiotic." These "one or two exceptions" are perhaps designed to include a volume of "inspirational poetry" published by Mr. Harris himself some ten years ago, which, at the time of its appearance, was hailed by the faithful as one of the most wonderful poetical productions in the language — too wonderful, indeed, to have emanated from any unassisted human intellect. After having been for fifteen years a prominent and highly honored spiritist, this gentleman's eyes were at least partially opened. He retained his belief in the "phenomena," and in the theory that they were produced by spirits; but he saw so much evil resulting from the teachings of these spirits, such irregularity and laxity of life, such aberration of mind, such demoralization of conduct, such errors and delusions, such pernicious and abominable doctrines, that he came to the conclusion that the only spirits concerned in the business were evil ones. He accordingly says: "The American Spiritualists are in reality a body of pagans, worshipping, like the ancient pagans, obscene and in every respect grossly licentious deities; and as regards the spirits with whom they have communication, they resemble the sorcerers and demons who took possession of men and women in the days of Christ."

He, however, in some degree qualifies these statements by admitting that a few Christian men have been deluded into the adoption of the system, or a part of it, and that so long as their spiritualism is kept in subjection to their Christianity, the observations in regard to the moral effects of the former did not apply to them. This qualification is undoubtedly a just one. There are many persons who consider themselves Spiritists, and who have not given themselves up to its more evil influences, or accepted its extreme doctrines. In fact, there is reason to believe that the teachers, writers, and lecturers who are engaged in proselyting for the "beautiful faith" do not dare to unfold the esoteric doctrines before promiscuous audiences, and especially that they shrink from a frank avowal of their views in regard to marriage and the relations of the sexes, and other points which might revolt public opinion if distinctly expressed.

The followers of Swedenborg hold the same views in regard to the nature and source of the phenomena, and earnestly insist upon the wickedness and danger of attempting intercourse with spirits through "mediums," rappings, table-tippings, etc. According to the Swedenborgian teaching, the world of spirits which is nearest to our own consists mainly of the recently deceased, and of gross and sensual spirits that cling tenaciously to the earth and its enjoyments, and it is these alone that will communicate with men. Dr. Holcombe, one of the ablest writers of the sect, thus describes that world: "It is a shifting scene; a world of judgment, of change, of coming and going. Nothing there is fixed. Two powerful currents of life run through that world; one setting towards Heaven, the other towards hell. Those who are preparing for Heaven are daily receding farther and farther from earth; because they are putting off their earthly modes or states of thought, and are becoming more and more like angels. They are being instructed in spiritual things; they are unlearning or forgetting natural things. They cannot come back to us any more than the fruit can return into the form of the bud. It would be painful, it would be injurious to their spiritual natures to take so many backward steps to be brought into rapport with us. We can go to them by making the same spiritual progress forwards; we should not wish them to be brought back to us. On the other hand, those who compose the downward current are being divested of what little truth and good they have ever had, and are preparing for hell. They are becoming more and more earthly and sensual. They experience a powerful tendency to return into this world. That being impossible, they gravitate, as it were, into the evil atmospheres of our spiritual life, and attempt to take possession of us. They are anxious to communicate with us; to knock on tables and attract our attention; to write through our hands and teach us; to compel our belief; to control our thoughts. They have all our own gross appetites and passions; more than our own falsities and errors. Operating, however, from the spiritual side, they may be inconceivably subtle, cunning, and dangerous." Now, however fanciful we may consider this picture, or however little we may be disposed to accept the testimony of the Doctor in regard to what is going on in the world of spirits, it must certainly be admitted that his theory sounds much more rational and more consonant with all that we know of the subject, than that of the Spiritists themselves. And if we once accept the hypothesis that spirits really have anything to do with the "phenomena," it seems utterly impossible to believe that they can be other than frivolous, vain, lying, and evil spirits. Can we conceive any great or good intelligence engaging in the business of table-tipping, rope-tying, dark-cabinet tricks, etc., for the amusement of a gaping crowd, or a "circle" of mental hypochondriacs? Is it not something passing simple absurdity, is it not monstrous, to believe that Bacon and Milton, Luther and Wesley, occupy themselves in attending *seances* to rap out silly answers to idle questions, in order that weak-minded dupes may enjoy the show at two bits per head, while itinerant mediums grow rich on the fruits of their credulity? The Spiritists explain the fact that deceased sages and philosophers talk such utter nonsense when they undertake to enlighten us through a "medium," by saying that there is a class of spirits who are fond of passing themselves off for distinguished men. They also admit that, as a general thing, the statements of the spirits cannot be relied on, and that it is not safe to follow their advice, all of which goes to confirm the theory of Mr. Harris, Miss Fox, Dr. Hatch, and numerous others who have renounced the system that the "phenomena," if produced by spirits all, are produced by evil, or low and frivolous beings.

It is not a little remarkable that a hundred years before the rise of modern Spiritism, Swedenborg should have taken such pains to warn men against the dangers of intercourse with spiritts. When reading some of the passages in which he treats of this subject, it almost seems as though he were personally acquainted with this system of modern demonology, its *seances*, mediums, teachers, and lecturers, together with all the demoralizing effects which it has produced and is producing. Not only does he teach that there is danger of being led into false doctrines by these influences, but also into evils of life that will endanger the salvation of the soul. He says that when a man's mind is laid open to spirits, they "enter into the whole of his external memory;' that they know his thoughts and wishes better than he does himself, and can make him think and believe what they please. They can confirm him in his errors of opinion, and in all evil ways. This influence, however, cannot be acquired without the coöperation of the individual. It is only those who seek the spirits and have voluntary intercourse with them, who can be injured by them.

Dr. Holcombe, in his "Our Children in Heaven," has the following curious passage: "The vast majority of spiritual communications are utter delusions, the information of the medium not extending one hair's breadth beyond the natural range of our spiritual forces. To illustrate: Some poor mourner visits one of the mediums to receive a message from a lost friend. The medium consents. The spirit proceeds to describe the deceased person with the utmost accuracy. Incidents are recalled, which have long been forgotten by the applicant himself. The medium will write something on paper in the well known handwriting of the lost friend. There is no mistaking it. If the questioner shakes hands with the medium, he will feel exactly the remembered pressure of his friend's hand, distinguishable from all others. He then delivers some message about family matters, indicating a most unexpected acquaintance with the business of other people. The inquirer is confounded. His conviction is forced. It seems a miracle, or a veritable communication from his deceased friend. * * * * The spirit acting through the medium may never have seen the deceased person, or heard of him. The latter may be away off in Heaven, and know nothing whatever of the trick imposed on his earthly friend. The spirit who actuates the medium *has entered the natural memory of the questioner and reproduced everything from its recesses.* If he could make himself visible to the natural eye, he might assume the exact

form of the deceased so that escape from his deception would be impossible." When we shall have witnessed some of these wonderful things, and have become convinced that spirits are concerned in producing them, we shall unhesitatingly adopt Dr. Holcombe's theory. Most assuredly no lofty and purified influences can be engaged in such ignoble business. But no matter what is the cause of the "phenomena," whether it be magnetism, or "odic force," or demons, or disembodied human spirits, or whether the whole system is one of imposture and jugglery, there can be no question as to the evils that have resulted from it, and the demoralizing effect which it produces upon its devotees.

This article having already reached an extreme limit, we shall be obliged to reserve what further we had designed to say on the subject for a future number.

PASTORS — THEIR WORK — THEIR SALARIES.

A correspondent writes us for information respecting the work to be performed by pastors, according to the Presbyterian polity, and the methods adopted by the churches in raising their salaries. The theory of our Church is, that ministers should devote their whole time to their calling, and that therefore they should receive from those who enjoy their service an amount sufficient for the comfortable support of those who are dependent on them. This amount, of course, will vary with the location and circumstances of all concerned.

The duties of a pastor, as indicated by our Book, and by the practice of the Church, are preaching of the Word, and superintendence of the spiritual welfare of the congregation, in which is included the maintenance of such social religious meetings as the session may deem to be necessary; general pastoral visitation, at the discretion of the pastor; care of the sick, and burial of the dead; with the stated and regular administration of the ordinances of the Church.

The salary of a pastor is raised by either of the following modes, no mode being prescribed by authority. The slips being owned by the church, they are rented by auction, or private arrangement, and the proceeds are appropriated for the pastor's support, any deficiency being made up by subscription. The slips being bought by individuals, they are subjected to a tax, a certain valuation having been determined by the Trustees. The slips being free, the salary is obtained from permanent subscriptions, which cannot be discontinued without notice for a given time. The slips being free, the pastor consents to receive as his salary what may be subscribed from year to year, or what may be given in collections on the Sabbath, releasing the Trustees from any further obligation.

By our polity the pastoral relation is permanent, so that, when regularly installed, the obligations assumed by both parties take the nature of a legal contract, and are binding until the relation is dissolved by the Presbytery.

APPLYING THE BRAKES.

It is one of the essential conditions of successful railroading that each train should have one or more experienced brakemen, whose duty it is at proper times to apply the retarding force. It is necessary that these men should be intelligent and well disposed, for at times the lives of the passengers depend on their fidelity. The brakeman is able greatly to embarrass the progress of the train by simply applying, at unsuitable times, the power entrusted to his care. He may "down brakes" without authority, and convert the inertia of motion into that of rest. It is to this abuse of his function that we now refer, because it fitly symbolizes the attitude occupied by many in the Church. They are continually turning on the brakes. If any new plan for developing the energies of God's people is proposed, they immediately fear too great speed may be attained. It is a well known fact that one stalwart brakeman can stop a whole train, and it is a matter for surprise that the Church makes slow progress when so many of her members are either consciously or unconsciously keeping down the brakes. One of the most important qualifications for the pastorate at the present time is an executive ability adapted to develop the dormant energies of the Church, which, like the forces of nature in the coal beds, have to be exhumed before they can be available, and which are now employed rather in retarding than promoting the progress of Zion — an ability to get work out of others — out of the private members of our churches, too many of whom are occupied in the pernicious practice of applying the brakes.

Principals.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from Boston.

Boston, March 3d, 1868.

In contrast with the rough and forbidding weather of last month, a welcome dawn of clear and cozy days shines over New England. Skies so pure, suns so radiant as those of three days past seldom favor, in March, this rocky, restless, breezy Atlantic coast. It is as if a band of vernal days had come from Florida, like a flock of genial passenger-birds, and alighted to rest on the cliffs of New England. But winter has not yet abandoned his domain, and it will still be many weeks before field and forest, grove and garden will rejoice in that warm, balmy atmosphere which will re-invigorate the vegetable world. In the six Eastern States winter lingers long in the lap of spring.

PUBLIC SCHOOLS OF THE CITY.

Arriving in the city by the morning train, I met with the able Superintendent of Schools, Mr. Philbrick, and it required no persuasion to induce me to accompany him in a visitation to several of them. The schools of Boston have a well-earned reputation, and so ably are they conducted that the aristocracy, however much it may be against their taste, are compelled to send their sons and daughters to them in order to secure for them the highest educational advantages. These schools are a genuine democracy. The sons of the day-laborer and the millionaire stand side by side, and enter the arena of intellectual discipline and culture on equal terms. Each boy stands on his own merits. If a lad makes a fool of himself, he is plainly told so by his playmates, whether he lives on Beacon or Back Bay Street. As it was when Benjamin Franklin was a day scholar in one of these schools, so at this day it rarely happens that the sons of rich men carry off the honors of the school-room. Not that nature seeks to compensate the poor by a higher intellectual endowment, but there is in the home training of the children of the wealthy that which often paralyzes the love of effort, and makes them thriftless, purposeless, valueless. How thoroughly is the proverb established that wealth and business capacity remain in the same family seldom more than two, and usually only one generation.

I may be mistaken, but it seems to me that in the choice of persons to constitute the "Board of Education," the voters of Boston make a more judicious selection than is customary in other cities. There is far less complaint in this department than in any other. In truth, I learn from good authority that for fifteen years no censure of the proceedings of the Educational Board has been of sufficient moment to find expression in the city journals.

THE WHEEL OF FORTUNE.

Boston is a very rich city. The wealth, however, is far from hereditary. A large majority of the solid men of to-day came to the city years ago, from the country, clad in homespun. Theodore Parker used to say that were it not for the annual levy made upon the remote farming towns for recruits, Boston, in a third of a century, would entirely lose her "breed of noble men." In all probability the efficient business men of the city in the next generation will be, not the sons of the present men of opulence, but the bare-foot Irish and German lads who are now living in the lanes and suburbs. To-day I met a wholesale grocer who, I well remember, used, thirty years ago, to sit beside me on an oaken bench in an old country school-house. During the fall he would gather beech-nuts, which in the winter he would sell for pins, then trade off the pins for goose-quills, and the goose-quills for coppers. To-day he is worth $250,000, and lives in a brown-stone front at the West End. *His* boys don't peddle beech-nuts.

The "Liquor Traffic" question — or in other words, the subject of the sale and use of intoxicating drinks in the community, continues to be a leading topic of discussion in Massachusetts. In the State election last November, the main question before the voters was: Shall the present prohibitory law, with the constabulary force to maintain it, be sustained — or shall it be repealed and a judicious license law take its place? The popular vote was in favor of the license system.

But during the session of the present Legislature, the advocates of the license system find it a difficult task to frame a satisfactory bill. The truth is, they are a heterogeneous mass, and cannot harmonize. The bill which promises to become a law is obnoxious to the "rank and file" of the whisky venders. They denounce it as designed "to establish an aristocracy in the traffic, giving to a favored few a monopoly of the business." No doubt so careful and guarded a law as the one now likely to be sanctioned by the Legislature is not the one *they* voted for last autumn. The friends of prohibition say that in less than three years Massachusetts will go back to a policy essentially the same as that of 1866–67, the annoying features of that system being omitted.

THE MAINE LAW AND ITS OPERATION.

Temperance legislation had its origin in the Eastern States twenty years ago. As it is destined to be a living question on the Pacific Coast, a brief view of it may be interesting to the readers of The Occident. The prohibitory system had its origin in Maine, becoming a law in 1853. It was generally designated "The Maine Law," and with slight modification, was soon adopted by all the New England States. Its essential features were as follows:

The appointment by the Governor of a State Agent, at some central location, who is required to keep a supply of unadulterated wines, brandies, rum, gin, and whisky. These he is required to furnish to the special town agents, one of whom is appointed by the authorities in each town. The town agent is under bond and oath to sell only for 'medicinal and mechanical purposes,' to persons in his own town.

Such are the leading provisions of the laws which still, in a majority of the Eastern States, regulate the sale of spirituous liquors. They demand entire prohibition, save under the authority of the State itself.

Of course, there was then, as now, a large minority in all these States whom interest or inclination led strongly to oppose the workings of the law, and who were determined to evade it. They argued that it infringed upon their personal liberty; that the selling of a glass of liquor was a personal matter between two individuals with which the State had no right to interfere — and that such interference was contrary to the meaning and spirit of our Republican Government.

At first the evasions of the law were carried on in a stealthy way. Hotel-keepers removed their bars down to a basement closet, where brandy and rum punches were dispensed by candle-light. Saloon keepers kept their cigars, oysters, soda, and cider in front; but in a back 'room which none but the initiated were permitted to enter, there was a choice supply of all things warming and exhilarating.

Only a few sold openly and defiantly, and they were arrested and fined. As a second offense doubled the fine, and a third added ninety days' confinement in jail, they either abandoned the business or joined the majority in a clandestine traffic. The law though ostensibly, was by no means thoroughly enforced. The friends of the law were oftentimes lenient. In some towns they, not verbally, but practically, said to the liquor-sellers: "If you will not sell publicly, and will not offend the public sense by furnishing those who are already on the verge of intoxication, we will not molest you." Acting on this tacit understanding, liquor dealers, in a cautious way, plied their vocation diligently, and the amount of sales in the Eastern States, though far less than formerly, was still large in the manufacturing cities and towns.

Yet, it cannot be denied that the prohibitory law has accomplished much — that its effects have been beneficial, and, driving the traffic from an open to a covert position, has rendered it less respectable, and therefore less dangerous to the community. Well raised young men were less liable to form habits of tippling. Drunkenness was more odious than when the unrestricted sale of intoxicating drinks prevailed. In 1860, intemperance was far less prevalent among the farmers and mechanics of the Eastern States than at any previous decade of their history.

EFFECTS OF THE CIVIL WAR.

"The miner and the mariner, of all others, are most liable to become drunkards," said Sidney Smith in one of his Edinburgh essays. He surely ought to have included the soldier. War has always been the direst foe to good morals, and a military campaign often demoralizes the youthful soldier who has withstood all other temptations. This was so in the Revolution of 1776. It was equally so in the Rebellion of 1861. With the surrender of Lee in 1865, the northern soldiers returned home, and many carried with them habits of drunkenness and debauch. The liquor saloons and brothels had a large increase of customers. Those who felt an interest in the well-being of society were with good cause alarmed by the increase of crime. In this State, especially, the Executive was appealed to to enforce the Prohibitory Act. In the rural districts this was comparatively easy to be done, but in Boston, the headquarters of the liquor traffic, it was found that the Sheriff and his deputies did not engage in the work with the earnestness which commands success. They were ready to arrest Patrick O'Brien and Ann Murphy on Endicott Street, but were unwilling to incur the resentment of the respectable wholesaler on Kilby, and the wealthy and fashionable saloon keeper on Court Street.

This led to the organization of the "Constabulary," or a force of State Constables, authorized by the Legislature, who had authority to search premises and make arrests in any part of the State. No doubt some of these special constables erred in the discharge of their duties, and in some cases unnecessarily annoyed those suspected of violating the law. In any event, the "Constabulary" became obnoxious to the "middle class" of voters, who had sustained the prohibitory law as previously carried out. The position of the late Governor Andrew also, had a marked influence in giving the license party great strength at the polls. Like the brave and strong man he was, he met the question boldly, insisting that alcohol was food — wholesome, nutritious — liable to abuse, like all good gifts, but healthful and invigorating when properly used. He maintained that its sale should be *guarded* and *re-*

stricted—not prohibited. Believing that his position was unsound, I now, as then, object to the conclusions at which he and his friends arrived.

But this letter is already too lengthy. I shall post your readers as to the final action of our Legislature in my next letter. MONADNOCK.

Letter from China.

PEKIN, January 21st, 1868.

It gives me great pleasure to respond to your request for information in regard to our work in China, and especially at the Capital. We have no large accessions to the Church of Christ to report, but we hear that the "sound of a going is heard in the tops of the mulberry trees" of the south, where the work has begun to yield its fruits.

As for us, we still believe that our work is not in vain in the Lord, though, from the nature of our field, immediate results are hardly to be expected. There are five Protestant missions located in this Capital, and four of them have succeeded in gathering little companies of disciples, varying from ten to fifty in number; but the influence of these missions is not to be estimated by their numerical accessions.

The fact of our being here is felt as a power in every part of the land where a missionary goes. He tells the people the Capital has opened its gates to the Gospel, and this simple announcement has a powerful influence in inducing them to open to it their doors and their hearts. They have thus succeeded in obtaining a permanent footing in places where it would otherwise have been impossible. There are some situations in which it is "strength to sit still." But, as I have already stated, the Gospel has here begun to yield an early harvest, though not, as yet, a very abundant one. The few scores already gathered here are more than could be counted in any other mission in China, at the same stage of its existence. There are, too, other departments of labor besides the direct preaching of the Gospel, in which we feel called to engage.

One of these is the preparation of books. Some of us are preparing the New Testament in the Mandarin dialect, so that it may be intelligible to all classes in the north of China. This work is now drawing near its completion, and when finished, will we trust, prove to many a benighted family a light in the dwelling. Books of science, also, require to be prepared. These, though not the Gospel, are powerful auxiliaries, as they overthrow superstition, stimulate thought, and lead an idolatrous people to look "through nature up to nature's God." A work on natural philosophy, on which I have been engaged for a long time, is now being published in eight volumes, at the expense of the Chinese Government.

Another department is that of education. In this we sow the seeds of future harvests, and train laborers who are to succeed us in giving the Gospel to their countrymen. The missionaries have had under their care four schools for boys and three for girls. In one of the former, of which I have charge, there are twenty-one pupils, who for intelligence of mind, correctness of deportment, and proficiency in study, would compare well with the same number anywhere in our own country. Five of the older ones have professed their faith in Christ, received baptism, and of these four are preparing themselves to teach the Gospel. The fifth has obtained a scholarship in the new Imperial College, in which he will seek to become a *Mandarin*.

This last named institution is among the most cheering features in the present horizon of China. You may have seen my account of it in the New York *Times*. It is established by imperial decree, for the express purpose of introducing into China the sciences of the West. The pupils are not to be boys, but men of years and culture, who have achieved a standing as scholars in their own literature—the elite of the flowery land, as regards intellect. The institution opened a month ago with sixty students, and the number is to be increased from year to year. The staff of professors consists of five—four from Europe and one American—your present correspondent.

The Embassy soon to arrive on your shores is another notable sign of progress. It shows that China is willing to accept the right hand of brotherhood, and acknowledge herself as one among the family of nations. She courts our friendship, values our knowledge, and professes her willingness to learn. Together with human science, may she be willing to receive that wisdom which cometh down from above.

In this letter I have only adverted to general features of our field and work. You may regard it as introductory, and in those I send you hereafter, I may enter more into detail. Without details no description can be graphic, or well adapted to interest a congregation or a Sunday School.

The new line of steamers brings us into closer neighborhood, while it will awaken among you a deeper interest in China, it will enable China to become better acquainted with our country and its Christian civilization.

Yours, very truly, W. A. P. M.

The American Sunday School Union.

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

Congregational Singing.

ROBINSON'S SONGS OF THE SANCTUARY. Hymns and Tunes for Congregational Singing. 35,000 copies already sold. Editions for Congregational, Presbyterian, and Baptist Churches. Price, $2 50. A liberal deduction to churches for first introduction.

HENRY WARD BEECHER'S PLYMOUTH COLLECTION. 75,000 copies sold. Congregational and Baptist editions, $2 50.

EPISCOPAL COMMON PRAISE. Appropriate Tunes for all the Psalms and Hymns in the Book of Common Prayer, with select chants. Just published. $2 75.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

Current Literature.

RECENT PUBLICATIONS.

THE QUEENS OF AMERICAN SOCIETY. By Mrs. Ellet, author of "Women Artists," etc. Published by Charles Scribner & Co., New York. San Francisco: H. H. Bancroft & Co.

This volume of 360 pages contains notices of more than three hundred American women. Of nine-tenths of these, however, little else is written than a mere mention of their names. Of course Mrs. Madison, Mrs. Alexander Hamilton, Mrs. John Jay, and others of "Revolutionary memory," are faithfully described; and with equal fullness and fidelity the author portrays many modern celebrities — Mrs. J. K. Polk, Mrs. J. C. Fremont, Mrs. J. J. Roosevelt, Mrs. J. W. White, and Mrs. Coventry Waddell, of N. Y., Miss Emily Mason, of Virginia, Mrs. J. J. Crittenden, and many others residing in various sections of the Union. The fairer portion of our readers must not regard themselves as slighted because the "Queens of California Society" are omitted in this work. Mrs. Ellet has never visited this coast, and limits her notices to the society in which she moved — that of the Atlantic States.

The work is not entirely free from affectation, yet it takes a sensible view of American female society, and, we think, truthfully describes the best phases of social and fashionable life in this country. There are thirteen original steel portraits. The book is really one of interest. Toward the close of the book Mrs. Ellet takes the following view of recent changes:

"It may be seen from the brief history given in the foregoing pages, that the ladies most prominent in fashionable life — from the Republic's early days to the present time — have been noticeable for more than merely frivolous distinctions. They have been women of superior mind and culture. This intellectual element, with the benevolent activity and moral worth of our leaders, has given an elevated tone to the *best* society in New York, of which the country may be justly proud. This should be remembered when Europeans, or critics among ourselves, are disposed to sneer at American fashionable life and manners, confounding the really superior class with vulgar pretenders, unworthy to be named with them.

* * * * * * * *

It is undeniable that changes, and changes not for the better, have taken place during the last few years in American social life in every quarter of the Union. They have been most perceptible in New York and at the most popular watering-places; chiefly Saratoga and Newport. There, to be "fast" has been to lead the ton. In 1865 the great feature of the season at Newport, among the lively folk thus designated by the grave and dignified, was the driving of "four-in-hand." One young lady drove a three-in-hand of tiny ponies, that looked like playthings. Another 'took the wind out of all the female sails,' by appearing in a 'turn-out' with four black ponies; a groom riding a fifth in the rear. The Brazilian dames, said to have worn head-dresses composed of small gauze balls, each imprisoning a fire-fly, were outdone by a New York lady at a fancy ball given by her. She personated 'Lyrus,' wearing on her head a wreath of flowers, while over her forehead rose a lyre composed of tiny gas-lights, fed from a small reservoir concealed in the dress, and flashing as she moved her head.

"Since the condition of things during the war enabled men to amass fortunes in an incredibly short time, and the discovery of oil in almost worthless lands gave them suddenly immense value, the 'shoddy' and 'petroleum' element has been prominent in circles composed of wealthy persons inclined to scatter their money profusely for the purpose of display. These leaders of gayety flutter in the admiring gaze of the stupid and ignorant masses, but they are not worthy to be named in the same category with those who can boast better claims to distinction than merely the possession of money. It is not worth our while to treasure the names of ladies of this order, who have made themselves conspicuous entirely by the extravagance of their entertainments, the excessive costliness of their dress, or their disregard of all feminine discretion. It is very easy to create a sensation in New York or any other large city. Where there is a display of unbounded wealth, such old-fashioned articles as morality and good taste are often despised. During the season of 1865–66, six hundred balls, more or less public, were given in that city, and it was estimated that seven millions of dollars were spent by the ball-goers; the average cost of a suitable dress being a thousand dollars, without jewelry. Frequently ten thousand dollars might be seen glistening on one fine form; the cost having increased since diamond-dust became a necessity in a lady's toilet.

"Of course these public balls are not attended generally by fashionable people, but their extravagance shows the tendency in popular taste. The wildest stories are extant in current gossip about those dames of the gay world. To rise and reign among the money-worshipping idiots of this kind of fashion in New York — to hold the metropolis in admiration — it is only necesary to possess millions and scatter money lavishly for show. No matter how the riches are obtained; dishonesty, cruelty, repudiation of debts, even fraud, provided it comes not under the ban of law, are lost in the brightness with which wealth covers its possessor. But such worse than vulgar parvenus dare not aspire even to admission to the society ruled by ladies such as are illustrated in this volume."

EDUCATIONAL.

Negatives.

According to Prof. Owen, no unequivocal fossil remains of the sheep have as yet been discovered. According to President Felton, (ridiculing the modern fashion of "nursing the leg,") there is not one among the remains of ancient art representing a man, woman, god, or demon, sitting cross-legged. (Notes to the *Clouds* of Aristophanes.) According to Daniel Webster, (in an interesting digression which we heard him make in the Day rubber suit,) there is no acknowledgment in the works of Francis Bacon of the labors of his great predecessor and namesake, Roger Bacon. All these statements, it will be perceived, are negative in their character; and, from this very circumstance, impress us with the profound investigations of their authors in the fields of geology, ancient art, and Baconian literature. To know what is *not* in a certain place implies a more thorough search than to know what *is*. Persons engaged in self-culture may derive a hint from this truth. To test your knowledge of the subject you have in hand, see how many negative statements you can make respecting it; how much you are able to deny concerning its character, its nature, or its relations.

C.

Women on the School Committee.—In the Massachusetts Legislature the bill legalizing the appointing female members of the Town School Committees is under consideration, with the probability that it will become a law. The bill was introduced by the unanimous action of the Legislative Committee on Education; and the Committee, aside from all other considerations, had the recommendation of the State Board of Education in favor of the project. A paragraph in their annual report reads as follows:

"In all our towns it is difficult to find men to put on the School Committee, who have both time and ability for the work. But in all our towns there are women who have had experience in teaching children, who are deeply interested in education, and who, moreover, have ample time to attend to the business. Some towns in the Commonwealth have already chosen women on the School Committee. But as the legality of this proceeding has been doubted, and as the advantages of it, in many instances, are unquestionable, this Board would recommend to the General Court to pass a law, distinctly authorizing any town in the Commonwealth to put on the School Committee a certain proportion of women, unless the present law be considered adequate."

We notice in the eastern papers the death of Miss A. C. Haseltine, of Bradford, Massachusetts, who died on the 13th ult.; a lady whose life has been one of eminent usefulness. She became Preceptress of the Bradford Academy in 1815, and remained in that position until within a few years past, when the infirmities of age enforced her retirement. During this long period she educated many thousand young ladies, who have since occupied positions of public and private usefulness.

A gentleman who wanted to make a speech to a Sunday School thought he would adopt the colloquial style, and this is what happened:

"Now, boys, what does a man want when he goes fishing?"

A shrill voice in the crowd went directly to the point with,—

"Wants a bite!"

The Lyndon (Vt.) *Times* relates how a schoolboy named George Dow took a whipping at school so much to heart that, coming back after a good many years from California, and seeing his old teacher, Rev. George Craven, of Danville, he followed him and beat him so severely that a physician had to be called in. Dow then started for California again to avoid arrest.

CONTRIBUTIONS.

Who are Beggars, and What shall we Do with Them.

The increasing number of this class calling at our doors demands attention. We cannot shun the question they present. We must either repel or encourage them. What is duty? It cannot escape our notice that the great majority are of the Roman Catholic religion. There is something in Protestantism which causes those trained under its influence to revolt at the thought of begging to supply their wants. They will work, suffer, sometimes starve, but not often beg. Our beggars are mostly Catholics. Scores of them are upon us every month, especially in the winter and spring seasons. Sometimes it is the stalwart Hibernian, with his voluble plausibilities, which, if not true, generally do great credit to his inventive genius, asking that, for the love of God — never for the love of *Mary*, for he knows that he is begging of Protestants — you will give a poor man a few bits to get him a night's lodging, or help him on to friends that will furnish him work.

Sometimes the olive complexion and peculiar features betray the Spanish or Italian race, and in tones whose sadness mimics the wail of the cathedral dirge, the plea is made with languidly plaintive looks and signs, in a tongue to most of us unknown.

Now, one does not wish to turn away "God's poor" empty or cold, if they are His. He does not wish to prepare the answer for himself, "I was hungry and ye gave me no meat," etc. And yet he does not wish to turn his benevolence into an encouragement to idleness and vice. What ought we to do? Many adopt the rule to always offer them food — nearly all of them have good appetites — but never give them money. Perhaps this is the safest plan for Christian charity. Still we have a right to

ask whether the Church of Rome, with her immense wealth, ought not to take care of her own poor? It is often remarked that these Catholic beggars do not go to members of their own communion for help. I will not affirm this, for I have not been able to observe widely enough to justify the assertion. I cannot in charity believe that there is good ground for the wide-spread belief that the priesthood of their church encourage them to beg their living of Protestants; but it cannot be improper or unchristian to suggest that their spiritual guides should use their influence, known to be very powerful with the membership of their own communion, to relieve the public as far as possible of imposition from this source. As now going on, it is a scandal to that church.

ALETHES.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Family Reading.

Cardiphonia.

BY MRS. JAS. NEALL.

If the hard heart must be smitten, ere the springs of life can flow,
As the waters locked in Horeb gushed beneath the prophet's blow;
If the vail before the temple where our idols are enshrined
Must be rent in twain to teach us we are weak, and frail, and blind;
If the whirlwind and the fire must the "still, small voice" precede,
Wakening in our souls the echo — hope is but a failing reed;
If the waves which overwhelm us may not in their wrath be stayed:
Grant us still to feel, oh, Father, "It is I — be not afraid."

If beside our household altars we grow weary of our trust;
If the wing of faith is broken, and her pinions trail in dust
If we faint beneath our burdens as we vainly question why
All our springs of consolation and our wells are dry;
If our cup from Marah's fountain be replenished o'er and o'er,
Till the dregs are drops of bitter, earth has not a solace for;
Though our strength be born of suffering; though our hearts be sore dismayed;
Oh! sustain us with Thy Presence — "It is I — be not afraid."

If our pleasant pictures fading leave a back-ground of despair,
Let a ray of light from Heaven beam upon the darkness there —
As in some old time-worn painting, which the dust has gathered o'er,
Light discloses to the gazer beauties all unknown before,
So the bright rays piercing downward through the mist which round us lies,
May illume life's darkened canvas, and reveal before our eyes
Glimpses sweet of pleasant waters, where our footsteps shall be stayed,
As we hearken to the whisper: "It is I — be not afraid."

It may be the spirit strengthens, and the soul grows pure and white,
When the clouds of sorrow darken, and all starless is the night —
That within their gloom is gathered gentle and refreshing rain —
Every little germ of patience quickening into life again.
But we fain would come before Thee ere the evil days draw nigh,
Ere the sun and moon are darkened, and the clouds are in our sky;
While life's "silver cord" is binding us to gladness and to mirth,
And its "golden bowl" is filling from the choicest founts of earth.

While the fragrance and the beauty of our morning round us lies,
We would of the heart's libation pour to Thee a sacrifice,
Trustful that the hand which scatters "blessings every morning new,"
Would refill the urn of offering, as a floweret with the dew;
Pure and sweet the exhalations from a grateful heart to Heaven:
Unto Thee, then, be the incense of our Cardiphonia given.
Ere the noontide sun shall wither, or the gathering twilight hour
Close the overflowing chalice of the morn's expanded flower.

— *Wheat Sheaf.*

The Bible.

The Rev. Prof. Leonard Wood said: "When I commenced my duties of professor of theology, I feared that the frequency with which I should have to pass over the same portions of Scripture would abate the interest in my own mind in reading them; but after more than fifty years of study, it is my experience that with every class the interest increases."

Daniel Webster said: "From the time that, at my mother's feet, or on my father's knee, I first learned to lisp verses from the Sacred Writings, they have been my daily study, and vigilant contemplation. If there be anything in my style or thoughts to be commended, the credit is due to my kind parents in instilling into my mind an early love of the Scriptures."

Fisher Ames said: "I will hazard the assertion that no man ever did or ever will become truly eloquent without being a constant reader of the Bible, and an admirer of the purity and sublimity of its language."

The great Milton said: "There are no songs compared to the songs of Zion, no orations equal to those of the prophets, and no polities like those which the Scriptures teach."

Even the brilliant infidel Rousseau said: "I must confess to you that the majesty of the Scriptures astonishes me; the holiness of the evangelists speaks to my heart, and has such strong and striking characters of truth, and is, moreover, so perfectly inimitable, that if it had been the invention of men, the inventors would be greater than the greatest heroes."

Long Sermons and Long Other Things.

A lawyer who consumes three hours in arguing a question of law relating to the ownership of a barrel of apples, is indignant at his minister for exceeding twenty-five minutes in unfolding one of the great principles of morality, on the observance of which the tolerable existence of society depends. The judge who fills two hours with his "opinion" on the right of the counsel to challenge a witness, grumbles at his minister because he has prolonged the discussion of fundamental laws of human existence to thirty minutes. The physician who takes ten minutes to prepare the medicine for a headache is nervously restive if his minister spends only twice as many in attempting to relieve a chronic heartache. The belle who has spent — how long? — in adjusting the bows of her bonnet, is remorseless in her criticism on the minister who does not finish his meditations on the character of God in fifteen minutes. The fop, who has combed and perfumed, and waxed his moustache for an hour, is mortified past endurance if the poor minister is not through with his discussion of immortal life "inside" of twenty minutes.

THE YOUNG FOLKS.

The Magpie.

If I were to ask you what the magpie is like, you would probably say that he wears a very decided coat of white and black, and nothing else. So most people think who have only looked at the magpie from a distance. Even our eyes are not always to be trusted, though the proverb does say, "Seeing is believing;" and one good thing about all Natural History is, that we learn from it that it does not do to take things for granted. We must watch and observe very closely and very patiently before we can be quite certain — an excellent habit, which will apply to other matters and objects besides birds, beasts, and fishes.

There is no question about the *white*, the beautiful snowy white on the magpie's breast and wings, but as to *black*, I doubt if he has a single quite black feather about him, at any rate, not many; they are all blue and steel, and purple and green, so dark and shiny that they pass for black a little way off.

The magpie's chosen haunts are tall clumps of trees; but you may often find it, alas! in a large wicker cage, outside a cottage or farmhouse window, and can there admire at your leisure its burnished plumage and bright, saucy-looking eye. It is so quick at learning, and so lively, and familiar, and amusing, in its captivity, one must hope it is almost happy there; so easily tamed, too, that it is often allowed its liberty without returning to a wild state. But a tame magpie does mischief enough, I can assure you; it will steal things out of the pantry, carry the very things you may want into some sly corner where you may never find them, hop away with the linen as it hangs out to dry — and all apparently for the very love of mischief. Yet, withal, Mr. Magpie is so clever and knowing, his faults are borne with and forgiven.

In its native state, it only utters a harsh, unmusical note, something like the falling-to of an iron gate; but it is so quick at imitating, it may be taught to copy any sound it hears. Not only will it crow like a cock and bark like a dog, but it will also imitate musical notes. In the olden days of ancient Rome, a barber, whose shop stood in one of the principal streets, possessed a magpie of wonderful skill in copying what it heard. Conquering generals returned that way to their homes in triumph, and many a stately pageant marched by the humble barber's shop to the sound of military music. One day a remarkable flourish of trumpets announced the approach of some such procession; the magpie heard, then grew quiet and pensive, refused its food, and seemed as if it was pondering something in the depths of its magpie brain. Three days passed by, and at the end of them the magpie gave forth the flourish of trumpets, to the astonishment of his master and all who came to listen.

Magpies live in pairs all the year round; and if you see one, another is sure to be somewhere near; sometimes two or three pairs will fly around together, and country people used to be silly enough to think certain things would happen to them, according to the number of magpies they chanced to see. Let us hope that by this time everybody has learned there is no such thing as chance in a world of God's making and God's upholding, and that nothing can happen to the very least of us without His ordering and permission.

The magpie's character, as you will have seen by the tricks it plays, is anything but trusty. It will make a great hue and cry when a hawk is near, and so it does service to the small birds; but I am sorry to say it does a good deal of stealing on its own account, often sucking the eggs of pigeons and fowls, and even pouncing upon the weaker young ones.

The magpie's nest is very curious, and unlike any other; it has a dome like the tomtit's, woven together of sticks, but in addition to this it is stuck all over with thorns in a most formidable manner, especially about the entrance; there it is so doubly barricaded it is hardly possible to force the way, and he must be a bold boy who would venture the attack unless armed with a knife or a hatchet. The nest is very large; it had need be, or the bird would be puzzled to know what to do with its tail, which is eleven inches long. Generally it is built on high trees, but it is also found in thick bushes near the ground; everywhere it is placed with such care in the thickest part, and is so strongly guarded by the interlacing thorns, that the magpie's nursery stands a good chance of safety.

The magpie is so cunning, though, that in making the nest it leaves a weak place behind, and then, if an alarm should come in front, it escapes by making off through the back door.

There is an old fable about the nest which you may like to hear.

Once upon a time, the birds, finding out that the magpie made a capital nest, agreed to go to him and ask him how he set about it. So they came in a body to seek advice from his superior wisdom.

"Well, I will show you how I do," said the magpie, politely. "I first lay two sticks across *so*."

"Yes, yes, I said that was the way," chattered the starling.

"Then add a few more, like this," the magpie went on.

"Who does not know that?" said the jay, saucily.

"Then fetch a little moss and wool."

"To be sure; why *we* could do that!" muttered the jackdaw.

"Gentlemen," said the magpie, "I see you are quite as able to build a nest as I am, so I wish you a very good morning." Then he bowed in a very dignified manner to the company, and flew away. So, to this day, the other birds have only been able to build half a nest.

Thus we see how silly it looks to go to other people for advice, and then appear to know as much about it ourselves. We shall not find that the way to grow wise any more than the birds did. No, if you are ignorant of any subject, never be ashamed of saying so, and of asking at once for information. You need only to be ashamed of the pride which makes you wish to conceal your ignorance instead of seeking for information.

So the magpie reads you this little lecture, and will now fly away again to his tall trees. — *Child's Companion.*

MISCELLANY.

Astonished Red Men.—The Owyhee *Avalanche* tells of a band of Indians who made a sudden attack on a detachment of soldiers in the mountains. The soldiers had a mountain howitzer mounted on a mule. Not having time to take it off and put it in position, they backed up the mule and let drive at the Indians. The load was so heavy that the mule and all went tumbling down the hill towards the savages, who, not understanding that kind of warfare, fled like deer. Afterwards one of them was captured, and when asked why he ran so, replied:

"Big Injun not afraid of little guns or big guns, but when white men load up and fire a whole mule at Injun, me don't know what to do."

After Mr. Frederick Douglass' lecture at Ann Arbor, a short time ago, a son of a United States Senator, attending college there, stepping upon the platform, advanced to Mr. Douglass, extended his hand and remarked:

"My name is ———; I am the son of a United States Senator."

"Are you?" said Mr. Douglass; "I have reason to believe that I am, too."

Mexico has a population of 8,000,000, and not more than thirty miles of railroad; and yet it is so rich that in times of ordinary quiet, for that country — equivalent to intolerable disorder in most others — the annual exportation of silver alone is twenty millions of dollars.

A paper accounts for the fact that some persons always go out of a concert-room just before the last piece, by supposing that they are servants who have received permission to stay out only a part of the evening.

Some of the members of the new bachelors' club in Lexington Avenue, New York, who became members because they could not "afford to marry," are said to have incomes of $20,000 to $30,000 a year.

An Indiana judge disposed of a couple at Lafayette recently, by sending the husband to the penitentiary and marrying the remainder. The happy couple then went to Indianapolis on a wedding trip.

Young Steele, the oil millionaire, whose income three years ago was $2,000 a day, is now said to be a teamster at the oil works he once owned.

GENERAL NEWS.

A foreign letter in the New York *Post* describes a remarkable discovery recently made in the island of Antiparos, in the Grecian Archipelago:

"A vast cavern has been found, containing an infinite number of marble sculptures, representing with wonderful fidelity all sorts of plants and trees. It is a subterranean garden, where every stone, projection, and festoon represents a petrified vegetation, the whole in transparently white, crystalized marble."

Very remarkable grottoes have long been known to exist in this island. Perhaps this is not a new wonder, but one of the old ones temporarily lost sight of.

Gerrit Smith, the well known anti-slaveryist and reformer, lives at Peterboro, about nine miles from Canastota, N. Y. He is seventy years of age. Though a Unitarian, he regularly attends to family worship, doing the singing and praying himself, and, instead of reading, repeats from the Bible a chapter, or part of one, night and morning. He rises at five o'clock, and walks at least five miles a day, "rain or shine."

Grant.—General Grant "stands alone and prominent, like Chimborazo among the mountains." The *Argus* says he smokes like Vesuvius, but, if he is nominated, Chase will show a loftier *pique*.

Every State has a candidate for Vice President. Judge Poland is Vermont's choice.

They call betting out West, "putting a pecuniary estimate on one's opinion."

The mortality from famine in Algeria is so great that the dead bodies are thrown into trenches, as on the day after a battle.

The fruit-growers throughout Indiana report that thus far not one peach bud in a hundred has been injured by the frost.

Mr. Charles F. Adams held the office of United States Minister to England longer than any other person since 1825.

The city authorities of Philadelphia talk about spending $160,000 for a new ice-boat to clear the Delaware river.

The reason, says Whitfield, why congregations are so dead is because they have dead men preaching to them.

The Yale professors are giving a course of scientific lectures in popular language for practical mechanics.

The New Orleans *Picayune* thinks there will be comparatively little cotton planted this year in Louisiana.

Ohio is going thoroughly through all the laws of the State, inserting the word "white" in its statutes.

PACIFIC COAST ITEMS.

The fine old town of Los Angeles is waking up from its proverbial lethargy. A company for the manufacture of woolen goods, a bank, and several "homestead associations," have been organized. The last named have been called into existence by the success of the town of Anaheim. But Anaheim was not a speculation. The original site of 1,265 acres was bought for two dollars per acre. The $70,000 paid by the shareholders two years later was for an actual outlay in labor and money to that amount. The town started with fifty small but very choice vineyards. It has proved a positive success.

Information from all parts of the State gives very favorable intelligence in regard to grain and fruit crops. Such a breadth of cereals was never sown before. Many set the number of acres at thirty to thirty-six per cent. over last year, and nearly double that of 1865. In the northern part of the State the early grain was damaged by freezing weather for a time, but the recent alternation of sunshine and showers is bringing it out wonderfully. Fruit trees are two weeks later in blossom than usual, so the crop is at least secure from the frost.

From Napa, a farmer writes: "Everybody for two weeks past has been busy improving their lots. Every tidy and industrious master and mistress of a family have renovated their yards, cleared away the fall and winter rubbish, and are busy taking care of fruit trees, shrubbery, and flowers. Some gardens are already beautiful, and our citizens intend that Napa ere long shall be known as 'the town of fruits and flowers.'"

The Corvallis *Gazette* says that a male teacher in that county attempted last fall to chastise a girl of large dimensions and some muscular development. She resisted, and for some time the contest was doubtful, as well as interesting to a crowd of juvenile spectators. The occurrence seems to have increased the mutual regard of teacher and pupil, for a few evenings since they were united in matrimony.

The Oregon papers say that a man who professes to have found gold diggings of fabulous richness, in the neighborhood of Stikeen River, Alaska, last summer, is organizing a company to go there this spring. There are placer diggings in southeastern Alaska, but their extent is unknown; and it is well understood at Fort Simpson and Sitka, that, so far as explored, they pay only moderately.

The Reese River *Reveille* grows poetical over the advent of spring. It says: "We fancy almost we catch the first odor of the wee flowers, struggling to raise their tiny heads above the snow. Yet there is plenty of mud, and the face of nature looks like the 'shining morning face' of the urchin, streaked with gingerbread, molasses candy, and dirt generally."

Numerous changes have occurred in the School Department of this city, since the first of January, not less than five of the male teachers having resigned, namely, Pelton, Hoitt, Tait, Holbrook, and Rowell. Mr. Tait has gone into real estate, Mr. Hoitt into insurance, Mr. Holbrook into the Board of Brokers, and Mr. Rowell is about to go East.

The attention of miners along the northern coast of this State has for three years past been turned to the beach diggings. Numerous claims have been located between Humboldt Bay and the Oregon line. The less experienced have uniformly failed, but several old miners have discovered and are working good paying claims.

Paradise Valley, a lowland section lying between the Tuolumne and Stanislaus rivers, contains an almost unbroken grain field of 150,000 acres—a magnificent expanse, which rivals the prairie lands of the Mississippi Valley.

The Democratic Convention of Oregon has nominated James Smith for Congress, and recommended Pendleton for President. The Republicans have nominated David Logan for Congress and propose Grant for President.

The grain market in this city continues firm. Six hundred barrels of flour went by the *Oregonian* on Thursday; 7,000 more will go on Monday. The price of flour in New York and Boston is firm.

A California fever is raging in and about Augusta, Me. Twenty-four persons from that vicinity came to the Golden State in one week recently, and others were preparing to follow.

The Supreme Court has decided in favor of the right of the present officials of the city of San Francisco to make their own appointments on the police force.

It is proposed in some of the States, in order to prevent the nuisance of vexatious and profitless libel suits, that a provision shall be added to the present libel law requiring all plaintiffs in such suits to give bonds for costs, including the fees of defendant's counsel, if the prosecution fails to gain the suit.

General Halleck has been transferred from the command of the Department of the Pacific to the command of the Fifth Military District, which comprises Texas and Louisiana—a difficult post at this time.

The *Oregonian*, the steamer of the Opposition line, which sailed on Wednesday, had a full quota of passengers for the East. All of the first cabin berths were engaged several days in advance.

The public school funds of this city will be exhausted on the last of next month. Unless measures are taken to raise additional means, the schools will be closed for two months.

The largest sheep owners in the State of California are residents of Monterey County. Sheep-shearing has already commenced.

On Monday, the 30th of March, the Legislature will close its session, as the Constitutional limit of 120 days then expires.

Gen. V. E. Howard has retired from the *Independent Dispatch*, and is succeeded by J. F. Linthicum.

There was a slight earthquake here on Tuesday—just enough to scare timid folks.

The Legislature has postponed action on the removal of the Capital indefinitely.

Greenbacks are selling at 72 cents, with an upward tendency, in this city.

TELEGRAPHIC SUMMARY.

Congressional.—The House Committee on Foreign Affairs, on Friday of last week, postponed the Alaska appropriation, with an intimation from some of the members that it was done to punish Mr. Seward....The House will not hold sessions on days when the Senate sits as a Court of Impeachment....On Monday, the U. S. Senate resolved itself into a Court of Impeachment for the trial of the President. The reply of the President to the charges of the House was presented by his counsel. They also asked for thirty days for preparation. This the Senate refused. The House Managers demanded immediate trial. Sixteen Republican Senators, including both of the Oregon, Maine and Vermont Senators, voted with the Democrats to give time till next Monday.

Foreign—Lord Stanley, British Foreign Secretary, declares the doctrine "once a subject, always a subject," an obsolete idea....The rebel Daimios of Japan have defeated the Tycoon in a great battle, and driven him into Jeddo. They notify Foreign Ministers that all treaties shall be faithfully observed by them. This probably settles the fate of the Tycoon....Mr. Gladstone, in the English Parliament, has presented a Reform Bill to abolish the present Church Establishment. He wishes to do justice to Ireland and to Dissenters generally.

Eastern.—Gen. Hancock has reached Washington, and Gen. Halleck has been ordered to take his place at New Orleans....The rain storm of near a week ago on this coast was a terrible snow-storm at the East....The Arkansas people have defeated the proposed Constitution....They are having quite an excitement in Boston among the license law party over the veto of Gov. Bullock, who refused to approve the bill abolishing the "Constabulary."

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, March 25, 1868.

There is but little change to note in quotations. Spring Lambs range from 10 to 12½c, with but few offering. The range for undressed Pork is 6@6½c, the inside figure for acorn fed or soft Hogs, of which the supply is large and the demand active.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 11@13c ℔ lb.
do 2d do 8@11c ℔ lb.
Veal—Medium to good, 9@12½c ℔ lb.
Mutton—In fair demand, 8@9c ℔ lb.
Lamb—Spring rather scarce at 11@12½c ℔ lb.
Pork—Undressed, 7@8½c; dressed, 10½@12c ℔ lb.

Produce Market.

Flour—Demand purely local and prices nominal. The *Oregonian* for Panama this morning had 600 bbls Imperial for New York.

We quote city brands:

Superfine, hf sks, ℔ 196 lbs.....$7 00@7 25
qr sks..... 7 25@7 50
Extra, hf sks..... 7 75@8 00
qr sks..... 8 00@8 25

Wheat—Sales include 200 sks Oregon, private; 550 sks ordinary, in two lots, $2 45@2 47½. The market is dull and prices nominal at $2 50@2 55 for best grades. At the close, 1,100 choice milling, $2 55; 900 sks good do. $2 50 ℔ 100 lbs.

Barley—Sales include 1,400 sks choice for shipment to Arizona, private; 600 sks good feed, private; 1,000 sks fair brewing, $2. We quote the market at $1 95@2 05. At the close, 1,500 sks good feed, private; 200 sks do, $1 95 ℔ 100 lbs.

Oats—The demand is moderately active; choice are scarce and held at extreme figures—say $2 30@2 35. Sales include 500 sks Coast, $2 65; 600 sks do, $2 25; 500 sks do, $2 25; 300 sks choice, $2 30; 200 sks do, $2 35 ℔ 100 lbs.

Potatoes—The receipts of Humboldt for the past two days aggregate 9,000 sks. Sales include 400 sks Bodega, in poor bags, $1 20; 500 sks do, $1 35@1 40; 500 sks do, inferior, $1 17; 600 sks Humboldt, $1 50@1 55 ℔ 100 lbs.

Corn—Sales of 600 sks Yellow, in lots, private; quotable at $2 35@2 40 ℔ 100 lbs for Southern deep Yellow.

Rye—Light demand; last sales were at $2 ℔ 100 lbs.

Buckwheat—Light demand; price nominal at $1 75@2 ℔ 100 lbs.

Onions—Supply moderate; jobbing at 6½@7c ℔ lb.

Beans—Sale of 30,000 lbs Bayo for consumption, private. Wholesale rates are as follows: Bayo, 3¾@4c for new, and 3c for old; Butter, 4@4½c; Pea, 4¾@6c; small White, 4½@5c; Pink, 2½@2¾c; Red, 2½@2½c ℔ lb.

Bran—The demand is good at $30@31 ℔ ton.

Middlings—Fine, $50; feed descriptions $40@35 ℔ ton.

Oil Cake Meal—Steady at $30 ℔ ton from the mill.

Hay—The market is well sustained, prices ranging from $18@25 ℔ ton, according to quality and condition.

Dairy Products—All kinds are in moderate supply. Fresh roll Butter continues steady at 30@32½c; California firkin, 32½c for store-packed, and 34@35c for ranch-packed. Cheese, 17@18c for California dairies, and 22½c ℔ lb for English (Eastern) dairies. Eggs 27½c ℔ doz.

Poultry—Live Turkeys, 14@16c, the latter an extreme figure; dressed do, 16@17c ℔ lb. Hens and Roosters, $7@7 50; Spring Chickens, scarce at $8; Ducks, $6@7 ℔ doz; Geese, $2 50@$3 25 ℔ pair.

Provisions—California-smoked Bacon, 16@17c; Oregon do, 13@14½c; California Hams, 17@18c; Oregon do, 15@16c. California Lard is a little off, say 14½@15½c; Eastern, do, 13@13½c ℔ lb.

Wool—The new spring clip is coming forward very sparingly, the market opening at 15½@16½c. Sales during the past ten days embrace 40,000 lbs pulled, for shipment to New York, private; 30,000 lbs fall, 12c; 20,000 lbs spring, 16c; 10,000 lbs do, 16½c, an extreme figure; quotable at the close at 15@16c for spring, and 11½@12c ℔ lb for fall.

Hides—The Hawaiian, per *D. C. Murray*, are for local consumption. Sales since last Wednesday aggregate 500 California dry, usual selection, 14@15c ℔ lb.

Tallow—The demand continues quiet and prices steady. Sales for the week foot up 10,000 lbs Beef at current rates. We quote fair to choice Beef and Mutton at 7½@7¾c ℔ lb.

CURRENT TOPICS.

The Legislature whose session has just closed, deserves a somewhat different parting notice from those which most of our political papers seem disposed to publish. It would not be possible for a Legislature to please all, were the attempt to be made, and it is certain that the attempt was not made by the body whose proceedings have been so narrowly watched during the last winter. It would hardly be possible that all the representatives of a State like this should be men above suspicion as to character, or beyond reproach as to private or public acts, and it is certain that not all those now gone to their accustomed business were such men. It would hardly be possible, when such inducements are offered for unwise or wicked legislation as were made to bear on these men, that laws should not be enacted which ought to be condemned, and it is likely that some such laws were enacted by the last Legislature. Still, as a body, it is probable that this State has not assembled for years a Legislature whose acts have been more worthy of its position, or more important to its future. There has been a large element in both houses of men true to all the moral, educational, and commercial interests of the State, and their influence has always been great—at times it has been controlling. For all the good they have accomplished, the Legislature should receive hearty thanks, and wherein they have failed to represent the will of the people, their acts should be reversed by their successors, or rendered as little injurious as possible. We shall be quite as fortunate as most of the States if during years to come we have no more impractical and unprincipled men as law-makers than were to be found among those whose term of service has just expired.

The country is passing through one of those crises which fearfully strain the framework of a government. The impeachment of the President at a time when no other causes of agitation exist might be expected to occasion general excitement and much difference of judgment. But such a trial when the disturbed affairs of the nation are taxing the wisdom of Congress and arousing the fears of many among the people, and when political issues are being made up for the canvass of a general election, and when the nervous condition of the nation is unnatural, because of the commotions through which it has passed within eight years, cannot fail to affect powerfully all classes of citizens. The merits of the case, whatever they may be, do not constitute the reason. The *fact* of the trial is a mighty test of the nation's strength. Yet we hear of no uprising, no violence, no factional display, no really intemperate language from any prominent source, and the people wait for the result, expecting to abide by it, or modify it by constitutional means. There is nothing in the history of our Government that more astonishes the people of other lands than does the facility with which we adapt ourselves to emergencies. Prophecies of statesmen abroad that we are just on the verge of ruin, come to naught, because they do not take into account this peculiarity by which we have always been distinguished. The masses are resolved to be driven by no exigency beyond the limits of self-preservation. Hence the necessity of intelligence and moderation, These must be our safety, and they will be equal to any perils. If the President is sustained in his office, those who believe he should be removed will make their belief felt by their declarations and their votes. If he is removed, those who believe he should be sustained will, in the same way, make their influence to be felt. But the spectacle is sublime as a great nation waits under the ægis of its fundamental law for the decision of so momentous a question. The future should take the lesson thus presented, and all should feel that the great problem of this nation is to make the people such that they can be safely entrusted with its interests.

Goat Island is just now attracting the attention of those who are interested in its geographical position, as related to the prosperity of San Francisco. It has been the point most desired by the Central Railroad Company from the beginning, to be made their chief depot on this coast, and in Congress they have been striving for months to obtain it. Of late, other railroad companies have sought, through the Legislature, to obtain possession of some portion of the tide lands around the island. And, as if to place it beyond the reach of any who would devote it to such uses, it is said now that the Government will hold the whole of it for military purposes, and a new force of troops is encamped on its hills. Military engineers insist that it is essential to the proper protection of the Bay. Other engineers are equally positive that while a part of it should be appropriated for fortifications, a part may be safely surrendered to civil uses; and because of this difference in opinion, no absolute decision has yet been announced. If it is really true that all the mighty interests hereafter to be centered on this Bay will require the military possession of this whole island for their protection, there can be no question that it should be so occupied. But it is certainly worth careful study whether a portion of it may not be given up to the railroad. It is of vast importance to this city that a position so convenient to all its commercial interests should be available in their behalf, if this is possible. The question is not one of mere opinion—incalculable advantages must be surrendered if Goat Island must be only a military stronghold, and these advantages can hardly be appreciated now. After thorough examination of the matter, we hope it may be found that when it is fortified as completely as shall be necessary, a portion of the end toward the mainland may be safely devoted to commerce.

We have made allusion before to the work of the American Christian Commission in the Eastern States. The religious papers recently received bring us information concerning one portion of that work which is cheering and suggestive. There have been conventions in various parts of the country, arranged by the prominent clergymen and laymen of the region, aided by members of the Commission, the healthful influence of which has been very extensively felt. One was held in Philadelphia, commencing on the 23d of March, and from the practical and interesting themes announced in the programme to be discussed, it must have been peculiarly important in its results. Much advantage arises from such general conference meetings. There is a union spirit that possesses all who take part in them. There is a wider range respecting the best modes of usefulness than would be possible to the individual or the single church. There is a stimulus to greater devotion and more earnest work, which bears fruit in the history and efforts of those who go down to their separate fields from such a mount of Christian privilege. And since, as yet, none have found any serious evils to result from these convocations, they are becoming more and more popular and general. Need we wait for a branch of the Christian Commission on the Pacific Coast before we avail ourselves of the experience thus furnished us? Like conventions would be eminently useful here.

The change to be made in the management of the Industrial School gives promise of good. It has been manifest that there should be opportunity to discriminate between the children, whose condition is sad enough in any view, for could the merely unfortunate be separated from the really vicious, many of them might be saved from a life of guilt. And could the vicious be brought more directly under reformatory influences, more of them might be released with a purpose to be honest and worthy citizens. The Legislature has done all, perhaps, that it could do in the matter, and we trust the Directors will give the poor children the full benefit of the change as soon as possible. The Industrial School is a noble public charity, and it should be managed so as to accomplish the most, for the inmates and for the State.

The representative sent to Congress by the Mormons is not likely to have a seat in that body. The committee has reported adversely, giving reasons that seem to be conclusive. The reception of the Mormon who, in all his relations to his constituents as a religious community, places them above the country, who takes oath to oppose the National Gov-

ernment, and regard it as hostile to the interests of his sect, would be more than an insult. The toleration of such a community as that in Utah, when its true spirit is known to be disloyal and violent, is proof of forbearance on the part of the nation which may cease to be a virtue, and become positively dangerous. Certainly, so long as they manifest this spirit, they should not be allowed to participate in Congressional councils and acts.

Religious Intelligence.

PACIFIC COAST.

Advisory Committee on Home Missions.—The following sums have been received by the Treasurer during the quarter ending March 31, 1868:

H. M. Collection by Rev. W. W. Brier, 1st Presb. Church, Watsonville, Cal.	$7 15
Livermore, Cal.	3 85
Gilroy, Cal.	77 00

" " Howard Presbyterian Church, San Francisco, in part	300 00
Total	$722 35

Samuel I. C. Swezey, Treasurer,
302 Montgomery Street.

—

The California State Sunday School Convention will be held in San Francisco, at the Calvary Church, Bush Street, on Tuesday, Wednesday, and Thursday, June 2d, 3d, and 4th, next. The proceedings will consist of devotional exercises, brief reports, voluntary discussions, with speakers limited to five minutes, "illustrative" teaching, addresses, and sermons. Among the speakers are Rev. Messrs. Briggs, Stone, J. B. Thomas, Lathrop, Wadsworth, Scudder, and Eells. We shall give the programme of exercises hereafter.

—

There will be a meeting of the San Francisco Sunday School Union at Rev. Dr. Benton's church, on Taylor Street, near Geary, on Sunday evening, April 5th, 1868. Friends of the Sunday Schools are most cordially invited to be present. It is to be hoped that all will join in trying to make these meetings successful, not only in attendance, but in works.

Several speakers will address the meeting, and a full attendance is earnestly desired.

S. W. Hoyt, Secretary.

—

Presbyterial Notice.—The Presbytery of San Jose will meet in the Presbyterian Church in Oakland, on Tuesday, April 8th, at 7½ o'clock, P.M. The opening sermon will be preached by Rev. James S. Wylie, Moderator. Narratives of the state of religion, and statistics of the churches will be given.

George Pierson, Stated Clerk.

—

At a late meeting of the congregation of the Presbyterian church in Napa City, the people resolved that their pastor, Rev. Richard Wylie, shall have leave of absence from his charge for three or four months, without any corresponding deduction from his salary.

They also resolved that Rev. James Wylie, father to their pastor, be invited to occupy the pulpit of said church during the absence of his son.

By one of the steamers of last month, two Presbyterian clergymen, who have been laboring on this Coast, returned to the East, viz: Rev. J. B. Pinney D.D., recently of Austin Nev., and Rev. Edward B. Willard of Columbia. Both of these gentlemen are able, faithful and laborious workers, and we hope to see them again as co-laborers on the Pacific slope.

—

The Shanghai *News Letter* of February 24th announces that the Chinese Government Anglo-Chinese School, in the city of Shanghai, will begin its Fifth Annual Session on the 4th of the second moon (26th February) under the superintendence of Rev. Young J. Allen, of the American Methodist Mission.

—

The Presbytery of Benicia at its late meeting in Napa, appointed Rev. Richard Wylie as Commissioner to the General Assembly. Mr. Wylie left for the East on the steamer of Tuesday last.

EASTERN.

At the Christian Convention recently held in St. Louis, the question discussed was, "How can Christian women best co-operate in the work of Evangelization?" Many very pretty speeches were delivered by the reverend gentlemen, but when a woman claimed the right to say a word, the chairman decided against her. An appeal was made to the house, but was laid on the table by a vote of 66 yeas to 28 nays.

The *Boston Congregationalist* says: "The trial of S. H. Tyng, jr., is now in progress in New York. We shall fully notice it next week, or so soon as it shall be completed. If it were not for a few grains of the tragic element floating about in it, it would be as near a farce as anything that "the Church" has lately offered to the world.

The late Dr. Wm. M. Engles, for many years editor of *The Philadelphia Presbyterian*, left a legacy of $2,500 to establish a scholarship in Princeton Seminary, and a similar sum for a scholarship in the Presbyterian Theological Seminary at Chicago; and he also left 300 volumes of his library to the latter institution.

We learn from the *Episcopalian* that a preliminary meeting of evangelical clergymen has been held in New York, to organize an Evangelical Union. A Committee of Invitation was appointed, and a meeting arranged. The same paper states that the movement is fairly inaugurated, and will be carried on to completion.

A telegram from Rome announces the appointment by the Pope of three new Bishops: Rev. Wm. O'Hara, of St. Patrick's, to be Bishop of Scranton; Rev. J. F. Shanahan, of Media, Penn., to be Bishop of Harrisburgh; and Rev. Dr. Becker, of Richmond, Va., to be Bishop of Wilmington, Delaware.

Rev. W. L. Gage, who is well known as one of the ripest German scholars of the country, and has translated several German works into our language, has received a call to the pastoral charge of the Pearl Street Congregational Church, Hartford, Connecticut.

The Presbytery of Carlisle has declined to dissolve the pastoral relation between the Rev. S. S. Mitchell and the Presbyterian church at Harrisburg, Pa. The church is prospering so much that an enlargement of the church building is contemplated.

Mrs. Henry W. Chittenden, of Guilford, Connecticut, having offered the First Congregational Church of that town a $2,000 organ if they would pay their debt of $2,700, they raised in the month of January $4,550.

Rev. Dr. Darling has declined the position of Secretary of Education, made vacant by the death of Dr. Mills, and Rev. John G. Atterbury, D.D., of Detroit, Michigan, has been elected to the position.

Rev. Henry L. Hall, late of Rockville, Conn., was installed pastor of the High Street Congregational Church in Auburn, N. Y.

Bishop Williams, of Massachusetts, has declined to allow the Catholic clergy in Worcester to say high requiem masses for the repose of the souls of Allen, Larkin, and O'Brien.

A new Congregational church was organized at East Bridgeport, Conn., Jan. 22. Its membership is thirty-nine, of whom twenty-six come from the North Church in Bridgeport.

The Universalists met recently in Boston to ordain a woman, Mrs. P. A. Hanaford, to the pastorate of the Universalist Society in Hingham. The work was accomplished.

FOREIGN.

The Chosen People.—There are in Europe 3,431,700 Jews. Sixty years ago, when missions were commenced to them, there was scarcely a convert to Christianity in Great Britain. Now there are said to be 3,000 converts in England and 20,000 on the Continent. About a hundred clergymen of the Church of England are converted Jews. In Berlin 5,000 of the 18,000 Jews have been converted, and 28 of the professors in the University are converted Jews. The Jews on the Continent manifest a stronger desire proportionately than Christians for the higher branches of knowledge, arts, and sciences. Some of the best literary, scientific, and political periodicals are edited by Jews; and some of the most celebrated poets, painters, engravers, musicians, and composers are Jews. In many of the countries of Europe where they have been sorely oppressed, they are now enjoying equal privileges with others.

FOREIGN.

Dublin, Ireland.—Rev. E. P. Hammond is continuing his labors among the young with great success. A late report says: "He has been holding meetings in Christ church, Rathgar (Presbyterian) for the southern suburbs, and will continue similar gatherings in the Metropolitan Hall, and is announced for the Merrion Hall at the New year. Testimonials from many quarters give assurance that a signal blessing follows his arduous and incessant labors."

Rev. Henry C. Potter, son of Bishop Alonzo Potter, nephew of Horatio Potter, and grandson of Dr. Nott, has just accepted a "call" to the pastorate of Grace Church, New York. The call was one of the loudest of which the Episcopal Church is capable, embracing the offer of the finest parsonage in America, and a salary of $10,000 a year. The fortunate parson is less than thirty years of age.

The Queen's Presbyterianism.—Quite a little stir is excited in England by the fact that the Queen enjoys the Presbyterian Church service when she is in Scotland. The Church of England papers, of the ritualist persuasion, are indignant, and if they could have their own way, would convict the Head of their Church of disloyalty to herself.

A Queen's Chaplain in India.—The *Bombay Times* states that ever since Dr. Norman McLeod's arrival in Bombay, he has been listened to with intense interest, as well as by Parsees, Hindoos, and Asiatics generally, as by his own countrymen.

New Protestant churches have been opened at Vichy, France, in which there will be service in English as well as in French; and also at Dunkirk. This latter church was presented with 20,000 francs by the municipal council of the town.

Rev. Dr. John Hall, formerly of Dublin, in a recent address, remarked that there is now more Christian activity among English non-comformists than there was among all Protestants in England at the beginning of this century.

The native Christians in Ceylon are taking measures to raise $25,000 to found a school of high order. They have requested the American missionaries to act as trustees, in connection with an equal number of native gentlemen.

Professor Goldwin Smith definitely announces his intention of taking up his residence in the United States.

Presbyterianism in England claims to be making progress. In thirty years it has built or acquired upward of 100 churches, having 20,000 members, and 15,000 Sunday school children. Its annual income is now $250,000.

The Cretan Revolution.—Dates from Crete to Feb. 25th represent the prospect of the Turks there as more gloomy than ever. They have been defeated in several engagements of late, with severe losses.

Late advices from Capetown, Africa, state that the Supreme Court of Natal have at last decided the question touching the matter of the Church property in favor of Bishop Colenso.

Rev. Hiram Mattison, D.D., has accepted the appointment of Secretary of the American and Foreign Christian Union.

There are fifteen Protestant churches in Belgium, made up mostly of converts from Romanism.

MISSIONARY INTELLIGENCE.

Sixty years ago there were no Protestant Christians in Travancore, Southern India. Now, what do we behold? There are at this point alone 27,000, and 500 native assistants, and 11 ordained native ministers. At Nagercoil, the principal station in the district, there is a large Christian villiage of 800 souls, a printing office, girls' boarding school, with theological classes, with three European and two native ordained missionaries. The London Missionary Society has the oversight of this field.

Dr. King finds it a delightful sign of progress to see the labor of evangelization at Athens passing out of his hands into the hands of educated and able Greeks. Dr. Kalopathakes, Mr. Constantine, and Mr. Sakellarios are actively engaged in preaching and teaching. They publish a religious paper, instruct about twelve hundred scholars, and are the executive members of the American-Greek Committee for the Cretans. They were educated in our American Colleges and Theological Seminaries.

Preparing for a Storm.—More than eight hundred workmen are busy day and night fortifying Rome; no rest is given even on holidays. Even the colonnades which form the grand lateral approaches to St. Peter's are being converted—the right to a barrack for Zouaves—the left into a temporary fortress of brickwork. Some accept these works as the preparations the French are making to leave the city.

The Emperor of Russia has paid the expense of printing a large edition of the Bible in the spoken language, and has caused it to be circulated in the army and among officials, free of expense. A Nestorian laborer, who has been traveling in the contiguous regions of Russia, reports the sale of 1,000 Bibles and Testaments in modern Russian, besides numerous copies of other religious books.

Workings of the Spirit.—Reports from the Moravian stations, at Labrador, mention the very interesting fact, that two of the Esquimaux conceived the plan of going to preach the Gospel to the heathen in the North, and have started on this mission. Such a fact is most encouraging, and particularly so amongst the stolid, slow-thoughted, and slow-motioned Esquimaux.

The property of Jacob Barker, late a New Orleans millionaire, was recently sold at b ankrupt sale

THOMAS J. MYER & CO.'S

Extra Baltimore Fresh Cove Oysters,

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equal to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

or these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE PRECIOUS AND THE VILE.

There is a disposition which seems to be more general than in years past, to partially obliterate the line between good and evil. Errors respecting morals and religion find advocates, not only among those who accept them merely, but among those who are willing they shall have their course that they may see if they will approach the truth in their farther development; and everything that can be worked into such approach is hailed as real gain. Vice is tolerated, not only by those who desire to practice it, but by those who think it will have less hideous features after it has been permitted for a time to compete with virtue on the same floor of respectability; and if it does resemble virtue in any respect, great interest is felt in the fact, as though a new blessing had been bestowed on the race. Wicked men are suffered to retain places of favor in society, not because their character is admired, but because there are many persons in society who are willing to white-wash their character so that it shall look as much as possible like that of decent people.

The effect of this attempt to bring together what God has put asunder has been most marked. Error has gained, and truth has lost. Vice has flourished, and virtue has grown feeble. Base men have become worse, and good men have been at a discount in the same ratio. This will continue to be true, till we recognize the original, essential distinctions between the precious and the vile, in sentiment, in conduct, and in character. There is serious danger from the tendency to elevate the one, and lower the other; to conceal the deformities of the one, and change the beauty of the other, till they may meet and accept each others' company. There is manifest evil in the willingness to make some attractive qualities, or agreeable concomitants, a sufficient apology for unworthy doctrines, or gross and disgraceful sins. The elegance of the place where men drink should not be an acceptable excuse for dissipation. The splendid execution of a drama should not be an apology for the degradation and wickedness which attend it. The high art displayed in pictures should not be a satisfactory reason for parading them before the public eye, when they are indecent and low in their suggestions. The skill and eloquence with which infidelity adorns its blasphemy should not be received as the bribe by which it forstals the judgment and obtains a verdict in its favor. On the contrary, it is just occasion for grief, if not for alarm, that so many will stand before any whited sepulchre, with tokens of honor, and speak gently and smoothly to each other as if they were engaged in a worthy service, but never go away with indignation, whatever may be the voluntary corruption and ruin that are buried within.

Morality is radically affected by this disposition, for morality depends upon those external distinctions which it so completely ignores. And religion is deprived by it of the beauty and worth by which it may be distinguished, since those sharply defined outlines of character, and those scriptural peculiarities of life which constitute piety are rounded off and removed. When forms are made synonymous with godliness, and a church relation is regarded a sufficient foundation for hope; when small sins are treated only as proper attractions, by which to remove the objections of ungodly men to religion; when as much of the Devil's territory as possible shall be occupied by Christians, and he shall have free access to as much of God's territory as possible, there is peril to the individual and to the church, that deserves the most serious thought.

Neither the purpose nor the acts of men can change the real relations of good and evil. Because we vote that they are identical they do not become identical. Because we insist that at least they wear some common features, they will not actually assume them. All the men on earth might resolve that fixed stars are only points of light, as they appear, but they would still pursue their majestic round as suns of systems — that the load-stone will not turn towards the north, yet the strange truth would remain, notwithstanding their declarations — that God has not this or that perfection in His character, yet He would be the same infinitely perfect God, without regard to their resolutions. The truth is to be *discovered*, not *willed*. We must ask what *is*, not determine what *must be*; and the fact that we find it more convenient to adulterate and change the truth than to refine ourselves — to lower the standard, rather than advance ourselves to its demands, will not affect the real relations which the Creator has established. We should rest upon this as forever true: there is that which is precious; there is that which is vile. These can never coincide. They are inherently unlike. We should take pains to secure the precious in sentiment — to exhibit it in life; and we should conscientiously exclude the vile, refusing to allow others to break down for us the distinction which none but God can set aside. Indeed, it may be doubted whether God Himself could make a decree by which truth should no longer be truth, or sin could become holiness.

These views are eminently practical at this time, because the opposite views are made so practical. Wherever there is a church, it should be understood that there is a bulwark against evil — not an agency by which some form of compromise between good and evil may be effected. Wherever there is a Christian, it should be seen that there is one who will not regard sin as a little thing, in any guise, or comfort and excuse him who commits it — not that he will show how near he can walk to the line between right and wrong, without absolutely passing it. Wicked men themselves expect this, and in heart they despise a Christian who favors what their own consciences declare to be wrong, however much they may desire the support of his favor. The great work of the Church is to withstand iniquity and promote the right; not merely to maintain an existence, proclaim good creeds, and make itself popular with those who desire religion to tone itself down to their wishes, and every member should be a *force*, arrayed against sin, and in aid of righteousness. There need not be denunciation, nor a flourish of trumpets, nor a display of furious hostility. But there should be a stern assurance that there is no apology for wickedness — a uniform refusal to unite in promoting what can only help the cause of evil. If men who love evil call this bigotry, Christians should not be afraid to accept the term. If men who hate light cry, "Away with such religion!" we should not welcome the darkness and help to introduce it, because this will please them more. There is a difference between good men and bad men, and every valuable interest demands that this difference be recognized and maintained. Looseness of opinion, and indifference in conduct on the subject, will not prevent the calamities to which they open the door, and which are multiplying upon us in a ratio that ought to awaken fear. It is the duty of all who love truth, and virtue, and God, to insist that these calamities be pressed back, and when this is done, by proper teaching and influence, in the family, in society, in the pulpit, and by the press, a brighter day will be opened to civilization and Christianity.

"CHRIST DIED FOR US."

Romans, v: 8.

Behold that unwavering, honest, and faithful testimony of Christ against sin and unrighteousness. View the Conqueror of the devil, death, and hell; an hungered, athirst, and a stranger, despised and persecuted, accused, cursed and betrayed, bound and beaten, spit upon and mocked, denied and forsaken, sorrowful unto death, and bleeding at every pore; His brow crowned with thorns, His sacred back torn with many stripes; soon after, His holy feet pierced with spikes, His hands nailed to the shameful wood, His soul writhing in anguish, His body suffering the pains of hell; thieves for His companions, and deriding Him. Behold Him suspended on the cross between heaven and earth, even by God Himself forsaken! Watch the conflict! He is wounded; will He faint and yield? He says: "My God! my God! why hast thou forsaken me?" Has He lost the battle? Does He surrender to the prince of darkness the world's redemption? Does He? Hark! What is it? The earth reels; the sky grows dark: the dead rise from their graves, and men, frantic with fear, flee in all directions. What has happened? Is it the judgment day? No. Look to Calvary! Behold and hear Jesus upon the cross! He fights the last fight with the prince of death. The conflict is fierce, but short and decisive. Hear the victor's triumphant shout! "It is finished!" The victory is won! Captivity is led captive, and the world redeemed! Hallelujah! "Thanks be to God, who giveth us the victory through our Lord Jesus Christ," who died for us! F. F.

SAN FRANCISCO PORT SOCIETY.

The eighth anniversary of this Society was held Sunday evening, at the First Presbyterian Church. The Treasurer, Mr. D. N. Hawley, reported the receipts of the past year to be $2,345 90, of which $500 was a donation from the Pacific Insurance Company. The chief item of expenditure was the payment of the salary of the Chaplain, Rev. J. Rowell, which was $2,100.

The Building Fund receipts of the past year amount to $1,977 30, which has been mostly expended in improvements and the payment of interest on notes. The Chaplain complains, and we doubt not justly, of the incubus of a floating debt of two thousand dollars.

The report of the Chaplain enters upon a full examination of the prospects and condition of the Society, and the class of men for whom it labors. There is much to embarrass and discourage in such an enterprise. One of the cheering features of the organization is thus spoken of in the report:

THE MARINE TEMPERANCE SOCIETY.

No branch of our work has prospered more than our Marine Temperance Society. It has been in operation a little more than a year, and has now nearly eight hundred names upon its roll. Of course, not all of these have kept their pledge, but a very large number have done so, and have been saved by it from thorough ruin.

A distinguished feature of this society is its open alliance with religion. Two prime facts are constantly set forth, viz: that they need God's help who mean to keep their pledge, and that temperance is only one step in the upward course which every

sailor ought to follow till it finds its climax in faith in Christ and personal salvation. It is largely owing to this high position taken that our Society grows steadily in numbers and influence, and has no need of flashy devices and unnatural stimulants to keep up a show of life and power. Our business is not play, but earnest work for living wages. We see every day the good effect of pressing these truths upon even those far gone in the debasing habit of drunkenness. They are not merely loud professions, but are most happily carried out in practice.

"Sir," said a drunken sailor, as he rolled up to me in the church at the close of the Sabbath worship, "sir, I want to take an oath against whisky."

"Very well, come into this room and I will let you sign the pledge."

"But I want something stronger than that; you dont know how bad I am."

I assured him that if he would pray to God for help, the pledge would prove strong enough to hold him.

"Then I will do it," said he, "for I'm so far gone that nothing else will save me."

The next time I saw him was in our prayer-meeting, earnestly listening to the words of life. Soon he was in deep distress through conviction of sin, and then he was rejoicing in a most happy hope in Christ. His name is on our church-roll now, and he is a faithful Christian man.

Nor are cases like this rare with us; but we often hear this clear testimony from the lips of converts: "My first step in religious life was signing the temperance pledge. Having done this, I felt that I needed something more, and must go on, and now I am happy in Jesus."

Already, too, the influences of this Society are felt around the globe. The members are urged to be bold defenders of their cause, both for their own security and for the sake of convincing others. Letters often come from foreign ports, giving cheering facts concerning this. A letter from one in Sweden tells of the delighted wonder of his family, at finding that he had really left off drinking. And others tell of great moral victories gained on fields of former shameful defeats, as well as of happy freedom from the jaws of familiar land-sharks, and of moral power exerted on ship and shore.

An eloquent sermon was preached by Rev. H. B. Hibben, Chaplain of the United States flag-ship *Pensacola*, after which a collection was taken, and prayer offered by Rev. Dr. Eells.

The following persons are the officers for the ensuing year: President, Oliver Eldridge; Vice President, R. B. Swain; Treasurer, David N. Hawley; Secretary, J. Rowell; Trustees, W. H. Stowell, J. T. Dean, Ira P. Rankin, Levi Stevens, I. W. Raymond, David N. Hawley, John T. McLean, J. Rowell, James F. Stewart.

THE sermon we print this week is the second of two on the same subject, lately preached in the First Presbyterian Church of Oakland. This accounts for the allusions in it to the first, which was mainly occupied with points just discussed in several articles that have appeared in THE OCCIDENT.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

International Hotel,

SAN FRANCISCO, CAL.

This favorite house is located on Jackson Street, a few doors west from Montgomery, on the same street with the Post Office, Custom House, and United States Court. The Land Office and principal Places of Amusement are within one block of the House. The International Hotel offers the greatest inducements for Families. It is capable of accommodating three hundred persons. The House is conducted on TEMPERANCE PRINCIPLES. The Furniture is quite new and in perfect order. The Table will always be supplied by the best in the Market. Two good Barber Shops, a Bath Room, and a Laundry are attached to the House.

The Prices for Board and Room will vary, according to the kind of Room, from $1 50 to $2 00 per day.

The International Coach will be at each Steamboat and Car, plainly marked "International Hotel," to convey passengers to the House, FREE, and to any part of the city at the cheapest rate, according to the distance. From the House to all of the Steamers, cents.

F. E. WEYGANT, Proprietor.

Correspondence.

Letter from Sonoma County.

Healdsburg, March 23d, 1868.

After weeks of gloomy weather the skies are clear once more, and the sunshine gladdens our hearts like the fulfillment of a promise in the fruition of hope long deferred. During the late storm, snow has been falling in the mountains, so that though the valleys are clad with verdure, the roses and lilies blooming, and the fruit trees in blossom, the Geyser Peak and Mount St. Helena are mantled in white. Summer and winter are personating Ruth and Boaz — the former lies lovingly in the valley at the feet of the latter, who reclines upon the mountains.

The town of Healdsburg, like a village scene in cameo work, gems the rolling bosom of the valley, near the confluence of Dry Creek with Russian River. It lies about thirty miles north of Petaluma, on the road leading to the Geysers and Ukiah City. Its Indian name is *Sotoyome*, which signifies Vale of Loveliness, or Valley of Flowers. In the town and immediate vicinity there is a population of about three thousand. At present the all-absorbing topic of conversation here is the railroad. Two companies have been organized and two routes proposed, from this place to deep water on the Bay of San Francisco; one, by way of Petaluma, the other, *via* Sonoma and Napa to Vallejo. The questions of an appropriation of county funds to build the road, and of route, are to be submitted to a vote of the people next month. The appropriation will, no doubt, be carried; how the question of route will be determined remains to be seen.

For rural beauty, fertility of soil, and a healthful and salubrious climate, this locality cannot be surpassed. During the year that the crops failed elsewhere, this was the Egypt of the State; a failure here has never been known. A railroad, to bring us nearer to the San Francisco market is all that is necessary to make this one of the most desirable places of residence in the State.

The are four schools in town — the Sotoyome Institute, under the direction of Professor Anderson, the District School, and two private schools. All of these are well attended, though the first is suspended temporarily in consequence of the sickness of its Principal.

There are four Sabbath Schools, six or eight church organizations, and five church edifices. These belong to the Old School Presbyterian, Baptist, Methodist Episcopal, Methodist South, and Roman Catholic denominations.

The Presbyterian church was organized by Rev. James Woods, October 10. 1858. Since December, 1862, it has been under the charge of the present pastor, the Rev. Ben. E. S. Ely. During his pastorate, sixty-two members have been added to its communion, and the chapel now occupied has been purchased, refitted, and furnished. The Sabbath School, under the superintendence of Chas E. Hutton, Esq., has an average attendance of eighty-four pupils, and is in a highly prosperous condition. A few days since, the pastor and his wife, on the occasion of the birth-day of the latter, were stormed by a surprise party, composed of the members of the congregation. After the company had retired, the pastor's wife found a purse of money and other valuable tokens of regard, concealed beneath her pillow, each of the guests having contributed something of value. This is the second time within a few months that the people have thus kindly remembered their pastor and his family. He feels deeply grateful to them, and thankful to God for the favor he has with his flock.

There is a decided religious interest in the congregation. The attendance upon the Sabbath services and the prayer-meeting is good, and the congregations are increasing. We are waiting and watching in earnest expectation of an outpouring of the Holy Spirit, "as they that watch for the morning."

Rev. Mr. Woods is preaching on alternate Sabbaths at Alexander's Valley and Windsor Village, about six miles distant. We learn that he proposes soon to organize a church at the latter place.

Perhaps I have been guilty of bad taste in occupying so much space with local and church matters; if so, I can only say that my impression is, that the Presbyterian family on this coast have never become sufficiently acquainted with one another, not having a medium of communication such as that which is now offered by The Occident. I have therefore read with pleasure the communications of local correspondents, and in this letter "do as I would be done by." Those members of our beloved Church who have a sufficient catholic spirit to look beyond the narrow bounds of their own particular congregation, will rejoice to hear what report comes from other places on Zion's walls than those that are immediately beneath their own watch-tower.

Yours, truly, Sotoyome.

Our Letter from the Capital.

Sacramento, March 30th, 1868.

This day closes the labors of the seventeenth session of the California Legislature. The full time allowed by law has been spent, and the representatives of the people are now to go home and render their account to their constituents. A very large amount of business has been left to the close of the session, and they are driving things through under a full head of steam.

Among the important laws passed is the one establishing a State University. The bill was carefully drawn by some of our best educators, and when its provisions are carried out, will give to this State a noble institution.

The Sunday repeal law that passed the Assembly to the surprise of almost every one, after the vote defeating the first bill of the kind, will scarcely come up in the Senate for final action. When it came up for reference it was, at the request of some friends of the Sabbath, referred to the Judiciary Committee, where it was likely to receive its just deserts in being reported back with the request that it should not pass. The Committee, however had no time to report at all, and returned it, with a great many other bills, to await a call from some one desiring its passage. This call was made on Saturday night, but objection being made, it was not brought up. This is, no doubt, the last that will be heard from it. Should it come to a vote, it will not pass.

It is to be regretted that the Assembly did not have the magnanimity and justice to pass the Senate bill permitting Chinese to testify in our courts, where they are the sufferers. The days of prejudice and ignorance will certainly soon pass away, and men will not dare to be unjust to any class of our population. A Legislature that will interfere wisely and kindly to protect animals from cruel treatment by their owners, ought not to be less kind to human beings.

It is a relief to Sacramento to know that the Capital question is at last settled. By the meeting of the next Legislature, the new building will be ready for use. It will be a noble structure and will certainly discourage all future agitation upon this subject.

Extra meetings are still held in the churches of this city. Christian people are more interested and awakened than usual, but there is no special interest manifested among the impenitent. Many persons are thoughtful and some inquiring what they must do to be saved.

We had the pleasure of meeting Mr. Knight today, one of the enterprising men connected with The Occident. He gives an encouraging account of its success. We hope the purpose to enlarge it soon will not have to be abandoned for want of a generous support.

Alpha.

Letter from Nevada.

Virginia City, March 25, 1868.

The roads over the Sierras are again open, and we are now in communication with the rest of the world; that is, with San Francisco. Our barren hills are stripped of their white covering, except a a few snow spots on the northern slopes. The blooming spring, with its thousand charms, can hardly be called one of the seasons in this latitude. It comes, so far as it comes at all, in the natural time for summer.

A short time since, I received a letter from a lay-brother in-Belmont, a mining camp of growing prospects, about eighty miles east of Austin, in this State. In his letter, my friend writes: "Last Wednesday, I was strongly solicited to conduct a service in the Theatre, at the funeral of J. M. P., a gambler, who was shot, but lived about two weeks. I was sent for about mid-night, a week previous to his death, at his request, and found the chamber full of gamblers and rum-sellers; but I was glad to find that P. was anxious to prepare to meet his God. Would that one better qualified to speak of Jesus had been there. Those present seemed to feel the solemnity of the occasion. Some shed tears quite freely. At different times before his death, this man had some of the Sunday school children come in, and sing to him of Jesus in Heaven. One night he had a little girl sent for at 12 o'clock to come and sing. The following Sabbath we had eleven adults in Sunday school.

The repentance of one so desperate, and hardened as he was considered, had quite an influence on the community at the time, and, although I have not been accustomed to making any attempts to exhort or speak at funerals, I did here endeavor to add a few words to the Scripture read."

This seems to have been a brand plucked from the burning at the eleventh hour. I thought as I read the touching account, that probably the early life of that erring man was passed in the midst of Christian privileges. Probably the prayers of a pious mother have followed him in all his wanderings in this far off land, to be answered upon his death-bed. How instructive is the fact, that Sunday school children were called in to be ministering angels to a returning prodigal in his dying hour!

"Out of the mouth of babes and sucklings Thou hast perfected praise."

Yours, truly, T. E. T.

EDUCATIONAL.

Patriotism.

Patriotism — the love of our whole country — is a sentiment which the teacher should take all available means to cultivate. Probably the study which most tends to develop this feeling is American His-

tory. But, indirectly, it may often be reached through other studies. For example: in Natural Philosophy, when the instructor reaches such subjects as the lightning-rod, the steamboat, and the telegraph, it would seem as though he were wasting very precious opportunities of promoting culture if he did not call special attention to the American origin of these inventions. And a vigilant teacher will find similar occasions of stimulating the love of country, and just pride in her achievements, in connection with studies which seem, at first sight, very forbidding. Take Greek Grammar. We well remember the pleasurable thrill of patriotic pride with which we first read the following judgment, from competent authority, upon Alpheus Crosby's (American) Greek Grammar: "Had that work appeared abroad, there would have been no end to its praises." (Preface to McClintock's First Book in Greek.) Pride, however, in this particular instance, is mixed with a little just indignation at that vitiated state of public opinion which denies, or limits "praises" to a superior book which happens not to have been produced "abroad." C.

The American Sunday School Union.

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

E. W. TAYLOR,

Attorney at Law,

Rooms 2 and 3, Byrne's Building,

Southwest corner of Kearny and Sacramento Streets,

SAN FRANCISCO.

Pacific Medical and Surgical Journal.

NEW SERIES. PUBLISHED MONTHLY.

The editorial management is in the hands of Dr. Henry Gibbons, a veteran in his profession, formerly Professor of Theory and Practice in the Philadelphia College of Medicine, afterwards President of the California State Medical Society, and now Professor of Materia Medica and Therapeutics in Toland Medical College, and Dr. Henry Gibbons, Jr., whose extensive experience in a large hospital in Washington, during the war, has familiarized him with modern surgery, and qualified him to take charge of this department. Besides, we have secured the assistance, as collaborators, of a corps of eminent physicians, representing the body of the profession on this coast.

TERMS.—$5 00 a year, or $3 00 for six months, payable in advance, in gold coin. Postage pre-paid by the Publishers.

PUBLISHED BY BANCROFT & COMPANY, San Francisco, Cal.

One copy of the PACIFIC MEDICAL AND SURGICAL JOURNAL and one copy of THE OCCIDENT (subscription price $4.00) will be forwarded one year, to one address, for $8.00.

Congregational Singing.

ROBINSON'S SONGS OF THE SANCTUARY. Hymns and Tunes for Congregational Singing. 35,000 copies already sold. Editions for Congregational, Presbyterian, and Baptist Churches. Price, $2 50. A liberal deduction to churches for first introduction.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to *glide* more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

Everything requisite for Funerals, at the shortest notice

Sermon,

BY REV. L. HAMILTON.

Hebrews, viii: 10. "I will put my laws into their mind and write them in their hearts, and I will be to them a God, and they shall be to me a people."

This is the new covenant which Jeremiah prophesied. In Gospel times, God would write His law upon the minds and hearts of his people — make it one with their wishes. The obedient should not feel it as a constraint on their liberty, but as a help to their warmest desires. Command should be transformed into inclination; law should become love. The value of the Christian Sabbath is never fully understood until it becomes thus a law written in the heart. We gain a point of advantage in this thought as we proceed to consider —

I. The use God designed that we should make of His holy day. He meant it to be a delight, a privilege, a Father's call to peculiar home joys; an invitation to high spiritual festivities, which we should both remember and anticipate, through all our days of toil and coarser pleasures, as the best of life's enjoyments, and thus give a Sabbath flavor to all our time. Last Sabbath we sought a hold for the day on the consciences of men. We traced the history of God's legislation upon it. If we made no error, we found it based in the nature of things and the constitution of man. God rested and sanctified the day — not because he was tired, but because man would evermore need to rest and sanctify it. He reënacted the day as a part of His universal law, written on tables of stone, and binding upon all men through all time. He appropriated it to a special and temporary use, as a sign between him and the children of Israel. Christ, as Lord of the Sabbath, abrogated this special use, and restored the day to its original basis as a Sabbath made for man. The Apostles found in His resurrection on the first day of the week a greater event to commemorate in its observance than the original completion of God's work of creation — an event nearer the hearts of God's people; one that would do more to quicken the sacred uses of the day; and in the liberty wherewith Christ had made them free, consecrated the first day of the week, instead of the seventh, to rest of body, to works of charity, and to divine worship; and then left the day as a sacred legacy to all the churches they planted among both Jews and Gentiles. They gave no command, no explicit permission in words, for this change; but they themselves devoted the day to sacred uses, and the whole Church copied and perpetuated their example. Should we not observe the day? Does not God require it? Must not the Christian conscience feel a reason strong enough in this history? Yet, after all, this is not the strongest reason to the Christian heart. It *feels* a stronger. I confess that I have felt half ashamed to be spelling out an argument for the Sabbath in this slow way. A warmer proof has been moving me to another style of words. I need the day. I have found it to be good. I cannot do without it. The day is its own argument. It seems cold to be urging it upon the conscience as a duty. Shall I tell these young persons who hear me today that it is their *duty* to visit their parental homes during their vacations, and feed the home affections by renewing the old associations and pleasures there? that they *ought* not to forget them? Shall I tell the weary men of business before me that they are under obligation — it is their duty — as often as the exigencies of business will allow, to return to the bosom of their families and cheer the home circle, and be cheered by those that greet them there, and cultivate the joys of domestic life? Duty! Certainly! these are duties, and we must talk about duty if there is no heart to feel the privilege. But the word is a reproach in such connection. Argument to prove the obligation is a reflection upon those to whom it is addressed. You all know that it shows a sad perversion of natural affection if the child needs to be urged to visit home, or the husband and father to seek the society of his family. So with keeping the Sabbath. It should be a delight. The child of God ought not to need urging to visit home.—But let us come to the object.

The chief design of the day, and that which includes all its uses, is our *spiritual education*. It is the religious school-time of the soul. God dismisses us from our every-day work and calls us in from our pleasures to heavenly lessons. He would give us order and quiet for meditation, and prayer, and study of divine truth. The day is a memorial of the fact that we have a spiritual faculty or heavenward side of our nature that needs cultivation. It will not grow well uncared for. It is like any other part of our nature. If you would be a good orator or talker, you must cultivate the faculty of expression. If you would be a historian, you must devote special attention to history. If you would be a first-rate lawyer, you must set apart time to the study of law. So, if you would be a growing Christian, strong in spiritual power, you must consecrate *time* to those things which make one grow spiritually strong. You must give special attention to them. You must have a Sabbath. Your religious nature is no exception among your other powers.

You may say that *every day* is for our religious education — that, under God, our week-day work and cares, our losses and disappointments, our sicknesses and bereavements, our wrongs and buffetings from others, our crosses of every kind, are meant for a discipline of our higher nature, and to raise us nearer to God — that this world is God's school of training for a higher; that we are here, not for what we may have and enjoy here, but to be prepared for hereafter. True! all true! and it is just this that gives emphasis to our need of the Sabbath, a special time devoted to this end. You know the tendency of the human mind to engross itself in the interests that occupy it for the time, to the neglect and forgetfulness of all others, and especially of those that can only be attended to in another mood. The longer it is held intent upon one, the less disposed it feels to turn to another. It gathers a kind of momentum of feeling in this long continuance, the force of which it finds itself unable to arrest and reverse at will. Now God throws the seventh day's rest across the track of our six days' work, to check this momentum, and ease up the onward rushing tendency to materialism that threatens to forget God and miss all the better significance of our work-day life. He says to us by the very return of the sacred morning, "Stop and think; lift your thoughts upward, See whither this downward sweep of worldly feeling is bearing you. Consider what all these absorbing interests will be to you if you have nothing else. Catch the higher meanings in them. Learn what God is seeking to do for you by them. In all your planning and toiling and building for time remember Him; and let it all be only building for eternity. Carry these Sabbath thoughts and the true Sabbath spirit into your week-day work with you, and so sanctify your life and all its works and interests to their true aim and end." The Sabbath is not to be isolated from the rest of our life — it is rather to penetrate all the days of the week and assimilate them all to its own true spirit. It is not to be cut sharply off from the rest by the midnight clock that strikes between it and saturday and Monday, or to be regarded as if there were some mysterious virtue in the minute on the Sabbath side of that striking that is not in the minute on the Saturday or Monday side. It was given to be woven through the rest, sanctifying all; the golden thread that runs in beauty through the whole fabric of life's work, and binds all our days together in the one meaning that points forward to our eternity, and upward to our home. The schoolboy's days of study are not to be separated from the rest of his life. His time of education is for the sake of the rest, and meant to imbue his mind with the true idea of what his life should be and do, and train his powers and nerve his purpose to realize that idea. So with the Lord's Day set apart for our spiritual education. It is in this relation to the rest of our life that its great worth appears. And if the day is truly kept, every Sabbath will get its holy lesson. It will leave us with new accessions of spiritual knowledge and wisdom. It stills the beating passions of the week that were growing too feverish. It looks back and asks, "In what spirit and with what aim have I conducted my business and regulated my indulgences through the past six days? Has it been for life's true end? Has it been with reference to God's claims and my hastening eternity? It reviews errors, corrects mistakes, takes its resolve for the future, guards itself against surprises, and sets the key of life for the next six days. So the Sabbath sends its power through the week. It lifts the whole life up to a higher plane of movement.

This use of the Sabbath according to its original design, sets aside at once the view of those who assert that it was first ordained simply as a rest from bodily toil. This is plainly contrary to Scripture and to common sense. The Israelites were required to offer a double sacrifice on that day. It was to be a "Sabbath of rest; a holy convocation." A convocation for what? It could be for no other purpose than united worship. It was to be "the Sabbath of the Lord in all their dwellings," in the tents of the desert and in the settled homes of the land of promise. And when we remember how they were commanded to study the words of God's statutes and commandments and teach them diligently to their children, we cannot doubt that the Scripture lessons in their home Sabbath would vary the public worship and fill the sacred hours remaining. To have commanded simply rest from work would have been an absurdity. It would have been a violence to nature. Some part of the man must be active if the body rests. It would have been appointing *Saturnalia* for the secret passions, instead of a holy rest. Put a healthy man under such a prohibition from work and give him nothing to occupy his mind, and you turn the day into torture. The spontaneous ferment of wicked thoughts would be uncontrollable. Instead of quelling sin, such rest would but sharpen temptation. Better work the body to the limit of strength the day through. But if the Jew might not work, his choice was of necessity between worship and some sort of amusement. The amusement was plainly forbidden. Hence God would have shut him up with his worst passions, and compelled him to prey upon himself, if he had not given him holy duties to fill the day. We cannot doubt which He did.

The idea of the Sabbath is not merely rest, but *holy* rest — not recreation of the body in gay pleasures, but in *holy* pleasures. And this is the most refreshing and invigorating recreation for a toil-worn body. It fills the heart with the most inspiring hopes. It stays the soul on sure and glorious prospects. It fortifies conscious weakness against all calamity and trial. It calms those passions which worldly pleasures are sure to inflame. It is true rest — not stagnation — that but generates rust on the wheels of life; not thoughtless hilarity — there is too much corrosive acid mingled with such pleasure for it to greatly ease the friction of toil — it is peace of soul that feels itself approved and folded to the bosom of God. The rest that does most to recreate the body, must be attended with the highest pleasurable action of the mind. Action is the true secret of rest. Look into the crucible of molten metal raised to a white heat. How still it seems! You feel its intense calm as the very symbol of rest. Yet that still heat is the utmost intensity of action — the liveliest possible motion of the particles among themselves. So man's Sabbath rest is sweetest and most life-giving when the soul is still by the very intensity of its action towards God — passion still; love and trust resting on the bosom of the Father.

2. We come to the question: In what manner should we keep the Sabbath?

It is plain, in the first place, that we have no divine law or rule in words to regulate the outward actions. The minute directions of Moses are not for us, as we saw last Sabbath. The Savior has expressly annulled them. They were not needed by His followers; they would have been oppressive; they were contrary to the free spirit of His Gospel. He justified His disciples in breaking the letter of the Mosaic statute when they were "an hungered."

To the great offense of the Pharisees, He healed the withered hand and the crippled woman, and gave the cured impotent man leave to carry his bed on the Sabbath day. He need not have done this. He could have easily deferred these cures till Monday. He evidently acted with the purpose to relax the stringency of the old law. We cannot refuse to see that he set aside the constraint of its minute regulations, and gave no explicit rule for the outward actions in their place. But are we left, then, without any guide to the observance of the day? By no means. The Savior still affirms that the Sabbath was made for man. He retains the substance. He keeps the Sabbath for its uses; and His spirit inspired the Apostles to sanctify the day and establish it in the Church. What is the law, then, for its observance? Plainly, the object of the day, and the natural dictates of Christian feeling in the effort to attain that object. We need no other guide. An explicit rule in words for the outward actions would have stood in the way of the Christian Sabbath's best observance. There was a special object to be answered by the day among the Jews that called for special regulations. The special aim has ceased; the regulations to attain it are now ended. Now we have the primeval Sabbath for its universal end. We have seen what that end is — the education of man in the things of the spirit, in the truths of eternity. How shall you keep the day? The answer is clear: So as to most effectually attain its object. You need no other rule. Feel what the day is given for; fill your own heart with its holy design; give yourself up to the object and you keep the Sabbath holy. "May I kindle a fire in my dwelling, as the Jew was forbidden to do, and prepare my meals as on other days?" Certainly; so that you do it in such a way as not to interfere with the sacred object. "Am I bound to sit quietly in my home when I feel that inaction is dulling the mind, while a walk in the open air would give a new spring to thought and sacred meditation?" Certainly not; stupefying the faculties is no help to spiritual education. "May I drive in the country with my family, or go on the excursion with my friends on God's holy day?" Stop and think. Can you attain the sacred end of the day as well in that mode of spending it? Does Christian feeling tell you so? Does the general experience of Christ's most earnest disciples give such license? I will abide by the answer. Consider well, and you cannot doubt what it must be. Nine hundred and ninety-nine in a thousand would give an emphatic no. The true spirit of the day instinctively shrinks from such a use of its sacred hours. Take your holidays of recreation, if you need them — religion does not forbid you; but take not the day which God has sealed to other uses. "Render unto Cæsar the things which are Cæsar's, and unto God the things which are God's."

But should we seek to invest the day with any sacred awe of feeling, as many do? Should we distinguish it from other time by such a sentiment? Should we cherish, and should we teach our children to cherish and cultivate that subdued and chastened reverence of heart and deportment which makes a peculiar Sabbath atmosphere over the holy hours? Is this superstition? The true answer here is: be natural! Let the proper exercises of the day make their own spirit and atmosphere. You spontaneously bare the head at the approach of venerable age, or the cortege of death. Let the Sabbath have its own mood of worship, and its proper expression. You may sneer at reverencing time as holy, or having a different feeling toward one day from another, but are you not doing violence to nature? Preface the exercises of family prayer with frolic and mingle them with mirthful songs, and see if the merest child will not feel the incongruity. It is not natural. It tramples the instincts of Christian feeling — the awe that must ever rise in the true approaches of worship to God at any time. Why is it that a gentle solemnity steals over you as you enter the house of God, even alone, which you do not feel in entering the grandest hall or theatre? It it only a room of common materials. Why is it that the traveler tells you of emotions too great for utterance on Olivet, overlooking Jerusalem, and of uncontrollable floods of tears as he stands thoughtfully in Gethsemane? These are only spots of earth in themselves, like thousands of others on which he has stood. Why is it that such mighty thrills of emotion run along your nerves as the soiled and tattered battle-flag is unfurled over your head? In itself it is no more than any other piece of painted cotton. Why is it that men will take long journeys to see a rock that chanced to be first pressed by the feet of a few Christian wanderers, two or three centuries ago, and will break off bits of it to carry home and cherish as sacred relics? It is composed of the same mineral elements with thousands of rocks close at hand. Cold reason can see no sense in this. Oh, yes! but we are beings of imagination and sentiment, as well as of reason. We were made to be powerfully moved and influenced by association. The mightiest truths stream into our feelings and move their depths through these symbols and memorials of great events. Nature feels them, and it is doing violence to ourselves to treat them slightly. So must the associations of worship and sacred thought gather around God's holy Sabbath its natural sentiment. It asks for no artificial constraint on the feelings — no putting on of a sanctimonious and affected reverence. Just let it have its own mood of prayer and praise and divine meditation. Listen to the dictates of Christian feeling; open your soul to the power of its associations; be as reverent as the true worshipper must; impress your children; impress all as far as you can with the same spirit; *be natural*, and you truly sanctify the Lord's day.

We think it must be plain, from the view now presented, that any attempt to divide the Sabbath with any of the gay forms of amusement or recreation; to make it partly holyday and partly holiday; to turn it into a French Sunday will be destructive of its true object. It is an attempt to mingle incompatibles. Think of it — the dance on the green, or the frolicsome picnic in anticipation during divine service! What mood of mind must it put the younger portion of worshippers in, not to say what its effect would be upon many of riper years? The bare question is enough to settle the decision, if we have rightly apprehended the object of the day.

But what civil legislation should be desired by us as a Christian State in behalf of a day of sacred rest? None at all, I answer, to constrain men to keep it holy. The very proposition is a self-contradiction. Keeping it holy must be the free, voluntary act of the individual. The civil legislator cannot touch the case. He cannot change the heart and give a Sabbath-keeping spirit. His office, so far as it can touch individual action directly, is to restrain it where it would interfere with those who desire to keep the Sabbath. It is protective, simply. Legislation may say to men, "You shall not disturb those who wish to keep holy the Sabbath day, either by your business or your amusements; touch not their rights." It ought to say this. But there it should stop. It is as powerless to compel men to keep the Sabbath holy as it is to compel them to have no other gods before Jehovah, or to honor father and mother, or not to think blasphemous thoughts. This is too holy ground for the human legislator to tread. We may take the Gospel and persuade but we may not coerce either opinions or actions so long as they trespass not upon the public or private rights of others.

But this does not touch at all the vexed questions of legislative duty with regard to those public matters which civil law may and must to some extent regulate. Shall it close public theatres and gardens and places of amusement? Shall it suffer the corporations itself creates to run their rail-cars and steamboats, and stages on that day? These are sometimes perplexing questions. It seems to me that no iron rule for all cases and circumstances can be given. When the Legislature has secured for the Sabbath good order among the people, and to all the right to religiously observe the day, in a government by the people, like ours, it can go no further, unless *public sentiment* demands more. Enactments which the people will not sustain and enforce are worse than useless. They irritate while they do not secure obedience. They weaken the law-observing conscience. They would bring the Sabbath into disrespect, rather than promote its observance. As friends of the day, our first appeal must be to the people, not to the Legislature — our main reliance public sentiment, not legal constraint.

And let us remember, my brethren, that we hold in our hands a mightier power to secure a holy Sabbath than the State Legislature — the persuasive Gospel of Christ. Let us rely on that. It is the still, small voice to prevail when the fire and the whirlwind and the earthquake of public excitement and state legislation have spent their force in vain. Let us remember that it has shown itself able to win a Sabbath all over the world where it has force, not only without the favor of human governments, but against their most determined resistance. Let us trust its power. Let us meet these brethren from foreign shores that threaten to rob us of our Sabbath with its voice of love and persuasion. Let us set a holy Sabbath before them in its blessed influences. Let them see it in our lives, in our families, in our superior social order and domestic happiness. We shall win them to our Sabbath. Christ's everlasting Gospel has not lost its power. It can win them. And we shall also secure the glorious promise to ourselves, spiritually fulfilled: "If thou turn away thy foot from the Sabbath, from doing thy pleasure on my holy day, and call the Sabbath a delight, the holy of the Lord, honorable, and shalt honor Him, not doing thine own ways, nor finding thine own pleasure, nor speaking thine own words; then shalt thou delight thyself in the Lord; and I will cause thee to ride upon the high places of the earth, and feed thee with the heritage of Jacob thy father, for the mouth of the Lord hath spoken it."

Attention!!

RELIABLE SEEDS.

EDWARD E. MOORE.

425 WASHINGTON STREET.

The undersigned, a Practical Agriculturist, is now prepared to supply the wants of Merchants, Ranchmen, and all others, by wholesale or retail, of such seeds as will not disappoint those who use them, as our seeds alter using the utmost care in their selection, in getting them true to their kind. We have suitable grounds prepared to test the different varieties, so as to insure their entire reliability. The assortment consists of ALL KINDS OF VEGETABLE SEEDS, ALL KINDS OF FLOWER SEEDS, ALL KINDS OF GRASS AND RED AND WHITE CLOVER SEEDS; also, ALFALFA AND LUCERNE.

EVERGREEN SEEDS, NATIVES OF CALIFORNIA AND ADJACENT STATES. ALL KINDS OF TREES AND SHRUBS, ALL KINDS OF FLOWERS IN THEIR SEASON, ALL KINDS OF BULBS IN THEIR SEASON, STRAWBERRY AND RASPBERRY PLANTS, Etc., Etc.

The subscriber deems it superfluous to name every article for sale, but merely remarks, that no one has a superior assortment, and no one will deal more honorably by his customers, to whom he refers with confidence, as universal approval has been awarded him. Small papers at wholesale or retail. All communications, or orders, by Mail, or Express Companies, attended to promptly. Catalogues furnished on application, by letter or otherwise.

The Child on the Judgment Seat.

Where hast thou been toiling all day, sweet heart,
That thy brow is burdened and sad?
The Master's work may make weary feet,
But it leaves the spirit glad.

Was thy garden nipped with the midnight frosts,
Or scorched with the mid-day glare?
Were thy vines laid low, or thy lilies crushed,
That thy face is so full of care?

"No pleasant garden toils were mine,
I have sat on the judgment-seat,
Where the Master sits at eve and calls
The children around His feet."

How camest thou on the judgment seat,
Sweet heart, who set thee there?
'Tis a lonely and lofty seat for thee,
And well might fill thee with care.

"I climbed on the judgment-seat myself;
I have sat there alone all day,
For it grieved me to see the children around,
Idling their life away.

"They wasted the Master's precious seed,
They wasted the precious hours;
They trained not the vines, nor gathered the fruits,
And they trampled the sweet meek flowers."

And what didst thou on the judgment-seat,
Sweet heart, what didst thou there?
Would the idlers heed thy childish voice?
Did the garden mend for thy care?

"Nay, that grieved me more; I called and I cried,
But they left me there forlorn;
My voice was weak, and they heeded not,
Or they laughed my words to scorn."

Ah! the judgment-seat was not for thee,
The servants were not thine;
And the eyes which fix the praise and the blame
See farther than thine or mine.

The voice that shall sound there at eve, sweet child,
Will not strive or cry to be heard;
It will hush the earth, and hush the hearts,
And none will resist its word.

"Should I see the Master's treasures lost,
The gifts that should feed His poor,
And *not* lift my voice, (be it weak as it may)
And *not* be grieved sore?"

Wait till the evening falls, sweet heart,
Wait till the evening falls;
The Master is near, and knoweth all—
Wait till the Master calls.

But how fared *thy* garden-plot, sweet heart,
Whilst thou sat'st on the judgment-seat?
Who watered thy roses, and trained thy vines,
And kept them from careless feet?

"Nay, that is saddest of all to me,
That is saddest of all!
My vines are trailing, my roses are parched,
My lilies droop and fall."

Go back to thy garden-plot, sweet heart;
Go back till the evening falls,
And bind thy lilies, and train thy vines,
Till for thee the Master calls.

Go! make thy garden fair as thou canst,
Thou workest never alone;
Perchance he whose plot is next to thine
Will see it and mend his own.

And the next may copy his, sweet heart,
Till all grows fair and sweet;
And when the Master comes at eve,
Happy faces His coming will greet.

Then shall thy joy be full, sweet heart,
In the garden so fair to see,
In the Master's words of praise to all,
In a look of His own for thee!

—Cotta.

Shall a Newspaper be Prayed for?

The church which does not habitually pray for its minister, cannot expect any decided blessings upon his labors. It is true that such blessings may sometimes descend in answer to his own prayers, and in spite of his church, but that church has no business to expect it, and ought to mingle its own rejoicings for the blessings with repentance for its own indifference. It is a settled point that the ministry cannot perform its work unsustained by the prayers of God's people.

Ought it then to be expected that the religious newspaper shall perform its work without the same support? That work is in many respects of the same kind with that of the ministers of Jesus Christ, while its influence is immensely wider. The minister can only speak to a few hundreds; often less than a single hundred. The newspaper audience is with the thousands. Probably the sheet which conveys this article will be read by twenty or twenty-five thousand persons. What an audience is this! The religious sentiments and habits of thought of the religious public are formed in a good measure by the newspaper which has its confidence. Ought not, then, the newspaper to be prayed for, that its conductors may have the Spirit of wisdom, of a sound mind, and of their Lord and Master? Its conduct is a great and difficult work, weighed down with responsibility, and suspended interest vast as the years of eternity.

If, instead of complaining at, the Christian would pray for, his newspaper, it might often suit him better, at the same time that it better promotes the interests of Christ's Kingdom.—*Exchange.*

Droll Calculations.—What a noisy creature would a man be were his voice, in proportion to his weight, as loud as that of a locust! A locust can be heard at a distance of one-sixteenth of a mile. A common man weighs as much as sixteen thousand of our locusts, and as the note of a locust can be heard one-sixteenth of a mile, a man of common dimensions, pretty sound in wind and limb, ought to be able to make himself heard at the distance of one thousand six hundred miles, and when he sneezes "his house ought to fall about his ears."

Supposing a flea to weigh one grain, which is more than its actual weight, and to jump one and a half yards; a common man of one hundred and fifty pounds, with jumping powers in proportion, could jump twelve thousand eight hundred miles, or about the distance from New York to Cochin China.

There is a greater depravity in not repenting of a sin when it has been committed, than in committing it at first. To deny, as Peter did, is bad; but not to weep bitterly, as he did, when we have denied, is worse.—*Payson.*

The Young Folks.

Goldspot, the Trout.

How he lived and died.

Did you ever see Goldspot, the Trout? Well, he lived down in the brook, where the big willow trunk is twisted close to the water, and makes such a dark, sunless sort of a pool—a slippery, lively little fellow, darting through the water like a streak of gold. It seemed very easy to catch him, but when you put your hand down into the water, Goldspot wasn't there! He was a sly little fish, too—you might bait your hooks with flies colored like the rainbow, and worms that wriggled most temptingly, but Goldspot knew better than that—he wasn't a fool, if he was a trout.

Well, Goldspot and little Silverwing, the fairy, who lived up in the dell, were great friends, and many was the gossip they had together, on a moonlight night, or early in the morning, before the children at the house had finished their dreams.

Silverwing was sitting on a fallen willow-leaf, floating along by the mossy shade, when Goldspot came darting up.

"Well, how do you do, Goldy?" said the fairy, touching him on the fins with her little jeweled wand.

"Do? I'm well enough," said Goldspot, discontentedly; "only I'm tired to death of this humdrum sort of life—up the stream, and down the stream, and round by the water-lilies. There isn't much variety in a fish's life, Fairy Silverwing."

"Some fishes have variety enough," said Silverwing. "If you were a shark, now—I've seen 'em out at sea, with double rows of shining white teeth!"

Goldspot shook his tail, horrified.

"I shouldn't like to be such an ugly, vulgar fish!"

"Or a whale?"

"Just as bad."

"Well, then, there are gold fish."

"What are they?" demanded our trout, beginning to feel interested, and resting his fin on the willow-leaf.

"Well, I've seen them when I've been hiding away in the honeysuckle tubes that hang over the window in the big house yonder."

"What! fish living in honeysuckles?" giggled Goldspot.

"Will you hear me out?" demanded Silverwing, with dignity. "I said I was in the honeysuckles. The gold fish were in beautiful round glass globes on a parlor table, with flowers arranged over the top of their crystal palace, and little black-eyed children watching them."

"Dear me, how fine that must have been!" said Goldspot, enviously. "Did you say they were gold all over, not merely spotted, like me?"

"Yes, gold all over."

"Oh, dear! what a difference there is in lots!" groaned little Goldspot. "Now, here I am, shut up in this odious little woodland stream, with nobody to admire me but a few crusty frogs, and an ill-tempered toad or two, while those fish up at the great house have company every day, and live in a crystal palace, besides! I think it's mean, Silverwing."

"All's for the best, Goldy," said Silverwing, preparing to step off her willow-leaf on a varnished butter-cup, that grew close to the shore.

"No, it isn't! Dear Silverwing, don't be in such a hurry. I want to ask a favor of you."

"What is it?"

"I know you can do the most wonderful things with that sparkling wand of yours. Please turn me into a gold fish at the big house. Do, dear Silverwing. I should be the happiest little fish in the world."

"You don't know what a foolish thing you are asking for, Goldspot," said Silverwing, gravely balancing herself in the yellow heart of the butter-cup. "You are a great deal happier as you are."

"No, I'm not; I'm a miserable fish!" said Goldspot, wiping his eye with his fin. If you won't grant me this favor, Silverwing, I'll swallow the first hook I see let down! I don't want to live any longer! Do, please, Silverwing, make a genteel gold fish of me."

"Have your own way, Goldspot," said the fairy, lifting up her diamond-tipped wand, so that the bright rays of the sunrise turned it into a spark of fire, and then touching Goldspot lightly on his head, and his tail, and each of his little shining fins.

And, wonder of wonders! Goldspot was a trout in the shaded brook no longer, but a beautiful creature with gleaming scales of gold in a crystal palace, with fresh flowers hanging over its mouth, and beautiful music sounding from a piano near by, and ladies and children watching his graceful motions. This was happiness indeed, and Goldspot wondered how he could ever have tolerated existence down in those humdrum woods. Silverwing had certainly been mistaken when she talked about "all being for the best."

For two days Goldspot lived a life of dissipation and vanity, praised by everybody, and never weary of flashing his golden armor in the sunlight. The third day his fins began to feel weak, and his head heavy, and he found difficulty in breathing.

"Oh, dear!" gasped poor little Goldspot, "this water is getting dreadfully impure. If I were only where the clear current flows out under the old willow!"

So Goldspot languished, and ceased to dart round and round, and hung his pretty head, and still nobody seemed to know what the matter was.

"Oh, Mamma!" said a pretty little girl, "what is the matter with my fish? He lies perfectly still at the bottom of the globe. I am afraid that he is dead!"

But Goldspot gave a little motion of his fin, to correct any such mistaken idea.

The mother looked closer.

"They have forgotten to change the water, my dear," she said; "see how turbid it is. Ring the bell for Jones to come and change it directly—no wonder the poor fish is sick."

Oh, how grateful little Goldspot felt.

The big servant-man came in, and lifted the glass globe in both hands, to carry it out to the kitchen pump. As he went past the big chair, he caught his

clumsy foot against it and stumbled, letting the globe slip and fall.

It came to the floor in a score of shattered pieces. The fern and pebbles flew every way, and the water streamed across the carpet; and, worse than all, poor Goldspot lay quite dead by the chair, when the little girl ran to pick him up.

That was the end of Goldspot, the trout.

"I knew how it would be," sobbed Silverwing, when she sat among the honeysuckles that evening, and heard them talking over the poor little fish's untimely fate. "He couldn't be contented, and this is the upshot of it. How much more sensible it is for fishes to be contented with their lot in life!"

Yes, and for children, too.—"*The Fairies.*"

AGRICULTURAL.

Winter Eggs.—To secure eggs in winter, you must feed your hens well and keep them well supplied with ashes, sharp sand, gravel, profused lime, and finely powdered bones, oyster shells, bits of cabbage, and scraps of meat put in boxes. A teaspoonful of cayenne pepper intermixed with their food, and fed to a dozen hens every other day, is sure to make them lay eggs. So says a lady from Maine, who obtained in this way from twelve to fourteen eggs a day from but sixteen hens, and she informs us that whenever she omitted feeding them with cayenne pepper for two or three successive days, her supply of eggs invariably fell to but five or six a day.

Water-proof Harness Blacking.—The following recipe for making an excellent article is well spoken of by a correspondent of the *Field and Farm.* Farmers, try it: "Beeswax, (shred fine) eight ounces, turpentine sufficient to cover it; let them stand till the wax is dissolved (three or four days); ivory black four ounces, olive oil (I use neat's foot oil) two ounces, Prussian blue two ounces. Rub the ivory black and Prussian blue well together to a fine powder in a mortar; then add the oil, and gradually the other ingredients, and thoroughly mix them. If it gets hard by keeping, soften with turpentine. I have only one brush used — one end for blacking, the other for polishing."

Wood ashes sprinkled over garden plants, are a valuable top-dressing manure, as they strengthen the stems, enlarge the leaves, and greatly improve the quality of our garden vegetables. Wood ashes possess a strong alkaline nature, and neutralize, or destroy or remove any acidity or sourness or sour weeds that may exist in the ground. Our hard, heavy, and fine-grained woods, as oak, hickory, ash, chestnut, etc., yield, when burnt, the strongest and best ashes. Leached ashes, the ashes left after soap-boiling, are still very good for manure, although not so strong as the pure or unleached wood ashes are. Unleached ashes are too caustic to be applied to garden vegetables.

Onions and Poultry.—Scarcely too much can be said in praise of onions for fowls. They seem to be a preventive and remedy for various diseases to which domestic fowls are liable. Having frequently tested their excellencies, we can speak understandingly. For gapes and inflammation of the throat, eyes, and head, onions are almost a specific. We would therefore recommend giving fowls, and especially young chickens, as many as they will eat, as often as three times a week. They should be finely chopped. A small addition of corn-meal is an improvement.

The amount of land washed away by the high water in Russian River and Dry Creek, in this vicinity, will not fall far short of one hundred acres This, when land is valued at from $100 to $125 per acre, is rather hard on the owners thereof.—*Healdsburg Democrat.*

Barley was found wild in the mountains of Himalaya.

The prospects for the coming spring of a wool clip in Illinois are more than usually promising.

Tanning Sheepskins with the Wool on.—Take the skin upon a board, with the flesh side out; then scrape it with a blunt knife; next, rub it over hard with pulverized chalk until it will absorb no more. Then take the skin from the board and cover it with pulverized alum; double half-way over, with flesh side in contact; then roll together tight and keep dry for three days, after which unfold it and stretch it again on a board or door, and dry in the air, and it will be ready for use.—*Columbia Spy.*

If people planting orchards would give orders to mark the north side of the trees with red chalk before they are taken up, and when set out to have the trees put in the ground with their north side to the north, in their natural positions, a larger proportion, it is said, would live, as ignoring this law of nature is the cause of many transplanted trees dying. If the north side be exposed to the south, the heat of the sun is too great for that side of the tree to bear, therefore it dries up and decays.—*Builder.*

Selecting Sheep.—The most approved form in sheep is general roundness of shape and fineness of the bones. The chest should be broad, the ribs well arched, the back and loins broad, flat, and straight; the limbs should be short in proportion to the body, the head small, the ears thin, the skin soft and elastic, the wool soft to the touch, thick, and coming well forward to the face, but not covering it. The face and forehead should be clothed with short hair, and the eyes should have a lively expression.

Soft Soap for Fruit Trees.—Mr. J. Case, an old friend of the *Weekly Press*, says: "Please tell your patrons to whitewash fruit trees with soft soap, instead of lime, and they will find it to their advantage. Lime is good in theory — but the soap much more so in practice. Fruit-growers, try it."

PACIFIC COAST ITEMS.

There are circumstances which greatly mitigate our regret that Professor Whitney has not been continued in his position as State Geologist. One is that he seems to have mistaken the main expectation of the public in regard to his operations. A loud orator at Liverpool once spoke with great warmth of the time when every Englishman would read Bacon. A practical person mildly suggested that it was more desirable to first bring about the time which would enable them to *eat* bacon! So with our young State; we want first the development of our resorces — and after that, if it can be, the honor of widening the sphere of scientific knowledge. Again, we are glad that Professor Whitney has not been continued in his work, because the best portion of one summer was spent by him and his corps in taking the altitude of the mountains lying between Tulare and Inyo counties, and in naming the one supposed to be highest for himself, and the lower peaks for his subalterns. The State can find names for its mountains more economically. Since then, his time has been largely given to an examination of the Calaveras skull, and urging the claims of this osseous specimen as evidence of the pre-Adamite existence of man — a subject well enough for an amateur geologist, but not the main purpose of the geological survey of California.

The Seventeenth California Legislature adjourned on Monday night. During the last two weeks both the Senate and House were exceedingly busy, and we doubt whether any previous session has left a better record. The important Acts passed are: To reduce fees and salaries on a general plan; to amend the registry and militia laws, making both more simple and economical; to reduce the legal standard for a day's labor and protect mechanics and laborers in their wages by an amended lien law; to regulate the business of insurance; to promote the building of local railroads; to prevent cruelty to animals; to complete the new building for the Deaf, Dumb and Blind Asylum; to encourage the manufactures of beet sugar and of silk; to build and sustain a State University; to revise and codify the general land laws.

A correspondent of the Owyhee *Avalanche* writes very disrespectfully of our neighboring city, when he says: "Oakland is simply a wart, a mole, a mistletoe bough, or an excrescence on the suburbs of San Francisco, and its people a batch of barnacles, depending for existence on the increasing prosperity of the metropolis. Their entire business consists in riding back and forward between the two places and talking about the terminus of the Pacific Railroad in connection with real estate." When that correspondent visits this section it will be prudent to keep this side of the Bay.

A correspondent from Cloverdale says: "It would be well for the frugal and well disposed emigrants who are reaching San Francisco from the older States in search of homes, to visit this region, and the narrower valleys of Mendocino County. We have none of the fevers of the Sacramento and San Joaquin valleys, the soil is productive, the climate exempt from extreme heat and cold — with wild game abundant, land cheap, and what every new comer ought to take into account, good schools."

The local papers report that eighty-eight passengers landed from the *Moses Taylor*, on her arrival here a few days ago, without a dollar in their pockets. This is taking a rather bold risk, but with enterprise, health, and youth to favor, it may prove a lucky one. Landing on a strange shore, it is very convenient to have a spare eagle or two, as some of these emigrants have doubtless learned ere this.

The Shanghai *News Letter* warns politicians, savans, and adventurers not to hurry across the Pacific from this coast on account of the success of Mr. Burlingame, Rev. Dr. Martin, Dr. Macgowan, and other Americans at the Chinese Court. To avert the calamity of such a foray, the editor announces that the supply of American would-be-Asiatic officials is already above the demand.

The total rain-fall since the commencement of the rainy season, five months ago, appears, by Tennent's rain-guage, to be over thirty-six inches. This is above the average amount of our annual rain-fall. In the season of 1861–62 the rain-fall was only a fraction below fifty inches. At Sitka the annual amount never falls below seventy-five, and usually reaches ninety inches.

The Los Angeles *News* announces that Abel Stearns, the largest land-owner in California, has sold 200,000 acres at $1 25 per acre, of his lands. This sale includes the ranches Los Coyotes, La Habra, and Las Balsas. Don Andreas Pico is now the largest land-owner in that region — owning the ranch San Fernando, of 121,619 acres.

The Republican State Convention, held at Sacramento on Tuesday, endorsed Grant as the candidate for President, but declined to indicate any preference for Vice President. Delegates were chosen for the National Convention.

The arrival, by the *China* on Tuesday, of Hon. Anson Burlingame, of the Chinese Embassy, with nine attachés and eighteen servants, attracted no little attention. They leave for New York by the next steamer.

The Oregon people say that no State can produce a better quality of iron than theirs. The first stove ever cast in the State was recently turned out at the Oswego Iron Mills.

The past six months has been a very dull season with the book-makers. Few new books have been issued, and they are paying badly.

The people of Los Angeles County have decided to give aid to the building of the railroad from Los Angeles to Wilmington.

Ex-Senator Gwin is visiting El Dorado, Nevada, and other mining counties, looking after some of his old claims.

There are now nine religious newspapers published in this city. Some of them have political tendencies.

TELEGRAPHIC SUMMARY.

Eastern.—The United States Grand Jury at Richmond have found a new indictment against Jeff Davis....There is another Fenian panic at Montreal, on account of the finding of concealed Greek fire....Business is dull in New York and the larger cities. Tens of thousands of laboring men are out of employ....Eleven hundred passengers left for California on the steamer *Arizona*....The snow on April 1st was deep in most parts of New England....The counsel for the President are reported to have summoned Generals Sherman, Meade, and Hancock.

Congressional.—The House last week defeated the resolution of Gen. Butler to attend to no business after Monday save impeachment....The Senate is maturing a bill to organize the "Territory of Wyoming," with Cheyenne as its capital....The House has refused to allow Mr. Hooper, the Mormon delegate from Utah, to take his seat.

Impeachment.—On Tuesday the impeachment trial was renewed in the Senate. The House Managers brought forward Van Horn to prove a conversation between himself and Gen Thomas as to the intentions and motives of the President. Chief Justice Chase ruled that the evidence was not admissible. The Managers denied that the Chief Justice had any authority in the matter. He maintained that it was his right to exclude irrelevant and improper testimony. By his casting vote, the Senate went into a private consultation.... In secret session, the Senate, by a vote of 25 to 19, sustained the Chief Justice, against the opposition of Sherman, Conkling, and Sumner....In the Senate, on Wednesday, the attempt was again made to overrule the Chief Justice, but without success.

Foreign.—Lord John Russell, in the House of Lords, vindicated his course, when Secretary of Foreign Affairs, in regard to the Alabama and other privateers during the rebellion....The British Ministry have postponed the question of Irish Reform to the meeting of the next Parliament....The British Abyssinian army has reached the highlands among which the King with his army is entrenched for a fight....Mr. Gladstone made a great speech in favor of Irish Church Reform, in Parliament on last Tuesday....King Victor Emanuel and the Pope are seriously ill.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, April 1, 1868.

We have to report this week a general decline in prices, as the result of free arrivals. Best quality of American Beef can now be had at 11½c, a decline of 1½c from last Wednesday; inferior qaality sells as low as 6c. Veal is also a shade easier. Mutton has fallen off 1½c. Spring Lamb is in better supply at a decline of 1½c. Pork also favors the buyer, the range for undressed being 5@8c, and for dressed, 9@12c, the latter being an outside price for very choice, and the inside figure for undressed being for soft Hogs.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 10@11½c ℔ lb.
do 2d do 7@10c ℔ lb.
Veal—Ordinary to choice, 8@12½c ℔ lb.
Mutton—In fair demand, 6@7½c ℔ lb.
Lamb—Spring in fair supply at 9@11c ℔ lb.
Pork—Undressed, best quality, 7@8c; dressed, medium range, 9@11½c ℔ lb.

Produce Market.

Flour—Apart from the usual jobbing trade there is but little demand. Best Oregon brands of Extra are quoted at $7 50@7 62½. City brands are also a little off, the outside paice for Extra in qr sks now being $7 87½. We have therefore revised our quotations as follows:

Superfine, hf sks, ℔ 196 lbs	$6 62½@6 87½
qr sks	6 87½@7 12½
Extra, hf sks	7 37½@7 62½
qr sks	7 62½@7 87½

Wheat—The market is apparently firm at $2 50 for good milling. Sales of 300 sks good, $2 50; 1,200 sks do, $2 50; 7,500 sks good shipping, for export, private. We quote fair to extra choice at $2 45@2 55. At the close, 1,200 fair milling, $2 45 ℔ 100 lbs.

Barley—The market is quiet at $1 95@2 05 ℔ 100 lbs.

Oats—We have to report a considerable movement in this grain during the last 24 hours, resulting in a marked advance in quotations. It is supposed in some quarters that the stock in the State is quite light, and that 50,000 centals would cover the surplus. Of this amount over 20,000 centals is now held by a single operator. Sales to-day have been made as high as $2 60@2 65. In all probability 2,000 sks have been secured since yesterday. Some of the details are as follows: 800 sks light, $2 25; 1,800 sks do, $2 30; 2,000 sks good, $2 35; 400 sks do, $2 37½; 500 sks do, $2 45; 1,500 sks do, $2 50; 1,000 sks choice, $2 60; 900 sks do, $2 65. In the present excited state of the market it is difficult to give quotations.

Potatoes—Sale of 600 sks Humboldt, ex *Del Norte*, $1 50. We quote the range for best kinds of all descriptions at $1 30@1 55 ℔ 100 lbs.

Corn—Red is quoted at $2 25; medium Yellow, $2 35@$2 37½; deep Yellow, $2 50 ℔ 100 lbs.

Rye—Continues dull at $2; 50 bags reported sold at $2 10 ℔ 100 lbs.

Buckwheat—No sales; nominal, $1 75@2 ℔ 100 lbs.

Onions—Sale of 25 bxs assorted Oregon, private; same are jobbing at 6@7c ℔ lb.

Beans—Sales include 371 sks Bayo, $3 62½; quotable at $4 75 for new, and $3 for old; 375 sks Pink, $2 62½; quotable, $2 50@2 75; Red, $2 12½@2 50; Butter, $4@4 50; Pea, $4 85@5 50; small White, $4 75@5 ℔ 100 lbs.

Bran—Very scarce and quick of sale at $30 ℔ ton.

Middlings—Fine, $50; feed descriptions $35@40 ℔ ton.

Oil Cake Meal—Steady at $30 ℔ ton from the mill.

Hay—Two cargoes of about 60 tons sold within the range of $18@24 ℔ ton; a choice lot of Wheat would command $25 ℔ ton.

Dairy Products—Fresh roll Butter, 30@32½c: California firkin, 32½c for store-packed, and 32½@35c for ranch-packed; Cheese, 17@18c ℔ lb for best California dairies, with sales of 30 cs for export within the range. Eggs, firm at 35c ℔ doz.

Poultry—Live Turkeys, 14@16c, and dressed do, 17@19c ℔ lb. Hens and Roosters, $6 50@7; Ducks, $5@6 ℔ doz; Geese, $2 50@$3 ℔ pair.

Provisions—California-smoked Bacon, 16@17c; Oregon do, 13@14c; California Hams, 17@18c; Oregon do, 15½@16c; Lard, 14@15c; for California, and 13½@14c ℔ lb for Eastern.

Wool—The receipts of the new spring clip continue light; quotations nominal at 11½@12c for fall and 15@16c for spring.

Hides—Sales since last Wednesday aggregate 400 California dry, usual selection, 14@14½c ℔ lb.

Tallow—Market quiet at 7¼@7¾c ℔ lb for good to choice Beef and Mutton.

CURRENT TOPICS.

The influx of emigrants from the East is becoming rather the occasion for serious thought than for congratulation, in the present condition of affairs. The practical question is assuming vast proportions, what shall be done with these thousands who are being discharged on our shores from six steamers a month? Most of them are ignorant of even the geography of the State, and need to be told where to go, when they are willing to go where they may find employment. Many of them are entirely destitute when they land, and need care in respect to obtaining the first day's food. Many of them have no other idea in coming here than to get work by the day — in the city if they can—and live as they have been accustomed to live at the East. It is manifest that either the city authorities, or some organization of citizens, should immediately take in hand the matter of providing both temporary and permanent employment for these men. Those of them who have a little money should be directed in regard to the purchase of land, from which they may obtain support, as the best thing they can do. And may there not be some association that can advance enough to others for the first payment on land, secured by lien on the purchase, so that a multitude of those who have expected nothing more than day labor, may soon become producers from the soil and have small homes for their families? Certain it is, that by some means the possibility of farming must be opened before these emigrants, or their coming will be an affliction to themselves and a curse to the State. We have nearly 75,000,000 acres of unoccupied land, and these are the men to possess and work it, if they can have help to begin.

The defeat of the British Ministry upon the Irish church question is a significant sign of the times. The lines were drawn between the common people and the aristocracy, and more interest was felt in the result, than in any question of like range that has had the attention of Parliament for years. All classes regard the decision as a triumph for the Liberals; in other words, as an occasion of joy among true philanthopists, and it is not unlikely that the Ministers may all resign, and the policy towards Ireland may be essentially changed. The *London Times* declares that the effect of the vote will be to reunite the Government, and the press generally is in favor of the change. No one who has watched the progress of events in England during the last five or six years can fail to see in this crisis a consummation to which there has been gradual but sure advance. And no one who understands the relation of cause and effect as seen in history, can doubt that there will be farther progress in the same direction. The *people* are becoming more formidable than ever before. The power begins to go forth from the people, and princes and nobles are compelled to heed it. If they wish to hold their wonted places, they must become allied with it. The elevating educating influence that has passed over the sea from this country — from our successes and struggles and varied experiences, is seen in the new order of things; and this influence will extend to the Continent. There must be more regard for the rights and liberty and worth of *men*, and the nations which accept the necessity and adopt themselves to it, will be the most firmly established. The nations that continue to ignore or resist it, will be rocked by the agitations that will revolutionize, if not destroy them. The world moves, and all lovers of their race, and of right, are glad to see the proofs of progress.

Three thousand blacks in the State of Mississippi have petitioned Congress for aid in removing to Liberia. They assign as the reason for their wish to go that they are prevented from comfortable association with the whites, and from obtaining work among them. It is probable that many more will follow their example, from the vigorous, industrious, and valuable portion of the late slave population in the South. In one view, there may be cause for satisfaction that this desire is spreading among them. But what is to be done with the great productive interests of the Southern States if the only laboring class there shall either be unable to work, or removed from the country? The treatment the blacks have received during the past two years has been suicidal to the prosperity of that whole region, in which their labor has always been the chief element of wealth. For years there could be no substitute for this labor, and before a new class of producers can come into possession of the land, and be prepared to carry on factories and shops, an incalculable loss must be experienced. The suggestion of wisdom is, that in some way that can accord with the new state of things, and which all are obliged to recognize, the blacks be encouraged to remain and work, nor have experiments shown that this is not possible and profitable for all concerned when they are made in a manner dictated by good faith and kind feeling.

Revivals of religion are reported to an extent that should encourage all Christian hearts. Many of them date their commencement in the Week of Prayer that was observed at the beginning of the year, and all of them seem to be dependent on prayer rather than upon any extraordinary human agency. This feature is very cheering. There is no necessity to wait for the machinery that is supposed to be needed, but while means are employed, as they have ever been, prayer seems to give unwonted efficiency to those means that have been thought hardly adapted to promote a revival. We take pleasure in noting all such proofs of God's grace and help, and no news can have more interest for a Christian people than the accounts of souls converted and churches made strong.

A meeting has recently been held in Liverpool, to inquire into the causes of the prevailing trouble in financial affairs. Of course, men from different points of vision indicated various things which in their measure have had effect to disturb and damage manufacturing and commercial interests. But there was one conclusion reached in which all agreed, that deserves careful notice. This was, that the low condition of commercial morality in all departments is the chief cause of the derangement experienced. This leads to recklessness, to dishonesty, to extremes of every kind, and tends to remove business from those safe and broad avenues which in other years were traversed by those who were successful.

There must be frequent revulsions occasioning general ruin, and more frequent individual failures, so long as men are unwilling to recognize the principles of honor and justice and prudence, in the methods they adopt for the prosecution of business.

It is worthy of note that a large meeting of manufacturers and merchants should express an opinion so manifestly correct, yet so much at variance with the practice of many among these classes. We may hope that their judgment will become more general, to the advantage of those doing business, and to the gain of good morals in the community at large.

The *Pacific Churchman* is hereafter to be published at Benicia, under the special supervision of Rev. Dr. Breck, Dean of the Associate Mission. It remains to be seen whether the change will be a benefit to the paper, but the presumption is always against such a change when there was reasonable success before, and to this success we bear cheerful testimony. The *Churchman* is, of course, a decided Episcopal paper, but we have been pleased with its spirit and contents during the short time it has been passing through our hands. The retiring editor has done his work well, and he has our congratulations, if he may transfer the responsibility to others without serious loss.

Some person has sent us the names of several prominent men in this country and England, who, after having wavered long, and injured the cause they refused to serve, by their hesitation, have become avowed Romanists. We have lost the list, but are rejoiced if the statement is reliable. No men can do the cause of truth so much harm as those who carry its banner only to betray it into the hands of its foes whenever there is an opportunity. It is far better that they lay down the banner and go over among those with whom they clearly belong. It would be a gain for Protestantism if more who

are in full sympathy with those who have been at last honest enough to show their true colors, would follow their example. Nor would the length of the list, nor the prominence of the names of those who ought to do this, render us any less decided, as we bid them God-speed in their purpose to be identified with their own. Were it desirable, it would not be difficult to furnish another list that might offset this, of those who do not find Rome all that they desire, and have sought among us a more excellent system of faith and practice. But whether there are converts to Protestantism or not, there is advantage in every way when those go out from us who are not of us, and whose history and spirit prove that there is no prospect they ever will be of us. We respect them more, and they can damage us less, when we see them in the uniform they ought to wear.

Religious Intelligence.

PACIFIC COAST.

The California State Sunday School Convention will be held in San Francisco, at the Calvary Church, Bush Street, on Tuesday, Wednesday, and Thursday, June 2d, 3d, and 4th, next. The proceedings will consist of devotional exercises, brief reports, voluntary discussions, with speakers limited to five minutes, "illustrative" teaching, addresses, and sermons. Among the speakers are Rev. Messrs. Briggs, Stone, J. B. Thomas, Lathrop, Wadsworth, Scudder, and Eells. We shall give the programme of exercises hereafter.

—

Presbytery of San Francisco.—At the regular spring meeting held at the Howard Presbyterian Church the first Wednesday of April, an application was received for the organization of a church on the Potrero in this city; and a Commission of Presbytery was appointed to comply with the request, should the way be opened. The commission consists of Rev. Messrs. Hurd and Pierpont, with Elder Geddes, and it is expected that the church will be organized next Sabbath, at two o'clock, P.M.

—

In a communication from Mariposa County some weeks since, while saying, "there had been little Protestant service in the county since last fall," it should have been added, "outside the town." We are glad to learn that in the town of Mariposa, services have been held by Rev. Mr. Culp, of the Methodist Church, South.

—

Howard Presbyterian Church.—At the last communion service of this church, held April 5th, eight persons were received on profession of their faith, and three on certificates from other churches.

—

The Rev. O. Hemstreet has been called to take charge of the church at Ione City. His address is accordingly changed from Bloomfield to Ione Valley, California.

—

Religious Interest in Oregon.

Portland, April 2d, 1868.

Within a few days I have had the opportunity to examine several of the early numbers of The Occident, and I am impressed with the importance of sustaining such a journal on the Pacific Coast. At the Alumni meeting at Oakland one year ago, an eminent minister, and if I mistake not, the pastor of a Presbyterian church, strenuously argued in favor of establishing a "Review" on this coast. It would have to struggle with many difficulties, he said, but finally would prove a success. But if The Occident should be supported by the Presbyterian churches as it ought to be, would it not answer a better purpose than even that of the proposed "Review?"

Suppose every clergyman should carefully collect within the sphere of his personal knowledge all the facts in regard to the moral, social and religious condition of his people, and note the evils which it is the duty of Christian faithfulness to remedy, and should transmit the result in a brief and lucid statement to some organ established for such purpose; how long would it be before the members of the church on this coast would have a vastly improved idea of the extent of its moral wants, and of their own duties? We would then have a "review" which would show what localities are destitute of preaching; how many young men of promise there are who should be brought forward and educated; to what extent the young are beguiled, beggared and ruined. They would not be merely looked at, and forgotten — but by frequent reference to them, they would give force to appeals to public benovolence; would furnish facts and arguments to legislators; would give courage and energy to ministers themselves.

Our Oregon Presbytery has just held a special meeting at Albany. My health was feeble, but I mustered courage to attend. I regret that times are such that the Presbytery did not take more positive action in favor of The Occident, but we look forward to a better future.

Since returning from the late session, I have been lead to reflect on the great command "to preach the Gospel to every creature." This expression applies to the duty of carrying the Gospel to every tongue and people on the earth. But I apprehend that at this time it has an application nearer home. There are in almost every minister's parish, families and individuals to whom the Gospel is not preached. They live in some retired nook, or they are new comers and unknown. Years pass by, and no Christian enters their dwelling to converse with them, or show any interest in their eternal welfare.

Among the causes of neglect on the part of ministers in such cases, is not a want of interest, but the fear of being accused of proselytism. The neglected families are supposed to have predilections for some other denomination. Such delicacy should never prevent fidelity to the great cause. Such are the manifest wants of this coast that we are specially called to preach the Gospel at *home*, as well as abroad.

Rev. Thomas Frasier is now supplying our pulpit at Portland, with that rich, spiritual instruction which comes from an intimate, theoretical and experimental acquaintance with evangelical truth. His power over the minds of his hearers is one of the strongest arguments in favor of preaching the Gospel as it was given by inspiration of God. Among some young ministers, there is a feeling that theology is of secondary importance; and to be successful in the pulpit, they must make constant use of Scott's novels and similar works of fiction for the purpose of forming their style. The staple of their preaching must be something fanciful, without reference to substance. The delivery of discourses must be neatly done, without regard to earnestness.

Mr. Fraser does a great service by developing the true theory of preaching. He makes the sublime doctrines of Christianity the foundation on which Christian virtues must be built to make them acceptable in the sight of God; and his manner is so sincere as to carry conviction to the heart. It is this spirit of the Apostolic age, this earnest, simple, faithful preaching of the word, that is to reform and redeem our world.

You will be glad to hear that Mr. Fraser's health has improved since his arrival in Portland.

O. G. H.

EASTERN.

Rev. William James, D.D., of Albany, N.Y., died in that city on the 15th ult., aged seventy years. He had been settled in the ministry at Rochester, Sebenectady, and Albany. For many years before his death he had no pastoral charge. He was very unequal as a preacher, but was at times one of the most eloquent of men.

Rev. Robert Watts, D.D., the new Professor of Theology in the Theological Seminary of the Presbyterian Church in Ireland, has adopted Prof. A. A. Hodge's work on the Atonement as a text-book for his classes.

On Wednesday evening, February 12th, Rev. G. C. Heckman, late of Indianapolis, Ind., was installed pastor over the State Street Presbyterian Church of Albany, N.Y., by the Presbytery of Albany.

The Third Presbyterian Church (N. S.) of Cincinnati have given a call to Rev. C. H. Taylor, D.D., of Alton, Ill, to become their pastor.

MISSIONARY INTELLIGENCE.

Indebtedness of Science to Missions.—Christian missions, though at first sneered at and ridiculed by worldly men of learning and wealth, have demonstrated their usefulness and importance to science as well as Christianity. The valuable contributions they have made to human knowledge in geography, ethnology, philology, and other departments of learning, are now freely acknowledged by men of science. To Dr. Livingstone, the distinguished missionary explorer, is the world indebted for the most of its knowledge of the interior of Africa; and it now appears that the first discoveries of the sources of the Nile were made by missionaries. Some missionaries of the Church Missionary Society in East Africa, in order to acquaint themselves with the native tribes, made exploring tours to the interior, in one of which they discovered a snow mountain, and after a time another. The statements which they sent to England were at first received with incredulity and ridicule. After some time they reported that the natives said there was a great inland sea; when the Royal Geographical Society sent out an expedition, which resulted in the famous discoveries by Captains Speke and Grant and Sir Samuel Baker of the great lakes, called the Victoria Nyanza and the Albert Nyanza, the sources of the great river of Egypt.—*Am. Messenger.*

Light and Darkness.—In the Fiji Islands, whose name, a short time since, was a synonym for the most heathenish cruelty, the Gospel is making wonderful progress. There are now 17,000 church members, 1,000 native catechists, 38 native missionaries, and 50,000 regular members of the schools. About 100,000 have been supplied with the Scriptures, and are under instruction in the Word of God. When the complete translation of the Bible into their language recently arrived at the islands, the native Christians were greatly delighted. One of them, like Simeon of old, exclaimed,

"Now let thy servant, O Lord, depart in peace, since his eyes have seen thy works complete in the language of Fiji."

All the tribes, however, have not been brought under the peaceful power of the Gospel. The dreadful news has been received that Rev. Thomas Baker, a Wesleyan missionary, and five native students training for the ministry, were cruelly massacred by a party of natives while they were traveling in the islands, and their bodies offered to the heathen deities and eaten.—*Ibid.*

No Church above Conscience.—It has been one of the most offensive claims of the hierarchy of

the Roman Catholic Church, that from its assumed infallibility, it had the right to compel assent to its doctrines, which has led to the bitter and bloody persecutions that have stained its annals. We are glad to see that the light is beginning to break in upon the minds of some of its dignitaries, whose avowed sentiments have been more worthy of the dark ages than those of the nineteenth century. Archbishop Purcell, of Ohio, says in a published letter:

"There is no power, human or divine, that forces a man to believe a religion, or anything else, against his own honest, enlightened conviction. I do not believe the Church has any right to employ force to coerce conscience."

We hope that this Protestant heresy will spread through the whole conclave of papal bishops.

THE BULWARK AGAINST THREATENED DESTRUCTION.—It has been charged by many enemies of missions that the introduction of Christianity into the Sandwich Islands has been of no benefit to the Hawaiian nation, being unable to prevent the rapid wasting away of the population, or to restrain its followers from immorality and vice. Dr. Gulick, however, makes this impressive statement:

"But for the conserving effects of the Gospel during the last half century, there would have been now scarce an Hawaiian left to tell the story of the extinction of the race through foreign vices grafted upon native depravity. That the race still continues to decrease is no wonder, but that it is in existence to-day with many manifestations of true Christianity, is one of the modern miracles of grace. That there is so much vice and immorality should astonish no one; but that there is any virtue, any piety, any civilization, should cause us to shout over the triumphs of redeeming mercy."—*Ibid.*

PERIODICALS PUBLISHED BY

Bancroft & Company,

SAN FRANCISCO, CAL.

THE OCCIDENT; a Religious and Family Newspaper. Published weekly, at $4.00 a year, or $2.50 for six months; payable in advance. Edited by Rev. James Eells, D.D., with Rev. E. B. Walsworth, as Associate.

THE PACIFIC MEDICAL AND SURGICAL JOURNAL; the only regular organ of the Medical Profession on the Pacific Coast. Published monthly, at $5.00 a year, or $3.00 for six months, payable in advance. Edited by H. Gibbons, M.D., and H. Gibbons, Jr., M. D.

SUNDAY SCHOOLS.

There has never been a period when so much time and thought were expended upon the means by which Sunday schools may be made most instrumental of good, as during the last year. Men have made the subject a specialty, and studied its various departments, and are now giving the public the benefit of their investigations; and many schools have been so changed in their exercises and forms, that we hardly recognize in them the institution of our childhood, in which the sum of the exercises was reciting seven verses of Scripture, giving answer to one question of the Catechism, and waiting for it to be time for school to be dismissed.

We are not of the number who think no improvement has resulted from the changes that have been introduced. There are many incidental evils that have thus obtained a place, but these are not necessary; and there are many advantages that every observer can see to be far more than incidental and temporary in their influence. Of the evils, we are inclined to mention some of the singing, which is too puerile and foolish even for children, some of the modes of teaching, which are not sufficiently Biblical, or flexible; some of the most popular styles of address, which are intended only to amuse, not to instruct or benefit the children; and some of the machinery, if we may so call it, by which the school is managed, which does little to cultivate the character of the pupils, or adds to the impressiveness of the whole service. There need be no less beauty of song by which all are charmed, should many of the lines now sung be exchanged for those that convey both sense and religion. There need be no less interest in the class, if it is understood that the Bible is the text-book, and if each teacher study his *pupils* as well as his *lesson*, so that in teaching he can best adapt himself to their peculiarities. There need be no less pleasing effect from an address, if he who makes it has a purpose to benefit the children, than if he seeks only to make them laugh. There need be no less order and efficiency in the management, if some effort is made to develop and maintain a conviction of personal responsibility in the pupil, than when a kind of military system is established, according to which every thing shall proceed.

That all the advantages may be gained by all schools, and there may be opportunity for consultation and interchange of views, as the result of which any existing evils may be removed, there is great profit from the Sunday School Conventions which have lately become so general and so popular. These are made eminently practical, and while they furnish a stimulus to those who are successful workers in this department of Christian work, those who receive the most benefit from them are that large class of persons found in our schools who desire to do good, but do not know how to teach.

The Convention held last week in San Jose was an illustration of this. Between twenty and thirty schools were represented by delegates, many of whom had learned little of the recent improvements in the manner of affecting and teaching children. The sessions were given up to the consideration of points that must suggest new ideas to almost all, and the interest taken in them made known their importance. The place chosen for the Convention was particularly favorable, because it could have the presence and counsel of the professors and others from Santa Clara, who had given much study to the matter of teaching, and who added greatly to the value of the discussions by the part they took in them. Other gentlemen from abroad contributed also to the interest, and all felt that the Sunday School cause received real impetus from the conference of so many practically engaged in its work.

We have no idea that all teachers can adopt in its details the same method of instruction, or that all schools can be profitably conducted in the same way. But the study of all successful methods will afford every one much light in his own course, and every school that is alive and successful can contribute something which others may learn to their advantage. The time spent in such conventions as that at San Jose is wisely spent, and there should be others in different parts of the State, as we trust there will be.

The great work of the Church on this coast is to be among the children; and God never supplied a nobler field for Christian enterprise and service. The future sends back its demands, most emphatic and earnest, on those who are engaged in it, and the rewards for fidelity and devotion will be the most brilliant ever bestowed on those who have been content to prepare the highways for advance to unparallelled elevation. Our Sunday Schools should have our united energy, and study, and prayers, that they may be the best in every sense.

ANNOTATIONS.

VII.

THE REAL AND THE POSSIBLE.

It seems to me that a better appreciation of the singular power that is in the Bible may be obtained by contemplating *what has come out of it* than by contemplating what we can find *in it*. In it is the secret germ of an immense body of the noblest and purest literature that we possess; of a world of thought and of ideas quite peculiar, and such as could have derived their origin and inspiration from no other source. The germ of all this beauty and power — of all Christian ethics and philosophy — of all the most elevating poetry of our language, and of every modern language, is there — has always been there — yet, until the season came for the seed to burst and disclose the wonders it contained, no man could see these possibilities. Something was there for each successive generation to discover or apply; something not fully available, nor capable of being understood in all its aspects, until new civilizations and new modes of thought should arise, so that by every onward stride of the human mind, and every new conquest of science, the truths contained in this Book should acquire fresh significance, and seem to develop a constantly increasing depth of philsophic meaning. Thus, the Christian thought and literature of every age is in one sense different from that of every preceding age; in another sense it is the same in all ages. The letter receives new interpretations, but the spirit and life of it undergoes no change. I have before me a little volume made up of extracts from the devotional writings of men and women, whose lives are links in a chain of existence extending through more than twelve hundred years. Yet all breathe a peculiar spirit, a spirit that never existed on earth until the story of the cross was told, a spirit which no other religion or philosophy has developed. I glance through this volume, and find everywhere the same indefinable *something* that characterizes the higher devotional literature of Christianity. No matter whether it is Chrysostom or Augustine, Origen or Anselm, Thomas a Kempis or St. Francis de Soles, Fenelon or Bacon, Savonarola or Luther, Baxter or Bishop, Taylor, Herbert, or Wesley, Wordsworth or Milman, Ruskin or Rosetti; no matter whether it is Greek or Italian, Frenchman, German or Englishman, that speaks — no matter whether he lived in the third century or the nineteenth — no matter to what branch of the Christian church he belonged, or in what communion his spiritual life was nourished — that indescribable *something* is to be found in all their utterances alike. All this *came out of* the Bible, and whether or not we can see it there, we *can* see there its germ, and the quickening power which is able to develop it, as heat and moisture and the chemical elements in the earth develop the flower from the seed, the oak from the acorn.

VIII.

THE "INDESCRIBABLE SOMETHING."

When one takes up a book that is written by a spiritual minded Christian, no matter to what department of literature it belongs, nor what may be its subject, he detects or *feels* in it, a peculiar quality that is not found in other books. This quality is felt though the book contains no profession of faith, and nothing of a didactic character. It is felt in solid philosophical treatises like Bushnell's "Nature and the Supernatural," and Argyll's "Reign of Law," as well as in Adelaide Proctor's poems, Dora Greenwell's exquisite essays, and the beautiful and elevating pictures of the author of "The Schoenberg Cotta Family" and "Kitty Trevellion's Diary." It is apparent in a philosophical disquisition by Coleridge, in a Speech of Gladstone's or Guizot's, in a poem of Whittier's or Christina Rosetti's, in a novel of Mrs. Gaskill's or Mrs. Stowe's. It comes like a sudden breath over the soul, stirring new thoughts and emotions, and touching the finer springs of existence. It changes our moods, and even our views and moral estimates, placing things in a new light as by a flash of intuition. It awakens something in us that has slumbered until thus finely and mysteriously touched. It is nothing that belongs to art, or that is the result of culture. It is more than intellectual refinement, or elevation of spirit resulting from high morality. It is different in *kind* from anything that mere morality can develop in the human soul. There have been wise sages, and noble moralists among the heathens. The moral precepts of Seneca, Confucius, and others, as well as many of those inculcated by Mohammedan and Bhuddist teachers are admirable, and often bear a close resemblance to those of Christianity. We may admit too, that there have been men of all creeds and races who were upright and noble in their impulses, and who conscientiously endeavored to conform to the laws of natural morality. Our libraries contain many works written by those whom we call heathens, breathing a severe and exalted moral spirit—but none, no not one, that has this mysterious quality which is developed from the spiritual part of our nature, from a region "into which man cannot ascend until lifted there by God through that supernatural action upon the soul which we call *grace;* the voice of the Divine Spirit, waking up the human spirit to its true life."

READING POETRY.

"The reading of poetry instead of novels will benfit the feelings and imagination. Novels give a false estimate of human affairs, and make people dissatisfied with ordinary life. They excite the passions to excess, and when duty calls, the powers

necessary to obey are exhausted." These sentences occur in an article of advice to those beginning to read and think, deservedly republished from the *Christian Miscellany*, in *Sabbath at Home*. They set forth the advantages of reading poetry, as compared with novels. The positive advantages of the former kind of reading are many; indeed, one of them — the improvement of the imagination — is referred to in the above comparison. Another is, mental refreshment. This is mentioned by Fox, the statesman, as quoted by the poet Rogers: "He thought poetry the great refreshment of the human mind." Another is, the improvement of our power of application. This seems a strange virtue to ascribe to the reading of poetry, yet it is mentioned by no less a philosopher than Mackintosh. Speaking of the odes of Gray, he says that there is no obscurity in them, "to those who are capable of that intense application which the higher order of poetry requires, and which poetical sympathy always produces." Another would seem to be (at least, according to the last-quoted authority,) the actual awakening of a new power in the mind. In animadverting upon Johnson's inappreciation of Gray and Prior, Mackintosh maintained that "there is a poetical sensibility, which, in the progress of the mind, becomes as distinct a power as a musical ear or a picturesque eye." Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.

The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.

Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.

In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to atten the military and gymnastic exercises, as a means of physical train ing.

For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.

Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Our Letter from the Capital.

Sacramento, April 6th, 1868.

Characteristics of the Senate.

The Legislature closed its labors at twelve o'clock Monday night, March 30th. I paid a visit to the Senate to witness, with many others, its closing proceedings. There was the utmost harmony prevailing among the members of that body. Comparatively little ill feeling was manifested at any time during the session. At the close, party differences seemed to be lost sight of, and the members parted in a very happy mood.

The Senate was composed of a very respectable and able body of men. Both political parties had some strong, active, vigilant members. Very few of them were regarded as in the market, and under control of the lobby. That there were some who yielded to the immense money pressure that was brought to bear upon them, especially at the close of the session, can scarcely be doubted. The lobby pressure was terrific during the last two weeks, and somebody got a round sum of money out of it. The other house has the reputation of receiving much the largest proportion of it.

It is to be hoped the time will soon come when public opinion will demand that political brokers and moneyed lobbyists shall be scourged from legislative halls, both state and national. The very sinews of our strength will be cut, the life-blood of the body politic poisoned, if some check is not placed upon these mercenary proceedings. In the present case, there is some consolation in knowing that the majority of the measures, perhaps, that were heavily backed up by money, failed to win the day.

One bill that was pressed to the very close of the session, and was urged and resisted with more energy, tact, and vigilance than any other, failed to pass by a single vote. One Senator who opposed its passage, remarked to me on the last day of the session that its friends would have given fifty thousand dollars for a single vote. That is certainly a very high figure, but the case was desperate, and there was plenty of money in it, and those who advocated it fought to win.

Closing Congratulations.

But I intended, at the outset, to mention two or three pleasant incidents connected with the closing up of the Senate's labors.

First of all, the attachés of the Senate presented Lieutenant-Governor Holden with a pair of gold spectacles. For, though a bachelor, he stands in need of the article so handsomely presented.

Then followed the presentation of a gold watch and chain, worth two hundred and fifty dollars, every Senator contributing something, as a mark of their esteem for their presiding officer.

Senator Mizner, President *pro tem.*, was next the recipient of a magnificent silver service from his friends of the Senate, and of a gold-headed cane from the attachés.

These presents called forth some happy speeches, and added much interest to the last hours of the session.

The request that I should give a review of the proceedings of the Legislature during its past session, I find it impossible to comply with, in a way that would do the subject anything like justice. Extra labors have kept me too busy to give the subject thought, and what I now say must be said in haste.

The question that threw everything else into the shade at the opening of the session was the election of a United States Senator. The action of the dominant party in selecting Mr. Casserly has given very general satisfaction to the people of this coast. He is regarded as an able, honorable man, who will be true to the best and varied interests of this noble young State.

Early in the session the removal of the State Capital began to be agitated, and had by far too much to do with future legislating upon other important measures. It was lifted as a Damascus blade over the heads of some members, and they were threatened with decapitation or a removal of the Capital if they did not give their support to anything they were called upon to help through.

A thorough investigation of the present building and its foundation, and the levee defenses of Sacramento, by the ablest engineers of the State, resulted in a report highly favorable, and the question was settled to the satisfaction of the great majority of the people throughout the State.

A great deal of time was wasted during the first two months of the session, and nearly all important measures of general interest were left to the very close of the session.

Action on Important Measures.

The Registry Law, which, though cumbersome, complicated, and defective, has worked well since its passage, was amended and retained. This insures greater purity at the ballot-box than we have had in former years.

The repeal of the Sunday Law was happily defeated. This question excited an unusual degree of interest among the people of the State, and the remonstrances against it poured in here by the thousand.

The bill modifying the laws by opening theatres, melodeons, and kindred institutions, which passed the Assembly, never came up for final action in the Senate. Thus far we are safe. But the end is not yet. A more persistent, united effort will be made to influence the next Legislature. And if the friends of the Sabbath, of all political parties, do not see to it that men in favor of Sunday laws are sent here two years from this time, a clean sweep will be made, and people who want a quiet day of rest must go elsewhere to find it. And many will do so. A high moral standard in society is more to be desired than fertile valleys, a genial clime, rich mountains, and any material advantages you choose to name. We must have the Sabbath of our fathers if we will have virtue, sobriety, and intelligence.

Unfortunately for the reputation of California, the Constitutional Amendment was not ratified. But it cannot be defeated by this action.

The State University.

The "Act to create and organize the University of California" was one of the most important measures passed during the session. "The University shall have for its design to provide instruction and thorough and complete education in all the departments of science, literature, art, industrial and professional pursuits, and general education, and also special courses of instruction in preparation for the professions of Agriculture, the Mechanical Arts, Mining, Military Science, Civil Engineering, Law, Medicine, and Commerce, and shall consist of various colleges, namely:

"*First.*—Colleges of Arts.

"*Second.*—A College of Letters.

"*Third.*—Such professional and other Colleges as may be added thereto or connected therewith. * * * * There shall be organized as soon as the means appropriated therefor shall permit—

"*First.*—The following Colleges of Arts: A State College of Agriculture; a State College of Mechanic Arts; a State College of Mines; a State College of Civil Engineering, and such other Colleges of Arts as the Board of Regents may be able and find it expedient to establish.

"*Second.*—A State College of Letters.

"*Third.*—Colleges of Medicine, Law, and other like professional Colleges."

Liberal appropriations have been made to build upon this broad foundation. There will still be a necessity for the literary institutions our churches are building up, where the religious influences, so necessary in youth, can be brought to bear upon the rising generation.

Considerable interest was taken in the subject of reform.

An appropriation of two thousand dollars was granted to aid the "California Prison Commission" in its noble work. Some of the best men of the State are at the head of it, and we hope they will push forward in their mission of reform.

The bill providing for a Chaplain for the State Prison was unfortunately lost.

A law was passed providing for the establishment of a branch prison at Folsom, in this county, or at Rocklin, on the line of the Pacific Railroad. Both points afford large quantities of granite that could be profitably worked by the prisoners.

There are many other matters of importance that might be referred to, but my time will not allow it now. Church items will have to be deferred to a future day.

Ten persons were received yesterday into the Presbyterian church — nine by certificate, and one on profession of faith. Alpha.

Letter from Philadelphia.

Philadelphia, March 4, 1868.

It is with great pleasure that I take up for the first time The Occident, number six of volume one, presented to me by my friend, the editor of *The Presbyterian*, this afternoon. In point of literary and typographical taste, there is little room for improvement. The form of it is especially convenient, and I could wish that more of our eastern papers would adopt it. In looking over the advertisements, many familiar names appear, in whose successful business operations your correspondent feels a lively personal interest. You have an additional guaranty of prosperity in the substantial names of such publishers as the enterprising Messrs. Bancroft.

Your readers may like to know what M. Du Chaillu, the great African explorer, said to a thousand people last night, about the world-renowned gorilla, in his first lecture, given for the benefit of the Church of the Evangelists. One would infer that in so good a cause he must certainly confine himself to facts, without exercising too freely a traveler's privilege.

The gorilla hunter is an ordinary looking Frenchman. He wears a black moustache, and is nearly bald, jocosely affirming that his hair was plucked off by the boughs of trees during his peregrinations in the African forests. He is not as fine a looking fellow as Gordon Cumming, the lion hunter, whom I recollect hearing one night discourse on his exploits before a credulous London audience. Cumming is a sturdy Scotchman, who used to delight in stalking through the streets of Edinburg with a helmet on

his head, a sabre at his side, and a crowd of gaping boys at his heels.

The modest Frenchman would probably be quite content to have a young gorilla for his sole companion, could he be tamed into conformity with the usages of good society.

The lecturer spoke with a marked foreign accent, and a simple colloquial style. I was unable to gather much more information than he gave to the public some years ago, in his first publication. The pictures and diagrams set upon the wall seemed more suggestive than the lecture itself. It was interesting to trace the ascending scale of creatures represented, from the chimpanzee up to man, the tallest, as he is the literal head of animated nature. Man, first of all in height and beauty of organism, even anatomically considered, is distinguished from the gorilla in various vital particulars. The gorilla has one rib more, and is a quadruped, walking upright only when ferociously advancing to attack his prey, like the grizzly bear. He is, besides, a vegetarian, notwithstanding his horrid teeth, numbering thirty-two, as in the human species. He feeds chiefly upon nuts. In all his travels, Du Chaillu had not found a single specimen six feet in height, and he was twelve years in Africa. Again, the human arm is also much shorter than that of the gorilla, which is very long and ungraceful, serving for a fore-foot as well. The human thigh is also much smaller, and the foot more comely and diminutive. The nose, by no means an unintellectual human feature, is wanting in the gorilla, although it was affirmed that the anatomy of the beast's skull discovered a regular nasal bone. In the gorilla almost all phrenologic developments are absent, except those of the animal propensities, such as the alimentive, the combative, and the sexual. The perceptive quality, however, is in some degree discoverable. The mouth is prominent and horrid, and the forehead disappears in the flatly retreating line from the eyebrow to the top of the skull. The animal is speechless, black and hairy — an untameable African monster. His hair is short behind, from the habit of lying on his back while watching the females and their young, and the breast is bare, from his custom of beating it when enraged. The female retreats at the approach of man, and sleeps in the tree-top; but the male is fearless and reclines upon the ground.

The next and third diagram represented the ourang, which is more delicately formed than the gorilla; and fourthly, appeared the chimpanzee, the smallest of all the group.

In these anatomic pictures, the animals were drawn standing upright, although — excepting man, the highest type, godlike and commanding, even when viewed as a skeleton — their normal posture is bestial and prone.

As in man, the gorilla's hand is shorter than the foot, and the foot contains the same number of bones as those found in that of the human species. The gorilla is the monarch of beasts, possessing prodigious strength. He can bend a gun-barrel as easily as we can a stick. The ridge of an adult skull is "an inch or two in height, grows out of the skull, and runs directly from a point above the nose back to a level to the top of the ears." His growl, when aroused by his pursuers, is like muttering thunder. He then advances, beating his breast terrifically, making the forest resound, and the very ground seems to tremble from the blows of his horrid fists. The lecturer could never forget his first pursuit of the animal that lives in the deepest recesses of the African forest, near the line of the equator. With his well armed companions of the native cannibal tribes, he proceeded with the greatest caution towards his game, but the inadvertent breaking of a twig aroused the monster while engaged in eating, who approached him with the fury of a demon until within six and even four yards. "I shall never forget," he remarked, "that black face, the twinkle of his small gray eyes, his large wide mouth, horrible teeth, and his dreadful roar, which was like the sound of distant thunder. My heart beat so that I seemed to hear it. After I had shot him, and he fell lifeless at my feet, his awful, hairy arms almost touching me, *my lower jaw went up and down*, in spite of me, exciting the merriment of my comrades."

According to rumor, Du Chaillu made his last trip to Africa on a wager to capture and bring home a living specimen, but when the supply of its native food is exhausted, it is difficult to keep it alive. Besides, an untoward accident from the discharge of a gun in the hands of an attendant, compelled him to escape for his life, "leaving behind him all the collection made during the journey." H.

Letter from the Bodega Country.

Bloomfield, April 1st, 1868.

Tomales, a growing town in the Bodega country, is situated on Tomales Bay, near the coast, and about eighteen miles from Petaluma. It is a shipping point of considerable importance, and has a population of about four hundred. There is a small band of Christians in and about the place, most of whom are Presbyterians, to whom the Rev. A. Fairbairn preaches two Sabbaths in each month.

In 1865 they built a very neat and substantial church edifice, and just as they were furnishing it and preparing for the dedication, it caught fire and burned to the ground, leaving the congregation not only without a church, but also a thousand dollars in debt. This, of course, was a very serious disappointment and loss to the little band who had been looking so anxiously toward the time when they should have something more comfortable than the old schoolhouse or barn in which to worship. They are, however, of that class that are not easily discouraged, and they immediately set to work to remove the debt and to prepare to build again. It was hard work and they progressed but slowly. But by perseverence they have been enabled to commence a new building, which they hope soon to occupy. It is hoped that when this is finished they will be able to support a minister alone, and have his services the whole of the time.

Bodega Corners is another place where Rev. Mr. Fairbairn preaches. Here a Presbyterian church is organized and is in a prosperous condition. Success has attended their efforts, so that now they are also erecting a church building which they hope to occupy in a few months. This place is about nine miles from Tomales and eight from Bloomfield.

Dunbar's Mills is further up the coast, about thirty-five miles from Petaluma. It is a small village engaged in the manufacture of lumber. Here also Brother Fairbairn preaches once a month to a small but interesting congregation. They have a good hall very suitable for worship. Here is no church organized, and there are but few Christians, though uuite a number of good people. What a pity it is that so many excellent moral people, and good neighbors, will go on day after day, and month after month, without the favor of God, the love of Jesus, or the enjoyment of the Christian's hope!

Santa Rosa is not generally regarded as in the Bodega country, though near it. It is north of Petaluma fifteen miles, and the same distance from Bloomfield, in a northeasterly direction. It is the county seat of Sonoma County and likely to become a large town. It has perhaps the best climate in the State; sufficiently remote from the coast to be free from the fogs and cold winds, and yet near enough to get a healthful breeze every day, so as to keep it free from fevers and the ague. When the railroads, to which we referred in a previous communication, are built, it will be one of the best localities in the State for large manufactories of almost any kind.

Here Rev. Thomas Fraser, jr., settled at an early day, and has continued to labor with poor health and under many discouragements, — at first, preaching occasionally in the places to which we have referred above, as well as in Santa Rosa, and so laying the foundation for what has since been accomplished. He has from time to time given up portions of his field and restricted his labors to a smaller parish, so that now only Santa Rosa and Two Rocks are occupied by him.

The Presbyterian congregation at Santa Rosa has been accustomed to worship with the Methodists in the Methodist church — Brother Frazer preaching one Sabbath and the Methodist minister the next. They have now, however, undertaken to build a church of their own, and as soon as the roads are sufficiently dry so that they can get lumber from the mills, they will commence the work. Thus, in this part of the county, there will be three Presbyterian churches erected this year, showing that something is being accomplished in the advancement of our cause. Much of it, under God, may be attributed to the energy and perseverance of Brother Fraser, who occupied the ground at first, and continued to superintend the work of sustaining regular preaching in the whole field.

If our Board of Domestic Missions could only send men into every new field at the beginning of its settlement, we should in a few years have many more flourishing churches, that would in return give their aid in establishing yet others, and thus very much more might be accomplished for the cause of Christ and the good of souls.

Your correspondent is called in God's Providence, to leave this beautiful Bodega Country to labor in Ione City, from which place you may hear from him again. X. Y. Z.

The American Sunday School Union.

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

CHILD'S WORLD,

a beautifully Illustrated Paper for Children and Youth. Monthly, at 12½ cents each per year for ten copies and upwards, and 24 cents for the semi-monthly. Also,

THE SUNDAY SCHOOL WORLD,

a Sixteen-Page Quarto Monthly Paper for Sunday School Officers and Teachers, at the low rate of Fifty Cents per Year. No Sunday School Teacher should be without this paper.

Rev. Richard Newton, D.D., the Editor of these papers, is acknowledged to possess unsurpassed abilities as a Sunday School writer. The above rates are in Currency.

Catalogues of the Society's publications, and Sample Copies of its Periodicals furnished gratuitously on application to Wm. F. Peters, care P. O. Box 1007, or at the Depository, 302 Montgomery Street, (Second Floor, Room No. 2,) San Francisco, Cal.

RECENT PUBLICATIONS.

NORWOOD. By Henry Ward Beecher. New York: Charles Scribner & Co. San Francisco: H. H. Bancroft & Co.

We confess that we have been very pleasantly disappointed while reading this book. So much had been said by various classes of persons respecting both its merits and its tendency, as it appeared from week to week in the *New York Ledger*, that we had, almost unconsciously perhaps, been prejudiced against it, and were ready to assume that Mr. Beecher had gone out of his range in attempting to write a novel. Indeed, now that we have read it, the feeling is quite prominent that it would have been better for himself, if not for others, if he had not sent forth such a work. Still, it is difficult to see how any one could read it and not be convinced that a man of genius wrote it, notwithstanding it bears proof that he had not great experience in such writing. The stamp of the author is seen on every chapter, whether it be grave or gay, and the interest continues to the end. Many questions are suggested by it which are worthy of serious answer, but only one will be presented by us, which was repeated often as we advanced: How far is an author himself responsible for the sentiments and language he permits his various characters to express? May these creations of his say what *he* would not feel at liberty to say, and is he to be held to account for the effect thus wrought upon the morals and habits of those who read his book? For example, when Hiram Beers indulges in what he calls "pious swearin," who is it that swears? When he more than intimates that horses are to have a future life, and quotes Scripture to prove it, no other character being allowed to set him right on the question, who really gives this impression as a possible truth to the multitudes who read the words? Is it the fictitious horse-lover, or the writer who gives him his language? The instances are too frequent in "Norwood" of both sentiments and expression that are unworthy of adoption, and the number is not small, of young readers especially, who will find justification, if they choose to imitate, in the fact that Mr. Beecher has given them the example. There are many beautiful, and some splendid passages in the book. There is much that will profit any one who will receive it. We were specially pleased with the chapters on the "New England Sunday," as containing some exquisite description, and that on the "Fruit of Sorrow" is worthy of Mr. Beecher in his best moods. We only regret that there is anything that should not, and need not, be found in a work that has such a source, and so many excellencies.

HAREM LIFE IN EGYPT AND TURKEY. By Emmeline Lott. Philadelphia: T. B. Peterson & Brothers. San Francisco: H. H. Bancroft & Co.

Like all other authors who claim to have had exclusive opportunities for information respecting the subjects they discuss, the writer of this book is, for the most part, beyond comment on the matter she has given us. Because of her position, perhaps unprecedented, as governess of the Viceroy's family in Egypt, she had access to the harem as no others could, and she describes with an ease and apparent truthfulness, which render her book very pleasant to read. The novelty of the subject and the peculiar relations of the author to those habits and life she reveals, add to the interest excited by the style, and after one has commenced the book he will find it difficult to lay it aside, whatever may be his opinion upon the statements it contains.

PACIFIC MEDICAL AND SURGICAL JOURNAL, for April. H. H. Bancroft & Co., San Francisco.

This neatly printed monthly of 48 pages has, among its leading articles, one on "Mushrooms and their Poisoning," which we have read with interest. We never had a fondness for this class of edibles, and the perusal of this able and scientific article by Dr. Logan has not improved our appreciation of them. We give the following extract:

"Fungi are the most numerous of all plants in regard to general species. We find them of every condition, whether imperfect or perfect plants; whether microscopic, or of a larger growth, in our fields, gardens, and vegetables; in our meat, cheese, clothing — everywhere.

"As might be conjectured from their redundant provision, fungi perform most important offices in the world. Besides hastening the decomposition of dead organized matter, their qualities and uses are exceedingly diversified. Whilst many are favorite articles of food, a still greater number are unwholesome and poisonous; some are medicinal, and others have tinctorial qualities. Among the edible fungi, of which a bountiful feast is for months spread out on the plains of California, what are called *mushrooms* are the best known. Many of the species of this genus, however, are excessively poisonous, and are known as *toadstools*. It is impossible to decide, except from experience, which are wholesome and which are unwholesome, and it would even appear that the same species may be one or the other, according to the circumstances of their growth, situation, etc. As a marked instance of this difficulty in forming an intelligent judgment, our worthy confrere, the Professor of Materia Medica in Toland Medical College, informs me that he and all his family were once severely poisoned by a few mushrooms, that he knew positively and from experience to be our edible species. On certain persons all mushrooms, even the very best of the esculent kinds, act more or less injuriously. In this respect they are on the same footing with some kinds of fish, particularly shell-fish, which, by idiosyncracy, act as poisons on particular constitutions."

Premature Decay of Teeth.—A London surgeon has discovered the cause of the premature decay of the permanent teeth. It is for the want of the stimulus of pressure on the socket, owing to the universal practice of rendering the food soft by the abomination of cooking. His remedy is the common use of navy biscuit or "hard tack," instead of bread. —*Pacific Medical Journal.*

NATHAN THE WISE. Dramatic Poem by Lessing. New York: Leypoldt & Holt. San Francisco: H. H. Bancroft & Co.

It would not be safe to consult German literature for the best and most reliable illustrations of Christian doctrine or character; nor, were this to be done, would Lessing be most likely to be selected as the author most likely to furnish these. The criticisms of the book before us which have appeared in a number of the journals that are generally just in their estimate of what they examine, seem to have been written by those who do not regard it with this truth in mind. We do not suppose *Nathan the Wise* was written for any other purpose than to show how good a character morality can produce, and the beauty of the poem, as well as the clear conception of the author, has gathered many charms around the subject, while, to our view, there is no necessity that religion suffer by the exhibition. It has no right to claim that the *wisdom* exhibited by Nathan is piety. Nor has infidelity a right to claim the book in its support. It should be read as a splendid specimen of literature — the most splendid poem, except the Faust of Goethe, that has been translated from the German — and as a work whose sentiments must be regarded from the author's position.

THE BOOK OF NURSERY TALES — with Colored Engravings. London: Frederic Warne & Co. San Francisco: H. H. Bancroft & Co.

Whoever remembers the regular stock stories by which his childhood was charmed — and who does not remember these?—will feel interest in this beautiful collection of the old familiar names and scenes. Not specially profitable, yet highly pleasing to children; not actually contributing to mental or spiritual growth, yet having, in most cases, a valuable moral which after years of thought will detect, these nursery tales have historic and real value. The illustrations furnished in this edition are pleasing, and add to the effect of the stories themselves.

LITERARY ITEMS.

A distinguished minister is engaged in writing a life of Christ; whereupon an exchange felicitiously says: "There is an excellent life of Christ in a work called the New Testament which is not likely to be improved upon."

Gen. Grant's father is writing stories of Ulysses' early days for the N. Y. *Ledger*, and J. S. C. Abbott is getting out his biography in full. Between the two he is likely to suffer some.

The Pacific Musical Gazette appears in its April issue, and exhibits rare taste and ability. It is a credit to this coast, and is worthy of a large circulation.

A new book by Renan, author of the "Life of Jesus," is in press, having St. Paul for its subject.

Mr. Greeley's *Ledger* Recollections of a Busy Life, will soon appear in book form.

EDUCATIONAL.

Parental Love.

Just after his election to the Presidency, Mr. Pierce lost his only remaining son by a railroad accident. The youth, named Benjamin, was eleven years old, and the circumstances of his death were distressing. The sympathy of a nation, and the honors of exalted place failed to lift the load from the heart of his bereaved parent. The new President's inaugural address could not fail to echo his domestic sorrow. "My countrymen: It is a relief to know that no heart but my own can know the personal regret and bitter sorrow over which I have been borne to a position so suitable for others, rather than desirable for myself." Of such material as this, it seems to us, should our school and family histories consist. There are two theories, of course, of education. One makes it substantially equivalent to information. Under this theory, the above fact would possess no more value than any other fact, such as a date or a middle name. The other theory makes education synonymous with the educement of what is best and most useful in a child's nature. Are many things more useful than a proper sense of the depth of parental love? C. R. C.

Young Folks and Events.

We have met an old man (and yet apparently of undecayed powers), who remembered nothing of Monroe's election, which must have occurred when he was thirteen years of age; or of Monroe's re-election, when he was seventeen; or of Adams' election, which happened when he was four years past his majority, and, therefore, fully able to vote. These facts can be explained on the supposition that, in the first place, his parents, and then afterwards himself, took no pains to fix these events, as they passed in his memory. Certain it is, that where pains are taken, events impress themselves upon the recollection very early. Thus, one of the brothers of Dr. J. C. Warren remembered a solar eclipse (1806)

which occurred when he was only two years old. And a son of Professor Joseph Henry, of the Smithsonian Institute, once told the writer that he well remembered Halley's Comet in 1835. In the former case the event was fixed in the mind by the father taking the child to the housetop, and causing him to imitate him while he spread out his arms and said, "All dark!" In the latter, the boy was taken to see the comet and told how very big and old he would be when it came again. In each instance the scene was afterwards kept fresh by repetition and reference. The moral is, that we should take pains with our young folks, and with ourselves, if we desire passing events to take permanent possession of the memory. C.

An Easy Place Wanted.

BY HENRY WARD BEECHER.

I receive letters of every complexion, but not often one more pithy than the following, which I give *verbatim*, except the name:

LANCASTER, Feb. 5th, 1868.

"REV. HENRY W. BEECHER:—

"*Sir*:—I hardly know how to address so great a man. You said in a sermon, some time ago, that honesty ought to be rewarded. I am honest with my fellow men, myself, my God. Can get recommendations (the best) from lawyers, doctors, preachers, etc. Get me an easy situation, that honesty may be rewarded. C. C."

To which I append my reply:

MY DEAR FRIEND:—The proper way to address a great man is the way in which you would address any man who has good common sense. Never begin by telling him that he is a great man. If he *is* one, he probably found it out before you did; and if he is *not* one, you will not be apt to make much by tickling his vanity by so cheap a compliment.

Surely, a man as honest as you are has been rewarded already. What! "honest with your fellow man, yourself, and your God!" There are few men that can say as much. Honest with your fellow man? Is your conduct without knots, wind-shakes, or cracks? Do your neighbors think so? Have you come to it gradually, as a winter apple ripens, or has it always been so? Excuse these questions, for really I am deeply interested. You belong to an exceedingly small class. You have few fellows on earth. Indeed, when you add that you are *honest with yourself*, I cannot keep company. You are ahead of me; and that last clause — *honest with your God* — takes you entirely out of my sight. Why do you come to me? I ought to sit at your feet. You are my master.

No doubt you can get "recommendations from lawyers, doctors, preachers." You place those gentlemen, doubtless, in the order of their honesty, ending in a climax. Lawyers are proverbially honest; doctors never deceive; preachers practice what they preach. Recommendations from any of these would smack of self-laudation. Every man praises his own virtues. Get some one not so inevitably good to commend you. Are there no editors, no members of Congress, in your neighborhood?

But I now come to the most important part of your letter. "Get me an easy situation, that honesty may be rewarded." I am ready to do all in my power for you. Had you signified the sort of easy place you would prefer, I should have been less perplexed. Let me see.

How would a good farm suit you — with say fifty head of neat stock in the barns, twenty horses, one hundred head of hogs, cribs full of corn, and twenty stacks of good timothy hay, besides all that the cattle can eat stowed away in the barn? I propose giving you this. But, on reflection, I am sure it would not be *easy* enough. Hired men must be looked after. Fences, tools, and buildings want continual repair. Summers are very hot, winters are very cold, and farming requires a man to be up and about at all seasons. No, I am sure that a good farm will not be an *easy* place!

I give up this project the more willingly because I thought of manufacturing. Would you like to own large cotton or woolen mills? A great deal of money has been made (and some lost) during the last ten years, in manufacturing. But, just now, I am afraid there is some embarrassment in the business. The place is not *easy* enough. I would not, if I were you, go into manufacturing, nor merchandising, nor speculation. There is too much agitation just now.

I could send you to Congress. Everything is easy enough there! But the singular honesty which you possess would make you lonesome. Congressmen are all, or most all, honest; but not *so* honest! and you might find yourself an object of jealousy, and envy, which would take from the *ease* of your position; all the more, because it would bring you so near to the White House.

Now, my dear fellow, *that* is the very place for you! Your peculiar virtue of honesty would eminently fit you for that place. The White House has often been refurnished, but never with that which you would carry to it, with one late exception. It took the nation four years to get used to honesty in a President, and then, alas, just as people began to like it, he and it disappeared!

You are a born President! All parties are looking out for you. They want a man "*Honest to his fellow men, to himself, and to his God.*" What a motto is that to run a race with! Thus far they seem not to have found just the man. If I were to divulge your name, no doubt you would be ravished away to Washington in spite of your screams, and made President of the United States. And the only reason why I do not disclose your whereabouts is, that I fear that the presidency would not prove that "*easy*" place which you so justly think is due to your honesty.

In fact, I believe it is a hard place. We read of many patient martyrs. Men have sung in the flames, and been broken on the wheel and rack without a groan, and have worn a heavenly countenance while arrows were piercing them, or stones plumping down upon them. And all these things might be. But shall we ever see a holy martyr whose faith will sustain him in the Presidential chair? Can a man be tormented by office-seekers, praised by parasites, teased by widows, overrun by Congress, carved and pierced by both parties, flayed by newspapers, cajoled, deceived, and finally tormented by a cabinet, who treat him to advice as consolatory as that which Job received from his friends — and yet be a saint? Can there be peace in the White House? You are the very man for a President, but the Presidency is not the place for you! It is not "easy."

Perhaps you would like to come to New York and take Mr. Astor's place, or Mr. Stewart's. Let me advise you not to do it. They have riches; but as yet, no search has been able to find for them that rare and precious stone — *content*. Both of them have builded a good deal. But though they can keep out the weather — the winter's cold, the summer's heat, and exclude light, and sound, and dust, as yet they have not been able to keep out care, sickness, sorrow, and heartache. No! I cannot conscientiously recommend you to become a very rich man. It is not "easy" to do, and still less "easy" after it is done.

Don't be an editor, if you would be "easy." Do not try the law. Avoid school-keeping. Keep out of the pulpit. Let alone all ships, stores, shops and merchandise. Abhor politics. Keep away from lawyers. Don't practice medicine. Be not a farmer nor a mechanic; neither a soldier nor a sailor. Don't study. Don't think. Don't work. None of them are easy. Oh, my honest friend, you are in a very hard world! I know of but one real "easy" place in it. That place is the GRAVE!

How is it in Lancaster? Can they not serve you there? Even graves are very dear about here. Try and get suited at home.—*N. Y. Ledger.*

Our Consecrations.

From out each yesterday of life
All have some precious store to keep;
Some little store of golden worth,
Some treasure rescued from the deep
Of those gone hours ere yet the waves
Of time have closed their quiet graves.

Thrice dark of all dark days that one
Which leaves no brightness from its hours,
No nightingale to sing at eve,
No after fragrance from its flowers,
No holy dew distilled from Heaven
To consecrate it fresh from even.

Blest art thou heart that yearnest (though
The tears that dim thine eyes be vain)
To call back something from thy past —
Some yesterday to life again.
The gladdest summer of our years
We consecrate by autumn tears.

Each consecrates some precious part,
Some secret store of hidden worth;
We garner each our harvest sheaves;
Our golden memories of earth,
Against the winter-time of need,
That we may after come and feed.

And when the yesterdays of life
Shall all be numbered, still I deem
Each one shall have its store to keep,
His fadeless relic of earth's dream;
Some shadows softened by God's light,
Some star that made his journey bright.

The Art of Not Hearing.

The art of not hearing is as important to domestic happiness as a cultivated ear, for which so much time and money are expended. There are so many things that are painful to hear, many of which, if heard, would disturb the temper, and detract from happiness and contentment, that every one should be educated to take in and shut out sounds at will.

If a man falls into a violent passion and calls me all manner of names, the first word shuts my ears and I hear no more. If, in my quiet voyage of life, I am caught in one of those domestic whirlwinds of scolding, I shut my ears as a sailor would furl his sails, and, making all tight, scud before the gale. If a hot, restless man begins to inflame my feelings, I consider what mischief these sparks might do in the magazine below, where my temper is kept, and instantly close the door.

Does a gadding, mischief-making fellow begin to inform me what people are saying about me, down drops the portcullis of my ear, and he cannot get in any further. Some people appear very anxious to hear everything that will vex or annoy them. If it is hinted that any one has spoken ill of them, they set about searching and finding out. If all the petty things said of one by heedless or ill-natured idlers were brought home to him, he would become a mere walking pin-cushion, stuck full of sharp remarks. I should as soon thank a man for emptying a bushel of nettles on my bed, or setting loose a swarm of mosquitoes in my chamber, or raising a pungent dust in my house generally, as for bringing me all the tattle of spiteful people. If you would be happy, when among good men, open your ears; when among bad, shut them. It is not worth your while to hear what your servants say when they are angry; what your children say when they have slammed the door; what a beggar says whose petitions you have rejected; what your neighbors say about your children; what your rivals say about your business or dress.

I have noticed that a well bred woman never hears an impertinent or vulgar remark.

A kind of discreet deafness saves one from many insults, from much blame, from not a little apparent connivance in dishonorable conversation.

Politeness of Paul.

An old poet has quaintly called Jesus "the first true gentleman that ever breathed." Paul's politeness, too, must not bo overlooked, compounded as it was of dignity and deference. It appeared in the mildness of the manner in which he delivered his most startling and solemn messages, both to Jews and heathens; in his graceful salutations; in his winning reproofs — the "excellent oil which did not break the head;" in the delicacy of his allusions to his claims and services; and above all, in the calm, self-possessed and manly attitude he assumed before the rulers of his people and the Roman authorities. In the language of Peter and John to their judges, there is an abruptness savoring of the rude fisherman life, and fitter for the rough echoes of the Lake of Gallilee than for the tribunals of power. But Paul, while equally bold and decided, is far more gracious. He lowers his thunderbolt before his adversary ere he launches it. His shaft is polished as well as powerful. His words to King Agrippa — "I would to God that not only thou, but also all that hear me this day, were both almost and altogether such as I am, except these bonds" — are the most chivalric utterances recorded in history. An angel could not bend more gracefully, or assume an attitude of more exalted courtesy.

A Good Mother.

She is a good mother who brings up her children to work — to work in the kitchen, if you please. We shall never have good puddings and pies, chowders and fricassees, while the ladies are taught that it is a disgrace to learn to cook. The time may not come when the daughters of wealth shall be obliged to take their stand in the kitchen — but should they not know how to bake and wash? What is a young woman fit for whose mother allows her to lie in bed till ten o'clock; and who, when she rises, sings a song or two, and sits down to the last new novel? She may answer for the wife of a wealthy fop; and a miserable life — miserable indeed — will she live. Far better for her, no matter what her condition in after life may be — whether she marries a fortune in gold, or a fortune in real worth — if she is brought up to work. Her life, in comparison to one brought up in idleness and folly, would be a season of real enjoyment, and the influence she exerted would be glorious indeed. What mother will be so unwise as to teach her daughters that work is degrading, while lying in bed, dressing in fashion, and reading mere trash, is elevating and dignifying? — *The Ladies' Repository.*

Rules for Young Men.

The *Mercantile Times* gives the following rules for young men commencing business.

The world estimates men by their success in life — and, by general consent, success is evidence of superiority.

Never under any circumstances, assume a responsibility you can avoid consistently with your duty to yourself and others.

Base all your actions upon a principle of right; preserve your integrity of character, and in doing this never reckon the cost.

Remember that self-interest is more likely to warp your judgment than all other circumstances combined, therefore, look well when your interest is concerned.

Never make money at the expense of your reputation.

Be neither lavish nor niggardly; of the two, avoid the latter. A mean man is universally despised, but public favor is a stepping-stone to preferment — therefore, generous feelings should be cultivated.

Say but little — think much — and do more.

Let your expenses be such as to leave a balance in your pocket. Ready money is a friend in need.

Keep clear of the law; for even if you gain your case, you are a loser of money.

Avoid borrowing or lending.

Wine-drinking and cigar smoking are bad habits. They impair the mind and pocket, and lead to a waste of time.

The Value of a Scrap-book.

Every one who takes a newspaper which he in the least degree appreciates, will often regret to see any one number thrown aside for waste paper which contains some interesting and important articles. A good way to preserve these is by the use of the scrap-book. One who has never been accustomed thus to preserve short articles, can hardly estimate the pleasure it affords to sit down and turn over the pleasant, familiar pages. Here a choice piece of poetry meets the eye, which you remember you were so glad to see in the paper, but which you would long since have lost had it not been for your scrap-book. There is a witty anecdote — it does you good to laugh over it yet, though for the twentieth time. Next is a valuable recipe you had almost forgotten, and which you found just in time to save much perplexity. There is a sweet little story, the memory of which has cheered and encouraged you many a time, when almost ready to despair under the pressure of life's cares and trials. Indeed, you can hardly take up a single paper without reperusing it. Just glance over the sheet before you, and see how many valuable items it contains that would be of service to you a hundred times in life. A choice thought is far more precious than a bit of glittering gold. Hoard with care the precious gems, and see at the end of the year what a rich treasure you have accumulated.

Education helps men to do whatever they have to do, much better than they could do without it. The mind, the hand, the eye, must be educated that they may assist each other. A well trained mind will guide aright the judgment which must be formed through the medium of the eye. The eye controls the action of the hand in all that it does in the accomplishment of anything that pertains to art or science.

Do not be troubled because you have no great virtues. God made a million spears of grass where he made one tree. The earth is fringed and carpeted, not with forests, but with grasses. Only have enough of little virtues and common fidelities, and you need not mourn because you are neither a hero nor a saint.

The grafts that circumstances make in our character we are apt to regard as its native fruit.

THE YOUNG FOLKS.

Little Jack Horner.

I suppose there is hardly a boy in California who has not read the story of Little Jack Horner, and thought how comfortable he was in his home when the nursery man says of him —

"Little Jack Horner sat in the corner
Eating his Christmas pie,
So he thrust in his thumb
And pulled out a plum,
Saying, 'What a good boy am I!'"

I used to think he was about such an honest-looking boy as sits beside me at the Lincoln School. But I saw an account of him last Saturday in a book which rather changed my mind. It said that Jack Horner was not so very honest a boy after all, and his pie was rather a droll one.

It seems that about four hundred years ago, Henry VIII reigned in England. He was a rough old customer, and wanted more land and money. Now, the monks owned many of the best castles and lands, and he sent word to some of them that if they did not give to him before Christmas the titles of their lands, he would cut their heads off. Now, the monks loved their fine lands — but they loved their heads still better. One of them lived in the west of England, and between there and London there were forests full of robbers. How could he send the titles safely? He thought of this plan. He put the deed in the middle of a big Christmas pie, and sent it by a boy named Jack Horner, who was to carry it to London. Now, the way was long, and Jack got tired and hungry. So he thought he would just pick off a piece of the crust, and nobody would notice it. He did so, and under the crust could see the edge of the paper. So he thrust in his thumb and pulled it out, and, found it to be the deed of Allwick Castle. It was the richest plum in that pudding. So he carefully put it in his pocket, and, instead of going to London, went off to an uncle in Scotland. The King was terribly mad when the

deed did not come, and he had the poor old monk's head cut off sure enough. But after a while King Henry died, and his daughter Mary became Queen. She was a Catholic, and she sent word to all the monks who had lost their lands that they might have them again, and if any were dead their lands should go to those who held the deeds.

Then it was that Jacky Horner stepped out, and showing the deed got the big castle of Allwick. This dont look as if Master Jack Horner was so very *good* a boy. But I give the story just as I found it.

THOMAS.

EDWARD McLEAN. JACOB HARDY.

McLEAN & HARDY,

Real Estate Agents,

BROADWAY, BETWEEN FINTH AND TENTH STREETS,

Oakland.

No. 14 Stevenson's Block, cor. Moutgomery and California,

San Francisco.

Buy, Sell, and Lease City and Ranch Property; Negotiate Loans; Collect Rents; Draw Legal Instruments, etc.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

PACIFIC COAST ITEMS.

For ten years after the discovery of gold, nearly every pound of butter consumed in California was brought from the Atlantic States. When in 1858, it was first brought into the market from Marin and Sonoma, it was so slovenly prepared as to be unfit for the table. Not until quite recently could a prime article of California butter be found in our market; but it is now demonstrated that when butter coming from the neighboring counties is insipid, greasy, and pale, it is not the fault of the grass or the climate, but of the lazy, filthy habits of the dairyman. We are fast driving the foreign article from our list of importations. In 1862, the number of firkins brought across the Isthmus, was 72,539. In 1864, it was about 60,000; in 1865, 47,620; in 1867, 24,150. By 1870, Eastern butter will be banished from our tables.

A San Diego correspondent is delighted with the climate and the farming prospects of that county. The soil is easily tilled and is very productive. The old Spanish grants are rapidly disintegrating. Land fit for tillage can be had from fifty cents to two dollars. Further east there is a pleasant district where you can pre-empt, and where a score of clever Texas farmers have already made a settlement. New comers, however, should not tarry in the town. There are two saloons for every dwelling-house, and after dark table-legs and other such "persuaders" are freely used. In these retreats a fight can always be got up in the "wee small hours," by any person wishing to find that kind of amusement.

A correspondent from one of our growing towns writes: The impeachment excitement has much abated here. To show you the extremes of judgment as to the President, here is a sample: A Christian lady said to me that President Johnson "is a greater traitor than Jeff Davis." A good Christian man remarked: "When Congress shall be remembered only to be deprecated, the name of Johnson will be side by side with Washington." No one will accuse the President or Congress with being overstocked with patriotism or piety.

The prospect of the grain crop continues favorable. The early wheat on the lowlands is thin and yellow, but the hills more than compensate for this drawback. The Woodland *Democrat* says: Yolo County will this season be blessed with an unusual yield of grain. Our farmers have never failed to raise good crops, but the present season promises a more abundant harvest than usual. With the exception of those whose lands are inundated by the river, we think our farmers should be of good cheer—and take their county paper.

A meeting to devise means to aid needy emigrants was held at the Merchants' Exchange on Tuesday. Mayor McCoppin presided. Various suggestions were made by gentlemen present, and a committee, consisting of James Linforth, B. Fabian, G. W. Gibbs, and W. H. L. Barnes, were appointed to report a plan of operations at the next meeting.

A lady in this city, afflicted with a severe cough, purchased a few evenings since what she supposed to be "Garland's Cough Drops." By frequent use during the night, she found herself greatly improved. A day or two after, she was surprised to find that instead of cough drops, she had been using a bottle of the patent "Hair Oil Invigorator."

A son of the Emerald Isle, who is disgusted with the condition of affairs in Nevada, gives his opinion of the metropolis of that State in a nut-shell: "The whole of Virginia is comprised in two blocks, and them two blocks consist of one corner, and that one corner is the California Bank!"

Hon. Anson Burlingame, and the rest of the Celestial Embassy are still luxuriating at the Occidental. The Mandarins, however, exhibit a mock dignity by refusing an interview with their fellow countrymen who have adopted any part of the American costume.

The Quincy *Union* says the late rain has caused rapid diminution of the banks of snow still lingering on the northern slopes of our surrounding hills. Soon the only snow in sight will be that upon the distant granite peaks of the Sierras.

We notice that the woolen fabrics from the "Salem Woolen Mills" in Oregon, now in the market in this city, are superior both in style and wear to those brought from the East. Both taste and economy will bring them into use.

The *Sage Brush* says that Susanville has been pretty effectually cut off from all intercourse with the civilized world since Christmas. Even into April, the mountains were entirely enveloped in continual storm and mist.

The Clear Lake *Courier* says: "School Superintendent Mackall informs us that he has moved his office. He no longer holds forth in Rice's canoe, but now keeps his office on horseback—same as Sheriff.

The people of Oakland had a jollification on Saturday night on account of the locating of the terminus of the Pacific Railway in that town. John B. Felton and Dr. Merritt were the chief speakers.

The Denver *News* recommends that Uncle Sam turn over Alaska to Brigham Young and his associates. since among the Esquimaux polygamy would be nothing new.

At the city election in Oakland this week, Dr. Merritt was elected Mayor, Rev. L, Walker, School Superintendent, and Sextus Shearer, Police Judge.

Oranges from Los Angeles and Tahiti, and apples from Oregon, are becoming plenty in our market.

TELEGRAPHIC SUMMARY.

Eastern.—In Rhode Island the Republicans elected their ticket last week by a largely increased majority....In Connecticut the Democrats re-elected their Governor and State ticket—more than doubling the majority of last year. The Republicans have a majority in the Legislature ...George Wilkes is reported to have been the agent in reconciling the irate Gen. Butler and the reticent Gen. Grant to each other. ....Report says that Grant declares the removal of the President the only condition of peace....The last steamer from New York to Panama is reported to have refused 1,200 passengers....Michigan has rejected the Constitutional Amendment by a decisive majority. This rejects negro suffrage in that State....The national debt figures up $2,641,719,332. The Presbyterian church at Grove Place, Rochester, N. Y., has been burned. Loss, $40,000....Fifty persons were killed by an explosion of the *Magnolia* on the Ohio near Cincinnati.

Impeachment.—The proceedings of the Impeachment Court are growing dull. There was considerable irrelevant testimony brought forward by vote of the Senate. The last testimony offered was that of L. C. Parsons and sundry newspaper reporters in regard to the President's speeches at Cleveland and St. Louis. After several days' interim, the Court renewed its session on Thursday....Gen. Rosseau is returning East overland....The trial of Jeff Davis is appointed for May.

Foreign.—The Tycoon of Japan has abdicated, and affairs are quite mixed up in that country....The French and British Ministers at Pekin are greatly displeased with the appointment and departure of Mr. Burlingame. He will survive....The British Ministry, under the lead of Mr. Disraeli, was defeated in the House of Commons on the question of postponing the Irish Reform Bill, by 65 majority. But the Tory Ministry are reluctant to yield on the Irish question until compelled by a more stern voice of the people. ....Thomas Darcy McGee was assassinated near his own door, when returning from Parliament, at Ottawa, Canada, on Monday evening. He was shot through the breast by a person believed to be in the interest of the Fenians. Though an Irishman, he strongly favored the English Government.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, April 8, 1868.

There is a continued disposition to ease off on the ruling rates. Some parties quote best Beef at 10c as an outside figure. Veal is without change, though 12c is considered an extreme price. Mutton is a shade easier. Spring Lamb is more plentiful, at a slight decline. Soft Hogs have been sold as low as 5c.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 10@10½c ℔ lb.
do 2d do 7@9c ℔ lb.
Veal—Ordinary to choice, 8@12c ℔ lb.
Mutton—Easy at 6@7c ℔ lb.
Lamb—More plentiful at 9@10c ℔ lb.
Pork—Undressed, grain fed, 7@8c; dressed, medium range, 9@11½c ℔ lb.

Produce Market.

Flour—Trade is generally dull. We quote best brands of Oregon Extra at $7 50, and city mills as follows:

Superfine, hf sks, ℔ 196 lbs	$6	62½@6 87½
qr sks	6	87½@7 12½
Extra, hf sks	7	37½@7 62½
qr sks	7	62½@7 87½

Wheat—Under the stimulus of a partial renewal of the export trade, there is a little better feeling to the market, though we have heard of no sales of moment, and therefore continue to quote best samples at $2 45@2 50 ℔ 100 lbs.

Barley—Sale of 300 sks brewing, $2 02½. We quote the range for this description at $2@2 05, and feed at $1 90@$1 95 ℔ 100 lbs.

Oats—The nominal range of the market is $2 50@2 75, though it would be difficult to place a round lot of choice above $2 62½. Sales include 323 sks slightly mixed, $2 50; 200 sks fair, $2 60 ℔ 100 lbs.

Potatoes—The condition of the market is a little hopeful, though $1 50 is considered a full figure for best descriptions. Sale of 400 sks choice Monterey, $1 35; 500 sks Humboldt, in lots, $1 45@1 50 ℔ 100 lbs.

Corn—The receipts of late have been more liberal, 2,000 sks having come to hand last week. Red is quoted at $2 25; pale, $2 35, and deep Yellow, $2 45@2 50 ℔ 100 lbs.

Rye—We have heard of no sales; quoted nominal $2@$2 05 ℔ 100 lbs.

Buckwheat—Small lots from store, $1 75@2 ℔ 100 lbs.

Onions—Stock moderate; jobbing at 5½@6½c ℔ lb for assorted.

Beans—Wholesale rates are as follows: Bayo, 3¼c for new, and 3c for old; Butter, 4@4½c; Pea, 4¾@5½c; small White, 4¾@5c; Pink, 2½@2¾c; and Red, 2½@2½c ℔ lb.

Bran—Very scarce and quick of sale at $31 ℔ ton.

Middlings—Fine is steady at $50; feed descriptions $35@40 ℔ ton, the inside figure for Shorts.

Oil Cake Meal—In fair demand at $30 ℔ ton.

Hay—Sales include about 60 tons within the range of $18@$24 ℔ ton. Receipts moderate.

Dairy Products—There is a continued good demand for all kinds. Fresh roll Butter is quoted at 30@32½c; California 30@32½c for store-packed, and 32½@35c for ranch-packed, with considerable inquiry for interior. Cheese, 17@18c ℔ lb; Eggs, 32@34c ℔ doz. The near approach of Easter adds firmness to the market.

Poultry—Live Turkeys are quoted at 16@19c, and dressed do, 18@20c ℔ lb. Hens, Roosters, and Spring Chickens, $7@7 50; Ducks, $5@7 ℔ doz; Geese, 3 ℔ pair.

Provisions—The demand for Cured Meats is less active. California-smoked Bacon is quoted at 15½@16c; Oregon do, 13½@14c; California Hams, 17@17½c—some asking 18c; Oregon do, 15@17c; Lard, 14@15c for California, and 13@13½c ℔ lb for Eastern.

Wool—The spring clip continues to arrive sparingly, and is quoted at 16@16½c for clean grades; fall clip, 11½@12c. Sales since last Wednesday aggregate about 30,000 lbs, chiefly for export.

Hides—Sales since the 1st instant aggregate 500 California dry, usual selection, 14@14½c ℔ lb.

Tallow—Sales of about 10,000 lbs Beef, private. We fair to choice Beef and Mutton at 7¼@7½c ℔ lb, the medium quotation being 7½c.

CURRENT TOPICS.

There are some facts respecting the various parts of the State which are indicative of increasing and permanent prosperity. The mines are receiving a due share of attention, not only from those who speculate in stocks, but also from both the capitalists and laborers who are now coming to our shores, and the prospect is fair that the new shafts that are being opened in old mines, and the new mines that are being worked, will richly reward those who are contributing so much to the wealth of the State. The farming lands are attracting the largest number, however, of those who design to make California their home, and along the lines of the railroads, and in the lower part of the state especially, great numbers of new comers are buying farms and sowing crops. Conversation with a gentleman recently from Santa Barbara assures us that within a year that region has wonderfully changed. The change consists chiefly in the fact that the immense ranches that have been owned there are being sold in sections that are within the means of ordinary farmers, and the wild appearance of the country is exchanged for plowed fields, young orchards, and comfortable homes. Of course the settlement of so vast a region has only begun, but it will progress with great rapidity. Very promising accounts are given from every portion of the State, and though the hopes of some of our people may be sanguine, it can hardly be doubted by any that a future of unprecedented prosperity is awaiting us. Let none forget that our obligations to God and man will be in the ratio of our success.

The presence among us of a real embassy from China is a fact that may well excite great interest. The appointment of Hon. Anson Burlingame as plenipotentiary representative of the Chinese Empire was a public admission of necessity that it come into more direct relation with the other Powers, and the selection of those dignitaries who accompany him was made with reference to gaining as much as possible for the Government from their observation and study of what they might find in our nation. The political and religious aspects of that vast empire, at this time, together with the new commercial interests that are being cultivated by recent facilities for communication with us, render this embassy exceedingly significant, and we are glad so much attention is paid to those who compose it.

In this connection we should speak of an address lately delivered here by W. P. Jones, Esq., U. S. Consul at Canton, respecting a University which it is proposed to establish in Pekin, the Capital of the Empire. He represents the time as most favorable, the patronage of the Government as reliable, the advantage to the missions and to civilization as incalculable, and the prospect of success as very cheering. Who can doubt that Providence is in league with the Gospel in the effort to enlighten and redeem the world?

Notice has been given of a National Convention, to be held in Pittsburgh on the 5th, 6th, and 7th of May, to express in some definite form the opposition to secret societies which is supposed to be quite general. It has been known that some branches of the Church are not in favor of these organizations, and there may be more persons ready to take position against them than we have so reckoned; yet it is not probable that this convention will be of much avail in suppressing them. There is a feeling, more extended and positive than some appear to believe, that avowedly benevolent associations outside of the Church may be useful in many ways. And there is a conviction, which has had expression from the earliest times, that some element of secresy in these associations increases the interest in their object felt by the members, and renders them more secure from such changes as might defeat that object in the course of years. If the rule of our Lord be applied to those societies now most prominent — "By their fruits ye shall know them" — it is difficult to show that some of them, at least, are not doing for the relief and advantage of man what would not be done but for their existence; and though we by no means suppose they can become a substitute for the Church, or assume to aid the Church in fulfilling its special mission to preach the Gospel for the salvation of men's souls, there is opportunity to doubt the philanthropy and wisdom of an attempt to interrupt the work they are doing. Those which all know to be evil should be condemned; but there are some of the most powerful among these societies and orders that may be commended by all who love morality and believe men are elevated by its influence.

The interest which has been manifested respecting the terminus of the Pacific Railroad has been but partially interpreted by those who have supposed it related only to the value of real estate in one locality or another. Like interest has never been felt in anything of this kind, and it is an expression of the conviction that this great artery of the continent is to pour a mighty tide of life into our State. It is probable that the expectations of some are extravagant, and the immediate effect of its completion may not make known what the road must ultimately contribute to our prosperity, but the prophecy contained in the universal enthusiasm with which its progress is watched will be fulfilled. It is no idle man's fancy, no sick man's dream. The facts that attend its penetration into the wilds of the interior — the towns, sales of land, wonderful influx of population, development of resources to which there had been no access, that render the track really a belt of civilization along its whole extent — are demonstrative of the wisdom as well as enterprise which conceived and prosecutes the mighty scheme. No man can tell what may be the results within twenty-five years, yet any one can see they must be marvelous.

Lord Napier reports that the army in Abyssinia is in as good condition as ought to be expected, and that they are making progress towards the strongholds of King Theodore. There can be no doubt, however, that the expedition has already cost much in treasure and life, more than either the British Government or people anticipated when it was projected. The difficulties of transportation and the unfavorable climate occasion more delay as the army advances, and it may be months after the camps of the heathen king are reached before the final victory can be announced. Whatever may be the results, the expedition will not become popular with the masses of England. It may increase the disaffection that has been manifest, and, like all the other movements of great Europeon Powers at this time, it will be carefully studied by those who see the hand of God, as well as the agency of men in what may transpire.

Fenianism is assuming proportions that were not anticipated a year ago, and it is manifest that the British Government regards it as a very serious foe, to conquer which will task the wisdom and the power of the nation. The divided feeling of the people respecting Ireland, and the resolute purpose of Fenians to accomplish their ends at any cost, if not by any means, and the evidently growing numbers and influence they can reckon in their support, complicate the questions which cannot be ignored, and render their solution difficult. The issues of another year, as related to the future of Ireland, will be full of interest. Nor is it certain that the settlement of the difficulties involved in this will not change the relations of other lands that are not supposed to be affected by the struggle that must come.

The announcement reached us a few days since that the library of the late John C. Calhoun had been sold at Abbeville for $250. One would have thought it would have commanded a much larger sum, merely as a speculative investment, as the time will come when the Carolinian's books will be sought by collectors of political and literary curiosities. Nothing testifies more strongly to the broken-down condition of the South than this sacrifice of the books of the great "secessionist," which went for next to nothing, because there is nothing in the South which can be spared for luxuries. Had they been offered for sale in Boston, they would have brought ten times the sum for which they were sold.

Religious Intelligence.

PACIFIC COAST.

The Presbytery of Benicia will hold its next semi-annual meeting in the Presbyterian church of Healdsburg on Friday, the 8th of May, at 7½ o'clock, P.M. The services to commence with a sermon by the retiring Moderator, Rev. James Wylie.

A. Fairbairn, Stated Clerk.

—

Church Erection Committee.—At a meeting of the Committee of the Synod of Alta California, held in this city April 13th, Rev. Henry M. Scudder, D.D., Chairman, Samuel I. C. Swezey was unanimously elected Treasurer for the current year. All contributions for this cause from the New School Church on this coast should be forwarded to the Treasurer at his office, No. 302 Montgomery Street.

—

Olivet Presbyterian Church.—This is the name adopted by the new church organized on the Potrero, in this city, on Sunday last, April 12th, by the Commission from the Presbytery of San Francisco. A fair audience was present at the organization, which comprises eleven members, and the proceedings were attended with an interest even beyond that usually manifested on occasions of this nature.

—

The younger members of Dr. Wadsworth's Church have formed a literary society, which meets once a month in the basement of the church building, to engage in readings, declamations, vocal and instrumental music, and the reading of original compositions. The attendance is large and the exercises varied, interesting, and excellent. The music, a considerable part of it, is arranged especially by Professor Gustave Scott.

—

Rev. George Mooar, pastor of the Congregational church in Oakland, expects soon to leave with his family for a visit of some months at the East. His church has given him leave of absence and will supply his pulpit while he is away. We are happy to know that Mr. Mooar has no thought of remaining permanently away from California, as he seems to be identified with interests here that need the support of such men more than ever before.

—

An Open Communion Baptist church was organized in Brooklyn last Sabbath, with good prospect of growth and success. If the spirit that has prevailed in the Church of the same name in this city shall be seen in those that may be formed in association with it, we shall be rejoiced to see the number multiply rapidly.

—

Elder Knapp continues to preach every evening in the city, but has returned to the First Baptist Church as the most favorable place in which to hold his meetings. We have not learned, of late, what success attends his labors.

—

The Rev. John Francis, Pastor of the First Baptist Church, Brooklyn, was married last Sunday, at that place. He will shortly leave California for the Atlantic States, and another clergyman is to take his place in Brooklyn.

—

A package of fifteen sermons was lost several months ago in this city, in a strong green wrapper, superscribed "Rev. Thomas Fraser, Montreal for San Francisco." Any person having any knowledge of this package will please give information at this office.

—

Occasional items have of late found their way into the public prints concerning efforts making for a new church enterprise in this city, with a view to the recall of Dr. W. A. Scott. We are credibly informed that a telegraphic dispatch was last week sent to him in New York, asking his acceptance. No reply has yet been received to this, but letters have been received from his New York friends, announcing that Dr. Scott and wife had sailed for Europe, intending to spend the "Holy Week" in the city of Rome. In view of this circumstance, Dr. Scott's friends have given up the hope of again welcoming him to California.—*The Pacific.*

—

Rev. Charles G. Ames, says the *Pajaronian*, lectured in Watsonville a few evenings since. Among other ideas, he said:

"Our immediate neighborhood is the true field of our labor, and especially in our own families—among those who live beneath the same roof with us; that it was not of so great importance to us what Congress was going to do with Andrew Johnson, as what we were going to do in the town of Watsonville—how best to conduct ourselves honestly, nobly, and intelligently, in our families, at the polls, and among our neighbors; work first to be right in our dealings with local matters, intelligent and honest, not making self the first and only consideration, and we will then be truly public spirited; and if all the towns worked in this manner, our laws would be better, and the whole machinery of government would run without creaking, and every community be free of jealous, growling cliques."

—

Festival at Alameda.—The Oakland *Transcript* says the Powell Street Literary Society came over from San Francisco to Alameda last week and gave an entertainment for the benefit of the Methodist church at that place. The exercises consisted of music, reading essays, etc. Mark Twain gave a humorous speech, which elicited great laughter. After the literary and musical exercises, those present partook of a supper prepared for them. There was a large number of people present.

—

Dr. Jesse T. Peck's many friends will be gratified to learn that his new book, entitled *The American Republic from a Christian Standpoint*, has made its appearance. It is an octavo of over seven hundred pages, illustrated with thirty-four fine steel engravings. The subject, the reputation of the author, and the excellent style of its publication, will insure it a hearty reception and an extensive circulation.

—

San Francisco City Missionary Society.

The first annual public meeting of this Society was held on Sunday evening last at the First Congregational Church, corner of California and Dupont streets. The meeting having been opened by devotional exercises, the Secretary, Samuel Pillsbury, Esq., was called upon for a report of the past proceedings of the Society, and this being its first public meeting, he also gave, for the information of the public, an account of the circumstances which led to its establishment, the objects which the Society aimed to accomplish, and the system through which it hoped to attain its ends. The Society is under the control of the Congregational churches of the city, and was formed for the purpose of relieving the material and spiritual wants of the destitute of this city through the labors of a City Missionary, appointed by the Board of Managers, and reporting to them once in three months, and whose whole time shall be devoted to the work of visiting the poor and affording them such relief as may be in his power. A life-membership may be secured by the payment of twenty-five dollars.

The Society has recently secured the services of Rev. Justin P. Moore as City Missionary, and to his report the Secretary referred the audience for information in relation to what has been accomplished and the wants yet to be met.

The Treasurer, L. B. Benchley, Esq., made his report, showing a balance in the treasury of $244 50.

The Rev. J. P. Moore gave an account of his labors among the poor. Has found during the rainy season a great amount of suffering, and although the suffering in San Francisco is probably less than in any other city of equal size in the Union, still it is sufficient to arouse the sympathy and claim the assistance of our citizens. He has made 1,291 visits, relieved the wants of many families, bringing these wants, when too great to be met by himself, to the notice of the different benevolent associations, and has distributed a large amount of Bibles and religious reading. Employment has been obtained for twenty-five persons, and in several instances, by means of his labors, souls have been converted to God. Many persons have been found who were formerly in good circumstanees, but who have been reduced to poverty, and are ashamed to make known their wants to those who have known them in their prosperity, many of them preferring to starve rather than ask assistance. Such persons need only employment that they may be able to care for themselves, and such assistance may be furnished them at a trifling expense. Indeed, the actual amount of money expended by Mr. Moore has been less than $40. Mr. Moore related many incidents connected with his labors among the poor, which brought tears to the eyes of many in the audience, and, what will undoubtedly be of quite as much advantage to the needy, brought money from their pockets.

Rev. C. E. Bissell, Rev. J. A. Benton, and Rev. Dr. Stone addressed the audience briefly. Mr. Bissell remembered having read in an old book which some of the audience might have seen, a recipe like this: "Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal; but lay up for yourselves treasures in Heaven, where moth and rust doth not corrupt, and thieves do not break through and steal." He would advise those who had clothing in danger of being eaten by moths to give it to Brother Moore for the poor. He would recommend that method as superior to snuff, cedar chests, camphor, or any of the ordinary safeguards. If any were afflicted with *ennui*, what surer or nobler cure than to assist Brother Moore in his work of mercy?

Rev. Mr. Benton said that the subject of immigration claimed a great share of the public attention at the present time, but that which California needs most is *character*. Let us show to the world that we have Christian character; that we can feel for the sufferings of our citizens, and that we have the will to relieve those sufferings, and more will be accomplished toward filling our State with desirable inhabitants than has been accomplished by all the circulars which have been printed and scattered abroad.

Dr. Stone thought that the people needed no more exciting to the duty which had been presented to them. He had seen tears in the eyes of many while listening to the accounts of destitution in our city, and he doubted not they would respond liberally to the appeal for help.

A collection was taken with satisfactory results. Dr. Stone informed any who might wish to adopt

Brother Bissell's remedy, that bundles of clothing could be left at the intelligence office of Charles S. Eaton, on Kearny Street, near Clay.

The following officers of the Society were elected for the ensuing year: President, Rev. A. L. Stone, D.D.; Vice President, Samuel Cowles; Secretary, Samuel Pillsbury; Treasurer, L. B. Benchley; Board of Managers, Charles S. Eaton, Samuel Pillsbury, Ira P. Rankin, J. W. Clark, E. D. Sawyer, S. S. Smith, D. S. Sutton, H. H. Lawrence, C. W. Kittredge, Elisha Brooks, J. W. Cox, H. N. Turner, Charles J. Farran, Wm. H. T. Clark, W. M. Searby, and A. J. Mason.

—

Sunday Excursionists Rebuked.—It has been announced that the Eureka Guard of San Francisco would visit this place on Sunday the 19th inst., with other excursionists. The Vallejo Rifles met on Thursday evening to consider the question of receiving the "Eurekas" in uniform on the day referred to. The Rifles resolved that they would with pleasure extend all the usual courtesies to respectable military companies visiting Vallejo on any week day, but declined to parade the streets of their town on Sunday, or to make any formal reception of the company expected on that day. We most heartily commend the action of the Rifles. We judge that the excursionists will meet with but a cold welcome in Vallejo.—*Vallejo Recorder.*

MISCELLANEOUS.

A ship was sailing in the southern waters of the Atlantic, when her crew saw another vessel making signals of distress. They bore down toward the distressed ship and hailed them.

"What is the matter?"

"We are dying for water," was the answer.

"Dip it up then!" was the response. "You are in the mouth of the Amazon River!"

There those sailors were thirsting, and suffering, and fearing, and longing for water, and supposing that there was nothing but the ocean's brine around them, when, in fact, they had sailed unconsciously into the broad mouth of the mightiest river on the globe, and did not know it. And though to them it seemed that they must perish with thirst, yet there were a hundred miles of fresh water all around them, and they had nothing to do but to "dip it up."

Jesus Christ says, "If any man thirst, let him come unto me and drink." "And the Spirit and the bride say, come, and let him that heareth say, come, and whosoever will, let him come, and take of the water of life freely." Thirsting soul, the flood is all around you; "dip it up!" and drink, and thirst no more.—*Earnest Christian.*

Beautify the Premises.—A house with shade and fruit trees set around it; a neat fence or hedge in front; a row of box or pansies growing by the walk, and a climbing rose by the door, will sell for more than if there were none of these, to any intelligent purchaser; so that, aside from the pleasure one takes in enjoying a pleasant and attractive home, it pays in a pecuniary sense, to beautify the premises. Fathers! husbands! make home beautiful.

An extenuating circumstance is found in the alleged infraction of canonical law by the Rev. S. H. Tyng, Jr. "He evidently bore in mind," says the Chicago Evening Post "the divine if not the canonical command, 'Go ye into all the world and preach the Gospel to every creature,' beginning at—New Jersey. The Gospel is needed there, if anywhere."

THOMAS J. MYER & CO.'S

Extra Baltimore Fresh Cove Oysters,

OF LARGE SIZE AND FINE FLAVOR.

These Oysters are not prepared by a new method, but are packed by Messrs. Thomas J. Myer & Co., with all the care and skill derived from an experience of over twenty years, and are warranted equal to any ever shipped to California.

For sale by R. G. Sneath, Bowen & Brother, Fordham & Jennings and all the principal dealers.

Oxford Bibles.

The superior excellence of the Bibles printed at the Oxford University Press is proverbial among all who prize correctness of the text, and clearness and beauty of typography and binding. The Oxford editions are the standard from which other editions are copied, and are therefore acknowledged as superior.

The Subscribers, who act as

SOLE AGENTS IN THE UNITED STATES

for these Bibles, keep all varieties and sizes, from the 48-mo. to the Folio. They select the following, which they strongly recommend.

THE SUNDAY SCHOOL BIBLE. Printed in clear type and well bound in arabesque - - - - - - - - - 50 cents.

THE PEW BIBLE. Printed in large type and bound in morocco, $2 00; Turkey morocco, $3 00.

THE STUDENT'S BIBLE. Printed on fine paper, in beautiful type, with References and Maps, and an Index to the persons, places, and subjects occurring in the Scriptures. Turkey morocco, - - - - - - - - - - - $4 00

THE CLERGYMAN'S BIBLE. Printed in large, clear type, with References and Maps, and an Index to the persons, places, and incidents occurring in the Scriptures. Bound in Turkey morocco, - - - - - - - - - - - - $5 00

THE PULPIT BIBLE. Beautifully printed in very large, clear type, demy, 4to. Bound in Turkey morocco, - - $20 00

THE FAMILY BIBLE. Beautifully printed in large type, containing Family Record, with or without References, Plates, and Maps, in every style of binding, from $17 00 upwards.

TRUE COURAGE.

A thoughtful man is often burdened with the solemnity of life. We are wont to gather around the death-bed with a feeling that the exit of a soul from earth is the most momentous event in its history. But more momentous far is its introduction to a career of work, and expansion, and influence, and responsibility, that must be prosecuted amid opposition, and temptation, and risk, that involves such amazing results, and that can be completed with success only by the exercise of the most earnest qualities and the most constant effort. Life, as the consummation of duty, personal, social, civil, as the perfection of character, as the sum of what can be retained by us, as the sum of what we contribute to others; *life*, as estimated by a man's stature, not by his years — by what he has achieved, not by what he has accumulated; such life as God would stimulate by the revelation of help in its scenes, and of glory at its end, is the most solemn theme for thought ever presented to a human mind. It rises before us like a lofty mountain, frowning with cliffs and bare rocks that seem to forbid ascent, though there are intervals of green and shade, and the top is bathed in perpetual light; and as we look up, the prayer that rises first upon our lips, after that which calls on God for help, is that we may have *courage* for the steep and dangerous way. Could we see the foes that lurk in the gorges and upon the heights to prevent our progress, and the still more formidable foes that fill the air, and, by their ceaseless efforts, try to hurl down the struggling climbers, still more importunate and ardent would be our prayer for *courage* that we may reach the summit. This is to be distinguished from *bravado*, which is only an assumed air, superficial, designed to frighten or overawe opposition, having no substantial qualities, and temporary in its influence. With a class of people this has much power, and many schemes owe their success wholly to the assurance and bluster of those who appear as their supporters. There are multitudes of men whose *inflation* makes them great, whose pretense has no limits, who thrust themselves and their sentiments upon others with the utmost effrontery, yet who are the most cowardly and unreliable men of the race. What can be done by arrogance and assumption, they can do, but they have nothing of the spirit of which we speak.

It must also be distinguished from mere *obstinacy* in the maintenance of what we believe. This, in some of its qualities, is unlike that just noticed. It is not demonstrative, makes no sallies against the enemy, no display of banners, no particular show of forces, but quietly entrenched in its strongholds, and convinced of their strength, it resolves not to be moved. Neither arguments upon the justice of its cause, nor attacks on its fortifications, avail to provoke any change. There it remains, sullen, refusing to learn, refusing to yield, and boasting that it is in the same fort, and under the same banner, and holding the same faith, year after year. There is no heroism in such a spirit. There is no apprehension of life and its real theatre and object. There is only immovable, stolid adherence to what we have accepted as true, a shutting in of the horizon around our little possessions, a cold ignoring of all claims and duties beyond, making us negative rather than positive, and exhibiting none of those qualities which should distinguish a true hero.

Moreover, courage must be distinguished from what is commonly regarded as *bravery*. This is often worthy, and is displayed by one who has courage, but does not include all that we assign to that term. Bravery has reference to single acts, rather than to a state of mind. Bravery has its significance from what is *seen*, while courage may have its highest development without any outward manifestation that will attract special notice. Bravery may be displayed in support of a bad cause, since it relates to the manner of action alone, while courage, in the sense here intended, refuses alliance with a bad cause, rejects at once all offers of bribe, whatever may be their form, and espouses only what is believed to be right.

This, then, is what we should seek — a modest, firm, intelligent purpose to believe, and do what ought to be believed and done. It stands in the open field of revealed obligation, ready to move as the finger of God shall point. It enters the region of what is offered as truth, prepared to sift, and compare, and select, then resolved to accept what is found to be real. It comes within the domain of Providence, where are sorrows and joys, burdens and delights, willing to bear what shall be imposed. When thus fitted for life, it comes forth to its scenes. Let there be strifes: it will not shun them, yet will fight only for principle, whatever promise of gain may tempt it to swerve. Let there be success: it rejoices in the supremacy of what is right, and therefore worthy to be supreme. Let there be reverses: it does not despond, but rises to a higher purpose, and is fired with a more dauntless spirit for a renewed and successful struggle. Let there be heavy griefs: it carries them — whether beneath the view of others, or in the seclusion of private experience — without faltering and without murmur.

A base man cannot possess this courage. A mean man can know nothing of its power. A wavering, halting, time-serving man will claim it in vain. Its root is thoroughly imbedded *principle*, its trunk is unbending *magnanimity*, its branches are the thousand *graces* of personal character, the thousand *acts* of generous intercourse with others, and the beautiful and noble *results*, that extend far and wide; while, as to root, trunk, and branches, it depends upon the support and culture of that Divine Being who shall gather all the fruit for His own glory.

Thus, in its highest sense, courage is a truly religious spirit. It allies itself with what God approves, bows with reverence to His will, and brings all its trophies to His feet. It is a proper and legitimate addition and outgrowth of Christian faith.

That there is need of men who are controlled by such an influence is hardly subject for debate. There is not a department of life in which they would not shine. There is not a path of public or private usefulness in which their example would not be occasion for joy, as they should cause it to echo with their songs as well as their footsteps of progress. Truth calls for such defenders, as she is abused and dishonored in the presence of those who have not the courage to espouse her cause. Right fails to wield the power it should ever possess, because it cannot summon to its support such allies as will not turn pale when wrong shouts defiance and threatens to conquer. Virtue tearfully pleads for those to be her friends who will be no cowards when vice makes its assaults with banners flying and a host of devotees. Religion makes earnest demand for those who shall dare to represent it as it is, and never be unable or ashamed to bear its panoply and use it when they may. Everywhere there is a call for men of courage, and all really valuable interests will make advance that is now rarely witnessed, when they are borne forward by those whose heroism and devotion shall prepare them for the service.

UNIVERSALISM SEVENTY YEARS AGO.

About seventy years ago Universalism began to be known in this country as a distinct and publicly avowed sentiment. Its first advocates, whose writings were recognized as standards of the doctrine, were Murray, Winchester, Chauncey, and Huntington. The sentiments held by these men are not those which are held by this sect now. It may be instructive, just at this time, to see the *thin* edge of the wedge which these early advocates and founders of Universalism sought to drive into the opinions of the Christian world. They all professed to believe in the cardinal doctrines of the Gospel — that salvation was based on the atonement of Christ, whom they regarded, with the Father and Holy Spirit, as the one only God, or as God Himself. They believed, firmly, in future punishment — teaching in the tersest language, that the misery of unbelievers in the future world would be unspeakably dreadful and of long continuance. Dr. Chauncey says that "they will be tormented for aions of aions, or for ages of ages." "It is fully and freely acknowledged that *many* of the sons and daughters of Adam will pass through a state of unutterable misery before they will be prepared for and admitted to the joys of God's presence in the heavenly world. Would to God it might be realized as an undoubted truth that there is the same reason from Scripture to believe there is a hell as a heaven; and those who are infidels as to the former would do well to take care lest they should know from their own experience the horrors of that dreadful place."

These men insisted, over and over again, that their opinion was not only in harmony with Scripture teachings, but with the whole Calvinistic system of theology to which they firmly held. They were apparently very sincere and pious. They demanded regeneration, a religious experience, faith in Christ, and a true Christian life. They simply wished, as they said, to put out of the way, as opposed to the Fatherhood and law of God, the endless punishment of the wicked. This they proposed, in their arguments, to do in one of these two ways — by annihilation, or by some special work which Christ would do for the lost in the future state.

Dr. Chauncey, in support of the former view, says: "The wicked are sent to hell *as so many incurables*. The second death ought to be considered as that which will put an end to their existence, both in body and soul, so as that they shall be no more in the creation of God."

Winchester supports the latter view in a poem on *the end of the Mediatorial Kingdom*. In this he represents Christ as on a "mission to the spirits in prison." There He makes to these spirits such a revelation of His law — as they never did or never would see while on earth — that they repent, believe, and, as a consequence, are saved.

These two ideas, as presented by these apostles of the new light which dawned upon the human mind seventy years ago, were the points from which these men started. They are the points from which many another since has started. But they do not stay *here*. The advocacy of this error brings other errors with it. Truth is held in unrighteousness. When the Bible doctrine of the endless punishment of the wicked is given up, or not used as that weighty motive which God Himself uses to arouse sinners and led them to seek His pardoning grace, all the other

Bible motives for a prayerful and godly life will be given up also. Cowper long ago gave us the philosophical result of this attempt to reconcile God's plain truth to one's *"feelings:"*

"The breach, though small at first, soon opening wide,
In rushes folly, with a full moontide.
Then welcome errors of whatever size
To justify it by a thousand lies." K.

ANNOTATIONS.

IX.

OF THE CHRISTIAN TYPE.

The Bible by operating upon the spiritual element in man has developed a peculiar type of character, loftier, and sweeter, and purer than was ever known until the coming of the new dispensation, a type illustrated in those Christian men and women in whom good natural qualities and generous culture are united with profound religious convictions, and a strong devotional spirit. There have been high-souled heathens, wise, patriotic, eminent for much natural goodness, and leading lives more blameless than the majority of Christians. There have been noble barbarians, brave, frank, ferocious, but not without a certain honor and good faith, even in their ferocity. But no condition of society, no system of philosophy or religion, has ever produced anything at all comparable to the highest types of Christian men and women. It is common to reproach religion itself with the shortcomings of the weaker brethren, as if Christianity ought to produce the same effect upon character in all cases, without regard to the original material it has to work upon, making the coward brave, and the mean man magnanimous by some instantaneous process. It pretends to do nothing of the kind. Even after a man has experienced the power of religion, his old character remains. It is the aim and purpose — the *heart* that is changed; the *character*, the slow formation of years, must be gradually elevated, strengthened, and moulded under the new influences to which it is subjected into a new and nobler form. The moment a man of mature age undergoes the great change which, in the language of religion, is called "conversion," he enters upon a struggle with old habits, old associations, old ideas, with the entanglements that spring from a life without God; with the temptations and defects peculiar to the natural temperament and characteristics of the individual. It is both useless and unwise to deny that this conflict must generally be a severe and wearisome one, full of discouragements and apparent defeats. The man of the world contemplating the spectacle of some weak or ignorant (though genuine) convert, struggling manfully to walk in his Master's footsteps, is often astonished and repelled because a patent miracle is not performed before his eyes — eyes that are blind to the real miracle that has changed the whole aim, and purpose, and aspiration of a life — that has given a *new direction* to a career that is to go on through all eternity; that has *initiated* a movement in a new direction, the end of which cannot be discerned by worldly eyes in its beginnings.

USE OF FOREIGN TROOPS.

Thirty-five thousand British troops are now among the mountains of Abyssinia — a region never penetrated before by the armies of a civilized nation. Most of this army are natives of Asia, and never saw, and never will see, that snug little island that is known as Great Britain. Now, as in former times, the British fight their foreign battles by the hands of foreigners. At the Boyne, at Steinkirk, at Blenheim, at Saratoga, and at Waterloo, as well as in many other battles, there were more foreigners than Britons under British commanders. But for the Hessians and other foreign mercenaries she brought over ninety years ago, Great Britain could have maintained no army in the American Colonies after 1777. Even in her civil wars, England has availed herself of the services of foreigners; and twice at least she has had dynasties placed on her throne by foreign armies. Once when the Earl of Richmond landed in Wales with 5,000 Frenchmen and marched to Bosworth Field, and there finding a crown in a hawthorn bush, founded the Tudor dynasty, which afterwards overthrew Catholicism in Great Britain. The second time was in 1668, when William of Orange led 15,000 foreign troops into England, and sent his father-in-law a fugitive to France.

The Abyssinian war is just now a perplexity to the present British Ministry, whose situation is at best on a rather uncertain foundation. Yet, now that the army has reached the confines of that rudely barbarous government, we hope it will be so far successful as to revolutionize the existing state of society, and introduce among the Abyssinians a higher intelligence and more humane customs.

Oakland Academy.

A CLASSICAL, ENGLISH, & MILITARY BOARDING SCHOOL.

REV. DAVID McCLURE, PRINCIPAL.

The Seventh Term of this Institution will commence on Wednesday, January 22d, 1868, in the new Academy building, recently erected on Telegraph Road, one mile from the Railroad Depot.
The location and plan of this new building have been made with the design of securing for the students a home of beauty and refinement.
Careful provision is made for thorough and extensive courses of study in English, Mathematics, Natural Science, and the Ancient and Modern Languages. A special course is also provided for those who are preparing for a commercial life.
In addition to these courses there is a daily military inspection and drill, together with vocal and light gymnastic exercises, under the instruction of a teacher. Every student is required to attend the military and gymnastic exercises, as a means of physical training.
For the mental, moral, and physical culture of each pupil committed to his care, the Principal holds himself responsible.
Further particulars may be obtained by addressing the Principal, at Oakland.

Correspondence.

Letter from Georgia.

Macon, March 20, 1868.

Reaching Savannah the last day of winter, I tarried but two days, and reached here nearly three weeks ago. Macon, next after Augusta, the largest interior town of Georgia, is one hundred and ninety-two miles from Savannah. It is a ride of nine hours over a level country, sparsely settled, and of a thin, barren soil. The first object that strikes the attention of the traveler is the occasional sight of an alligator, as he splashes away from the sudden approach of the cars. They are a hideous animal — the most loathsome of all quadrupeds. In size they are smaller than those of South Florida, are cowardly, and dangerous only to calves, pigs, and ducks. The first part of the route is through a pine and cedar region, the last through one of oak and hickory.

Although the appearance of a Southern pine forest is monotonous, it is not repulsive or forbidding. The trees are tall and erect, without a branch, save at the top. There is no brush or underwood, for the fire annually sweeps over the ground and removes the rubbish. You may drive anywhere with a buggy, and on horseback may dash off at your pleasure in pursuit of the deer. For many purposes the pine of this section furnishes a most durable and useful lumber, and will some day be a large source of profit.

Once in a while, in crossing a creek, you meet with the magnolia, the most magnificent of southern trees. It is found only in a rich, moist soil. Its trunk is tall and free from limbs. The leaves are dark and of a deep glossy green. Its blossoms, which appear the first of June, are oval like the water lily, white, and often eight or ten inches in diameter. They scatter a rich fragrance through the unbroken forest. Like the wild, southern eagle, which a century ago made its hiding-place among its branches, it is rarely domesticated.

Macon has a population of twelve thousand. Two hundred thousand bales of cotton formerly were annually brought to this place from the surrounding region. The culture of cotton was, prior to the rebellion, well nigh the sole occupation of the planters of middle Georgia. It was their surest and speediest method of making money, and had the advantage of being always a cash article. In order to secure the largest crop possible, it was for a long time the policy of the planter to sow but little grain, and plant but comparatively few acres of corn. His bacon, the leading article of meat among the slaves, was brought from Kentucky and Ohio. His mules, cattle, horses, and much of his flour were brought from Tennessee. The neglect to raise their own stock and provisions has been a serious drawback to the prosperity of the Gulf States, and in the late rebellion was the leading cause of their overthrow. It is very doubtful if Sherman could have made his grand march through this State, brave and strategic as he is, if Georgia had had within herself ample stores of subsistence — and especially if, added to these, she had possessed the foundries, furnaces, and rifle factories of Massachusetts.

PRESENT STATUS OF THE SOUTH.

The political leaders at the South ten years ago, were reputed to be the most sagacious of statesmen. They certainly had been most successful, for they had controlled the action and policy of the general government nearly all the time since its organization. Even the election of Mr. Lincoln, an event intentionally brought about by themselves, might have been turned to political advantage; for they well knew that there were domestic and other influences by which they might to a considerable extent have given tone to his policy. But in 1860–61 these men showed themselves the most stupid of blunderers. Jeff. Davis was bent on rule or ruin. The stupendous egotism of the man and his flatterers led them to believe that they were sure of triumph. They have learned a lesson since then.

It was a sad misfortune that reconstruction could not have been immediately carried out at the close of the war. The rank and file were ready for an adjustment on any rational basis. The unsettled and uncertain state of things since then has been most disastrous to both the white and black population. Georgia, once the richest and most enterprising of the Southern States, is now utterly bankrupt.

All her industrial interests are paralyzed. Her people are not only poverty-stricken, but many of them are actually suffering. Lands which in 1865 would sell for $14 per acre, now want a purchaser a $5. The more energetic of her young men are casting about for new homes — some of them leaving for California. Your State in climate and locality is regarded in a more favorable point of view than any other part of the Union. Had they the means for removal, there are thousands of families who would be seeking the Pacific coast.

Kearsarge.

Letter from Del Norte County.

Crescent City, April 10, 1868.

This remote northwestern section of California abounds with rough mountains, and a few narrow valleys which have a very limited range of tillable soil. Del Norte County has a white population of nine hundred — about the same it had ten years ago. Of these, one-half live at Crescent City, and two-thirds of the other half in Smith River Valley, twelve miles to the north. Crescent City is the landing-place for goods to a portion of Southern Oregon, including Josephine, Curry, and Jackson counties. Few towns have a more pleasant climate and location. The harbor, however, is shallow, safe in summer, but very dangerous in winter. The copper mines discovered several years ago eighteen miles inland, were at first thought to be valuable, but have not proved so. One of them, the *Alta*, was sold to Boston capitalists in 1865, who began to work the lode soon after, but have now quit. The cost of drawing the ore over a terrific mountain road to this town, and freighting it to Boston, made the enterprise unprofitable.

Neither mining or farming are likely to add much to the size of the town. Aside from the narrow valley of Smith River, there are hardly a hundred acres in the county of tillable land. Its best reliance is the vast growth of timber, which reaches to within two miles of the town. Such a noble forest as that which includes a hundred square miles of unbroken redwood forest trees, in the western part of this county, is not to be found elsewhere. They are from two hundred and fifty to three hundred feet in height, have a diameter of from three to fifteen feet, and are free from limbs until within a short distance of the top. It will require capital to make this growth of timber available; but it furnishes such ample material for shingles, clapboards, and clear lumber that before many years it will be sought after.

The view from this town down the coast extends on a clear day to Trinidad Point, fifty miles belo Just under this point lies the snug little harbor Trinidad — small, but safe — and around it a about thirty cottages, now nearly all unoccupie Trinidad was the landing-place of the pilgrims wh when the Gold Bluff excitement broke out in 185 hurried in crowds up the coast in the expectation acquiring sudden wealth. A traveler coming dow the coast one fine morning, at low tide, discovered belt of golden sand. Dismounting, he filled his sa dle-bags and blanket, and hurried down to Humbol Bay to announce the discovery. The first mini *hegira* on this coast followed. At one time the were three thousand adventurers at Trinidad a in the vicinity, a large town was laid out, corner l sold, a theatre and race-course projected, and mat rials for a daily paper ordered. With the collap of the Gold Bluff excitement the crowd disappear but the discovery of rich placers on the Trinity a Salmon rivers made Trinidad a brisk little tradi post. In four years these placers were exhauste the Indians became annoying and dangerous, a Trinidad for some years past has been well ni depopulated. The last time I was there its popul tion numbered eleven lumbermen, four half-bre Indians, and one married woman. In justice to t lady I will add that she possessed a scolding capaci ample enough for the whole town, were it dense peopled.

Just below Trinidad lies Humboldt Bay, on whi are located Eureka and Arcata — the former growing business town — the latter delightfully cated on an elevation overlooking the quiet inla waters. The Presbyterian church at Arcata is u der the care of Rev. J. S. Todd, a young man whom his present congregation speak in high ter of commendation.

Eureka is becoming noted for the manufacture lumber — more being sent to San Francisco fr that town than from any other point in the Sta

Below Eureka are Mattole and Eel River valle The former was the scene of the petroleum, or " excitement" of 1865. The speculation — for su it was — collapsed suddenly.

Eel River Valley, however, has the elements a substantial growth and genuine prosperity. T land is unsurpassed in productive capacity, the c mate is finely tempered and healthy, and the lan are being occupied by a class of industrious and telligent farmers. Good schools are established, a already a Congregational and a Methodist chur have been organized — the former under the char of Rev. C. H. Pope, and the latter under that Rev. Mr. May. The upper part of the vall abounds with the finest forests, and when the p jected railroad to Humboldt Bay shall be built, t valley of the Eel River will be one of the most d sirable sections on the Pacific coast. Victor.

Letter from Southern California.

Los Angeles, April 9th, 1868.

After a ride of ten days on horseback from Mo terey, I reached here last Monday. This would regarded in the Eastern States as making good tim since the distance is nearly four hundred mil Here, however, it is looked upon as moderate trav ing. It is the most favorable season for making t trip by land, as there was no annoyance from eith dust or heat, and only one interruption by rain.

Los Angeles, is in a scenographic point of vie the most attractive, charming inland town I ha seen in California. It is nearly ninety years sin it was founded, and twenty since it was captur

from the Mexicans. It then had 2,000 inhabitants. During the era of placer diggings, the town remained stationary, but for six years past has grown rapidly. It now has a population of 6,500. The location is delightful along the banks of the erratic Los Angeles River, and under cover of the San Fernando Mountains. On the northwest side of the town is a summit one hundred feet high, from whence one can get a bird's eye view of the valley. There are about 6,000 acres around the town covered with orchards and gardens exclusively, and just at this time clothed with "living green."

One feature which at once attracts the notice of the visitor, is the *Zanjas*, or Canals filled with water taken from the river five miles above, and without which, the gardening would be a failure. Then, the fences consist of willow trees, planted from ten inches to two feet apart, and which in addition to their value as forming secure inclosures, in summer add greatly to the comfort and beauty of the town.

This neighborhood is the great grape raising section of the State. In truth, there is no spot on the Continent which equals it in the production of this fruit. There is also an abundance of the peach, pear, plum, pomegranate, olive, orange and lemon. Los Angeles County is the paradise of lovers of fruit. Half of the population are Mexicans; but many Americans are now settling, not merely in the town, but in even the most remote valleys of the County. I visited yesterday, the cottage home of a Marylander, who came here in 1860. Having less than two hundred dollars, he worked as a day laborer for two years, and six years ago bought the romantic little nook where he now resides, eleven miles north of the town. Since then he has surrounded his house with shrubbery; has a fine young orchard; fountains playing in his yard, and cattle, horses and sheep on the adjacent hills. I must not omit what is most important in his schedule of possessions, the mention of his excellent wife and two children. I am strongly inclined to agree with his statement when he says that with a limited amount of capital, a man can, in the rural districts of this County, surround himself with a greater number of comforts and luxuries than in any other part of the world.

Still, there are some marked deprivations in such a life. There are no school or church privileges, except in Los Angeles itself. The Roman Catholic influence predominates; most of the American and European families have no fixed religious opinions, and the prevailing habits of the population are loose and irregular.

Yet a better period is dawning, and emigration will bring with it improved schools, and more refined customs. A Congregational church is about completed, and to be occupied. The next twenty years will see a great improvement in this part of our State.

G.

CONTRIBUTIONS.

How Shall the Sermon be made more Interesting?

A very worthy minister belonging to our denomination told an excellent anecdote in the hearing of myself and several others, not many years since, which made quite an impression upon both the intelligence and risibilities of the company. The story was about an old woman who, coming from church one bright Sabbath day, exclaimed,

"What an excellent sermon we had to-day! Never heard such a sermon before in my life!"

On being asked what the subject and text were, she could give no information, but finished her eulogium by saying,

"How beautifully he pronounced that word Mesopotamia!"

Not long since your correspondent catechised a very intelligent lady on her return from church in a similar manner, and secured only a similar amount of information respecting what she had heard.

Now, this anecdote and fact serve to suggest the point that we wish to discuss in this hasty contribution. Instead of casting the blame upon the old lady for pronouncing such a ridiculous, unmeaning eulogy, we feel that she was comparatively guiltless, and place the blame — where it ought to be — upon the ignorance of the sermonizer. "Like people, like priest," is a phrase of deep significance. Our people wander home from our churches without being benefited with false notions or no notions at all, of the sermon, because it has failed to be what it ought always to be — an intelligently impressive discourse.

The history of the church comes to our support. During the early centuries what was it that gave such vigor of intellect, such comprehensiveness of views, such devoted piety to the followers of the Savior — a piety whose faith failed not amid the flames of persecution, and which has placed upon the brows of uncounted thousands around the throne of God the sparkling crowns of martyrdom? Mainly the fact that the early church had her pulpits adorned not only by a pious but an intelligent ministry. Go to the land of John Knox and a host of other noble defenders of the faith of Jesus; examine the history of the cantons of Switzerland; look at our own country fifty or sixty years ago, when the judges and great men of the nation were among the most devoted sons of the Church, and you will find in each case that the pulpits of the land rose like so many towers of strength and intelligence, to which infidelity, as well as the piety of God's children, was attracted. Seek for the glory of the Protestant Church at this time in all the large cities of Christendom, and you will find it chiefly in the vigorous, sanctified intelligence of the men who stand up to preach the Gospel to audiences that have become interested and well informed and capable of judging of the merits of a sermon, because it is all glowing with thought as well as piety.

Now, the minister's desire and purpose to do good, and his devotion to his calling being assumed, there is no need of further proof that he must make his sermons thoroughly intelligent if he would have them interesting to the people. We do not plead for that intelligence which, though sparkling like the north star, remains as cold as the region over which that luminary sheds its beams. It is the intelligence of him whose whole heart is under the warming, sanctifying influence of the Holy Ghost that should abound in all our pulpit performances. And we plead for this because of the immense power of the pulpit. Where ignorance has prevailed among the clergy — as in the days of Queen Elizabeth — or profligacy — as in the times of Archbishop Laud—the masses of the people have become ignorant and profligate. And certainly if, in the ages gone by, there was need that sermons be both instructive and spiritual, there is special need of such sermons now. As our material globe has been casting off its primeval chaos, putting on the various forms of beauty, and, as some scientific men tell us, is marching on until it shall be adorned with all the grandeur of the new heavens and the new earth, so is there evidence that the average intelligence of the race is on the advance. Men are waking up from the sleep of ages. They are planning out systems of education and philosophy. They are examining the foundations of the Christian faith and trying the great doctrines of Holy Writ by the severest tests — orthodox and heterodox. Scientific investigators are putting forth all their efforts, on the one hand to build up, on the other to destroy, the edifice of truth. Surely if the time ever was when the ministrations of the pulpit should glow with the radiance of a superior intelligence, that time is upon us now. Let the sermon, then, be philosophical, surcharged with important thought, logical, archæological, argumentative, poetical, oratorical, full of an unction conveyed by the Holy One, and manly in all its vindications of truth, as the time, the occasion, and the subject may dictate. Let the eyes of the minister be open to the great meaning of his text and the magnitude of his work. By this means the pulpit will continue to be without a rival in point of power and spiritual influence; infidelity will hide its head; ignorance be banished from our congregations, God honored and souls saved from death.

M. A.

Bloomfield, March 20th, 1868.

The American Sunday School Union.

Having commenced the Sunday School Missionary work on the Pacific Coast, we are ready to aid in organizing Sunday Schools and aid existing needy Schools.

We have just received a fine and large assortment of the publications of the Society, which we supply to Schools at reasonable rates. We also supply the periodicals of the American Sunday School Union. The

Current Literature.

RECENT PUBLICATIONS.

FEMALE SOCIETY AT WASHINGTON. By James Elwell. Boston: Henry Lewis & Co. Pamphlet Edition.

This little work, made up of a series of letters from the Capital to a Boston daily, is a readable little pamphlet of sixty pages. We only allude to it by way of introducing a very brief sketch of the matrons who have presided at the White House.

It is a matter of historical congratulation that whatever may be said of the Presidents, no woman has ever occupied the Presidential mansion against whom even partisan bitterness has breathed any reproach. The wife of General Washington was at the head of the "Republican Court," as it was called, and she was at home in her station, which was then much more aristocratic than it has been in this century. John Adams' wife, if not so graceful a lady as Mrs. Washington — "Lady Washington," as the snobs of that departed day would call her — was a woman of sense and intelligence. Mr. Jefferson is charged with having vulgarized Republicanism by the course he adopted. He put an end to the "Republican Court," and made everything around him hard as boxwood, and, his opponents would have said, as ungainly as himself. The reason of his conduct, it was whispered, was the consciousness of his own deficiencies in the graces. But Mr. Jefferson was by birth, by education, by station, and by experience, a gentleman. Few Americans, even of the highest social position and the longest tenure of office, had better opportunities to become acquainted with "high life" than he. He was Minister to France in the very last days of the old monarchy, and lived in the center of the most polished society that the world had seen — "a civilization that was rotten at the core, though most glorious in the complexion." The only effect of this, and of what he law in other parts of Europe, was to make Mr. Jefferson more democratic than ever; and the simplicity — his enemies said the coarseness — of his Presidential life was owing to his dislike of everything that resembled the display of European Courts. He was a widower, which made the change from the Washingtonian mode the easier.

Mr. Madison succeeded Mr. Jefferson, and had a wife who adorned her station, and whose fame is fixed as an accomplished woman. Mr. Monroe was, we believe, a widower. Mrs. J. Q. Adams was a sensible, matter-of-fact woman. Gen. Jackson was a widower, and so was Mr. Van Buren. President Harrison was in office but a month, and his wife had not an opportunity to restore feminine social rule. He was succeeded by Mr. Tyler who was a widower, but who took a second wife toward the close of his term. Mr. Polk's wife had the reputation of unusual fitness for her place, and during her time there was an atmosphere of social ease and enjoyment which has been unknown since at the Presidential mansion.

President Taylor was married, but Mrs. Taylor took no part in social life during her brief stay at Washington. Mrs. Fillmore was a quiet woman and an invalid. Mrs. Pierce was a most exemplary and amiable woman, and lived mostly retired. Mr. Buchanan was and is a bachelor, and the only bachelor that ever was President — and it is observable that he carried his hostility to marriage so far as to help the rebels to dissolve the Union, a species of divorce on the largest possible scale. We think no bachelor should be President, as he gives no "hostages to fortune," and had Mr. Buchanan been a husband and father, he would not have allowed the secessionists to have their way, and to make so many widows and orphans. The wife of Mr. Lincoln had less of character and reputation than any of his predecessors. The wife of Mr. Johnson is said to be a woman of worth, but has been in ill health for several years. None of the Presidents have taken large families to the White House, and Presidents Washington, Madison, Jackson, and Polk were childless.

RECORDS OF NOBLE LIVES. By W. H. Davenport Adams. London: T. Nelson & Sons. San Francisco: H. H. Bancroft & Co.

The author has given a short and very interesting biography in this book of some of the most worthy men England has produced. The selection was made with a desire to illustrate noble traits of character, and noble deeds in life, as these may be viewed in the various positions which eminent men may occupy, and its general effect on the reader is inspiring and elevating, while each record is a careful and just tribute to its subject.

Sir Philip Sidney, as the brilliant Christian gentleman, Sir Francis Bacon, as the profound philosopher and statesman, Robert Blake, as the ever true patriot on the land and on the sea, William Penn, as the distinguished philanthropist, are representative men, whose history may be studied with profit by all, and the lessons the author draws from the record of them he has given are practical as well as beautiful. We can gain the best idea of what he designed the book should be from his own statement respecting the value of biography which we find in his notice of Penn.

"The value of biography consists of the examples which it affords of men who have become great and good by their devotion to truth and beauty, and the warnings it inculcates by painting the careers of the vicious, the unstable, and the profligate. The errors of a great man, as well as his virtues, may be turned to advantage by thoughtful observers, who will also find in the nobility of his character a splendid incentive to excellence, and will derive from it a constant inspiration. Goethe was wont to remark that it was good for every man to see once a day a fine statue, or to hear a sweet strain of music, or to read a wise book, but it is even better that each one of us should always keep before him the examples of men who have deserved well of their fellows, and from whose lives he may learn the most advantageous lessons. It is difficult, I think, to gaze upon a noble picture without wishing one were a great painter, or to listen to a grand lyric without feeling how admirable a thing it is to be a good poet. And so the perusal of the biography of a wise, just, and generous man has a tendency, I believe, to make the reader in love with wisdom, justice, and generosity. Infinite is the value of biography; it teaches so much, and teaches so plainly. Sum up all that may be gained from a study of the lives chronicled in these pages, and see what a wealth of wisdom and experience it represents! It is of such men that Wilson finely says: 'Their glories shine far beyond the limits of their daily walk in life; their odors are wafted across the boundaries of unfriendly societies; their spiritual seed is borne away, and takes root, and bears manifold fruit, in fields far distant from the gardens of the Lord where they were planted.'"

EDUCATIONAL.

Prematureness.

At the age of fourteen William Pitt had written a tragedy. This is still preserved, and it displays the maturity of his tastes, if not of his understanding. It is so unyouthful that it contains no love. The whole plot is political. Pitt died in his forty-seventh year of over-work and over-anxiety, as First Lord of the Treasury. Similar is the record of a modern philosopher. At the age of nine, having been permitted to witness a military muster, he was asked what he had seen to interest him. His answer revealed the fact that he had forgotten the soldiers, while taking part with two old men whom he had found debating on election and free-will. The man afterward became, in succession, a Presbyterian, a Universalist, a Unitarian, and the attempting founder of a new sect altogether; but has finally entered the Church of Rome, and is now a zealous advocate of tradition. From cases such as these, one conclusion, at least, seems to arise almost spontaneously, to wit: it is not an unpromising circumstance if we discover in boys a certain amount of boyishness. Paul, surely, had a great intellect; but he, when he was a child, spake as a child. The mind prematurely occupied with serious things, is apt to grow up without a relish for restful pleasures, and so tend to over-work — as in the case of Pitt; or, having no relish for legitimate recreation, and yet craving variety in some form, it tends to find it in the follies, extremes, and changes of opinion — as in the case of Brownson. C. R. C.

Pictures.

A young lady taking a ride upon the Bay, came in sight of the Receiving Ship. She at once remarked its resemblance to the *Jersey* prison-ship of the Revolution. The circumstance revealed the fact that the illustrations of her school history had been carefully observed and memorized, and had not passed before her eyes as so much mere typographical ornamentation. And this is as it should be. The illustrations of the text-book should not be disregarded, for they are both a means of strengthening the scenic memory, and of impressing valuable knowledge. But neither should they be passed over too cursorily. Photographing takes time, whether upon the sensitized paper or upon the tablet of memory. A well-filled mental gallery is too good a thing to be secured without deliberate and energetic effort. As Pycroft says in his *Course of Reading*, "*Nihil sine labore* is true even of looking at pictures. Unless we read and reflect on the scenes we contemplate, and are contented to look only at a few at one time, we shall soon perceive that we have become more confused than informed." C. R. C.

One Hundred Years Ago.

The world a century ago was in many particulars a different world from what it now is. There were no steamers traversing rivers, and crossing the wide ocean; no railways carrying their crowded trains halfway across a continent in three-score hours; no telegraphic wires sending messages with lightning speed around the world; no lucifer match had superseded the use of flint and tinder; no photographist had learned to portray the family group, or picture the landscape as truthfully as life itself; "oil on the brain" was a disease unknown among the maladies, and the tallow candle had not given place to the gilded astral.

One hundred years ago and this nation of thirty-seven States consisted of a few scattered, dependent English colonies, scarcely named or known in the civilized world. Washington was a rustic landholder on the banks of the Potomac, Jefferson an obscure lawyer, and Franklin a busy type-setter.

One hundred years ago there was not an independent government on the western continent — the Pacific slope was an unbroken wilderness, and on the soil of California no white man, not even the Spanish Jesuit, or Mexican pioneer, had built his cabin. This little nook of land where now stands the city of San Francisco, was a lonely, wild landscape, verdant in spring, brown and barren in au

tumn. Elk abounded on the adjacent lowlands, and deer skipped on the eastern mountains. The Indian, undisturbed, paddled his canoe on the waters of the Bay, kindled his fires on the sand-hills, and enjoyed the few scanty comforts of savage life.

One hundred years ago boys were content to be *boys* till they were men grown. No boy, then, thought it dignified and manly to chew and smoke tobacco, drink whisky, and tell dirty stories. Young America was not then born. Girls of fifteen were not ashamed to be found washing the dishes, sweeping the room, or cooking the dinner.

In some respects mankind have not improved since 1768, but in the aggregate, I think I like to live in the world of to-day, better than in that of "One Hundred Years Ago." ALICE.

On the Ferry.

On the ferry, sailing over
To the city, lying dim
In the mellow mist of evening
By the river's further rim!
On the ferry, gazing outward
To the ocean calm and cold;
Where the blue bay dips its waters
In the sunset's fleeting gold.

On the ferry, gazing outward,
O thou ocean deep and wide,
Every pulse is beating measure
With the rythm of thy tide!
Loving waves kiss warm and eager;
Motionless the great ship stands,
While above each pendulous pennon,
Lures me with a beckoning hand.
Calm on the uneasy waters
Lean the sunset bars of flame,
Like the legendary ladder
On which angels went and came.

In another summer evening,
On a little way before,
I shall reach another ferry,
Seeking swift a dimmer shore.
I shall cross a wider ferry,
Crossing to return no more,
Sailing for a fairer city,
Waiting on a lovelier shore.

Life may touch the soul so gently,
We can hardly call it rough;
Yet we'll all say in its closing
Our brief day's been long enough.
Thus I stand with gathered garment,
Ere the deeper shadows fall;
O my heart, drop thy last idol,
Listening for the boatman's call.
Come! and by my spirit's sinking,
By my shrinking fears untold,
Bear me gently o'er these waters,
Charon, boatman, calm and cold.

Olden Time Spelling Schools.

The northern part of Ohio was, in some localities, settled at quite an early day. Forty years ago our township had become quite populous and thrifty, and there came into it a down-easter, an industrious and well-informed man. I can recall the benevolent, yet sad expression of his face, for it was said that he had met with bereavements before coming to the west. He was a carpenter, and straightforward and systematic in his habits. The neighborhood became quite attached to him, and he was employed to teach our winter school. Working at his trade in summer, he continued our instructor in the winter for several years. We did not grow tired of him, and he did not appear to get weary of us. We were probably not mistaken in thinking that he took an interest and a laudable pride in our improvement, for he was painstaking and laborious in his instructions.

In those days there were few public amusements in that farming region. The era of negro minstrels, panoramas, and miscellaneous lecturing had not dawned — at least upon that retired locality. The recreation most enjoyed, and in my recollection the most memorable, was the winter spelling-schools. These occurred on every Wednesday night of the winter term, when there was clear weather. It is pleasant to recall one of those long winter evenings when the boys and girls gathered at the old-fashioned school-house.

The afternoon school had closed, and the teacher had appointed a stout boy to see that the fire-place was kept full of blazing wood. Just after dark, as the bright moon came up, a dozen sleighs and cutters came up loaded with living freight. After these came a huge double sleigh with an abundance of hay, and at least half a score of small specimens of humanity, picked up from a half dozen houses, and all as merry as kittens. And the bright eyes and cherry lips that one caught a glimpse of under the warm buffalo robes —— ah! who shall forget them?

The school-house destined to be the scene of the conflict has been swept and garnished. Pellets of chewed paper have all been swept from the ceiling, and two pails of water — a wise provision for the warm room — are placed on the bench in the entry. The boys have fed the fire till the old chimney fairly roars. Amid the bustle, down comes the ferule of the teacher on the desk. What the roll of the drum is to armies, this "rule" is to this whispering, laughing young company. The challengers take their place on one side of the house, the challenged are arrayed on the other. Back seats, middle seats, low front seats, are all filled. Some of the fathers and grandfathers have come in as spectators, and occupy the bench of honor near the desk. Now come the preliminaries. The reported best speller on each side chooses. They begin:

"*Susan Brown!*" Out comes a little round-eyed creature, blushing like a rose. Such a *little* thing, and chosen first!

"*Moses Jones!*" Out comes Moses — an awkward fellow with a terrible shock of red hair surmounting his broad brow. The girls laugh at him, but what he doesn't know about the "elementaries" isn't worth knowing.

"*Jane Murray!*" Out trips Jane, fluttered as a bride, and takes her place next to the caller. She is a pretty girl, but a sorry speller. Don't you hear the whisper around the house: "Why, that is John's sweetheart!" John is the leader, and a battle lost with Jane by his side would be sweeter than a victory won without her.

And so they go on calling names until the opposite benches are empty, and the contest begins. Down goes one after another, as words of three syllables are followed by those of four, and then come the tough, knotty words picked out of Webster's Unabridged. Forty minutes pass away, until at last Moses and Susan remain alone.

The Dictionary is well nigh exhausted, and yet there they stand. By and by the village doctor gives out a thundering word, and Moses comes down like a tree — and Susan flutters there still, like a little leaf aloft, that the forest and the fall have forgotten. By and by she hesitates a breath or two — and fails. Little Susan sinks into the chink left for her on the crowded seat, and there is a lull in the battle.

Other exercises follow — but they are brief. The main battle has been fought. Then comes the hurrying, and bounding, and whispering, and glancing — the pairing off and jumping in. There are hearts that flutter — mittens that cannot be worn — hopes that are not realized — looks that are not fondly returned. There is a jingling of bells at the door. One after another the teams drive up and receive their nestling freight and are gone. The teacher covers the fire and pinches the smoking wicks between his thumb and fore-finger. We wait for him. The bells ring faintly in the far-off wood. They are gone. The school-room is dark and tenantless, and we are alone with the night! Merry, care-free company! Many a year has since gone by. Some of them are sorrowing. Some are dead — and all, we fear, have changed. Spell! Ah! the *spell* that has come over that crowd of young dreamers — over you — over me — over all of us!

Irritable Christians.

There is too much truth in the following, from the *Religious Magazine:*

There was a clergyman who often became quite vexed at finding his little grandchildren in his study. One day one of these little children was standing by his mother's side, and she was speaking to him of Heaven.

"Mamma," said he, "I don't want to go up to Heaven."

"Don't want to go to Heaven, my son!"

"No, mamma, I'm sure I don't."

"Why not, my son?"

"Why, grandpa will be there, won't he?"

"Why, yes, I hope he will."

"Well, as soon as he sees us, he will come scolding along, and say, '*Whew! whew! whew! what are these boys here for?*' I don't want to go to Heaven if grandpa is going to be there."

There is no doubt that many Christians bring a reproach on religion, and disgust the young with serious things, by the moroseness of their tempers, their perpetual fretting and fuming when anything goes not to suit them. The young are ready to say, if religion makes its possessors so unlovely, "I never want it." Cheerfulness, kindness, pleasant looks, and pleasant words are the fruits of grace. The religion of Christ is love, and though it does not instantly root out all the evil propensities of the human heart, it must gradually transform the natural character until the Christian reflects the image of Him from whose lips the language only of kindness fell.

Ivory Inexhaustible.

New Siberia and the Isle of Lakon are, for the most part, only an agglomeration of sand, ice, and elephants' teeth. At every tempest the sea casts ashore fresh heaps of mammoth tusks, and the inhabitants are able to drive a profitable trade in the fossil ivory thrown up by the waves. During the summer innumerable fishermen's barks direct their course to this isle of bones; and in winter, immense caravans take the same route, all the convoys, drawn by dogs, returning charged with the tusks of the mammoth, each weighing from one hundred and fifty to two hundred pounds.

The fossil ivory thus obtained from the frozen North is imported into China and Europe, where it is employed for the same purposes as the ordinary ivory, which is furnished as we know, by the elephant and hippopotamus of Africa and Asia. This isle of bones has served as a quarry of this valuable material for export to China for five hundred years. And it has been exported to Europe for upwards of one hundred years. But the supply from these strange mines remains undiminished. What an accumulated number of generations does not this profusion of bones and tusks imply!

Obstructions as Aiders.

Difficulties exist to be surmounted. The great heart will no more complain of the obstructions that make success hard, than of the iron walls of the gun which hinder the shot from scattering. It was walled round with iron tube for that purpose, to give it irresistible force in one direction. A strenuous soul hates cheap successes. It is the ardor of the assailant that makes the vigor of the defender. The great are not tender at being obscure, despised, insulted. Such only feel themselves in adverse fortune. Strong men like war, tempest, hard times, which search till they find resistance and bottom. They wish, as Pindar said, "to tread the floors of hell, with necessities hard as iron." Periodicity, reaction, are laws of mind as well as of matter. Bad kings and governors help us, if only they are bad enough. In England, it is the game laws which exasperate the farmers to carry the Reform Bill. 'Tis what we call plantation manners which drove peaceable, forgiving New England to emancipation without phrase. In the Rebellion, who were our best allies? Always the enemy.—*Emerson, in January Atlantic.*

Nature is sanative, refining, elevating. How cunningly she hides every wrinkle of her inconceivable antiquity under roses and violets, and morning dew! Every inch of the mountains is scarred by unimaginable convulsions, yet the new day is purple with the bloom of youth and love. Look out into the July night, and see the broad belt of silver flame which flashes up the half of heaven, fresh and delicate as the bonfires of the meadow-flies. Yet the power of numbers cannot compute its enormous age — lasting as space and time — embosomed in time and space. And what are they — time and space? Our first problems, which we ponder all our lives through, and leave where we found them; whose outrunning immensity, the old Greeks believed, astonished the Gods themselves; of whose dizzy heights all the worlds of God are a mere dot on the margin; impossible to deny, impossible to believe.—*Emerson.*

In our daily intercourse, we go with the crowd, lend ourselves to low fears and hopes, become the victims of our own arts and implements, and disuse our resort to the Divine oracle. It is only in the sleep of the soul that we help ourselves by so many ingenious crutches and machineries. What is the use of telegraphs? What of newspapers? To know in each social crisis how men feel in Kansas, in California, the truly wise man waits for no mails,

reads no telegrams. He asks his own heart. If they are made as he is, if they breathe the like air, eat of the same wheat, have wives and children, he knows that their joy or resentment rises to the same point as his own. The inviolate soul is in perpetual telegraphic communication with the Source of events, has early information, a private dispatch, which relieves him of the terror which presses on the rest of the community.—*Emerson in Atlantic.*

I was once walking a short distance behind a very handsomely dressed young girl, and thinking, as I looked at her beautiful clothes, "I wonder if she takes half as much pains with her heart as she does with her body."

A poor old man was coming up the walk with a loaded wheelbarrow, and just before he reached us, he made two attempts to go into the yard of a small house; but the gate was heavy, and would swing back before he could get through.

"Wait," said the young girl, springing lightly forward, "I'll hold the gate open."

And she held the gate until he passed in, and received his thanks with a pleasant smile as she went on.

"She deserves to have beautiful clothes," I thought, "for a beautiful spirit dwells in her breast."—*Little Corporal.*

THE YOUNG FOLKS.

Counsel to Boys.

RELIGION.

It is not my province to tell you which church or creed is superior to all others, nor yet to argue that all of them are equally good, nor that belief and unbelief are of no practical account. On this head I will only say, generally, that the good son of virtuous, intelligent parents will be very apt to abide in their faith and communion until he is quite sure that his understanding is mature, and his knowledge as to facts and principles at least equal to theirs. What I would wish to urge is this — that one essential, fundamental base of a noble career, in my view, is a firm, clear, living conviction that the universe is no accident — no casual product of fate, or chance, or the fortuitous concussion of atoms — but the creation of an omnipresent, omniscient, omnipotent Will.

No man is old enough, or wise enough, to solve all the problems presented to finite minds by what we see and know. If the universe has a Creator, must there not have been a time when it did not exist? If God made all things but Himself, must He not have previously existed alone? And must not Infinity have been enlarged by the subsequent calling of the material universe into being? Thus, question after question may be asked, to which no satisfactory answer can be given, and with reference to which we can only say, with Tennyson,

> "I sink upon the altar stairs,
> That slope through darkness up to God."

But, when we quit the dreary domain of speculation, all is simple, cheerful, certain. We are *not* the waifs of Chance, the slaves of Necessity. "Though we now see through a glass, darkly," we can yet see enough to render it certain that we are children of an infinitely powerful, wise, and good Parent — too wise and too loving to permit us to defy His laws with impunity. He must punish every aberration from the straight and narrow path of righteousness — that is, Rectitude. He would not be absolutely good, if He did not. To permit us to do wrong with impunity — to break His laws and secure thereby seeming personal advantage or gratification, at the expense of general injury — would be to resign His benignant scepter, and allow the world to drift helplessly toward Chaos and the unfathomable abyss.

The vital truth is tersely summed up by the Psalmist, in the statement, "The fool hath said in his heart, There is no God." That is the one great, fatal mistake, which covers our globe with misery and woe. But for this, there could be no libertine, no thief, no drunkard, no heinous transgressor. The conceit that God's justice may somehow be evaded, circumvented — that the pleasures of sin may be enjoyed, and its penalties somehow escaped — is a form of qualified Atheism, immensely more prevalent and more baleful than any other. It is the omnipresent prompter of greed and lust, and indolence, and knavery. Less palpably absurd than the notion that nothing originated everything, it is more widely cherished, more vastly injurious.

Let no one harbor a doubt of the universality, the inexorable, unavoidable certainty of Retribution! In spite of all deceiving appearances, we reap as we have sown, and receive as we have deserved. The succession of effect to cause is not always instant or obvious — appearances may often seem to ignore or defy it as plainly as the sun seems to revolve around the earth; but the truth is only obscured, never subverted. God reigns; that is the great, first truth. He does not merely contemplate and oversee; He designs, directs, and decrees, and is never disconcerted, nor disappointed. What to us are aberrations, defeats, disasters, are to Him, who foreseeth the end from the beginning, but steps toward the fulfillment of His transcendant, beneficent purposes of Universal Good.

Young friends, I do not intend to preach to you, and you will probably hear no more from me in this precise vein. But every plan of life and duty must find anchorage in some fundamental idea; and the one truth which seems to me most essential, is that which the fool's heart denied when he said, "There is no God."—*Horace Greeley in the Little Corporal.*

How to Get an Education.—Boys say often, "we want to get an education, but we are poor, and father is poor, and we can't get it; so we are going to learn a trade, or go into a store or do something else." Now let me say, every boy that wants an education, if he will bend his force to it he can get just as good a one as he wants. The way is open. Education does not come through academies and colleges and seminaries; these are helps, but it comes by study and reading, and comparing. All the schools, and colleges, and seminaries in the world, will not make a scholar of a man without these; and with them a man will be one if he never sees a college The same is true of girls, and what is true of this pursuit is true of any other. The force must be from yourself and you must develope it. It is that indomitable "I can" that sets a man astride in the world.

Babbittonian Pens.

One reason why the country is so flooded with poor Pens is, that they are generally made by mechanics, rather than by artistic and experienced Penmen, the only parties really understanding the requirements of a

GOOD ARTICLE.

THE BABBITTONIAN PENS, made in the most finished style, by skillful artisans, after models prepared according to the combined wisdom and experience of several amateurs and old Professors of Penmanship, are admirably adapted to meet the public wants.

I. THE BABBITTONIAN LADIES' PEN is one of the most exquisite little instruments, for delicate writing, ever constructed.

II. THE BABBITTONIAN EXTRA FINE PEN is pronounced, by a large number of elegant Penmen, to be more free, more durable, and more varied in capacity, for either fine or coarse strokes, than any foreign Pen whatever. Suitable for elegant writing, it is a great favorite with ladies and gentlemen.

III. THE BABBITTONIAN BUSINESS PEN, having great freedom and variety of movement, is unequalled for general business or school purposes. Somewhat coarser than the Extra Fine, it wears longer and moves more easily on paper.

Babbittonian Patent Penholder.

It is not only superior, but very much superior, to any now in use, possessing the following advantages:

1. It holds the pen outward from the stiff perpendicular, by a peculiar mechanism, causing it to glide more easily and smoothly on paper.
2. It has two scales of measurement—one of inches, and the other of decimal parts on the French Metrical System, which is being adapted over Europe, and which has already been sanctioned by the United States Congress.
3. It lets a pen in and out with the greatest ease.
4. It makes a good ruler for six or seven inches.
5. It receives pens for a long or short distance.
6. It will not clog up with ink and thus get rusty.
7. It is light and easily wielded by the fingers.
8. It is made of Steel, Japanned or Silver-plated.
9. It is made in one piece, firm, strong and durable.
10. It is never coming apart like a wooden holder.
11. It is not fragile, nor liable to bend like tin.
12. It is stylish in finish and beautiful in form.
13. It is self adjusting to pens of various sizes.
14. It is the most economical holder in the world.

Also, SCHOOL FURNITURE.

PACIFIC COAST ITEMS.

As farming, the mechanical trades, and manufacturing are not likely to give employment to the numerous emigrants now arriving on this coast, some of our cotemporaries advise the more robust of the new comers to seek the placer diggings of this State. The floods of the past winter have probably laid open much wealth in the old placer counties. These diggings are easily reached. Mining tools and provisions are cheap, and the favorable season is just beginning.

An "Old Oregonian" sends us an entertaining sketch of his first experience in that State, having reached there in 1845. There was no money in the country, and his first contract for work was the splitting of 3,000 rails for thirty bushels of wheat — then the only legal tender. He had to travel a mile through fern high as his head, and his food was mush, without salt or seasoning. The first day he split fifteen rails. They had a tough time — the early settlers of Oregon.

The people of Sonoma County are vigorously canvassing the merits of the two proposed railroad routes between Russian River Valley and San Francisco. Both routes start from Healdsburg — one coming by way of Petaluma, the other by way of Vallejo. The county is authorized to aid one route to the extent of $5,000 per mile, and the voters are to decide which one. Hence the spirited campaign now going on.

There is hardly a homestead in California which would not be improved by setting out shade trees, and shubbery. Horace Greeley used quaintly to say, that the daughters of farmers who had their houses surrounded by trees, and their orchards abounding with fruits, would much more readily get good husbands. Certain it is that he who plants a tree, erects to his memory a monument for years to come.

The *Call* aptly says that there have been two eras of emigration to California — one the "golden era," and the other "the agricultural era." The former extended from 1849 to 1853. It gave wealth to other lands, but left our own poor. The latter era is now in progress, and instead of leading to waste and ruin, will strengthen and elevate our people.

The steamers *Sacramento* and *Nebraska*, which left on Tuesday and Wednesday for Panama, were both filled with cabin passengers. The unusually low fares of the present season account for two-thirds of the travel to the Atlantic States. Probably five-sixths of those now leaving will return within twelve months.

The tannery at Corvallis, Oregon, is furnishing this market with some extra qualities of leather, and the Santa Cruz leather has for several years commanded the highest prices. There is no reason why Eastern leather, like Eastern butter, should not be driven from the Pacific Coast.

Henry Comstock, who came from Mexico to California in 1853, and discovered the far-famed Comstock lode in January, 1859, is now "exploitering" in Montana. He discovered the lead at Virginia by noticing "the queer-looking dirt in a gopher-hole."

Humboldt Bay, 228 miles above San Francisco, is a fine locality for ship-building, especially for the small class of vessels needed so much on this coast for local traffic. Within ten years it will grow into an important business.

The fine weather of the latter part of this week has given fresh vigor to business in this city, and pleasant faces to the gardeners, fruit-raisers, milk-carriers, and men-of-leisure in the suburbs.

It is stated that there are more papers published in San Francisco with its 125,000 inhabitants, than there are in London, with its three million souls. Our city abounds with newspapers.

The corner-stone of the Young Men's Christian Association building will be laid to-day, on Sutter Street. Address by George Barstow, and oration by Rev. A. L. Stone, D.D.

No less than five California papers have changed proprietorship this month. The latest we notice are the Healdsburg *Standard* and the Red Bluff *Independent*.

The steamer for Alaska this week took Company G. Second U. S. Artillery, Lieut. Huggins, which is to occupy a new post on the island of Kodiak.

The Cornell University of New York has offered $15,000 for the collections of shells which have been made by Dr. W. Newcomb, of Oakland.

Signor Farini and Mark Twain have been occupying Platt's Hall this week. Both have marked ability in their respective callings.

Instances of insanity and attempts at suicide continue to be frequent in this city. Most of the persons affected are new-comers.

Flint, Bixby & Co., of Monterey County, Cal., have a flock of 75,000 sheep, and a pasturage range of 200,000 acres.

Thirty-seven deaths occurred in this city last week, against forty-one in the corresponding week of last year.

A valuable mine of iron ore is said to have been discovered five miles from St. Helena in Napa County.

In 1852, the cost of living in California was $3 per day. Now it ranges from sixty cents to a dollar.

The rain-fall in this city has now almost reached thirty-nine inches.

The State election in Oregon takes place the first Monday of June.

TELEGRAPHIC SUMMARY.

Eastern.—Three women were killed, and others injured at the Catholic Cathedral in Chicago, from an accident occasioned by a fire alarm....The Indians are dying of starvation on the Plains....Indian troubles have broken out in Florida....The New York Democrats disavow any interest in the Presidential impeachment, save a fair and impartial trial....Gen. Halleck is *not* ordered to the East.

Congressional.—The Impeachment trial drags its slow length along. Gen. Thomas has undergone an examination, and Gen. Sherman has been upon the stand without any important evidence being elicited....The Senate will limit the time of arguments of the counsel after the close of the examination....Mr. Washburne continues to stultify himself on the Alaska question, by practically denying his former statements.

Foreign.—Frenchmen at Paris are seeking American citizenship to escape military service....Quiet prevails in England, both Liberals and Tories awaiting the "progress of events in Abyssinia and Ireland."....Cassius M. Clay has resigned his post as Minister at Russia. There are unfavorable reports of his conduct.

WEEKLY MARKET REPORT.

San Francisco Cattle Market.

Wednesday, April 15, 1868.

There are no features of special interest to report. Quotations are essentially the same as last week.

We quote slaughterers' prices as follows:

Beef—American, 1st quality, 10@10½c ℔ lb.
do 2d do 7@9c ℔ lb.
Veal—Ordinary to choice, 8@12c ℔ lb.
Mutton—Easy at 6@7c ℔ lb.
Lamb—More plentiful at 9@10c ℔ lb.
Pork—Undressed, grain fed, 7@8c; dressed, medium range, 9@11½c ℔ lb.

Produce Market.

Flour—The steamer *Nebraska*, for Panama, this morning, carried away 4,000 bbls in transit for New York. Sale of 1,000 bbls Albany (Oregon) Extra, private, but understood to be a little off from the ruling rates. We quote best descriptions of Oregon Extra at $7 37½@7 25, and city brands of California as follows:

Superfine, hf sks, ℔ 196 lbs	$6	62½@6 87½
qr sks	6	87½@7 12½
Extra, hf sks	7	37½@7 62½
qr sks	7	62½@7 87½

Wheat—Market quiet. Sales include 712 sks Oregon white, $2 45; 500 sks do, $2 47½. We quote fair to good shipping at $2 40@2 45, and prime milling at $1 50. At the close, 2,400 sks choice, in two lots, $2 50 ℔ 100 lbs.

Barley—Very little demand. The nominal rates are $1 90@1 95 for light to good feed, and $2 ℔ 100 lbs for brewing. At the close, 1,000 sks brewing, in lots, $2 ℔ 100 lbs.

Oats—Sale of 240 sks light, $2 50. The nominal range of the market is $2 50@$2 70 ℔ 100 lbs.

Potatoes—Choice descriptions are in demand at $1 30@$1 50 ℔ 100 lbs, weak at the outside figure; second quality dull at nominal quotations.

Corn—Quotations are as follows: Red, $2 25; pale Yellow, $2 30; deep Yellow, $2 35@2 40; and White, $2 50 ℔ 100 lbs.

Rye—Nominal at $2@$2 05 ℔ 100 lbs.

Buckwheat—Dull and nominal at $1 75@2 ℔ 100 lbs.

Onions—Stock moderate; jobbing at 5½@6½c ℔ lb.

Beans—Sale of 200 sks small White, private. Quotations are as follows: Bayo, 3¼c; Butter, 4⅜@4½c; Pea, 5¼@5½c; small White, 5@5½c; Pink, 2½@2¾c; and Red, 2⅜@2½c ℔ lb.

Bran—The price has been advanced to $32 50 ℔ t with orders in advance of supply.

Middlings—We quote fine steady at $50, and feed d criptions at $35@40 ℔ ton.

Oil Cake Meal—The mill price remains at $30 ℔ ton

Hay—Sales of about 70 tons fair to good within the ran of $17@$24 ℔ ton.

Dairy Products—Are in active demand Fresh r Butter is quoted at 30@32½c, the latter figure for very choi California firkin Butter, 31@32½c for store and ranch-packe Cheese, 16@17c ℔ lb; Eggs, 32@34c ℔ doz.

Poultry—Under limited supplies, prices have advanc to high figures. This scarcity is supposed to be only tem rary; hence, lower rates may soon be expected. Live T keys are to-day quoted at 19@21c, and dressed do at 22@2 ℔ lb. Hens and Roosters, $7 50@8; Spring Chickens, f grown, $7 50@8 50; Broilers, $5@6; Ducks are less sal ble at $5 50@6 50 ℔ doz; Geese are dull at $2 25@3 75 pair.

Provisions—Cured Meats are generally quiet. Calif nia-smoked Bacon commands 15½@16c; Oregon do, 13 14c; California Hams, 17@18c; Oregon do, 16@17c; La 14@15c for California, and 13½@14½c ℔ lb for Eastern.

Wool—The receipts continue moderate. Some of t lots of spring which have thus far come forward are of e cellent quality, while other lots have been excessively dirt The last named descriptions are generally credited to se tions of the State where, from copious showers on low land the mud has been too widespread to be avoided by the shee The market for spring clip has not fairly opened. Owing limited supplies, dealers do not care to press, nor are buye anxious to operate; nevertheless, exporters are steadily pic ing up available lots of clean shipping grades of spring 16@16½c. There is no fall clip offering; last quotatio were 11@12c for best grades. Sales since last Wednesd (not before reported) aggregate about 61,000 lbs, spring ar fall at current rates.

Hides—The demand is is light and receipts moderat About 200 Mexican dry, just at hand by the steamer, realiz 13c. The range for this description is 12@13½c. Sales California dry since last Wednesday aggregate 790, usual s lection, at 14@14½c ℔ lb, tha market closing weak at the ou side figure.

Tallow—Continues in fair demand at 7¼@7¾c ℔ lb, f ordinary to choice Beef and Mutton.

Current Topics.

The Joint Committee of the two Assemblies to consider and report a basis for union between the Old School and New School branches of the Church met in Philadelphia last month. Some manifest changes had been effected in the feeling of the committee, and of the Church at large, since their report last May. Still it was doubtful whether they could agree upon a basis that all would accept. They conferred together for two days before they reached a satisfactory position, and the doctrinal points furnished the most serious occasion for debate, all claiming to be orthodox, while the N. S. members insisted that "liberty" be allowed them, so far as the illustration of their views and the methods of their working may be concerned. On the third day they devised a mode of settling the whole question through a proposition of Dr. Gurley, of Washington, that while the recognized standards of the Church should be held in their integrity and in "their fair historical—that is, the Reformed or Calvinistic sense," full liberty be granted to both sides in "explaining and illustrating" those doctrines of the Gospel. This proposition was adopted *unanimously*, and all felt that there could be no other serious bar to union. Then discussion closed, and all gave themselves up to the tide of feeling that could hardly be restrained in the circumstances. Prayer was uttered in the midst of weeping, and thanksgiving was universal, and the meeting was closed by all standing, joining hands, and singing the doxology,

"Praise God, from whom all blessings flow."

We trust the result in the Committee may be prophetic of what will be witnessed in the Assemblies, and we cannot doubt that the spirit there manifested will prevail in the Church.

Can any one tell why the impression is so universal that editors and ministers of the Gospel are under obligation to keep a free intelligence office? It has seemed to us for some time that we shall be compelled to have an assistant for this department of our business, and, should it increase in the present ratio, he will have no leisure. We are disposed to do all in our power for the information of those who make reasonable demands of us, but really we receive some letters that test our good nature no less than they tax our patience. Neither editors nor ministers are omniscient or omnipresent—nor have they nothing to do but to write letters to save those who wish them to do this a little trouble and a few shillings. By the way, we received one letter of the scores lately sent us with inquiries, to which we call attention as a remarkable exception. It had in it a postage stamp for the answer! We do not remember another instance of the kind for months past.

Nothing is more hopeful, as bearing on the future, than the increasing interest manifested in all parts of the world respecting the education and welfare of children. In France while no public school system exists, there have been recently formed such schools for the poor, in addition to those before supported, as must greatly change the condition of the next generation. In Spain a remarkable advance has been made within the past year in popular education. In England the long-continued oppression of children employed in the manufactories has been brought to an end by a law that went into effect last January, by which they are released from such long terms of work each day, and their employers are obliged to furnish them means of instruction a certain number of hours each week. In China a new interest is felt respecting schools of such character that the pupils may gain a knowledge of science and art as known in other parts of the world. In Japan this interest has been more marked, and large quantities of books have been sent there from this country for use in their schools. In our own land, the purpose to care for the children, those of the vicious and degraded, as well as those of the better classes, the black and the white, the native and the foreign, by public schools, and industrial schools, and schools supported by benevolent contributions, and Sunday Schools, has been more general and effective since the war than ever before. No one can know these facts without a conviction that they speak with mighty emphasis respecting the time to come. They are lifting the pall of darkness from a multitude of minds, and beginning to roll it back. Such increase of light and knowledge never fails to produce blessed results.

The work of reconciliation between the whites and blacks in the South seems to be making but little progress. The reason for this is undoubtedly to be found in the unsettled condition of national politics. Each party in the South, with its sympathizers in the North, expects great advantages from the success of its own theory of reconstruction in the coming Presidential election, and when the result of that contest shall have been settled, the work of reconciliation which for months has been at a stand-still, will take a fresh start. It is possible that on both sides too much is expected from national legislation. Neither the success of any political party nor any political measure which may be adopted at Washington, can of itself complete the work of reconstructing Southern society. It is the duty of Congress to protect all classes in their rights; but the work of actual reconstruction must be performed by the parties themselves. They must learn to regard their interests as identical, and to work together for the furtherance of those interests. There is perhaps a disposition on our part to throw too much blame on either the freedmen or the whites at the South for the bad feeling which exists between them, while neither are worthy of unqualfied blame. The blacks have very few wants and those easily supplied without continual labor, and their highest idea of freedom is undoubtedly to work when they choose. Their elevation must come by time and by the growth of artificial wants. Neither is it strange that the whites should not immediately look with favor on the new order of things. Let us hope for a future change in some of the ideas of both classes.

The desire of the Cornell University to get possession of a collection of shells now owned in California, is evidence enough that we should not permit it to be removed from us, if it can be retained for any fair sum. Dr. Newcomb has been engaged for years in gathering his specimens, and has arranged them with great care and skill, so that conchologists agree that the collection is of uncommon value, and we learn that he prefers to dispose of it to some institution in this State. There is no opportunity for our new University to obtain it until the Board of Regents shall be appointed, but we would suggest that a number of gentlemen become security for its reasonable value if there is need of immediate action, and that then either the University, or the City College, or some other College, purchase of them. There could be little risk in doing this, since there would be no other source of supply for the demand in this direction, and the demand increases with the increase of Colleges. An exorbitant price should be the only reason why an Eastern University should take such a collection from us at this time.

A remarkable decision has been made by the Court of Appeals in Kentucky, to the effect that men regularly chosen as Ruling Elders in the Presbyterian Church are not officers of the Church—annulling their election. Verily, we have fallen upon strange times if our civil Courts are to pass action on purely ecclesiastical affairs, and set up one and put down another in our churches, at their pleasure. The decision is wholly at variance with those of Courts in other States, and if it abides, it takes away the foundation of all church organizations. A worse form of Church-and-State arrangement it would be difficult to conceive, and this is not the country for a very successful experiment in that direction.
